**2. Experiment and Culture.**—*The Existing Fisheries.* In many respects the fishing industry is capable of modification and development. A good deal has been effected by the State Governments in the way of experiment and culture. A uniform policy of development for Australia is desirable, and recommendations have been made that the Fisheries Departments of the various States should co-operate with the Federal Government with a view to increasing the productiveness of the Commonwealth waters; and that uniform fisheries laws should be adopted by adjacent States.

All live fish arriving in Australia are examined on shipboard in order to prevent the importation of undesirable fish.

With the object of ascertaining something of the movements of oceanic fishes, as well as of those estuarine fishes which make periodical oceanic migrations, reports are furnished regarding the various kinds of fishes, etc., observed travelling along the coast, as well as the quantity and size of fish seen. Some very useful information has in this way been obtained.

Fuller details regarding the activities of the States in fish-culture are given in Official Year Book No. 6, pp. 471–2.

By arrangement with the Commonwealth Fisheries Department, members of the staff of the Australian Museum, Sydney, accompany the F.I.S. "*Endeavour*" on various cruises. Specimens are collected, mounted for scientific purposes, and distributed to other Australian Museums, a considerable number being put aside for the Commonwealth Fishery Museum.

## § 5. The Commonwealth Department of Fisheries.

**1. The Federal Council of Australasia.**—The Federal Council had power to legislate with regard to fisheries in Australasian waters beyond territorial limits. In its second session (opened 16th January, 1888), an Act was passed to regulate pearlshell and bêche-de-mer fisheries in Australasian waters adjacent to Queensland; and in the third session, opened shortly afterwards, the Act was made applicable to Western Australia. Upon the passing of the Commonwealth Constitution Act of 1900, however, the Federal Council ceased to exist.

**2. Commonwealth Investigations.**—In 1907 the Commonwealth Government decided to demonstrate what might be attained commercially by the application of modern methods and experiences. A Federal Investigation Ship, the *Endeavour*, was constructed specially for the work, and a Director of Fisheries was appointed. Cruises and experiments were immediately instituted. These shew that the Commonwealth possesses an asset of considerable value in her sea fisheries. The scope and results of the inquiries are set out in the Director's reports, and are summarised below.

**3. Scope of the Inquiry.**—The immediate scope laid down for the investigation was, shortly, as follows:—

- (i.) By various means of capture to ascertain what marketable food-fishes may be found in ocean waters adjacent to Australia.
- (ii.) In what quantity they may be taken.
- (iii.) To what extent they migrate, and where.
- (iv.) How they may be conveniently and economically captured.
- (v.) By systematic survey to find out and chart suitable fishing grounds.

In addition to the work which is being thus carried on in the various recognised methods of capture (including long-line and drift-net fishing, etc.), survey, hydrographic work, etc., is conducted, for the purpose of ascertaining the nature of the bottom, depth of water, currents, and sea temperature.

4. **The F.F.S. "Endeavour."**—The construction of the investigation vessel was undertaken in the Commonwealth, and was upon the lines shewn by the most recent European experience to be of greatest advantage, with necessary modifications to suit the Australian climate. A description of the vessel, which was the first Commonwealth owned sea-going ship, is given in Official Year Book No. 6, p. 473. Up to the end of 1913, 85 cruises had been made in eastern and southern waters.

5. **Results.**—The object of the investigations is to shew how and where food-fish may be obtained in quantity, rather than to bring large catches into port. Moreover, in untested areas, sounding and survey work generally become a main feature. Experiments with drift nets and long lines have given promising results. Trawling has been the principal method tried. By this means the fish are disturbed by a large bag-shaped net drawn along the sea bottom, and they are caught and retained in a trap arrangement at the tail-end of the net. Prior to 1912 the trials were limited to waters of not more than 100 fathoms in depth. During 1912 and 1913 the work was, in several localities, extended to a depth of 250 fathoms, and shewed that excellent catches could be obtained. In many cases, the greater size and superior quality of the catches obtained in deep waters made the freights, commercially, much more valuable than those obtained in shallow areas. A typical instance is the rockling, which in coastal waters is uncommon and small, but abundant at depths between 150 and 200 fathoms, and with an average weight of nearly ten pounds. The cruises have shewn that both suitable and unsuitable trawling grounds were met with in all parts, and that not all suitable grounds are rich in fish life. The richest grounds were found in localities where a reversal of currents or eddies facilitates the accumulation of fish food. Good catches are nearly always obtained along the "edge of the bank" at a depth varying from 50 to 120 fathoms. The "Endeavour" has so far located approximately 10,000 square miles of trawlable ground carrying fish in paying quantities, and within reasonable distance of the principal cities. The results have attracted a considerable amount of attention, particularly in Great Britain.

In conjunction with the survey work, investigations were undertaken regarding the deep water currents and their relation to the abundance of fish food and migrations. Bottom samples have been obtained from various depths down to 1200 fathoms, and water samples and temperatures from intermediate depths. Plankton collections from the surface have also been obtained, particularly to ascertain the distribution of pelagic fish eggs.

A varied and scientifically interesting collection of rare fishes, invertebrates, etc., has also been obtained. The specimens have been classified and mounted by naturalists in various parts of the Commonwealth.

Reports on the hydrographic, survey, and scientific departments of the vessel's activity are being prepared. At the end of 1911, part I. of the zoological results of the fishing experiments of the *Endeavour* was published; parts II. and III. followed in 1912. In 1914, a second volume was begun. These embody reports on the fishes, mollusca, sponges and hydroids obtained during the cruises. A number of new species has been discovered, and scientifically examined.

6. **Treatment and Disposal of the Catch.**—It was decided that the wisest method of disposing of the fish was to distribute them to recognised charitable institutions. Clashing with the established industry was thus avoided, and upwards of one hundred charities have benefited.

Upon capture, the prompt gutting and washing of the fish is performed. The necessary records are taken regarding the number, size, food, etc. They are then dried, and stowed in the cool chamber.

Unmarketable fish constitute a considerable proportion of the catch. Experience elsewhere has shewn that fish for which there is no sale for consumption, have a considerable value as material for rich fertilisers, and for the extraction of oil. For both these by-products there is a good oversea market.

The inadequacy of the present supply of fish in Australia is universally admitted, yet all reports agree that there is, on the coast, a bountiful supply of fish. It is not, as in Great Britain and the northern countries of Europe, a popular article of diet, but is rather in the nature of a luxury. While the value of fish consumed in Norway is nearly 20s., and in Holland, Denmark, and the United Kingdom 5s. per head of population, in Australia it is little over 1s. 6d. Moreover, in the European countries named, notwithstanding the fact that the trawlers have generally to go much further afield for their catches, a shilling's worth of fish represents a much larger quantity than could be obtained for the same amount in the Commonwealth, where the wealth of the coastal waters indicates that, with satisfactory handling, the product of the sea would become an article of food for the poorest classes, and a valuable industry would be developed. The uncertainties and limitations of the market, caused by the irregularity of the supply, will be overcome when the fact is recognised that the ocean product, properly exploited, is adequate to supply the demand, however strong. Under present conditions, it is not surprising that Australians are not great fish-eaters. The quantity of fish consumed annually per head in Great Britain is 42 lbs.; in Australia it is only 9 lbs. As a result of the *Endeavour's* experiments, definite steps are being taken to carry out well-considered schemes, which it is hoped will awaken enterprise, and revolutionise the unsatisfactory conditions of the Australian fish trade.

### § 6. Fish Preserving.

Bounties have been provided by the Federal Government for fish preserving, the rate payable being  $\frac{1}{2}$ d. per lb. The amounts paid were £27 in 1907-8; £1727 in 1908-9; £311 in 1909-10; £115 in 1910-11; £168 in 1911-12; and £103 in 1912-13. An amount is available for 1913-14. It is anticipated that the bounties, together with the increased yield that may be expected to result from the fisheries investigations now being conducted, will lead to a considerable output and consumption of locally preserved fish. The abundance of fish in Australian waters offers excellent opportunities for the institution of preserving establishments, particularly in those coastal districts which enjoy a temperate climate. Up to the present but little development has taken place, and the establishments for fish preserving at the present time are very few.

## SECTION XII.

## MINES AND MINING.

## § 1. The Mineral Wealth of Australia.

1. **Place of Mining in Australian Development.**—The value of production from the mineral industry is now considerably less than that returned by the agricultural or the pastoral industry, nevertheless it was the discovery of gold in payable quantities that first attracted population to Australia, and thus laid the foundation of its nationhood. Prior to 1851, the year when Hargraves' memorable discovery was made, coal and copper had both been mined to some extent, and the existence of deposits of other minerals, including gold, had been proved. But it was the news of the sensational finds of the precious metal in 1851 and the year immediately following that brought about a constant stream of immigration, and caused an increase in population from 221,000 at the end of 1841 to upwards of 1,168,000 at the end of 1861.

2. **Extent of Mineral Wealth.**—The large production of gold, silver, copper, and tin, the extent of the coal deposits, the presence of large quantities of iron ore, and the great variety of minerals found in appreciable quantities, suggest that the future history of mining will, in all probability, be even more remarkable than that of the past. For the extent of the total mineral wealth of Australia cannot yet be regarded as well ascertained, since the mineral exploration of the country is, after all, still in its infancy. The presence of considerable deposits of valuable minerals has long been known. Thus, coal was discovered in 1797, and a shipload was exported to Bengal in 1799; silver was discovered by Count Strzelecki as early as 1839, and was worked as early as 1864; copper mining dates back to 1844; lead to about 1848; iron to about 1850; while the discovery of gold in payable quantities dates back to 1851. Cobalt, nickel, manganese, chromium, tungsten, molybdenum, mercury, antimony, bismuth, zinc, radio-active ores, etc., have all been found, some in fairly large quantities.

Among the more valuable non-metalliferous substances may be mentioned coke, kerosene shale, graphite, alunite, asbestos, diatomaceous earth, clays, ochres, etc.; in building stones, sandstones, syenites, granites, basalts, augite-andesite, porphyries, serpentines, slates, limestones, and marbles; in precious stones, diamonds, emeralds, rubies, sapphires, amethysts, precious opal, turquoise, topazes, garnets, chrysolites, cairngorm, agates, etc. In general it may be said that the variety of Australian mineral wealth is very great.

3. **Value of Production during 1912.**—Compared with the returns for 1911 the total mineral production of the Commonwealth shews an increase in 1912 of over £2,149,000. The largest advance is exhibited in the figures for New South Wales, where the total was over £1,821,000 in excess of that for the preceding year. In Queensland the increase amounted to £516,617. South Australia and Tasmania also shewed increases amounting to £147,000 and £144,000 respectively. The improvement in the States mentioned was, however, counterbalanced by more or less heavy decreases in the remaining States, the return for Western Australia shewing a falling-off amounting to about £346,000, while there was a decline in the Victorian yield to the extent of £133,000. In Victoria the decline is attributed to the falling-off in the gold yield, due to diminished returns from the lode mines at Ballarat, Scarsdale and Berringa, and the deep alluvial workings at Rutherglen and Ararat. In Western Australia, the gold yield shewed a falling-off of £375,000, through diminished returns, principally from the Mt. Margaret fields.

The decline in the gold yield for the Commonwealth amounted to about £672,000, South Australia and Tasmania alone shewing an increased output over the total for the preceding year.

The comparative value of the production of minerals raised in each State during 1912 is given in the following table:—

COMMONWEALTH MINERAL PRODUCTION IN 1912.

| Minerals.             | N.S.W.     | Victoria. | Q'land.   | S.A.    | W.A.      | Tas.      | N.T.   | C'wealth.  |

| Unenumerated ...      | 8,309      | 659       | 2,535     | 6,550   | 5,711     | *5,742    | ...    | 29,506     |
| Total ...             | 11,226,602 | 2,331,294 | 4,175,355 | 584,458 | 5,760,207 | 1,493,502 | 57,820 | 25,629,238 |

\* Osmiridium.

It may be pointed out in connection with the figures given in the above table that the totals are exclusive of returns relating to certain commodities, such as stone for building and industrial uses, sand, gravel, brick clays, lime, cement, and slates, which might rightly be included under the generic term "mineral." Valuations of the production of some of these may be obtained from the reports of the various Mines Departments, but in regard to others it is impossible to obtain adequate information. In some instances, moreover, the published information is of little value. Thus, the New South Wales Mines Report supplies the value of exports only in connection with building stone, and it is obvious that such figures are of little value as regards production, while the Victorian figures are incomplete. It has therefore been considered advisable to discard both totals. By restricting the comparison to items in connection with which properly comparable information can be obtained for each State, it is believed that a satisfactory estimate of the progress of the mineral industry can be more readily obtained. The items excluded from the total for New South Wales in 1912 consist of—lime, £44,478; marble, £1340; Portland cement, £368,280; building stone, £559; and grindstones, £176. The South Australian figures are exclusive of—chalk, £600, and flint pebbles, £420.

4. Total Production to end of 1912.—In the next table will be found the estimated value of the total mineral production in each State up to the end of 1912. The figures given in this table are also exclusive of the same items referred to in connection with the preceding table. Thus the total for New South Wales falls short by £2,146,000 of that published by the State Department of Mines, the principal items excluded being cement, £1,839,700, lime £278,000, and building stone, £21,176.

## COMMONWEALTH MINERAL PRODUCTION TO END OF 1912.

The "other" minerals in New South Wales include antimony, £305,224; bismuth; £128,537; chrome, £101,468; coke, £2,138,667; diamonds, £120,408; iron, £2,113,786; opal, £1,350,207; oil shale, £2,322,831; wolfram, £132,517; and zinc, £7,539,913. In the Victorian returns antimony ore was responsible for £224,712. Included in "other" in the Queensland production were opal, £172,195; gems, other, £226,202; bismuth and wolfram, £846,674; antimony ore, £50,953; manganese, £64,709; limestone flux, £279,398; and ironstone flux, £202,776. The chief item in South Australian "other" minerals was salt, £815,381. In the Tasmanian returns limestone flux was responsible for nearly £100,000, and iron ore for about £26,000.

It will be convenient in the succeeding pages to deal first with gold and the various metals, then with non-metallic minerals and precious stones, and finally to furnish some account of the extent of employment in mining generally.

## (A) METALS.

## § 2. Gold.

1. **Discovery of Gold in Various States.**—The discovery of gold in payable quantities was an epoch-making event in Australian history, for, as one writer aptly phrases it, this event "precipitated Australia into nationhood." A more or less detailed account of the finding of gold in the various States appears under this section in Official Year Books Nos. 1 to 4, but considerations of space preclude the insertion of this matter in the present issue.

2. **Production of Gold at Various Periods.**—In the table hereunder will be found the value of the gold raised each year in the several States and in the Commonwealth from the dates when payable discoveries were first reported. Owing to defective information in the earlier years the figures fall considerably short of the actual totals, for during the first stages of mining development large quantities of gold were taken out of Australia by successful diggers, who preferred to keep the amount of their wealth secret. For South Australia the records in the earlier years are somewhat irregular, and the remark applies to some extent also to the returns for Western Australia and Tasmania.

In New South Wales the yield for 1912 was much below the average, the output being the lowest recorded since 1902. The decreased yield is in large measure due to the circumstance that the demand for miners in other branches of the industry, coupled with the steady employment obtainable in other pursuits, has led to a slackening of operations at small claims and a neglect of prospecting. In Victoria the decrease was mainly due to the falling-off in the returns from the deep alluvial mines at Rutherglen and Ararat, and the quartz lodes at Ballarat, Scarsdale and Berringa. The deficiency in Queensland was due to the reduced returns from some of the chief centres such as Charters Towers, Gympie, and Rockhampton. More than half the fall in the gold production of Western Australia is attributable to a decline in the yield for the Mount Margaret field. There were decreases also in the East Coolgardie, Murchison, North and North East Coolgardie, Dundas, East Murchison, Phillips River and Ashburton fields. An improvement was shewn in other fields, particularly at Yilgarn, where the yield was the highest for many years.

## VALUE OF GOLD RAISED IN AUSTRALIA, 1851. to 1912.

The amount of gold raised in the Commonwealth in any one year attained its maximum in 1903, in which year Western Australia also reached its highest point. For the other States of the Commonwealth the years in which the greatest yields were obtained, were as follows:—New South Wales, 1852; Victoria, 1857; Queensland, 1900; South Australia, 1904, and Tasmania, 1899.

The following table shews the quantity in fine ounces of gold raised in each State and in the Commonwealth during each of the last ten years, the value of one ounce fine being £4 4s. 11½d.:—

## QUANTITY OF GOLD PRODUCED IN THE COMMONWEALTH, 1903 to 1912.

3. **Changes in Relative Positions of States as Gold Producers.**—A glance at the figures in the table shewing the value of gold raised will sufficiently explain the enormous increase in the population of Victoria during the period 1851 to 1861, when an average of over 40,000 persons reached the State each year. With the exception of the year 1889, when its output was surpassed by that of Queensland, Victoria maintained its position as the chief gold-producer for a period of forty-seven years, or up to 1898, when its production was outstripped by that of Western Australia, the latter State from this year onward contributing practically half the entire yield of the Commonwealth. New South Wales occupied the second place on the list until 1874, when Queensland returns exceeded those of the parent State, a condition of things that has been maintained ever since. South Australia has occupied the position of lowest contributor to the total gold yield of the Commonwealth since the year 1871. Taking the average of the last ten years, the relative position of each State in regard to the gold production of the Commonwealth was as follows:—

## RELATIVE POSITION OF STATES AS GOLD PRODUCERS, 1903 to 1912.

| State.            | Annual Average of Gold Production, 1903 to 1912. | Percentage on Commonwealth. | State.           | Annual Average of Gold Production, 1903 to 1912. | Percentage on Commonwealth. |
|-------------------|--|-----------------------------|------------------|--|-----------------------------|

4. **Methods of Gold Mining adopted in Each State.**—The circumstances of gold mining in the various States are not quite identical, for which reason reference is made to that of each State.

(i.) *New South Wales.* In New South Wales the earlier "rushes" were to surface alluvial or shallow-sinking grounds. Many of these were apparently soon worked out, but there is reason to believe that in some instances payable results would be obtained by treating the rejected wash-dirt on more scientific principles. With the exhaustion of the surface deposits discoveries were made by sinking to what are called deep alluvial leads, representing the beds of old drainage channels in Pliocene and Pleistocene times. The first of these deep alluvial leads was discovered at Forbes, in New South Wales in 1862. The Tertiary deep leads at Gulgong were discovered in 1871. Cretaceous leads occur at Tibooburra, and detrital gold has been found in permo-carboniferous conglomerates at Talawang. The method of dredging is at present being extensively used for winning gold from the beds of running streams, and from loose river flats and other wet ground where sinking would be impracticable. The system was introduced from New Zealand, where it was originally applied with great success on the Clutha River, and there are now dredges working on practically all the auriferous rivers of New South Wales. Hydraulic sluicing

is also employed in several places, the necessary machinery being fitted to a pontoon for convenience in moving from place to place. The quantity of alluvial gold obtained, other than by dredging, amounted to 6987 ozs. in 1912, the chief yields being—Braidwood, 1036 ozs.; Orange 637 ozs.; Windeyer, 500 ozs.; and Hill End 296 ozs. The quantity obtained by dredging was 20,649 ozs.; the largest returns being obtained at Araluen, 7950 ozs.; Stuart Town 2609 ozs.; Gundagai, 2178 ozs.; Adelong, 1527 ozs., and Nundle, 1297 ozs. The dredges in operation during 1912 numbered 67, of which 21 were of the bucket type and 46 were suction plants. In the recovery of gold 17 bucket dredges and 11 pumping plants were employed, while four bucket dredges and 35 pumping plants were engaged in the winning of stream tin. The value of the plants in operation was estimated at £355,096. The quantity of gold won from quartz amounted to 135,638 ozs. At the present time the Cobar district is the chief centre of the production from quartz, the yields from the Cobar and Canbelego fields included therein being respectively 51,175 ozs. and 17,305 ozs. Next come the Wellington field with 11,714 ozs.; Adelong, 7884 ozs.; Hillgrove, 6500 ozs.; Wyalong, 5882 ozs.; and Murrumburrah, 5863 ozs.

The table below shews as far as can be ascertained the yield from alluvial and quartz mining in each of the principal districts during 1912. Owing to the circumstance that it was impossible to obtain complete returns from the whole of the mine and battery owners the total for the State necessarily falls short of that given in preceding pages.

#### GOLD WON IN NEW SOUTH WALES, ALLUVIAL AND QUARTZ, 1912.

| Total ... ..                 | 7,047                         | 20,649          | 135,638 | 163,334 |

(ii.) *Victoria.* Quartz-reefing predominates in Victoria, although a considerable amount of gold is obtained from alluvial workings, both surface and deep leads. The deepest mines in Australia are found in the Bendigo district, where the two deepest shafts were at the 31st December, 1912, 4614 and 4318 feet deep respectively. Altogether there were at the close of 1912 no less than fifty-three shafts in this district which had reached a depth of over 2000 feet. A considerable amount of attention is given to dredging and hydraulic sluicing, particularly in the Beechworth, Maryborough, Castlemaine, Ararat, Stawell, and Ballarat districts, the number of plants in operation at the end of 1912 being 93. The total quantity of gold won from dredge mining in 1912 was 73,214 ounces, and from sluicing 567 ounces, the total area treated being 672 acres. Tin to the value 2624 was also won. The yields from alluvial workings and quartz reefs as returned (in crude ounces) from the chief mining districts of the State during last year were as follows:—

## GOLD WON IN VICTORIA, ALLUVIAL AND QUARTZ, 1912.

| District.          |     |     |     | Alluvial. | Quartz. | Total.  |
|--------------------|-----|-----|-----|-----------|---------|---------|
|                    |     |     |     | ozs.      | ozs.    | ozs.    |
| Ararat and Stawell | ... | ... | ... | 11,438    | 8,104   | 19,542  |
| Ballarat           | ... | ... | ... | 11,034    | 53,315  | 64,349  |
| Beechworth         | ... | ... | ... | 70,493    | 15,252  | 85,745  |
| Bendigo            | ... | ... | ... | 2,812     | 169,204 | 172,016 |
| Castlemaine        | ... | ... | ... | 11,268    | 61,278  | 72,546  |
| Gippsland          | ... | ... | ... | 6,497     | 16,418  | 22,915  |
| Maryborough        | ... | ... | ... | 42,486    | 25,720  | 68,206  |
| Total              | ... | ... | ... | 156,028   | 349,291 | 505,319 |

The largest output from lode mines in 1912 was furnished by the Central Red, White and Blue, at Bendigo, with 13,650 ozs.; followed by the Lord Nelson, St. Arnaud, with 13,146 ozs.; the North Nuggetty Ajax, Daylesford, with 11,474 ozs.; and the Johnson's Reef, Bendigo, with 9962 ozs. Of the deep alluvial mines the Great Southern at Rutherglen produced 11,332, and the Duke and Main Leads Consols, at Maryborough, 9951 ozs. In dredging, the Tewkesbury Amalgamated, at Bright, headed the list with a return of 4438 ozs.

(iii.) *Queensland.* Operations in Queensland are at present chiefly confined to quartz reefing, the yield from alluvial in 1912 being only 3830 ounces, of which 1274 ozs. were won at the Batavia River field, while the quantity produced from quartz was 207,939 ounces; from copper and other ores 130,931 ounces; and from old tailings 5246 ounces; making a total production of 347,946 ounces, valued at £1,477,979. The yields from the principal fields are given below:—

## GOLD WON IN QUEENSLAND, ALLUVIAL AND QUARTZ, 1912.

| District.                   |     |     |     | Alluvial. | Quartz.   | From Copper and other Ores and old Tailings. | Total.    |

| Total                       | ... | ... | ... | 3,830     | 207,939   | 136,177                                      | 347,946   |

(iv.) *South Australia.* In South Australia alluvial gold has been worked for many years in the gullies round Adelaide, while a fair amount of gold has been obtained by this method at Teetulpa, in the northern areas. The battery and cyanide returns as published in the "Mining Review" shew that the chief producing centres in 1912 were Tarcoola and Tarcoola Blocks, Deloraine, Kirkeek's Treasure, Nillinghoo, Kitticoola, Reedy Creek, and Mt. Grainger.

The total output of gold for 1912 from the Northern Territory amounted to 7811 ounces, valued at £22,671.

(v.) *Western Australia.* In Western Australia operations are confined principally to quartz reefing, the returns from ordinary alluvial and hydraulic sluicing being comparatively small. The total production of gold from all sources during 1912 was 1,282,658 ounces, of which only about 0.3 per cent. was alluvial. The yields in each district were as shewn below :—

### GOLD WON IN WESTERN AUSTRALIA, ALLUVIAL AND QUARTZ, 1912.

| Kimberley ... ..             | 272       | ...                    | ...       | 272       |
| Other goldfields ... ..      | 7         | ...                    | 240       | 247       |
| Total ... ..                 | 4,317     | 8,958                  | 1,254,570 | 1,267,845 |

The figures in the above table are compiled from returns from the individual mines and are somewhat incomplete; the total is therefore less than that shewn on page 407, which represents mint and export returns.

(vi.) *Tasmania.* The yield from Tasmania is also chiefly obtained from quartz reefing, although there is a little alluvial mining carried on, as shewn in the table hereunder. The yields as returned from each district in 1912 are given below :—

### GOLD WON IN TASMANIA, ALLUVIAL AND QUARTZ, 1912.

| District.           | Quartz. | Alluvial. | Cyanide. | Blister Copper. | Silver Lead Bullion. | Total. |
|---------------------|---------|-----------|----------|-----------------|----------------------|--------|
|                     | Ozs.    | Ozs.      | Ozs.     | Ozs.            | Ozs.                 | Ozs.   |
| Beaconsfield ... .. | 11,122  | ...       | 9,933    | ...             | ...                  | 21,055 |
| Mathinna ... ..     | 74      | ...       | 262      | ...             | ...                  | 336    |
| Mt. Victoria ... .. | 31      | 255       | ...      | ...             | ...                  | 286    |
| Warrantinna ... ..  |         |           |          |                 |                      |        |
| Mt. Cameron ... ..  | 19      | 18        | ...      | ...             | ...                  | 37     |
| Lefroy ... ..       |         |           |          |                 |                      |        |
| Lisle ... ..        | ...     | 189       | ...      | ...             | ...                  | 189    |
| Golconda ... ..     |         |           |          |                 |                      |        |
| Lilydale ... ..     | ...     | 100       | ...      | 7,351           | 8,673                | 16,124 |
| West Coast ... ..   |         |           |          |                 |                      |        |
| Total ... ..        | 11,246  | 562       | 10,195   | 7,351           | 8,673                | 38,027 |

The total production was valued at £161,300, equal to 37,973 ozs. fine, considerably more than half of which was produced by the Tasmania Gold Mine Ltd., at Beaconsfield.

(vii.) *Northern Territory.* Pine Creek is the chief mining field in the Northern Territory, but operations have for many years been carried on in a desultory manner, chiefly by Chinese labour. It is stated that the field has been unfairly exploited, the rich pockets only having being scooped out without any systematic prospecting. Confidence in the auriferous prospects of the area has been shaken by the failure of various companies, but in the view of the Mines Department the ground has not been properly tested or systematically mined, and the Department proposes to sink to a depth of 300 feet and prove that with proper methods the area is worthy of renewed exploration. The chief yields in the Pine Creek district were from the Eleanor and Kohinoor mines, which returned gold to the value of £11,086 and £1506 respectively.

5. **Remarkable Masses of Gold.**—Allusion has already been made in preceding Year Books to the discovery of “nuggets” and other remarkable masses of gold, but it is not proposed to repeat this information in the present issue.

6. **Modes of Occurrence of Gold in Australia.**—This subject has been alluded to at some length in preceding issues of the Year Book, but considerations of space will not permit of repetition in the present issue.

7. **Place of Commonwealth in the World's Gold Production.**—In the table given below will be found the estimated value of the world's gold production, and the share of the Commonwealth therein during the ten years 1903 to 1912. The figures given in the table have been compiled chiefly from returns obtained direct by the Commonwealth Bureau of Census and Statistics from the gold-producing countries of the world.

WORLD'S GOLD PRODUCTION, 1903 to 1912.

| Year.       | World's Production of Gold. | Gold produced in Commonwealth. | Percentage of C'wealth on Total. |
|-------------|-----------------------------|--------------------------------|----------------------------------|
|             | £                           | £                              | %                                |
| 1903 ... .. | 66,701,000                  | 16,295,000                     | 24.43                            |
| 1904 ... .. | 70,611,000                  | 15,897,000                     | 22.51                            |
| 1905 ... .. | 76,974,000                  | 15,551,000                     | 20.20                            |
| 1906 ... .. | 83,290,000                  | 14,632,000                     | 17.57                            |
| 1907 ... .. | 84,827,000                  | 13,515,000                     | 15.93                            |
| 1908 ... .. | 91,434,000                  | 13,059,000                     | 14.28                            |
| 1909 ... .. | 93,337,000                  | 12,605,000                     | 13.51                            |
| 1910 ... .. | 93,719,000                  | 11,554,000                     | 12.33                            |
| 1911 ... .. | 94,949,000                  | 10,552,000                     | 11.11                            |
| 1912 ... .. | 95,358,000                  | 9,880,000                      | 10.36                            |

While the production of gold in the Commonwealth shews a slight decrease during the sixteen years from 1897 to 1912, the world's total production practically doubled itself in the same period. The following table will be found interesting, as shewing the various foreign countries where the chief increases have taken place during the interval in question:—

## INCREASE IN GOLD YIELD, VARIOUS COUNTRIES, 1897 to 1912.

| Country.          | 1897.      | 1900.      | 1910.      | 1911.      | 1912       |
|-------------------|------------|------------|------------|------------|------------|
|                   | £          | £          | £          | £          | £          |
| United States ... | 11,787,000 | 16,269,000 | 19,781,000 | 19,909,000 | 18,840,000 |
| Canada ...        | 1,240,000  | 5,742,000  | 2,097,000  | 2,010,000  | 2,599,000  |
| Mexico ...        | 2,045,000  | 1,884,000  | 4,930,000  | 5,069,000  | 4,974,000  |
| Transvaal ...     | 11,654,000 | 1,481,000  | 31,973,000 | 35,041,000 | 38,686,000 |
| Rhodesia ...      | 800        | 308,000    | 2,568,000  | 2,648,000  | 2,707,000  |
| Gold Coast ...    | 85,000     | 38,000     | 780,000    | 1,079,000  | 1,499,000  |
| Madagascar ...    | 8,500      | 142,000    | 442,000    | 389,000    | 289,000    |
| India ...         | 1,571,000  | 1,893,000  | 2,202,000  | 2,238,000  | 2,272,000  |
| Korea ...         | 208,000    | 371,000    | 955,000    | 953,000    | 961,000    |
| Japan ...         | 142,000    | 290,000    | 596,000    | 639,000    | 639,000    |
| Java ...          | 24,000     | 112,000    | 723,000    | 625,000    | 550,000    |
| Costa Rica ...    | 2,000      | 31,000     | 96,000     | 149,000    | 95,000     |

The largest increase was recorded in the Transvaal, where the production more than trebled itself in the sixteen years 1897 to 1912.

8. **Employment in Gold Mining.**—The number of persons engaged in gold mining in each State in 1901 and during each of the last five years is shewn in the following table :—

## PERSONS EMPLOYED IN GOLD MINING, 1901 and 1908 to 1912.

| Year.    | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.  | N. Terr. | C'w'lth. |
|----------|--------|-----------|---------|----------|----------|-------|----------|----------|
|          | No.    | No.       | No.     | No.      | No.      | No.   | No.      | No.      |
| 1901 ... | 12,064 | 27,387    | 9,438   | 1,000    | 19,771   | 1,112 | 200      | 70,972   |
| 1908 ... | 6,363  | 20,853    | 7,736   | 880      | 16,075   | 843   | 333      | 53,083   |
| 1909 ... | 5,585  | 18,671    | 7,150   | 920      | 17,027   | 713   | 257      | 50,323   |
| 1910 ... | 5,247  | 16,553    | 6,115   | 950      | 16,279   | 682   | 306      | 46,132   |
| 1911 ... | 4,650  | 14,015    | 5,227   | 920      | 15,428   | 570   | 358      | 41,168   |
| 1912 ... | 3,898  | 11,856    | 5,500   | 920      | 13,700   | 485   | 263      | 36,622   |

## § 3. Platinum and the Platinoid Metals.

1. **Platinum.**—(i.) *New South Wales.*—The existence of platinum was first noted in New South Wales in 1851 by Mr. S. Stutchbury, who found a small quantity near Orange. Since the year 1878 small quantities of the metal have been obtained from beach sands in the northern coastal district. Platiniferous ore was noted in 1889 at Broken Hill. The chief deposits at present worked in the State are situated at Fifield, near Parkes, but the entire production in 1912 was small, amounting to only 610 ozs., valued at £3880, while the total production recorded to the end of 1912 amounted to 12,990 ozs., valued at £29,010.

The bulk of the production in 1912 was obtained by individual miners working with somewhat crude methods. Gold is found in association with platinum in the washdirt, the proportion being about 4 to 8 parts of platinum to 1 of gold.

(ii.) *Victoria*. In Victoria the metal has been found in association with copper at the Walhalla Copper Mine in Gippsland. The mine was worked extensively from 1874 to 1881 and then abandoned, but was reopened in 1910. It is stated that there are 70,000 tons of ore in sight, assaying three to four per cent. copper, and containing also platinum and silver. The production of platinum in 1911 amounted to 184 ozs., valued at £989.

2. *Osmium, Iridium, etc.*—(i.) *New South Wales*. Small quantities of osmium, iridium, and rhodium are found in various localities. As far back as 1860, the Rev. W. B. Clarke states that he found native iridium. Platinum, associated with iridium and osmium, has been found in the washings from the Aberfoil River, about 15 miles from Oban; on the beach sands of the northern coast; in the gem sand at Bingara, Mudgee, Bathurst, and other places. In some cases, as for example in the beach sands of Ballina, the osmiridium and other platinoid metals amount to as much as 40 per cent. of the platinum, or about 28 per cent. of the whole metallic content.

(ii.) *Victoria*. In Victoria, iridosmine has been found near Foster, and at Waratah Range, South Gippsland.

(iii.) *Tasmania*.—For many years osmiridium has been known to exist in the bed of the Savage River, on the West Coast, and in rivulets and creeks in the Serpentine country, but it was not until early in 1911 that efforts were made to work the deposits. During that year the price paid for the mineral was as high as £7 10s. per oz., and about 100 men were engaged in the search for it. The quantity produced amounted to 272 ozs., valued at £1888. In 1912 the production was 779 ozs., valued at £5742, or an average of £7 7s. 9d. per oz. Early in 1913 a prospector was reported to have found near the Pieman River a piece of osmiridium weighing two ounces, the largest "nugget" of this metal ever found.

## § 4. Silver.

1. *Occurrence in Each State*.—Particulars regarding the occurrence of silver in each State will be found in preceding Year Books, Nos. I. to V., but considerations of space preclude the repetition of this matter in the present volume.

2. *Development of Silver Mining*.—In illustration of the development of silver mining in Australia the following table has been compiled, shewing the production of silver, silver-lead and ore, and lead from each State during the years 1881, 1891, 1901, and the five years ending 1912:—

PRODUCTION OF SILVER AND LEAD, AUSTRALIA, 1881 to 1912.

| Year. | N.S.W.    | Vic.  | Q'land. | S. Aust. | W. Aust. | Tasmania. | North Terr. | C'wealth. |
|-------|-----------|-------|---------|----------|----------|-----------|-------------|-----------|
|       | £         | £     | £       | £        | £        | £         | £           | £         |
| 1881  | ...       | 5,239 | 13,494  | 1,182    | 11,224   | ...       | ...         | 31,139    |
| 1891  | 3,621,614 | 6,017 | 21,879  | 1,787    | 250      | 62,138    | 4,140       | 3,717,825 |
| 1901  | 1,954,964 | 6,550 | 69,234  | 3,886    | 7,718    | 325,335   | ...         | 2,367,687 |
| 1908  | 2,346,941 | 2,835 | 206,716 | 9,000    | 23,883   | 322,007   | 30          | 2,911,412 |
| 1909  | 1,839,688 | 2,310 | 167,636 | 673      | 19,977   | 298,880   | ...         | 2,329,164 |
| 1910  | 2,110,040 | 2,090 | 123,086 | 907      | 20,210   | 247,576   | ...         | 2,503,909 |
| 1911  | 2,652,548 | 2,070 | 79,765  | 140      | 33,335   | *253,361  | ...         | 3,021,219 |
| 1912  | 3,745,796 | 2,000 | 121,855 | 326      | 38,918   | 309,098   | 820         | 4,218,813 |

\* Exclusive of silver to the estimated value of £42,831 contained in blister copper.

(i.) *New South Wales.* The figures quoted for New South Wales in the above table represent the *net* value of the product (excluding zinc) of the silver-lead mines of the State. In explanation of the values thus given, it must be noted that the metallic contents of the larger portion of the output from the silver-lead mines in the State are extracted outside New South Wales, and it is considered, therefore, that the State should not take full credit for the finished product. Hence the *net* value referred to above relates to that of the ore, concentrates, and bullion, as declared by the several companies to the Customs Department at date of export. The real importance of the State as a producer of silver, lead, and zinc is thus to some extent lost sight of. The next table, however, which indicates the quantity and value of these metals locally produced, and the quantity and value of concentrates exported during the last five years, will shew the estimated total value of the yield:—

**VALUE OF PRODUCTION FROM SILVER-LEAD MINES OF NEW SOUTH WALES,  
1908 TO 1912.**

| Year.       | Value of Silver, Lead, and Spelter produced within the C <sup>o</sup> wealth. | Value of Concentrates Exported. | Total.    |
|-------------|---|---------------------------------|-----------|
|             | £   | £                               | £         |
| 1908 ... .. | 2,008,410   | 2,400,997                       | 4,409,407 |
| 1909 ... .. | 1,176,394   | 2,707,680                       | 3,884,074 |
| 1910 ... .. | 1,755,220   | 3,180,850                       | 4,936,070 |
| 1911 ... .. | 1,949,271   | 3,259,246                       | 5,208,517 |
| 1912 ... .. | 2,477,442   | 3,692,352                       | 6,169,794 |

As regards silver alone, the following table, which has been prepared on a basis similar to that on which the preceding table was compiled, shews the estimated total quantity and value of that metal yielded by the mines of New South Wales up to the end of 1903 and during the last nine years:—

**ESTIMATED QUANTITY AND VALUE OF SILVER YIELDED BY MINES OF  
NEW SOUTH WALES, TO END OF 1912.**

| Period.                | Produced in Australia. |            | Contained in Concentrates, etc., Exported. |            | Total Production. |            |
|------------------------|------------------------|------------|--|------------|-------------------|------------|
|                        | Quantity.              | Value.     | Quantity.                                  | Value.     | Quantity.         | Value.     |
|                        | Fine ozs.              | £          | Fine ozs.                                  | £          | Fine ozs.         | £          |
| To the end of 1903 ... | 82,947,404             | 13,807,421 | 104,659,834                                | 18,330,147 | 187,607,238       | 32,137,568 |
| 1904 ... ..            | 7,751,667              | 920,947    | 2,945,058                                  | 349,891    | 10,696,725        | 1,270,838  |

**3. Chief Centres of Silver Production.**—Broken Hill, in New South Wales, and Zeehan, in Tasmania, are the great centres of silver production in Australasia. The production in Queensland has, however, considerably expanded during the last few years.

(i.) *New South Wales.* (a) *Broken Hill.* A description of the silver-bearing area in this district is given in preceding issues of the Year Book. Owing to the high prices ruling for the various metals, the years 1911 and 1912 were characterised by great activity in the Broken Hill district, and each of the mines on the line of lode worked to its fullest capacity. The value of the output in 1912 was £4,437,000 as compared with £3,832,000 in 1911.

Although the returns are not complete in all cases, the following table relating to the mines at Broken Hill will give some idea of the richness of the field:—

#### RETURNS OF BROKEN HILL SILVER MINES TO END OF 1912.

| Mine:  | Authorised Capital. | Value of Output to end of 1912. | Dividends and Bonuses Paid to end of 1912. |
|--|---------------------|---------------------------------|--|
|  | £                   | £                               | £  |
| Broken Hill Proprietary Co. Ltd. ...         | 600,000             | 34,710,053*                     | 10,256,000                                 |
| Broken Hill Proprietary Block 14 Co. ...     | 155,000             | 3,448,108                       | 536,660                                    |

\* The value of the ores purchased during the years 1908 to 1912 is not included. † Incomplete.

‡ This company went into liquidation on 24th July, 1911, and after that date the mine was worked by the Zinc Corporation Ltd. Separate details regarding capital not available.

(b) *Yerranderie.* The mines on the Yerranderie field in the Southern Mining District produced 676,095 ozs. of silver in 1912, besides 1438 ozs. of gold, and 1906 tons of lead, the total production being valued at £121,859. Mining operations in this locality are carried on under considerable difficulties owing to the heavy cost of transport, but it is hoped that with the construction of a railway to the field, it will be possible to treat lower grade ores with profit.

(c) *Kangiarra.* The yield from the Kangiarra field, in the Yass district, consisted of 93,088 ozs. of silver, besides gold, 233 ozs.; lead, 1177 tons; and copper, 250 tons; the total production being valued at £45,536.

(d) *Conrad.* The ore raised by the Conrad Mines Ltd., at Howell, in the Tingha division, amounted in 1912 to 21,958 tons, valued at £51,097. The ore contents were estimated at 395,244 ozs. of silver; 1646 tons lead; 435 tons of zinc; and 220 tons of copper. The number of men employed in 1912 was 193, and the value of plant and machinery, £11,150.

(e) *Cobar.* A considerable quantity of silver is obtained from the Great Cobar Ltd. Mine and attached properties, the production in 1912 amounting to 202,330 ozs. At the Cobar Peak Silver Mine the production was 8135 ozs.

(ii.) *Tasmania, West Coast.* The production of silver-lead ore in 1912 was 90,124 tons, valued at £309,098, to which the Hercules Mine at Dundas contributed 30,887 tons, valued at £95,526. The next highest yield came from the Primrose at Rosebery, with £40,141, followed by the Zeehan Montana at Zeehan with £29,505, the North Mt. Farrell £24,662, and the Comet, Dundas, with £15,597.

(iii.) *Queensland.* The yield for the chief silver-producing centres in 1912 was as follows:—Chillagoe, £19,197; Herberton, £9988; Charters Towers, £7091; Stanthorpe, £8078; Cloncurry, £4712.

(iv.) *South Australia.* Rich specimens of silver ore have been discovered at Miltalie, near Cowell, in South Australia. The surrounding district is highly mineralized, but, so far, has not been thoroughly prospected.

4. **World's Production of Silver.**—The world's production of silver during the last ten years is estimated to have been as follows :—

**WORLD'S PRODUCTION OF SILVER, 1903 to 1912.**

| Year ...                              | 1903.   | 1904.   | 1905.   | 1906.   | 1907.   | 1908.   | 1909.   | 1910.   | 1911.   | 1912.   |
|---------------------------------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|
| World's production in 1000 fine ozs.* | 173,222 | 176,840 | 181,338 | 184,552 | 183,386 | 212,570 | 227,291 | 240,223 | 254,214 | 250,979 |

\* Add 000 to figures for fine ounces.

Australasia's share in the world's silver production in 1912 was estimated at 16,112,000 ounces, or about 6½ per cent. on the total production.

5. **Prices of Silver.**—As the production of silver is dependent to a very large extent on the price realised, a statement of the average price per standard ounce paid by the London Mint at various periods and during the last five years is given below :—

**PRICE OF SILVER, 1871 to 1912.**

| Year ...               | 1871. | 1881. | 1891. | 1901. | 1908. | 1909. | 1910. | 1911. | 1912. |
|------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Pence per standard oz. | 60½   | 51½   | 45½   | 27½   | 24½   | 23½   | 24½   | 24½   | 28½   |

During the month of November, 1906, owing to the small sales in New York, and also to the fact that the Indian, American, and Mexican Governments were all buying silver, the price rose to 33½d., the highest realised since 1893, when the average stood at 36½d.

6. **Employment in Silver Mining.**—The number of persons employed in silver mining in 1901 and during each of the last five years is given below :—

**NUMBER OF PERSONS EMPLOYED IN SILVER MINING, 1901 and 1908 to 1912.**

| Year.   | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tasmania. | N. Terr. | C'wealth. |
|---------|--------|-----------|---------|----------|----------|-----------|----------|-----------|
|         | No.    | No.       | No.     | No.      | No.      | No.       | No.      | No.       |
| 1901... | 6,298  | ...       | 40      | 150      | ...      | 2,414*    | †        | 8,902‡    |
| 1908... | 7,560  | 3         | 496     | 50       | 5        | 1,740     | †        | 9,854     |
| 1909... | 6,207  | ...       | 354     | 40       | 5        | 1,516     | †        | 8,122     |
| 1910... | 7,999  | ...       | 590     | 60       | 21       | 1,173     | 65       | 9,908     |
| 1911... | 8,495  | ...       | 433     | 30       | 43       | 1,125     | 47       | 10,173    |
| 1912... | 9,062  | ...       | 208     | 30       | 60       | 1,681     | ...      | 11,041    |

\* Including copper miners. † Included in South Australia. ‡ Including copper miners in Tasmania.

As the table shews, the bulk of the employment was in New South Wales and Tasmania, the quantity of silver raised in the other States, excepting Queensland, being unimportant.

## § 5. Copper.

1. **Production of Copper.**—The production of copper in the various States of the Commonwealth has been influenced considerably by the ruling prices, which have undergone extraordinary fluctuations. The quantity and value of the production in earlier years and for 1908 to 1912 is shewn in the following tables :—

## PRODUCTION OF COPPER, AUSTRALIA, 1881 to 1912.

| State.                | 1881.   | 1891.  | 1901.       | 1908.       | 1909.       | 1910.       | 1911.        | 1912.       |

\* Including £1196, Northern Territory.

A short account of the discovery of copper in the different States is given in the earlier Year Books.

2. Sources of Production.—(i.) *New South Wales.* The principal seat of the copper-mining industry at the present date is in the Cobar district, the value of the deposits there being first recognised in 1869. The value of the output from this district in 1912 was £410,155, out of a total for the State of £579,791. Operations at the Great Cobar Mine were to some extent interfered with owing to lack of skilled labour, nevertheless the output of copper totalled 6650 tons as against 6548 tons in 1911.

From the Grafton Company's mine at Cangai the output was valued at £57,161, as compared with £33,288 in the preceding year. The metallic products comprised 788 tons of copper, 320 ozs. of gold, and 6410 ozs. of silver. The Kylvie mine, in the Cooma division, contributed materially to the total output, the production from this mine being valued at £52,459. The Kangiara mines, in the Yass division, raised 3856 tons of copper ore, estimated to contain 250 tons of copper valued at £17,040.

The Electrolytic and Refining and Smelting Company of Australia Limited, established at Port Kembla, had a successful year, the output of electrolytic copper being 16,888 tons, most of which was made from imported blister copper.

(ii.) *Victoria.* The copper produced in this State was obtained from the mine near Walhalla operated by the Gippsland Copper, Platinum, and Gold Mining and Smelting Company. During 1911 the company smelted 1116 tons of copper ore and 18 of auriferous quartz, and from the resultant 91 tons of matte, copper was produced to the value of £2088, silver valued at £65, gold at £220, and platinum at £989. There was no production recorded in 1912.

(iii.) *Queensland.* The yield in this State amounted in 1912 to 23,120 tons, valued at £1,698,280, to which the Cloncurry field contributed 10,435 tons, valued at £761,755. Next in order were Mount Morgan with 7068 tons, valued at £516,000; Gladstone, 1764 tons, £128,916; Rockhampton, 1345 tons, £105,921; Etheridge, 1242 tons, £93,600; Cloncurry, 1142 tons, £83,366; Mount Perry, 443 tons, £30,567; and Chillagoe, 417 tons, £31,376.

Exploration of the deeper ground at Cloncurry has confirmed the belief in the richness of the field, and the district is now generally recognised as the most extensive and richest cupriferous area in Australia.

(iv.) *South Australia.* Taking the entire period over which production extended, the yield of copper in South Australia easily outstrips that of any other State in the Commonwealth. In recent years, however, Tasmania, Queensland, and New South Wales have come to the front as copper producers, as the table on the preceding page will shew. Deposits of copper ore are found over a large portion of South Australia. The Kapunda mine, discovered in 1842 by Messrs. Dutton and Bagot, is situated fifty miles north of Adelaide, and is the oldest copper mine in the State. Up to the end of 1879 the production amounted to 70,000 tons, the metal possessing such a high standard of purity that it always obtained the highest prices in the world's markets. During the nine years 1870 to 1878 the production was valued at £157,000. The Burra Burra mine, located in 1845 by a shepherd named Pickett, is situated about 100 miles north of Adelaide. The original capital invested in this mine was £12,320 in £5 shares, on which no call was ever made, while dividends to the amount of £800,000 were paid. For many years this mine produced from 10,000 to 13,000 tons of ore, averaging 22 to 23 per cent. of copper. During the 29½ years in which the mine was worked the production was valued at £4,749,000. In 1859 as many as 1170 persons were employed on it. The mine has lain practically idle for many years.

Yorke's Peninsula, between Spencer's Gulf and St. Vincent's Gulf, contains a large area of copper-bearing country. The principal mines at Wallaroo and Moonta are situated a few miles from Port Wallaroo, and date back to 1860. For about thirty years the Moonta mines were worked independently, selling their ores to the Wallaroo company. During its separate existence the Wallaroo field produced about £2,600,000 worth of copper, while Moonta yielded £5,396,000, and was the first Australian mining field to produce £1,000,000 in dividends. The amalgamation took place in 1889, and since that year the united properties have produced about £4,281,000 worth of copper. The entire yield from the date of first working is estimated at about £12,500,000. The mines just enumerated represent a very small proportion only of those opened on the copper-bearing areas of the State. The bulk of the production in 1912 came from the Moonta and Wallaroo mines.

(v.) *Western Australia.* The value of copper exported from this State in 1912 was £60,537. According to the returns, the production in the West Pilbara field was 12,284 tons, valued at £104,289, while the Phillips River field shewed a production of 1318 tons, valued at £15,815. A small quantity of copper ore was raised at the Murchison goldfields.

(vi.) *Tasmania.* The quantity of blister copper and copper ore produced in Tasmania during 1912 was 6528 tons, valued at 440,444, the bulk of the production being due to the Mount Lyell Mining and Railway Co. Ltd. This Company treated 259,013 tons of ore in 1912, and produced 5136 tons of blister copper, containing copper to the value of £385,739; silver, £45,225; and gold, £31,242. The Mount Balfour field raised 1220 tons of ore, valued at £8013, and the Jasper Copper Co., at Heazlewood, 14 tons, valued at £325.

(vii.) *Northern Territory.* The production in 1912 was returned at £3998, but as in the case of other minerals the deposits have not yet been scientifically mined. There is an extensive lode at Coronet Hill and a large area of cupriferous country in the surrounding district. Good copper shows have been located at Woollogarang on Settlement Creek. It is proposed to make further tests of the deposits near Rum Jungle.

3. **Price of Copper.**—The great variation in price that the metal has undergone is shewn in the following table, which gives the average price in London and New York during 1901 and in each of the last five years. The figures are given on the authority of "The Mineral Industry."

#### FLUCTUATION IN VALUE OF COPPER, 1901 and 1908 to 1912.

| Year.       | London Price per Ton<br>Standard Copper. | New York. Price in Cents per lb. |                      |
|-------------|--|----------------------------------|----------------------|
|             |  | * Lake Copper.                   | Electrolytic Copper. |
|             | £  | Cents.                           | Cents.               |
| 1901 ... .. | 66.79                                    | 16.55                            | 16.11                |
| 1908 ... .. | 59.90                                    | 13.42                            | 13.21                |
| 1909 ... .. | 58.73                                    | 13.34                            | 12.98                |
| 1910 ... .. | 57.05                                    | 13.04                            | 12.74                |
| 1911 ... .. | 55.97                                    | 12.63                            | 12.38                |
| 1912 ... .. | 72.94                                    | 16.56                            | 16.34                |

\* The term "Lake" copper is used to designate all copper sold in the trade as such, regardless of the process by which it is refined.

4. **Relationship to World's Production.**—The world's production of copper in 1901 and during the last five years is estimated to have been as follows:—

#### WORLD'S PRODUCTION OF COPPER, 1901 and 1908 to 1912.

| Year ... ..                                | 1901.   | 1908.   | 1909.   | 1910.   | 1911.   | 1912.     |
|--|---------|---------|---------|---------|---------|-----------|
| World's production—<br>(short tons) ... .. | 583,517 | 835,623 | 942,408 | 966,998 | 969,750 | 1,114,769 |

5. **Employment in Copper Mining.**—The number of persons employed in copper mining during 1901 and in each of the last five years was as follows:—

#### PERSONS ENGAGED IN COPPER MINING, 1901 and 1908 to 1912.

| Year. | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tasmania. | Nor. Ter. | C'wealth. |

| 1912  | 2,384  | 6         | 3,457   | 4,500    | 223      | 1,681     | 52        | 12,303    |

\* Included with silver miners. † No returns. ‡ Excluding Tasmania.

## § 6. Tin.

1. **Production of Tin.**—The development of tin mining is, of course, largely dependent on the price realised for the metal, and, as in the case of copper, the production has been subjected to somewhat violent fluctuations. The table below shews the production in each of the Commonwealth States during the years 1881, 1891, 1901, and 1908 to 1912:—

## TIN PRODUCED IN AUSTRALIA, 1881 to 1912.

| State.                       | 1881.       | 1891.       | 1901.     | 1908.     | 1909.     | 1910.     | 1911.     | 1912.     |
|------------------------------|-------------|-------------|-----------|-----------|-----------|-----------|-----------|-----------|

\* Dressed tin ore, about 70% tin.

† Tin ingot and ore.

‡ Not available.

2. **Sources of Production.**—(i.) *New South Wales.* The bulk of the output in New South Wales was obtained by dredging, the quantity so won in 1912 being 1621 tons, valued at £223,813. In the Tingha division the yield amounted to 1006 tons, valued at £139,865, the yield from dredging being estimated at £104,006. The Emmaville division in the New England district shewed a yield of 1118 tons of ore, valued at £156,590, of which dredging produced 743 tons, valued at £104,090. In the Wilson's Downfall division 167 tons, valued at £23,285, were raised. The new field at Ardlethan, discovered in January, 1912, produced about 500 tons of ore, of which 379 tons realised £7741.

(ii.) *Victoria.* In Victoria lode tin has been discovered at Mt. Wills, Beechworth, Eldorado, Chiltern, Stanley, and other places in the north-eastern district; and stream tin has been found in a large number of places, including those just mentioned in the north-eastern district. The bulk of the production in 1912 was obtained by the Cocks Pioneer, at Beechworth, and the Walwa Tin Mining Company, at Walwa.

(iii.) *Queensland.* The continued high price of the metal during 1912 was reponsible for renewed activity in tin mining, particularly in the Herberton district, where there was increased development in existing mines, while great attention was devoted to recent discoveries and also to deposits hitherto regarded as insufficiently productive. Besides the ordinary creek and stream alluvial, extensive layers of stanniferous wash capping many of the ridges have been profitably worked. The yield for this district amounted in 1912 to £209,893. From the other chief districts the yields were as follows:—Chillagoe, £51,777; Cooktown, £36,233; Stanthorpe, £21,428 and Kangaroo Hills, £20,340.

(iv.) *Western Australia.* The production of tin ore and ingot for the State during 1912 amounted to 575 tons, valued at £70,578, to which the Greenbushes field contributed 430 tons, valued at £50,166, and the Pilbara field 123 tons, valued at £14,993. Production at the former field shewed increased activity during the year, but in view of the high prices ruling for the metal the decrease at the latter is difficult to understand.

(v.) *Tasmania.* The tin ore raised in 1912 amounted to 3713 tons, valued at £543,103, the largest contributor to the total being the Mount Bischoff Co. in the North Western Division. This company treated 230,506 tons of ore from which 1200 tons of tin oxide valued at £168,000 were obtained. The dividends paid for the year amounted to £75,000, and the total to the end of 1912 to £2,362,500. The Mt. Bischoff Extended produced 171 tons of calcined tin oxide. In the North-Eastern Division, the Briseis Co. produced 538 tons of black tin, valued at £82,000; the Pioneer obtained 463 tons, valued at £75,000. In the Eastern Division the Anchor Co. Ltd. produced 143 tons, valued at £20,000. In the Western Division the Renison Bell produced 62 tons of metallic tin, valued at £12,716.

(vi.) *Northern Territory.* Mount Wells, in the Burrundie district, has yielded a fair output of tin since 1886, but the present system of handling the ore is reported to be costly, the mining being done by tributors, whose parcels have to be kept separate. About 60 men, mostly Chinese, are employed at the mine. Copper, silver lead and tin shows occur abundantly in the district, but little work has been done on them. Great hopes for the future are placed by the Department in the Horseshoe Creek tinfield, although, so far, it has been worked in the usual slipshod way. The production of tin in 1912 amounted to 271 tons, of which 100 tons were obtained at Burrundie, 40 tons at Horseshoe Creek and Mount Todd, 30 tons at Umbrawarra, and 21 tons at the West Arm and Bynoe Harbour.

3. *World's Production of Tin.*—According to "The Mineral Industry" the world's production of tin during each of the last five years was obtained as follows:—

#### THE WORLD'S TIN SUPPLIES, 1908 to 1912.

| China, Exports ... ..                      | 4,836   | 4,516   | 6,510   | 6,056   | 8,785   |
| France ... ..                              | ...     | ...     | ...     | 500     | 500     |
| Germany, mainly Bolivian ores ... ..       | 6,374   | 8,995   | 11,394  | 12,426  | 12,500  |
| Japan ... ..                               | 26      | 23      | 23      | 155     | 175     |
| Straits Settlements, Exports ... ..        | 63,690  | 61,540  | 57,490  | 57,944  | 61,528  |
| United Kingdom, domestic ores ... ..       | 5,133   | 5,282   | 4,874   | 4,950   | 5,061   |
| United Kingdom, imported ores ... ..       | 11,614  | 11,890  | 13,055  | 13,850  | 13,600  |
| Total (metric tons) ... ..                 | 113,566 | 114,012 | 115,759 | 118,898 | 126,199 |

The totals are exclusive of output from the native smelters in Central and South Africa, exports from Siam and the Dutch East Indies to India, China, Korea and Japan, and local consumption in Straits Settlements, Siam, and Dutch East Indies, omissions in these and a few other cases being due to lack of returns.

4. **Prices of Tin.**—The average price of the metal in the London market for the year 1897 and from 1902 to 1912 was as follows:—

**PRICE PER TON OF TIN, 1897 to 1912.**

| Year. |     |     | Price per Ton. | Year. |     |     | Price per Ton. |
|-------|-----|-----|----------------|-------|-----|-----|----------------|
|       |     |     | £ s. d.        |       |     |     | £ s. d.        |
| 1897  | ... | ... | 61 8 0         | 1907  | ... | ... | 172 12 9       |
| 1902  | ... | ... | 120 14 5       | 1908  | ... | ... | 133 2 6        |
| 1903  | ... | ... | 127 6 5        | 1909  | ... | ... | 134 15 6       |
| 1904  | ... | ... | 126 14 8       | 1910  | ... | ... | 155 6 2        |
| 1905  | ... | ... | 143 1 8        | 1911  | ... | ... | 192 7 0        |
| 1906  | ... | ... | 180 12 11      | 1912  | ... | ... | 209 8 5        |

According to "The Mineral Industry" the maximum price obtained for tin during the period 1897-1912 was reached in October, 1912, when the metal was quoted at £228 9s. 1d. per ton.

5. **Employment in Tin Mining.**—The number of persons employed in tin mining, in 1901 and during the last five years is shewn below:—

**PERSONS ENGAGED IN TIN MINING, COMMONWEALTH, 1901 and 1908 to 1912.**

| Year. |     |     | N.S.W. | Victoria. | Qld.  | W. Aust. | Tas.  | Nor. Ter. | C'wealth. |
|-------|-----|-----|--------|-----------|-------|----------|-------|-----------|-----------|
|       |     |     | No.    | No.       | No.   | No.      | No.   | No.       | No.       |
| 1901  | ... | ... | 1,428  | ...       | 1,148 | 413      | 1,065 | ...       | 4,054     |
| 1908  | ... | ... | 2,456  | 53        | 2,140 | 614      | 1,588 | 384       | 7,235     |
| 1909  | ... | ... | 2,037  | 48        | 2,158 | 406      | 1,576 | 355       | 6,580     |
| 1910  | ... | ... | 2,028  | 25        | 1,932 | 326      | 1,598 | 322       | 6,231     |
| 1911  | ... | ... | 2,225  | 34        | 1,860 | 321      | 1,755 | 280       | 6,475     |
| 1912  | ... | ... | 2,646  | 57        | 2,153 | 409      | 1,762 | 287       | 7,314     |

## 7. Zinc.

1. **Production of Zinc.**—The production of spelter is practically confined to the Broken Hill district of New South Wales, where zincblende forms one of the chief constituents in the enormous deposits of sulphide ores.

Gratifying results have been achieved in the work of the profitable extraction of the zinc contents of the large heaps of accumulated tailings and from the ore raised on the Broken Hill field. The year 1909 witnessed the passing of this problem out of the experimental stage, and the practical solution of the difficulty which had confronted the mining companies for many years. At present not only is the zinc being obtained in a marketable form, but the silver and lead contents are being turned to profitable account. During 1912 the various process plants on the field were all in continuous operation, and improvements were effected tending towards simplicity of construction and increased capacity. In 1899 the exports of zinc (spelter and concentrates) amounted to 49,879 tons; in 1909 they totalled 373,906 tons, valued at £1,041,280; and in 1912, 520,518 tons, valued at £1,766,242, the great bulk of the production being obtained from tailings. The following table shews the production of zinc in New South Wales from 1889 to 1912:—

## NEW SOUTH WALES.—PRODUCTION OF ZINC, 1889 to 1912.

| Year. | Quantity of Zinc<br>(Spelter and Concentrates) Produced. | Value.  | Year. | Quantity of Zinc<br>(Spelter and Concentrates) Produced. | Value.    |
|-------|--|---------|-------|--|-----------|
|       | Tons.  | £       |       | Tons.  | £         |
| 1889  | 97   | 988     | 1909  | 373,906  | 1,041,280 |
| 1891  | 219  | 2,622   | 1910  | 468,627  | 1,289,634 |
| 1899  | 49,879   | 49,207  | 1911  | 516,378  | 1,414,980 |
| 1908  | 276,720  | 600,883 | 1912  | 520,518  | 1,766,242 |

The total quantity of zinc (spelter and concentrates) produced in New South Wales to the end of the year 1912 was 2,819,718 tons, valued at £7,539,913. The average price of spelter per ton in the London market during the last seven years was £23 19s. 8d., ranging from £20 8s. 3d. in 1908 to £27 0s. 5d. in 1906. The price in 1912 was £26 8s. 5d.

At the Silver Spur mine at Texas, in the Stanthorpe division in Queensland, part of the ore is high in zinc and lead, but low in silver. Profitable extraction of the zinc and lead depends, however, on railway connection with the mine.

During the year 1912, 14 tons of zinc, valued at £217, were raised in Western Australia.

The zinc contents of the ores treated by the Tasmanian Smelting Company at Zeehan were stated to have amounted to 12,000 tons for the year ended June, 1913.

## § 8. Iron.

1. **General.**—The fact that iron-ore is widely distributed in the Commonwealth has long been known, and extensive deposits have been discovered from time to time at various places throughout the States. It will appear, however, from what is stated below, that until quite recently, little has been done in the way of converting these deposits into a marketable commodity.

(i.) *The Manufactures Encouragement Act 1908-12.* It was hoped that the passing by the Commonwealth Parliament of the Manufactures Encouragement Act, which came into force on the 1st January, 1909, would assist in firmly establishing the iron industry in Australia on a remunerative basis, both in the smelting of pig iron and in the production of bar iron and steel from Australian ore. The Act referred to, together with its amendment in 1912, provides for the payment of bounties on iron in accordance with the terms set out hereunder:—

## BOUNTIES PAYABLE ON AUSTRALIAN PIG IRON, BAR IRON, STEEL, Etc.

| Description of Goods   | Rate of Bounty.       | Total Amount which may be authorised. | Date of Expiry of Bounty. |
|--|-----------------------|---------------------------------------|---------------------------|
| CLASS 1.   |                       |                                       |                           |
| Pig iron made from Australian ore ...  | 12s. per ton          | £150,000                              | 30th June, 1914           |
| Puddled bar iron made from Australian pig iron   | "                     |                                       |                           |
| Steel made from Australian pig iron ...  | "                     |                                       |                           |
| CLASS 2.   |                       |                                       |                           |
| Galvanised sheet or plate iron or steel (whether corrugated or not) made from Australian ore   | 10 per cent. on value | £30,000                               | 30th June 1914            |
| Wire netting, not being prison made and being made from Australian ore or from wire manufactured in the United Kingdom                     | 10 per cent. on value |                                       |                           |
| Wire made from Australian ore  |                       |                                       |                           |
| Iron and steel tubes or pipes (except riveted or cast), not more than six inches internal diameter, made from Australian pig iron or steel | 10 per cent. on value |                                       |                           |

Particulars of the bounties paid under the above Act during the half-year ended the 30th June, 1909, and during the financial years 1909-10 to 1912-13, are shewn in the following statement:—

**PARTICULARS OF BOUNTIES PAID ON AUSTRALIAN PIG IRON, BAR IRON, STEEL, Etc., 1909 to 1913.**

| Description of Goods.           | Steel made from Australian Pig Iron. | Puddled Bar Iron made from Australian Pig Iron. | Pig Iron made from Australian Ore. | Galvanised Sheet Iron made from Australian Ore. | Wire netting made from wire manufactured in the United Kingdom | Total.  |
|---------------------------------|--------------------------------------|---|------------------------------------|---|--|---------|
|                                 | £                                    | £   | £                                  | £   | £  | £       |
| Half-year ended 30th June, 1909 | 575                                  | 568   | 2,314                              | 192   | ...  | 3,649   |
| 1909-10 ... ..                  | 1,491                                | 1,254   | 23,510                             | 287   | 6,036  | 32,578  |
| 1910-11 ... ..                  | 1,940                                | 2,080   | 20,462                             | 121   | 4,824  | 29,427  |
| 1911-12 ... ..                  | 723                                  | 671   | 15,611                             | 74  | 5,968  | 23,047  |
| 1912-13 ... ..                  | ...                                  | 38  | 16,949                             | ...   | 1,110  | 18,097  |
| Total ... ..                    | 4,729                                | 4,611   | 78,846                             | 674   | 17,938   | 106,798 |

So far New South Wales is the only State where bounty has been claimed, and the above figures, taken in conjunction with those in the succeeding table, show that production has not been as rapid as might have been expected.

**2. Production of Iron.**—(i.) *New South Wales.* Reference to the extent of the deposits of iron ore in the State, and the events leading up to the establishment of ironworks at Lithgow, will be found in earlier issues of the Year Book (see No. III., p. 508). During 1912 the following materials were received at the blast furnace:—Iron ore, 55,170 tons; limestone, 20,399 tons; and coke, 51,102 tons. The output was 36,277 tons of pig iron. No steel ingots were made during the year.

The Broken Hill Proprietary Company has obtained the necessary powers, and proposes to undertake the manufacture of iron and steel on a large scale at Newcastle. It is estimated that the plant and works will be in operation in about two years.

The following table shews the quantity and value of finished iron, pig iron, etc., made in New South Wales during the last seven years, chiefly from scrap iron, but since 1908 partly from the smelting of iron ore:—

**NEW SOUTH WALES.—PRODUCTION OF IRON, 1906 to 1912.**

| Particulars.  | 1906.   | 1907.*  | 1908.†  | 1909.‡  | 1910.§  | 1911.§  | 1912.§  |
|---------------|---------|---------|---------|---------|---------|---------|---------|
| Quantity Tons | 8,000   | 29,902  | 40,207  | 29,762  | 40,487  | 36,354  | 32,677  |
| Value ... £   | 112,848 | 178,632 | 118,224 | 106,357 | 161,948 | 145,416 | 130,708 |

\* Includes 18,631 tons pig iron, valued at £60,550, produced from 34,500 tons of iron ore raised within the State. † Includes 30,393 tons pig iron, valued at £98,777, from 51,206 tons of ore raised within the State. ‡ Includes 26,762 tons pig iron, valued at £100,357, from 46,740 tons of iron ore raised within the State. § From ore raised within the State.

The bounty paid in 1911 and 1912 on iron and steel made from ores mined in New South Wales was as follows:—

# BOUNTY PAID ON IRON AND STEEL, NEW SOUTH WALES, 1911 and 1912.

| Description.            | 1911.    |          | 1912.    |          |
|-------------------------|----------|----------|----------|----------|
|                         | Tonnage. | Bounty.  | Tonnage. | Bounty.  |
| Pig iron ... ..         | 24,658   | £ 14,795 | 31,104   | £ 18,663 |
| Puddled bar iron ... .. | 1,789    | 1,073    | 549      | 329      |
| Steel ... ..            | 2,633    | 1,580    | ...      | ...      |
| Total ... ..            | 29,080   | 17,448   | 31,653   | 18,992   |

A quantity of iron oxide is purchased by the various gasworks for use in purifying gas, the output in New South Wales being drawn chiefly from the deposits at Port Macquarie, while smaller quantities are obtained from Mittagong and Goulburn. During 1912 the quantity raised was 3757 tons, valued at £4763, while the total output to the end of that year was 23,696 tons, valued at £30,747. The quantity of ironstone disposed of for flux is decreasing, since the requirements of the smelting companies have fallen off, owing to suitable ores being obtained. In 1912 the quantity raised was 1093 tons, valued at £761, as against 1216 tons, valued at £861, in the preceding year.

(ii.) *Victoria.* Iron ore has been located at various places in Victoria, particularly at Nowa Nowa, in the Gippsland district, and at Dookie. A blast furnace was erected in 1881 near Lal Lal, on the Moorabool River, and some very fair quality iron was produced, which was used for truck wheels and stamper shoes in the Ballarat mines. The fall in the price of the metal, however, led to the closing of the works. In his report for 1905 the Secretary for Mines states that without special assistance to the industry there does not seem to be any prospect of the deposits being profitably worked.

(iii.) *Queensland.* Queensland possesses some extensive deposits of iron ore, which is mined chiefly for fluxing purposes in connection with the reduction of gold and copper ores. During the year 1912, 15,526 tons of ironstone, valued at £9035, were raised, the bulk of the production being in the Chillagoe and Cloncurry districts.

(iv.) *South Australia.* In South Australia iron ore is raised for fluxing purposes only, although the State possesses some rich deposits capable of being mined for an indefinite period. The best known deposit is the Iron Knob, a veritable hill of iron of high percentage, situated about forty miles W.S.W. from Port Augusta. The estimated quantity of iron ore in sight at the Iron Knob and Iron Monarch has been set down at 21,000,000 tons. The Broken Hill Company intends to treat ore from this quarry at its ironworks at Newcastle, New South Wales.

(v.) *Western Australia.* This State has some very rich deposits of iron ore, but owing to their geographical position, the most extensive fields at the present time are practically unexploited, the production in the State being confined chiefly to that needed for fluxing purposes. The Murchison field possesses some extensive deposits of high-grade ore. There are also deposits on Koolan Island at Yampi Sound.

(vi.) *Tasmania.* The existence of large quantities of iron ore in Tasmania was noted as far back as 1822, when Surveyor-General Evans alluded to the "surprising abundance of iron within a few miles of Launceston." A company known as the Tasmanian Charcoal Iron Company was formed to work these deposits, and commenced operations in June, 1876. Unfortunately, however, the presence of chromium rendered the pig iron so hard and brittle that the works had to be abandoned. Extensive deposits of specular iron ore are also found in the neighbourhood of the Blythe and Gawler Rivers. The total production of iron ore in 1908 was 3600 tons, valued at £1600, and

was all raised by the Tasmanian iron mine at Penguin, but owing to the closing down of that mine in 1909, there has been no further production. Iron pyrites for the manufacture of sulphuric acid and of manures, is produced on the West Coast.

(vii.) *Northern Territory.* Boulders of pure hematite have been found in the country between Eureka and Pine Creek, and it is stated by the Director of Mines that these are probably derived from large accretions in the neighbouring mountains.

(viii.) *World's Production of Iron, 1911.* The quantity of iron produced in Australia is but a very small proportion of the world's production, which in 1911 amounted to 63,252,000 metric tons (pig iron). The leading position for magnitude of production is held by the United States, which in 1911 produced 24,028,000 tons, compared with Germany's 15,280,000 tons, and the United Kingdom 9,875,000 tons. The position of the three countries named is similar to what it has been for several years past.

## § 9. Other Metals.

1. **Antimony.**—This metal is widely distributed in New South Wales, and has been found native at Lucknow, near Orange. Dyscrasite, a silver antimonide, has been found in masses up to one ton in weight in the Broken Hill lodes. Antimony is also obtained in the Hillgrove district, and deposits are being worked in the Port Macquarie Division and at Yulgilbar in the Copmanhurst Division. Deposits are occasionally worked in the Macleay and Bellinger River Districts when market values afford a margin of profit. It has also been found at various places in Victoria, chiefly in association with gold. In 1912 the export of antimony metal and ore from New South Wales amounted to £355. The total quantity of antimony ore raised in New South Wales up to the end of 1912 was 16,654 tons, valued at £305,224. The production of antimony ore in Victoria during 1912 amounted to 2430 tons, valued at £16,162. The ore was raised by a syndicate operating at Costerfield. In Queensland extensive deposits were discovered at Neerdie, in the Wide Bay district, during 1872, also at Wolfram Camp on the Hodgkinson field, on the Palmer River, in the Ravenswood district, and on the Mitchell River in the Herberton district. In Western Australia lodes of stibnite carrying gold have been found in the Roeburne district.

2. **Arsenic.**—In the form of arsenopyrite, arsenic is of wide distribution in Victoria, but the deposits are worked to a limited extent only. At Ballarat a small quantity of the oxide is obtained from the flues of roasting furnaces. In New South Wales about 200 tons of arsenic were obtained in 1910 by the Conrad Mines Ltd. at Howell.

3. **Barium.**—A valuable lode of barium sulphate has been discovered near Dalwin, on the North Lyell railway, in Tasmania, and it is proposed to develop the deposit. It is stated that the lode is from  $2\frac{1}{2}$  to 7 feet wide over a length of over 40 chains.

4. **Bismuth.**—This metal has been found in New South Wales, near Glen Innes, and also in the vicinity of Pambula, its discovery dating from 1877. About 6 tons of metal and ore, valued at £1210, were exported from New South Wales during 1912; the total quantity exported to the end of that year was 541 tons, valued at £128,537. In Queensland wolfram, molybdenite, and bismuth have been found in various districts, but the chief centres of production in 1912 were the Herberton and Chillagoe fields. The total production in 1912 was valued at £77,082, of which £57,821 was returned as wolfram, £2835 as bismuth, and £16,426 as bismuth and wolfram. In South Australia deposits are found at Balhannah, at Mount Macdonald, and at Murninnie, on the shores of Spencer's Gulf. In Tasmania 7 tons, valued at £2606, were raised in 1912 by the Shepherd and Murphy mine at Middlesex.

5. **Chromium.** In New South Wales chromium is found at Bowling Alley Point, on the Peel River, at Barraba, at Gordon Brook, in the Clarence River district, at Bingara, Wallendbeen, and near Gundagai. The production during recent years has been trifling. The total exports to the end of 1912 amounted to 30,835 tons, valued at £101,468. Chrome iron ore is found in Queensland in the Rockhampton district, where the Elgalla mine, at Cawarral, produced a small quantity in 1911. There was also some production from the mine near Broadmount.

6. **Carnotite.**—A discovery of carnotite ore was made in 1906 twenty miles E.S.E. from the Olary railway station in South Australia. (See also "Radium.")

7. **Cobalt.**—This metal was found at Carcoar in New South Wales in 1889, and subsequently at Bungonia, Port Macquarie, and various other places. There was no export of cobalt in 1912, and the total produced since 1860 amounted in value to only a little over £8000. Deposits have been noted in South Australia near Bimbourie, and South Blinman; in Western Australia at Norseman and Kanowna; and at various places in Victoria.

8. **Lead.**—This metal was first noted in New South Wales in 1849, when small specimens of native metal were found by the Rev. W. B. Clarke. At present lead mining *per se* is not practised to any extent in the Commonwealth, the supply of the metal being chiefly obtained in conjunction with silver. In New South Wales the lead contents of the bullion produced within the State amounted in 1912 to 17,251 tons, valued at £264,530. The total lead production to the end of 1912 was 138,192 tons, valued at £2,000,911. In Victoria oxides, sulphides, and carbonates of lead are found in the reefs of most of the goldfields. The deposits are not, however, of sufficient extent to repay the cost of working. In Queensland the deposits are worked chiefly for the silver, copper or gold contents of the ore, the lead produced in 1912 amounting to 3108 tons, valued at £55,667, of which 1956 tons, valued at £35,938, were produced from the mines in the Chillagoe district, 689 tons, valued at £11,713, from Herberton, and 204 tons, valued at £3729, from the Etheridge district. Lead ore to the value of £22,565 was exported from Western Australia in 1912. Complete information is not available as to the lead contents of Tasmanian silver lead ores. At one time South Australia produced a fair amount of lead, £22,303 worth being raised in 1902, but the production rapidly decreased, there having been no output for the last two years.

9. **Mercury.**—In New South Wales mercury was first recorded by the Rev. W. B. Clarke in 1841. Cinnabar has been found in lodes and impregnations at various places, such as Bingara, Clarence River, etc. Up to the present the production of quick-silver has been small, the total being only a little over 1000 lbs. In Victoria native mercury and cinnabar have been found at Silver Creek, a tributary of the Jamieson River. Lodes of cinnabar have been found in Queensland at Kilkivan, and at Black Snake, in the Wide Bay district; about four tons were produced between 1824 and 1891. Between O.K. and Mungana several shows have been prospected with encouraging results. Small quantities have been found disseminated over a large area near Willunga in South Australia.

10. **Manganese.**—Ores of this metal occur in widely separated districts in New South Wales, but the low price of the metal precludes mining to any great extent, and the production to date has been trifling. In Queensland there are extensive deposits at Mount Miller, at Gladstone, and Mount Nansen, near Gympie, the product being utilised chiefly by the Mount Morgan mine. The production from the Mount Miller mine amounted in 1912 to 308 tons of ore, valued at £1281. Small quantities of manganese ore were raised in Victoria during 1912 from mines in the vicinity of Heathcote. Extensive deposits of the ore were mined at Boolcunda in South Australia some years

ago, but latterly the production has ceased. Deposits have also been noted at Kangaroo Island, Quorn, Tumby, and various other parts of the State. In Western Australia ores of the metal are found widely scattered, the black oxide being especially plentiful in the Kimberley district.

**11. Molybdenum.**—In New South Wales molybdenite (associated with bismuth) is obtained at Kingsgate, near Glen Innes, at Deepwater, and at Whipstick, in the Pam-bula division, the export in 1912 being 57 tons, valued at £3706, as compared with 20 tons, valued at £2591, in the previous year. The production in Queensland for 1912 was 102 tons, valued at £17,349, practically the whole of which was contributed by the mines in the Chillagoe field.

**12. Radium.**—(i.) It is reported that there have been several definite discoveries in Australia of the occurrence of minerals containing radium. The discovery at Olary, in South Australia, of carnotite, which is an alteration product of pitchblende, the compound from which radium is obtained, has already been referred to. In 1910 pitchblende was identified in portion of the workings at Olary, and a specimen, exhibiting a high degree of radio-activity, was obtained. This is the first authentic discovery of the mineral pitchblende in Australia. The deposits of radio-active uranium ores found at Radium Hill are now being mined, and the concentrates forwarded to Sydney for treatment at the company's works at Woolwich. In another case a monazite from Pilbara, Western Australia, has been shewn to give off radium emanations. This mineral has been called "pilbarite." Yet another specimen of mineral having the composition of a secondary pitchblende has been discovered by a prospector. The exact place where this specimen was found is uncertain, but it is believed that it came from the New England district of New South Wales. It is stated that its radio-activity is very marked, the mineral being 1 per cent. more active than the Bohemian variety, and that it contains only such elements as were readily separable from one another by the methods used to obtain pure uranium and radium from Bohemian pitchblende. Lastly, it is stated that the ores obtained at the Moonta mines, South Australia, contain from one-tenth to one-fifteenth of the amount of radium found in high-grade pitchblende, and that a product having a fairly high degree of radio-activity can be extracted therefrom with comparative ease.

(ii.) *Production of Radium Bromide.*—At the end of November, 1912, a small quantity of radium bromide was produced at the Radium Hill Co.'s works at Woolwich, Sydney, this being the first occasion on which a marketable amount of this salt has been obtained outside of Europe. It is estimated by the chemist in charge that the present plant at the works is capable of providing £600 worth of radium weekly.

**13. Tungsten.**—Wolfram and scheelite, the principal ores of tungsten, are both mined to a small extent in New South Wales. During 1912 the export of wolfram was 172 tons, valued at £16,584, and of scheelite 56 tons, valued at £4963. Wolfram was mined chiefly at Torrington, in the Deepwater division, and scheelite at Hillgrove. A mine near Omeo, in Victoria, was developed during 1909, and 5 tons of concentrates, valued at £464, were produced during 1912, and 3 tons, valued at £60, produced at Bendoc. In Queensland, tungsten ores are found in several districts, the chief centres of production in 1912 being Chillagoe and Herberton. (See also Bismuth, page 426.) A deposit of wolfram was discovered near Yankalilla in South Australia as far back as 1893, but the production up to date has been small. In the Northern Territory 27 tons of wolfram, valued at £4160, were raised during 1912 in the Wolfram Camp area, and 11 tons, valued at £960, at Yenberrie.

In Western Australia a deposit of wolfram was discovered in the West Kimberley district, about 70 miles to the north-east of Derby; nine tons, valued at £826, were raised during 1911, but there was no production in 1912. Wolfram is mined at various points in Tasmania, the production for 1912 being 66 tons, valued at £6601, obtained chiefly at Avoca and from the Shepherd and Murphy mine at Middlesex. Scheelite has been discovered on King Island in Bass Strait.

14. **Tantalum.**—Tantalite in small quantities has been found in the Greenbushes mineral field of Western Australia for some time past, but recently a lode of fairly extensive proportions was located at the Wodgina tinfield. Up to the end of 1905 the production of this mineral in Western Australia amounted to 73 tons, valued at about £10,000, but early in 1906 it was found that the supply exceeded the demand and production was temporarily stopped; in 1908 a small quantity valued at £400 was exported. About £327 worth was reported as having been raised in the Greenbushes and Pilbara fields during 1909, but none was exported owing to the entire absence of any market. No production was recorded subsequently. Small quantities of the mineral are also found in the Northern Territory.

15. **Uranium.**—This mineral has been discovered in South Australia in the country between Mount Painter and Mount Pitts, about 80 miles east from Farina. The uranium ores occur most frequently in the form of torbernite and autunite, and are found over a considerable area. The discovery is therefore of considerable importance, since ores of this mineral are found to a very limited extent in other parts of the world, and uranium is the chief source from which radium is derived.

In addition to the metals enumerated above there is a large number of others occurring in greater or less degree, while fresh discoveries are being constantly reported.

## (B). NON-METALLIC MINERALS.

### § 10. Coal.

1. **Production in each State.**—(i.) *Historical.* A historical account of the discovery of coal in each State will be found in preceding issues of the Year Book. (See No. III., pp. 515-6.)

(ii.) *New South Wales.* The production in 1912 amounted to 8,885,815 tons, valued at £3,660,015, the highest yet recorded.

(iii.) *Victoria.* During 1912, 593,155 tons of coal were raised, valued at £259,321. Of this total 455,659 tons, valued at £184,056, were raised by the State coal mine at Wonthaggi.

(iv.) *Queensland.* The number of collieries contributing to the output in 1912 was 48, and the quantity of coal raised was 902,166 tons, valued at £338,264, as against 891,568 tons, valued at £323,998, for the preceding year. Thirty-four collieries were working in the Ipswich district, seven on the Darling Downs, and seven in the Central district. The industry is at present in very satisfactory position in the northern State, and owing to the wide area over which the deposits stretch, practically no limit can be set to its possibilities of extension.

(v.) *Western Australia.* Six collieries were in operation on the Collie field during 1912, and the output for the year was 295,079 tons, or about 45,000 tons more than in 1911. The improvement is due to the more general use of up-to-date machinery.

(vi.) *Tasmania.* The principal collieries in Tasmania are the Cornwall and Mount Nicholas, the former producing 22,000 and the latter 30,000 tons out of a total yield in 1911 of 57,067 tons.

The quantity and value of coal produced in each State and in the Commonwealth at various periods since 1881, are shewn in the following table:—

### PRODUCTION OF COAL, AUSTRALIA, 1881 to 1912.

| Year.     | N.S.W.    | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.   | C'w'lth.   |
|-----------|-----------|-----------|---------|----------|----------|--------|------------|
| QUANTITY. |           |           |         |          |          |        |            |
|           | Tons.     | Tons.     | Tons.   | Tons.    | Tons.    | Tons.  | Tons.      |

| 1901      | 2,178,929 | 147,228   | 189,877 | ...      | 68,561   | 18,175 | 2,602,770  |
| 1908      | 3,353,093 | 64,778    | 244,922 | ...      | 75,694   | 24,427 | 3,762,914  |
| 1909      | 2,615,596 | 76,945    | 270,726 | ...      | 90,965   | 26,464 | 3,083,696  |
| 1910      | 3,009,657 | 189,254   | 322,822 | ...      | 113,699  | 48,609 | 3,684,041  |
| 1911      | 3,167,165 | 301,141   | 323,998 | ...      | 111,154  | 26,214 | 3,929,672  |
| 1912      | 3,660,015 | 259,321   | 338,264 | ...      | 135,857  | 24,568 | 4,418,025  |

The Victorian figures for 1912 include about 4000 tons of brown coal, the bulk of which was raised at Altona.

**2. Distribution and Quantity of Coal in each State.**—(i.) *New South Wales.* Estimates have from time to time been made as to the total quantity of coal available for working in the deposits in New South Wales, and while these naturally differ to some extent, they agree in placing the amount at well over a thousand million tons, without taking into consideration the deposits existing below a depth of 4000 feet. According to Mr. E. F. Pittman, the coal-bearing rocks of New South Wales may be classified as follows:—

### COAL-BEARING ROCKS OF NEW SOUTH WALES.

| Geological Age.                     | Maximum Thickness of Coal-bearing Strata. | Locality.                                 | Character of Coal.                                   |
|-------------------------------------|---|---|--|
| I. Tertiary—Eocene to Pliocene      | Approx. 100 ft.                           | Kiandra, Gulgong, and Chouta Bay          | Brown coal or lignite.                               |
| II. Mesozoic—Triassic or Trias-Jura | 2,500 „                                   | Clarence and Richmond Rivers              | Coal suitable for local use only.                    |
| III. Palæozoic—Permo-Carboniferous  | 13,000 „                                  | Northern, Southern and Western Coalfields | Good coal, suitable for gas, household and steaming. |
| IV. Palæozoic—Carboniferous         | 10,000 „                                  | Stroud, Bullah Dellah.                    | Very inferior coal with bands; of no value.          |

In regard to the Tertiary deposits, it may be noted that no serious attempt has been made to use the coal as fuel in New South Wales. At Kiandra a deposit of lignite was found to possess a maximum thickness of 30 feet, but as a general rule the seams vary from 3 to 4 feet in thickness. The Triassic or Trias-Jura deposits in the Clarence and Richmond districts contain numerous seams, but the coal is largely intersected by bands, while its large percentage of ash renders it unfit for use as fuel for industrial purposes. These beds extend under the great western plains but the presence of artesian water

precludes the possibility of their being worked. The Clarence basin extends into Queensland, and at Ipswich thick and valuable seams of coal are worked. It is in the Permo-Carboniferous division that the great productive coal seams of the State are found, the area which they cover being estimated at about 16,550 square miles. The deepest part of the basin is somewhere in the vicinity of Sydney, where the "Sydney Harbour Colliery" is working the top seam at a depth of 2884 feet. Towards the north, south and west the seams rise towards the surface, and outcrop in the neighbourhood of Newcastle, Bulli and Lithgow. The coal from the various districts embraced in this division differs considerably in quality—that from the Newcastle district being especially suitable for gas-making and household purposes, while the product of the Southern (Illawarra) and Western (Lithgow) is an excellent steaming coal. At the present time the Greta coal seams are being extensively worked between West Maitland and Cessnock, and this stretch of country, covering a distance of fifteen miles, is now the most important coal mining district in Australasia. The Permo-Carboniferous measures have in various places been disturbed by intrusions of volcanic rocks, which in some instances have completely cindered the seams in close proximity to the intrusive masses, while in other instances the coal has been turned into a natural coke, some of which has realised good prices as fuel.

The table hereunder gives the yields from the various divisions at intervals from 1881 to 1912:—

#### COAL RAISED IN NEW SOUTH WALES, 1881 to 1912.

| District.    | 1881.     |         | 1901.     |           | 1905.     |           | 1912.     |           |

| Total ...    | 1,769,597 | 603,248 | 5,968,426 | 2,178,929 | 6,632,138 | 2,003,461 | 9,885,815 | 3,660,015 |

*Sydney Harbour Colliery.* This colliery possesses considerable interest from the circumstance that its workings are amongst the deepest in the world. Extended reference to the history of its opening will be found in preceding Year Books. (See No. VI., page 504.)

(ii.) *Victoria.* The deposits of black coal in Victoria occur in the Jurassic system, the workable seams, of a thickness ranging from two feet three inches to six feet, being all in the Southern Gippsland district.

Deposits of brown coal and lignite of immense extent occur in gravels, sands, and clays of the Cainozoic period throughout Gippsland, Mornington Peninsula, Werribee Plains, Gellibrand, and Barwon and Moorabool basins. In the Latrobe Valley the beds reach a thickness of over 800 feet. When dried, the material makes good fuel, but owing to its excessive combustibility and friability requires to be consumed in specially constructed grates. Attempts have been made to manufacture briquettes from the brown coal, but so far without any great measure of success. At the Melbourne and Altona Colliery Company's mine at Altona, 3942 tons of brown coal, valued at £850, were raised in 1912.

The output of coal from the chief Victorian collieries during the last ten years was as follows:—

#### PRODUCTION OF COAL IN VICTORIA, 1903 to 1912.

| Year. | State Coal Mine. | Outtrim Howitt Company | Jumbunna Coal Company | Coal Creek Proprietary. | Silkstone Co-operative Company | Austral Coal. | Other Companies. | Total Production. | Value.  |
|-------|------------------|------------------------|-----------------------|-------------------------|--------------------------------|---------------|------------------|-------------------|---------|
|       | Tons.            | Tons.                  | Tons.                 | Tons.                   | Tons.                          | Tons.         | Tons.            | Tons.             | £       |
| 1903  | ...              | 20,602                 | 18,517                | 20,727                  | 4,354                          | ...           | 5,661            | 69,861            | 43,645  |

| 1908  | ...              | 47,633                 | 58,552                | ...                     | 6,967                          | ...           | 810              | 113,962           | 64,778  |
| 1909  | 2,946            | 44,156                 | 65,945                | 3,265                   | ...                            | 10,631        | 1,730            | 128,673           | 76,945  |
| 1910  | 201,053          | 46,832                 | 61,954                | 10,968                  | ...                            | 36,052        | 13,050           | 369,909           | 189,254 |
| 1911  | 506,059          | 28,359                 | 57,397                | 4,589                   | ...                            | 34,607        | 28,987           | 659,998           | 301,141 |
| 1912  | 455,659          | 24,326                 | 53,306                | 4,829                   | ...                            | 31,506        | 23,529           | 593,155           | 259,321 |

Included in the total "for other companies" is an amount of 16,108 tons raised by the Powlett North Woolamai Collieries. The figures also include about 4000 tons of brown coal, the bulk of which was raised at Altona.

(iii.) *South Australia.* The coal from Leigh's Creek in South Australia is subject to similar disabilities to the Victorian brown coal, and until some means are devised of overcoming these, production will probably languish.

(iv.) *Queensland.* In Queensland the coal-bearing strata are of vast extent and wide distribution, being noted under the greater portion of the south-eastern districts, within 200 miles of the sea, as far north as Cooktown, and under portions of the far western interior. The Ipswich beds are estimated to occupy about 12,000 square miles of country, while the Burrum fields occupy a considerably larger area. At Callide, fifty miles west of Gladstone, a seam of coal free from bands has been struck in a shaft only sixty feet deep, and borings have proved the deposit to be of considerable magnitude. The beds in the Cook district are estimated to comprise rather more than 1000 square miles, but coal measures extend to the south-west far beyond Laura and to the north of the railway. Extensive beds occur in the basin of the Fitzroy River, in the Broomsound district, and at the Bowen River. Amongst other places where the mineral is found may be enumerated Clermont, the Palmer River, Tambo, Winton, Mount Mulligan, and the Flinders River. Boring operations have proved the existence of seams of workable coal for some distance on both sides of the Dawson River. A bituminous coal is yielded by the Ipswich seams, those of the Darling Downs yield a cannel, while anthracite of good quality is furnished by the Dawson River beds.

The quantity and value of coal raised in Queensland at various periods since 1861 were as shewn below:—

#### PRODUCTION OF COAL IN QUEENSLAND, 1861 to 1912.

| Year ... | ... | ...  | ... | 1861.  | 1871.  | 1881.  | 1891.   | 1901.   | 1912.   |
|----------|-----|------|-----|--------|--------|--------|---------|---------|---------|
| Quantity | ... | Tons |     | 14,212 | 17,000 | 65,612 | 271,603 | 539,472 | 902,166 |
| Value    | ... | £    |     | 9,922  | 9,407  | 29,033 | 128,198 | 189,877 | 338,264 |

At present coal mining in Queensland is in a very satisfactory position, the increasing volume of the trade being chiefly due to the action of the Government in granting concessions to vessels coaling at local ports.

The distribution of production during the last two years was as follows:—

#### QUEENSLAND COLLIERIES, 1911 and 1912.

| Collieries.                     | 1911.        |                               | 1912.        |                               |
|---------------------------------|--------------|-------------------------------|--------------|-------------------------------|

| Clermont ... ..                 | 67,325       | 7 6                           | 79,501       | 7 6                           |
| Total ... ..                    | 891,568      | 7 3                           | 902,166      | 7 6                           |

Of the total production in 1912, 299,055 tons, or nearly one third, were shipped as bunker coal.

(v.) *Western Australia.* The coal seams in Western Australia belong to the Carboniferous, Mesozoic, and Post-tertiary ages. Most of the coal contains a large proportion of moisture, and belongs partly to the hydrous bituminous and partly to the lignite class. The only coalfield at present worked is at Collie, in the Mesozoic beds of the south-west. The coal produced is bright and clean, but very fragile when free from moisture. The increased output for the last few years is partly due to the establishment of a bunkering trade at Bunbury and Fremantle, and partly to the employment of improved machinery. The production from this field since 1901 was as follows:—

#### PRODUCTION OF COAL IN WESTERN AUSTRALIA, 1901 to 1912.

| Year ... ..   | 1901.   | 1906.   | 1907.   | 1908.   | 1909.   | 1910.   | 1911.   | 1912.   |
|---------------|---------|---------|---------|---------|---------|---------|---------|---------|
| Quantity Tons | 117,836 | 149,755 | 142,373 | 175,248 | 214,302 | 262,166 | 249,890 | 295,079 |
| Value £       | 68,561  | 57,998  | 55,158  | 75,694  | 90,965  | 113,699 | 111,154 | 135,857 |

(vi.) *Tasmania.* In Tasmania coal occurs in the following geological periods:—  
 (1) Permo-Carboniferous: Lower Coal Measures. (2) Mesozoic: Upper Coal Measures.  
 (3) Tertiary: Brown Coal and Lignite deposits. Permo-Carboniferous coal is found at Avoca, Mt. Nicholas and Fingal, Thomson's Marshes, Langloh, Seymour, York Plains, Mike Howe's Marsh, Longford, Colebrook, Schouten Island, Spring Bay and Prosser's Plains, Compton and Old Beach, Lawrenny, Longhole, Sandfly, Ida Bay, Hastings and Southport, Recherche and South Coast, Tasman's Peninsula. Deposits of lignite and brown coal are plentiful in beds of Tertiary age, but they have not been exploited to any extent. An estimate gives the approximate quantity of coal available as sixty-five million tons, of which eleven millions are in the Lower Coal Measures and fifty-four millions in the Upper Measures, exclusive of an unknown quantity in strata fringing the Central Tiers.

### PRODUCTION OF COAL IN TASMANIA, 1901 to 1912.

| District.         | 1901.  | 1906.  | 1907.   | 1908.  | 1909.  | 1910.  | 1911.  | 1912.  |

The bulk of the output in 1912 was raised from the Cornwall and Mt. Nicholas mines, which produced 22,353 and 28,717 tons respectively.

**3. Production of Coal in Various Countries.**—The total known coal production of the world in 1911 amounted to about 1140 million tons (exclusive of brown coal or lignite), towards which the Commonwealth contributed 10 million tons, or less than 1 per cent. The following table shews the production of the British Empire and the chief foreign countries in units of 1000 tons in 1901 and during each of the years from 1907 to 1911:—

### COAL PRODUCTION, BRITISH EMPIRE, 1901 and 1907 to 1911.

| Year.    | United Kingdom. | British India. | Canada.    | Australian C'wealth. | New Zealand. | Union of S. Africa. |

### COAL PRODUCTION, FOREIGN COUNTRIES, 1901 and 1907 to 1911.

| Year.    | Russian Empire. | Sweden.    | German Empire. | Belgium.   | France.    | Spain.     | Austria-Hungary. | Japan.     | United States. |
|----------|-----------------|------------|----------------|------------|------------|------------|------------------|------------|----------------|
|          | 1000 tons.      | 1000 tons. | 1000 tons.     | 1000 tons. | 1000 tons. | 1000 tons. | 1000 tons.       | 1000 tons. | 1000 tons.     |
| 1901 ... | 16,215          | 268        | 106,795        | 21,856     | 31,126     | 2,609      | 12,895           | 8,885      | 261,875        |
| 1907 ... | 25,583          | 300        | 140,885        | 23,324     | 35,411     | 3,637      | 14,881           | 13,656     | 428,896        |
| 1908 ... | 25,487          | 300        | 145,298        | 23,179     | 36,044     | 3,823      | 14,843           | 14,587     | 371,288        |
| 1909 ... | 26,232          | 243        | 146,397        | 23,140     | 36,519     | 3,799      | 14,868           | 14,806     | 411,432        |
| 1910 ... | 24,460          | 298        | 150,372        | 23,532     | 37,030     | 3,751      | 14,834           | 15,429     | 447,854        |
| 1911 ... | 22,824          | 307        | 158,164        | 22,683     | 38,023     | ...        | 15,000           | 15,763     | 443,025        |

Including New Zealand the production from Australasia takes second place amongst the possessions of the British Empire, British India coming first in order.

**4. Export of Coal.**—The exports of coal from the Commonwealth are practically confined to New South Wales.

The total quantity of coal of Australian production (exclusive of bunker coal) exported from the Commonwealth to other countries in 1912 was 2,152,385 tons, valued at £1,147,013, of which amount 2,153,600 tons, valued at £1,145,545, were exported from New South Wales. The quantity of bunker coal taken by oversea vessels was 1,670,841 tons, of which 1,388,000 tons were taken from New South Wales.

In the following table will be found the quantity and value of the exports at decennial intervals since 1881 and during the last five years. The figures for New South Wales are given on the authority of the Mines Department of that State, and include both bunker coal and coal exported from New South Wales to other States of the Commonwealth :—

#### EXPORTS OF NEW SOUTH WALES COAL, 1881 to 1912.

| Year.                  | 1881. | 1891. | 1901. | 1907. | 1909. | 1910. | 1911. | 1912. |
|------------------------|-------|-------|-------|-------|-------|-------|-------|-------|
| Quantity ... 1000 tons | 1,080 | 2,514 | 3,471 | 5,744 | 4,394 | 4,690 | 5,024 | 6,053 |
| Value ... £1000        | 417   | 1,807 | 1,682 | 2,662 | 2,234 | 2,459 | 2,664 | 3,233 |

The principal oversea countries to which coal was exported from New South Wales during the year 1912 were as shewn hereunder. The quantity and value refer strictly to exports, and exclude bunker coal :—

#### DESTINATION OF NEW SOUTH WALES OVERSEA EXPORTS OF COAL, 1912.

| Country.              | Quantity. | Value.  | Country.          | Quantity. | Value.  |
|-----------------------|-----------|---------|-------------------|-----------|---------|
|                       | Tons.     | £       |                   | Tons.     | £       |
| Chile ... ..          | 850,017   | 463,231 | Peru ... ..       | 65,447    | 32,644  |
| Philippine Islands... | 104,570   | 54,932  | Hawaii... ..      | 61,979    | 31,782  |
| Straits Settlements   | 113,376   | 62,005  | United States ... | 103,609   | 55,580  |
| Fiji ... ..           | 30,256    | 14,756  | India ... ..      | 123,330   | 62,045  |
| New Zealand ... ..    | 387,391   | 209,505 | Java ... ..       | 211,316   | 105,905 |

The quantity of bunker coal taken from New South Wales by oversea vessels was about 1,388,000 tons, valued at £775,000.

The distribution of the total output from New South Wales collieries during the last five years was as follows; the particulars given of amounts exported include coal shipped as bunker coal :—

#### DISTRIBUTION OF TOTAL OUTPUT OF NEW SOUTH WALES COAL, 1908 to 1912.

| Year.       | Exports to Australasian Ports. | Exports to other Ports. | Local Consumption. | Total.    |
|-------------|--------------------------------|-------------------------|--------------------|-----------|
|             | Tons.                          | Tons.                   | Tons.              | Tons.     |
| 1908 ... .. | 2,715,310                      | 3,383,366               | 3,048,349          | 9,147,025 |
| 1909 ... .. | 2,200,769                      | 2,192,834               | 2,626,276          | 7,019,879 |
| 1910 ... .. | 2,478,497                      | 2,211,936               | 3,483,075          | 8,173,508 |
| 1911 ... .. | 2,525,776                      | 2,498,304               | 3,667,524          | 8,691,604 |
| 1912 ... .. | 3,096,179                      | 2,956,939               | 3,832,697          | 9,885,815 |

The figures quoted above are given on the authority of the New South Wales Mines Department. Owing to the abolition of the record of interstate trade it is impossible to give the quantities forwarded to each of the States of the Commonwealth.

5. **Consumption of Coal in Australia.**—An estimate of the consumption of coal in the Commonwealth may be arrived at by adding the imports to the home production, and deducting the exports (including bunker coal taken by oversea vessels). The following table shews the consumption of coal in Australia, computed in the manner specified, for the last five years:—

## CONSUMPTION OF COAL IN AUSTRALIA, 1908 to 1912.

| Year.       | Quantity of Coal Consumed. |                                |                             |           |
|-------------|----------------------------|--------------------------------|-----------------------------|-----------|
|             | Home Produce.              | Produce of the United Kingdom. | Produce of Other Countries. | Total.    |
|             | Tons.                      | Tons.                          | Tons.                       | Tons.     |
| 1908 ... .. | 6,087,000                  | 4,000                          | 11,000                      | 6,102,000 |
| 1909 ... .. | 5,367,000                  | 1,000                          | 11,000                      | 5,379,000 |
| 1910 ... .. | 6,897,000                  | 110,000                        | 198,000                     | 7,205,000 |
| 1911 ... .. | 7,407,000                  | 7,000                          | 4,000                       | 7,418,000 |
| 1912 ... .. | 7,907,000                  | 1,500                          | 14,000                      | 7,922,500 |

The figures for 1910 are, of course, abnormal, the comparatively heavy importation from the United Kingdom and foreign countries being due to uncertainty in the local supply on account of the strike of coal-miners in New South Wales. Of the total importation from foreign countries in that year, India supplied 138,000 tons, and Japan 28,000 tons.

6. **Price of Coal.**—(i.) *New South Wales.* The price of coal in New South Wales has been subject to considerable fluctuation since the date of first production. Up to the end of 1857 the average value of the total output was 11s. 10d. per ton. Next year the value had risen to nearly 15s., declining thereafter until in 1871 the price realised was 7s. From 1872 to 1879 there was a rise in value to 12s. Between 1882 and 1891 the price ranged between 8s. and 10s. From 1891 onwards there was a steady decline until 1898, when the average was 5s. 4d. Henceforward prices rose again until 1902, when 7s. 5d. was the average. A decline then set in until 1905, when the price stood at a little over 6s., followed by a rise of one penny in 1906, and a further rise of eightpence in 1907. In 1908 the average was 7s. 4d., and in 1912, 7s. 5d. per ton. The price of New South Wales coal depends on the district from which it is obtained, the northern (Newcastle) coal always realising a much higher rate than the southern or western product. The average rate in each district during the last five years was as follows:—

## PRICE OF COAL IN NEW SOUTH WALES (PER TON), 1908 to 1912.

| Year.       |     |     |     | Northern District. | Southern District. | Western District. |
|-------------|-----|-----|-----|--------------------|--------------------|-------------------|
|             |     |     |     | s. d.              | s. d.              | s. d.             |
| 1908 ... .. | ... | ... | ... | 8 0.78             | 5 10.91            | 4 5.52            |
| 1909 ... .. | ... | ... | ... | 8 3.48             | 5 11.91            | 4 9.34            |
| 1910 ... .. | ... | ... | ... | 8 1.44             | 6 1.76             | 5 5.56            |
| 1911 ... .. | ... | ... | ... | 8 0.13             | 6 1.88             | 5 0.72            |
| 1912 ... .. | ... | ... | ... | 8 1.15             | 6 1.06             | 4 11.98           |

(ii.) *Victoria.* In Victoria the average price of coal up to the 31st December, 1890, was 19s. 3d. per ton. In 1895 the price was still as high as 12s. 2d., but in the following five years there was a serious decline, the value in 1900 being quoted at 9s. 7d. per ton. In 1901, however, there was an astonishing rise, the figure being as high as 14s. 7d. Since that year, however, the price again declined, the average for 1905 being 10s. 2d.; for 1909, 12s.; for 1911, 9s. 3d.; and for 1912, 8s. 9d. These averages are exclusive of brown coal, the production of which in 1912 was valued at about 4s. 4d. per ton.

(iii.) *Queensland.* Prices in the principal coal-producing districts during the last five years were as follows:—

**PRICE OF COAL, QUEENSLAND, 1908 to 1912.**

| District.                    | Value at Pit's Mouth. |                   |                   |                   |                   |
|------------------------------|-----------------------|-------------------|-------------------|-------------------|-------------------|
|                              | 1908.                 | 1909.             | 1910.             | 1911.             | 1912.             |
|                              | Per ton.<br>s. d.     | Per ton.<br>s. d. | Per ton.<br>s. d. | Per ton.<br>s. d. | Per ton.<br>s. d. |
| Ipswich ... ..               | 6 6½                  | 6 8½              | 6 11              | 6 5               | 6 7               |
| Darling Downs ... ..         | 9 5½                  | 9 7¾              | 10 5½             | 10 10             | 10 10½            |
| Wide Bay and Maryborough ... | 11 7½                 | 11 6              | 11 9              | 10 4½             | 10 6              |
| Rockhampton ... ..           | ...                   | 4 6               | 8 0               | 7 6               | 7 6               |
| Clermont ... ..              | ...                   | ...               | ...               | ...               | ...               |

(iv.) *Western Australia.* The average price of the Collie (Western Australia) coal up to the end of 1901 was 9s. 4d. per ton, the price in 1901 being 11s. 7d. In 1902 the average stood at 12s. 3d., and from that time the price fell steadily until 1906, when it was 7s. 7½d. per ton. In 1907, the average price was 7s. 8¾d.; in 1908, 8s. 7½d.; in 1909, 8s. 5¾d.; in 1910, 8s. 8d.; in 1911, 8s. 10d. per ton.

(v.) *Tasmania.* The average price per ton of coal at the pit's mouth in Tasmania was 8s. in 1901. In 1902 it was 8s. 7d.; in 1903, 8s. 9d.; in 1904 and 1905, 9s. 8d.; in 1906, 9s. 9d.; in 1907, 1908, and 1909, 8s.; in 1910, 11s. 9d.; and in 1911 and 1912, 9s. 2d.

**7. Price of Coal in other Countries.**—According to a report published by the Board of Trade the average value of coal at the pit's mouth in the five principal coal-producing countries of the world, for the five years ended 1911, was as follows:—

**PRICES OF FOREIGN COAL, 1907 to 1911.**

| Year.       | United Kingdom.   | Germany.          | France.           | Belgium.          | United States.    |
|-------------|-------------------|-------------------|-------------------|-------------------|-------------------|
|             | Per ton.<br>s. d. | Per ton.<br>s. d. | Per ton.<br>s. d. | Per ton.<br>s. d. | Per ton.<br>s. d. |
| 1907 ... .. | 9 0               | 9 8¾              | 12 3              | 13 8½             | 5 11½             |
| 1908 ... .. | 8 11              | 10 3½             | 12 11½            | 13 1½             | 5 11½             |
| 1909 ... .. | 8 0½              | 10 2½             | 12 5½             | 11 8½             | 5 7½              |
| 1910 ... .. | 8 2½              | 9 11½             | 12 3½             | 11 10½            | 5 10½             |
| 1911 ... .. | 8 1½              | 9 9½              | *                 | 12 0              | 5 10½             |

\* Not available.

The price of coal at the pit's mouth in the principal British possessions is averaged by the same authority as follows:—

**PRICE OF COAL, BRITISH POSSESSIONS, 1907 to 1911.**

| Year.       | British India.    | C'wealth of Australia. | New Zealand.      | Canada.           | Union of Sth. Africa. |
|-------------|-------------------|------------------------|-------------------|-------------------|-----------------------|
|             | Per ton.<br>s. d. | Per ton.<br>s. d.      | Per ton.<br>s. d. | Per ton.<br>s. d. | Per ton.<br>s. d.     |
| 1907 ... .. | 4 8               | 6 10                   | 10 7              | 10 8½             | 10 2½                 |
| 1908 ... .. | 5 3               | 7 4½                   | 10 4½             | 10 8              | 6 9½                  |
| 1909 ... .. | 4 8½              | 7 6½                   | 10 10½            | 10 10½            | 6 3½                  |
| 1910 ... .. | 4 1               | 7 6½                   | 11 1½             | 10 8½             | 5 10½                 |
| 1911 ... .. | 3 11½             | 7 5½                   | 10 10½            | 10 9              | 5 8½                  |

8. **Employment and Accidents in Coal Mining.**—The number of persons employed in coal mining in each of the States during the year 1911 is shewn below. The table also shews the number of persons killed and injured, with the proportion per 1000 employed, while further columns are added shewing the quantity of coal raised for each person killed and injured, this being a factor which must be reckoned with in any consideration of the degree of risk attending mining operations.

Returns published by the Board of Trade, England, give the total known number of persons engaged in mining and quarrying throughout the world as  $6\frac{1}{2}$  millions, more than one-half of whom were employed in coal mining, the number in the United Kingdom being 1,033,000; the United States, 725,000; Germany, 694,000; France, 197,000; Belgium, 144,000; Austria, 131,000; and India, 116,000.

Recent returns shew the rate in the United Kingdom in respect of deaths through accidents in coal mines as 1.43, and for the British Empire 1.48 per 1000 persons employed in coal mines. For France the rate is given as 1.17, for Germany 2.30, and the United States 3.35. For foreign countries generally the rate is stated at 2.48 per 1000.

#### EMPLOYMENT AND ACCIDENTS IN COAL MINING, 1912.

| State.                | Persons Employed in Coal Mining. | No. of Persons. |          | Proportion per 1000 Employed. |          | Tons of Coal Raised for Each Person. |          |
|-----------------------|----------------------------------|-----------------|----------|-------------------------------|----------|--------------------------------------|----------|
|                       |                                  | Killed.         | Injured. | Killed.                       | Injured. | Killed.                              | Injured. |
| New South Wales ...   | 17,795                           | 30              | 81       | 1.70                          | 4.55     | 330,000                              | 122,000  |

| Queensland ...        | 2,019                            | ...             | 45       | ...                           | 22.29    | 296,000                              | 20,000   |
| Western Australia ... | 542                              | ...             | 58       | ...                           | 107.00   | ...                                  | 5,000    |
| Tasmania ...          | 155                              | ...             | 2        | ...                           | 13.00    | ...                                  | 27,000   |
| Commonwealth          | 21,997                           | 32              | 205      | 1.05                          | 9.32     | 367,000                              | 57,000   |

### § 11. Coke.

1. **Production of Coke.**—Notwithstanding the large deposits of excellent coal in Australia, there is at the present time a fairly considerable amount of coke imported from abroad, the oversea import during the year 1912 amounting to 15,588 tons, valued at £17,694, the bulk of which came from Germany, and was taken chiefly by South Australia and Western Australia. The table hereunder gives the production in New South Wales during the last five years:—

#### COKE MADE IN NEW SOUTH WALES, 1908 to 1912.

| Year.              | 1908.    | 1909.    | 1910.    | 1911.     | 1912.    |
|--------------------|----------|----------|----------|-----------|----------|
| Quantity ... Tons  | 283,873  | 204,274  | 282,337  | 264,687   | 241,159  |
| Value, total ... £ | 199,933  | 137,194  | 189,069  | 184,337   | 162,454  |
| Value per ton ...  | 14s. 1d. | 13s. 5d. | 13s. 4d. | 13s. 11d. | 13s. 5d. |

The falling-off in the returns for 1909 is, of course, due to the shortage of supplies occasioned by the coal strike.

A small quantity of coke is made in Queensland, but the bulk of that used in ore reduction is imported, mainly from New South Wales. The following table shews the amount manufactured locally, and the amount imported during the last five years; the quantities imported include shipments landed from other States of the Commonwealth.

GRAPHS SHEWING VALUES OF THE PRINCIPAL MINERALS PRODUCED IN THE  
COMMONWEALTH, 1842 to 1912.

(See pages—for gold, 406; silver, 413; zinc, 422; copper, 417.)

**EXPLANATION OF GRAPHS**—The values shewn in the above diagrams are those of the total Commonwealth production of certain of the most important minerals in successive years from 1842 to 1912.

The base of each small square represents an interval of one year, and the vertical height represents in the case of gold £1,000,000, and in the case of silver, zinc and copper £200,000.

GRAPHS SHEWING VALUES OF THE PRINCIPAL MINERALS PRODUCED IN THE  
COMMONWEALTH, 1842 to 1912.

(See pages 430 for coal ; 420, tin ; and 404 total mineral production.)

EXPLANATION OF GRAPHS—The values shewn in the above diagrams are those of the total Commonwealth production of certain of the most important minerals in successive years from 1842 to 1912.

The base of each small square represents an interval of one year, and the vertical height represents in the case of coal and tin £200,000, and in the case of total mineral production £1,000,000.

**QUEENSLAND—COKE MANUFACTURED LOCALLY AND IMPORTED, 1908 to 1912.**

| Year.                            | 1908.  | 1909.  | 1910.   | 1911.  | 1912.  |
|----------------------------------|--------|--------|---------|--------|--------|
| Manufactured locally ... .. tons | 10,684 | 8,633  | 11,188  | 35,025 | 38,136 |
| Imported ... .. „                | 58,804 | 55,559 | *32,054 | †      | †      |

\* Nine months only. † Not available.

The development in smelting operations in Queensland is reflected in the increased consumption of coke. Of the total production shewn above for 1912, 4539 tons were made in coke works, and the balance at gasworks.

**§ 12. Oil Shale and Mineral Oils.**

1. **Production of Shale.**—(i.) *New South Wales.* As pointed out by Mr. E. F. Pittman, the name kerosene shale has been rather inaptly applied to a variety of torbanite, cannel, or boghead mineral found at various geological horizons in New South Wales. The mineral does not, as a rule, split in parallel layers, the fracture being rather of a conchoidal type. Pure samples have been found to contain over 89 per cent. of volatile hydro-carbons. The discovery of the mineral in New South Wales dates probably as early as 1802. Its occurrence in the Hartley Vale district was noted by Count Strzelecki in 1845. The mineral has been found at several places in the Upper Coal Measures, and in at least two in the Lower Carboniferous. Production on anything like a large scale commenced in 1868, when about 17,000 tons, valued at £48,000, were raised. The production in 1912 amounted to 86,018 tons, valued at £34,770, as compared with 75,104 tons, valued at £36,980, in 1911. Of the total raised in 1912, 40,185 tons were produced in the Northern District, and 45,833 in the Western District. The large output in the Northern District as compared with the preceding year was due to increased activity of the mine near Murrurundi, owned by the British Australian Oil Company. In the Western District the three producing mines were at New Hartley, Genowlan and Crown Ridge, in the Capertee District.

(ii.) *Victoria.* Up to the present no extensive deposit of oil shale has been located in Victoria.

(iii.) *Queensland.* The discovery of natural gas and traces of oil in a deep bore at Roma has fostered the hope that energetic prospecting will lead to the discovery of mineral oil in quantity in this locality. Oilbearing shales are common in many parts of the State. The deposit at Duaringa on the Central railway line shewed a thickness of 6 feet, and contained about 30 gallons of oil to the ton. Inflammable gas and a little oil have been noted in bores put down for coal on the Dawson River. There are shale deposits at Monduran Creek, near Gladstone, Casuarina Island, Redbank plains in the Ipswich District and Murphy's Creek, near Toowoomba.

(iv.) *South Australia.* In this State large areas of bituminous shale, of which the boundaries are only approximately known, occur at Leigh's Creek and Lake Phillipson. Reference to the mineral known as coorongite is made in sub-section 13. Specimens of bitumen have been discovered on Kangaroo Island, and it was supposed that they were the product of a petroleum-bearing area. The Government Geologist states, however, that the island strata are not of such nature as to support this supposition. In regard to the mainland area it is argued by some investigators that the bores so far put down have not been carried to sufficient depth to fairly test the strata.

(v.) *Western Australia.* A deposit of carbonaceous shale of considerable thickness is known to exist at Coolgardie, but the mineral has not yet been raised in any quantity.

(vi.) *Tasmania.* Tasmanite shale has been discovered in the basins of the Mersey, Don, and Minnow Rivers, and the Government geologist estimates the probable capacity of the beds at 12,000,000 tons. The crude oil content of average quality shale has been estimated at 40 gallons to the ton. A small quantity of shale was raised in 1910, but

there was no production in 1911 or 1912. At present mining for the product is only in the developmental stage, but there is apparently no reason why the industry should not in time become of considerable importance.

(vii.) *Northern Territory.* The existence of oil shale has been reported for many years in the Boroloola district, while several oil licenses have been applied for in the Victoria River district. Experts, however, have pronounced unfavourably on the prospects.

(viii.) *Papua.* An expert has reported that the deposits of oil-bearing shale can be worked at a profit, and oil of a satisfactory quality has been obtained from two comparatively shallow bores.

2. **Export of Shale.**—In 1912 New South Wales exported to New Zealand 285 tons of shale, valued at £720.

3. **Shale Oils Bounties.**—The Shale Oils Bounties Act 1910 provides for the payment of bounties on certain goods manufactured in Australia from Australian shale on or after the 1st July, 1910, and before the 1st July, 1913. The total amount to be made available for bounties under this Act is £50,000. Particulars are given in the following tabular statement:—

**COMMONWEALTH SHALE OILS BOUNTIES—AMOUNT PAYABLE.**

| Description of Goods.    | Rate of Bounty.  | Maximum Amounts which may be paid during the Financial Year 1910-11. | Maximum Amounts which may be paid during each of the Financial Years 1911-12 and 1912-13. | Date of Expiry of Bounty. |
|--------------------------|------------------|--|---|---------------------------|
| Kerosene* ...            | 2d. per gallon.  | £ 8,000  | £ 16,000  | } 30th June, 1913.        |
| Refined paraffin wax ... | 2s. 6d. per cwt. | 2,000  | 4,000   |                           |

\* The product of shale, having a flashing point of not lower than 73 degrees Fahrenheit, determined by the "Abel Pensky" test apparatus in manner prescribed.

During the year ended 30th June, 1913, the Commonwealth Oil Corporation, at Hartley Vale, New South Wales, received bounty to the amount of £804 on kerosene, and £882 on refined paraffin wax, while the British Australian Oil Company received £1988 on kerosene, and £86 on paraffin wax.

### § 13. Other Non-Metallic Minerals.

1. **Alunite.**—Probably the most remarkable deposit of alunite in the world occurs at Bullahdelah, in the county of Gloucester, New South Wales, a large proportion of a low bluff ridge in the district being composed of this mineral. The deposits are worked by quarrying, and up to the end of 1912, 39,035 tons had been exported, valued at £119,543, the exports for the year 1912 being 3425 tons, valued at £13,700.

Deposits of a high-class alunite are reported to have been discovered near Sunbury, in Victoria.

In South Australia an extensive deposit of the mineral was located in 1913 at Carrickalinga Head, on the coast north of Normanville, and within a short distance of Adelaide. It is stated that the specimens so far analysed have proved richer in valuable constituents than any similar find yet recorded.

2. **Asbestos.**—This substance has been found in various parts of Australia, but up to the present has not been produced in any considerable quantity. In New South Wales the deposits at Jones' Creek, in the Gundagai division, were opened up during the year 1909 and a trial parcel of 15 tons shipped to Germany. There was, however, no record of production in 1912. In Western Australia what may prove to be a valuable deposit of the fibrous chrysolite variety has been located at Tambourah, on the West Pilbara gold-field, and in 1909 £154 worth of this mineral was raised. In 1899 Tasmania raised 200 tons, valued at £363, but there has been no production during the last ten years.

Deposits of asbestos of the mountain leather and mountain cork varieties have been discovered at Oodlawirra, while deposits of a good blue variety have been discovered near Hawker, and about 23 miles from Eudunda, in South Australia.

3. **Barytes.**—In New South Wales during 1912 about 102 tons of barytes, valued at £254, were obtained at Bethungra, in the Cootamundra division, and 292 tons, valued at £498, were raised at Lue in the Mudgee division. About 300 tons of inferior quality stone was produced from a mine at Cobargo.

4. **Clays and Pigments.**—Valuable deposits of clays and pigments of various sorts are found throughout the Commonwealth. There is a considerable local production of earthenware, bricks, and tiles, but the finer clays have not as yet been extensively used. The production of kaolin in 1912 amounted to 394 tons, valued at £185, raised in the Parkes, Murrumburrah, and Goulburn divisions. Fireclay to the amount of 14,152 tons, valued at £1528, was raised in the Wollongong division. Deposits of steatite near Wallendbeen were worked during 1912, the quantity disposed of during the year amounting to 168 tons. In Victoria 288 tons of kaolin, valued at £342, were raised during 1912, of which 238 tons were raised at Egerton, and the balance at Pyalong. In Queensland 6336 tons of fireclay, valued at £2535, were mined during the year 1912, in the Mount Morgan district. On Kangaroo Island, South Australia, where, it is stated, the first pottery mill in the Commonwealth was erected, there are vast deposits of felspar, china, stone, silica, and firebrick clay. There are also very extensive deposits of fireclay near Ardrossan on the Yorke Peninsula. Porcelain and other clays of good quality have been found in the Kingston district in Tasmania. A small parcel of kaolin from the Zeehan district yielded about 50 per cent. after treatment, but it is stated that the product could not be profitably exported to Europe. Deposits of ochre have been opened up at Dubbo, Wellington, and Marulan, in New South Wales, and ochres and pigments of excellent quality have been produced therefrom. Extensive deposits of iron oxide, giving a return of 80 per cent. ochre, have been discovered near Oodlawirra in South Australia.

5. **Coorongite.**—This peculiar indiarubber-like material was first noted many years ago near Salt Creek and in the vicinity of Coorong Inlet, in South Australia. It was thought that the substance owed its origin to subterranean oil-bearing strata, but so far the search for petroleum has not been attended with success.

6. **Fuller's Earth.**—Small quantities of this material were produced in 1912, from leases near Narrabri, in New South Wales, the total sold amounting to 50 tons, valued at £287.

7. **Graphite.**—Graphite is found in New South Wales near Undercliff Station, in the county of Buller, but the deposit is not sufficiently pure to prove remunerative. A small quantity of ore was forwarded in 1911 to England from a site on the Bookookoorara in the Wilson's Downfall division. In Victoria the mineral occurs in Ordovician slates in several of the goldfields, but is not worked. In Queensland graphite was raised some years ago by the Graphite Plumbago Company at Mt. Bopple, near Netherby, on the Maryborough-Gympie line. In Western Australia deposits occur near Bunbury.

8. **Gypsum.**—This mineral is found at various places in the Commonwealth. It occurs in two forms, large crystals, and a floury earth consisting of minute crystals and known as "copi." Both forms are exceedingly pure. It is largely used as a natural manure and to some extent in the manufacture of Portland cement. Gypsum, or hydrous sulphate of lime, when burnt forms plaster of Paris, but in spite of the abundant supply of suitable material it has not yet been used for this purpose. In Victoria during 1912 there was a production of 2078 tons, valued at £3359, of which 1240 tons were obtained at Boort, 813 tons at Lake Boga, and 25 tons at Reedy Lake.

9. **Tripolite, or Diatomaceous Earth.**—Although tripolite has been found at Barraba, Cooma, Wyrallah, and in the Warrumbungle Mountains in New South Wales, the deposits have not yet been worked commercially on any considerable scale. From the deposits at Bunyan, in the Cooma division, 31 tons of diatomaceous earth, valued at £132, were produced in 1912. In Victoria there is a remarkably pure deposit at Lilliecur, near Talbot, while beds of the mineral are also met with at other places in the Loddon valley, near Ballarat, at various places close to Melbourne, at Craigieburn, Lancefield, Portland, Swan Hill, Bacchus Marsh, etc. From the deposit at Talbot, 850 tons, valued at £3400, were obtained in 1912. A fairly extensive deposit of tripolite exists in Queensland, between Nerang and Beaudesert, but the various outcrops have as yet been only partially examined.

10. **Salt.**—Salt is obtained from salt lakes in the Western and North-western Districts of Victoria, and from saltens in the neighbourhood of Geelong. Large quantities are also obtained from the shallow salt lakes of South Australia, chiefly on Yorke Peninsula. Lake Hart, about sixty square miles in area, situated about 120 miles N.W. from Port Augusta, contains immense supplies of salt of good quality, which at present, however, owing to distance from market, possess no economic value. The salt is simply scraped from the beds of the lakes in summer time and carted to the refinery. It is stated that care must be taken not to leave too thin a crust of salt over the underlying mud, as the resultant "crop" after the winter rains will in that case be smaller than usual. A bore recently put down near Kingscote, on Kangaroo Island, revealed brine which can be profitably used by evaporation. In Western Australia supplies are obtained from dried-up shallow lakes and consumed locally or exported. The chief centres of production were formerly Rottnest Island, near Fremantle, and Middle Island, near Esperance, but the greater part of that now produced is obtained at Port Gregory.

11. **Natural Manures.**—Gypsum has already been referred to. (See 8 *ante*.) South Australia possesses deposits of rock phosphate near Port Clinton and Ardrossan on Yorke Peninsula, at Belvedere near Kapunda, and at Koorunga, and also at many other places which have only been prospected to a small extent. Although it can hardly be considered a mineral product, mention may be made here of the large accumulations of guano on the Arolohos Islands, off the coast of Western Australia, in the neighbourhood of Geraldton. The deposits vary in thickness from four to twenty-seven inches. During the years 1876-80 over 36,000 tons were raised; no figures are available shewing the production of recent years.

## § 14. Gems and Gemstones.

1. **Diamonds.**—Diamonds were first noted in New South Wales by E. J. Hargraves in 1851, and in October of the same year by Geological Surveyor Stutchbury. The Cudgegong field was discovered in 1867, and shortly afterwards the Bingara diamondiferous deposits were located. Stones of small size are also found at Cope's Creek and other places in the Inverell district. The largest diamond won in New South Wales was reported to have been obtained in 1905 at Mt. Werong, near Oberon, and weighed 28½ carats. It is difficult to secure accurate returns in connection with the production of precious stones, but the yield of diamonds in 1912 was estimated at 2240 carats, valued at £2001, while the total production to the end of 1912 is given as 178,971 carats, valued at £120,408. The yield in 1912 was contributed by miners working in the vicinity of Copeton, in the Tingha division. Small quantities of diamonds are found in Victoria in the gravels of streams running through granite country in the Beechworth district; at Kongbool in the Western District; and near Benalla. The stones are generally small,

and the production up to date has been trifling. In 1912, eleven small diamonds, valued at £20, were picked out of the sluice boxes of the Great Southern alluvial mine at Rutherglen. A few small diamonds have been found in the Pilbara district in Western Australia. In South Australia diamonds have been found on the Echunga goldfield, the most notable gem being Glover's diamond, which was sold for £70.

**2. Sapphires.**—These gems were discovered in New South Wales in 1851, near Burrandong. They have also been found in small quantities near Inverell, and at a few other localities in the State. There is no record of production. Specimens of sapphire have been found in Victoria, but the stones of commercial size are generally of little value owing to flaws.

In Queensland sapphires are found in the gravel of creek beds, between Withersfield and Anakie on the Rockhampton-Winton railway line. The gems show excellent fire and lustre, but the colour is darker blue than the Oriental sapphire. Hyacinths are occasionally found in association with the gems. The production of sapphires in Queensland in 1912 was valued at £40,016, and up to the end of 1912 the total was £226,202. The production in 1912 included industrial corundum to the value of £7644. Sapphires are plentifully found in the tin drifts of the Ringarooma and Portland districts in Tasmania, but the stones are, as a rule, small and not worth saving.

**3. Precious Opal.**—This stone was first discovered in New South Wales at Rocky Bridge Creek on the Abercrombie River, in the year 1877, and later a most important discovery was made at White Cliffs in the Wilcannia district, which, until recently, contributed the bulk of the production. In 1912, however, out of a total production valued at £35,008, the yield from the Lightning Ridge field near Walgett, amounted to £26,180, while the output from the White Cliffs field was returned at £8828. Some very fine stones are at times obtained, one weighing 5 ozs. and valued at £800, being recovered in 1911. Occasionally, black opals of very fine quality are found, one specimen from the Wallangulla field, weighing  $6\frac{1}{2}$  carats, being sold in 1910 for £102. The total value of opal won in New South Wales since the year 1890 is estimated at £1,330,000.

Small quantities of precious opal are also found in the Beechworth district in Victoria.

In Queensland, the first recorded discovery of the gem dates from about 1875. The opaliferous district stretches over a considerable area of the western interior of the State, from Kynuna and Opalton as far down as Cunnamulla. The yield in 1912 was estimated at £3000, and up to the end of that year at £172,195. These figures are, however, merely approximations, as large quantities of opal are disposed of privately to buyers on the fields, no record of which is obtained. At present, the industry is not in a very satisfactory position, as the shallower grounds of the older centres have been worked out, and there appears to be little disposition to explore the deeper grounds.

**4. Other Gems.**—Emeralds were found in New South Wales in the year 1890, near the township of Emmaville, the largest specimen found in the district weighing twenty-three carats in the rough. Altogether 2225 carats were sent to London during that year, some of the gems bringing £4 a carat, but the production has since dwindled. The mine at the Glen in the Emmaville division was reopened and worked for a short period during 1908, when about 1000 carats of emeralds, valued at about £1650, were obtained. The largest stone in the rough weighed 60 carats. Amongst other gems found in New South Wales at various times may be mentioned *turquoises*, discovered in 1894, near Bodalla; *topazes*, fine specimens of which have been obtained in the New England district, and *zircons* and *garnets*. Zircons of small size are plentifully found in the vicinity of Table Cape in Tasmania. Topazes are common in the tin drifts of Tasmania, and some fine specimens have been found. Turquoises are also found in thin veins in Victoria. In Gascoigne's mine, situated near the King River, in the parish of Edi, samples of the gem have been found equal in colour to the best Persian stone, and a considerable quantity

of turquoises from this mine has been sold in England and Germany. Fine *agates* are found in many places in Victoria, but have not been made use of to any extent. Garnets are found in Western Australia, and beautiful specimens of *crocidolite* have been obtained at Yarra Creek in the Murchison district. *Rubies* have been found at various places in New South Wales and Queensland. *Tourmaline* has been found on Kangaroo Island, in South Australia, and *beryls* near Williamstown, Victoria. Very large but impure beryl crystals have been found at Ben Lomond in Tasmania. Some fine samples of *chiastolite* or luck stone have been found at Mt. Howden, near Bimbourie, in South Australia.

### (C.) GENERAL.

#### § 15. Numbers Engaged, Wages Paid, and Accidents in Mining.

1. **Total Employment in Mining.**—The number of persons engaged in the mining industry in each State and in the Commonwealth is an index of the significance of the mineral wealth. During the year 1912 the number so employed was as follows :—

NUMBER OF PERSONS ENGAGED IN MINING, 1912.

| State.                 | Number of Persons Engaged in Mining for |                               |         |       |                       |        | Total. |
|------------------------|---|-------------------------------|---------|-------|-----------------------|--------|--------|
|                        | Gold.                                   | Silver,<br>Lead,<br>and Zinc. | Copper. | Tin.  | Coal<br>and<br>Shale. | Other. |        |
| New South Wales ...    | 3,898                                   | 9,062                         | 2,384   | 2,646 | 18,051                | 1,817  | 37,858 |
| Victoria ... ..        | 11,856                                  | ...                           | 6       | 57    | 1,486                 | 163    | 13,568 |
| Queensland ... ..      | 3,981                                   | 208                           | 3,457   | 2,153 | 2,019                 | 920    | 12,738 |
| South Australia ...    | 920                                     | 30                            | 4,500   | ...   | ...                   | 1,050  | 6,500  |
| Western Australia ...  | 13,700                                  | 60                            | 223     | 409   | 542                   | 27     | 14,961 |
| Tasmania ... ..        | 485                                     | 1,377                         | 1,681   | 1,762 | 155                   | 106    | 5,566  |
| Northern Territory ... | 263                                     | 18                            | 52      | 287   | ...                   | 32     | 652    |
| Commonwealth ...       | 35,103                                  | 10,755                        | 12,303  | 7,314 | 22,253                | 4,115  | 91,848 |

The following table shews the number of persons engaged in mining in the Commonwealth during each of the years 1891, 1901, and 1912, together with the proportion of the total population so engaged:—

PROPORTION OF PERSONS ENGAGED IN MINING, 1891, 1901, and 1912.

| State.                 | 1891.               |   | 1901.               |   | 1912.               |   |
|------------------------|---------------------|---|---------------------|---|---------------------|---|
|                        | Miners<br>Employed. | No. per<br>100,000 of<br>Popu-<br>lation. | Miners<br>Employed. | No. per<br>100,000 of<br>Popu-<br>lation. | Miners<br>Employed. | No. per<br>100,000 of<br>Popu-<br>lation. |
| New South Wales ...    | 30,604              | 2,700                                     | 36,615              | 2,685                                     | 37,858              | 2,180                                     |
| Victoria ... ..        | 24,649              | 2,151                                     | 28,670              | 2,381                                     | 13,568              | 1,000                                     |
| Queensland ... ..      | 11,627              | 2,934                                     | 13,352              | 2,664                                     | 12,738              | 2,017                                     |
| South Australia ...    | 2,683               | 834                                       | 7,007               | 1,931                                     | 6,500               | 1,541                                     |
| Western Australia ...  | 1,269               | 2,496                                     | 20,895              | 11,087                                    | 14,961              | 4,963                                     |
| Tasmania ... ..        | 3,988               | 2,695                                     | 6,923               | 4,017                                     | 5,566               | 2,888                                     |
| Northern Territory ... | ...                 | ...                                       | ...                 | ...                                       | 652                 | ...                                       |
| Commonwealth ...       | 74,820              | 2,341                                     | 113,462             | 2,992                                     | 91,843              | 1,977                                     |

2. **Wages Paid in Mining.**—Particulars regarding wages paid in the mining industry, which in preceding issues of the Year Book were given in this section, have now been transferred to the section dealing with Labour and Industrial Statistics.

3. **Accidents in Mining, 1912.**—The following table gives particulars of the number of men killed and injured in mining accidents during the year 1912:—

### NUMBERS KILLED AND INJURED IN MINING ACCIDENTS, 1912.

| Mining for— | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas. | N. T. | Cwllth. |
|-------------|--------|-----------|---------|----------|----------|------|-------|---------|

### § 16. State Aid to Mining.

1. **Introduction.**—The terms and conditions under which State aid is granted in mining are alluded to at some length in previous issues (see Year Books IV. and V.), but owing to considerations of space they have been omitted from this issue.

2. **New South Wales.**—The chief aid given in this State is in the direction of assistance to prospectors. Up to the end of 1912 the total sum expended in this manner amounted to £433,359, of which £12,091 was advanced in 1912. During the year the Government subsidy to the Miners' Accident Relief Fund amounted to £14,091.

3. **Victoria.**—Under the Mining Development and Surplus Revenue Acts the sum of £414,529 was expended from revenue, and £166,939 was provided out of votes during the period 1897 to 1912 as follows :—

|   | £       |
|---|---------|
| Advances to mining companies ... ..                           | 153,818 |
| Advances to prospectors ... ..                                | 65,139  |
| Boring for gold and coal ... ..                               | 188,840 |
| Construction of roads and tracks ... ..                       | 61,636  |
| Erection of testing plants, batteries, etc. ... ..            | 62,953  |
| Miscellaneous, cyanide patents, Schools of Mines, etc. ... .. | 49,082  |
| Total ... ..  | 581,468 |

The expenditure in 1912 was £26,684, of which £3466 was advanced to companies; £3976 was loaned to miners; £166 was spent on constructing roads, etc.; £16,477 on boring for gold, and £2599 on testing plants and miscellaneous. The Government batteries number 25, and of these 15 are managed by local trusts without expense to the Department so far as cost of working is concerned. The repayment of loans by companies amounts to £20,837, by miners £2305, and for cost of boring £6752. The State's contribution to the Coal Miners' Accident Relief Fund amounted in 1912 to £736.

4. **Queensland.**—State assistance to the mining industry in 1912 amounted to £16,622, of which £8778 consisted of loans in aid of deep sinking; £1037 grants in aid of prospecting; £4270 in aid of roads and bridges to gold and mineral fields; £537 advance under Mining Machinery Advances Act 1906; and £2000 grant in aid of coal prospecting at Mount Mulligan.

5. **South Australia.**—Aid is given to the mining industry under the terms of the Mining Act of 1893, and previous measures. Up to the end of 1912 the total amount of subsidy paid was £57,118, of which £7170 has been recovered, leaving a debit of £49,948. Portion of this amount is represented by machinery that has fallen into the hands of the Government. Four Government batteries are in operation in this State.

6. **Western Australia.**—Under the Mining Development Act of 1902 assistance was granted in 1912 in accordance with the subjoined statement.

Advances in aid of mining work and equipment of mines with machinery, £3773; advances in aid of erection and equipment of crushing plants, including subsidies on stone crushed for the public, £3710; advances in aid of boring, £2103; providing means of transport, £253. In addition, amounts totalling in all £34,016 were expended from the Mining Development vote on various matters such as water supply, roads, cartage, and subsidies for development below the 100 feet level in small mines. The sum of £3710 shewn above includes an amount of £999 paid to owners of plants crushing for the public at fixed rates. All water supply works on the goldfields are now carried out by the Water Supply Department.

In 1912 there were thirty-five State batteries in operation. The amount expended on the erection of State batteries up to the end of 1912 was £91,981 from revenue, and £217,859 from loan, giving a total of £309,840. During the year receipts amounted to £40,857, and working expenditure to £49,805.

The total value of gold and tin recovered to the end of 1912 at the State plants was £3,956,337, resulting from the treatment of 900,416 tons of gold ore and 56,884 tons of tin ore.

7. **Tasmania.**—In Tasmania provision is made for State aid to mining under the Deep-Sinking Encouragement Acts of 1899, 1900, and 1901. Under these Acts sums of £5000, £2000, and £1000 respectively were provided for assisting persons and companies to sink shafts or to drive tunnels below a specified depth, the amount advanced in any particular case varying according to the amount expended by the borrower. The total amount advanced to October, 1909, was £6861, granted to five companies in sums ranging from £682 to £1452, leaving an unexpended balance of £1139. None of the companies to whom the advances were made has been successful, and consequently none of the sums advanced, which were to be repaid out of profits, has been refunded. A sum of £1000 was placed on the estimates for 1911-12 for the purpose of assisting prospectors, the money to be expended on the £ for £ principle, and of this £730 was expended. A further sum of £1000 was provided for the year ended 30th June, 1913, and of this the amount expended to the 30th December, 1912, was £332.

8. **Northern Territory.**—Prior to 1912, prospectors were helped by grants of rations and some monetary assistance, but it was found that these privileges were occasionally abused, and steps have now been taken to ensure the bonafides of all seeking aid. Provision is also made for generous grants to discoverers of metalliferous ores.

## SECTION XIII.

## MANUFACTURING INDUSTRIES.

## § 1. General.

1. **Industrial Progress.**—The statistics of manufactures in the Commonwealth shew that many industries have now been permanently established on a secure basis, and also indicate a consistent progress both in regard to the extension of existing industries and the establishment of new ones. As will be seen in the following pages of this section, this progress has been particularly in evidence since the abolition of inter-colonial tariffs, which took place upon the creation of the Commonwealth of Australia in 1901.

(i.) *The Gold Discoveries, 1851.* Prior to the gold discoveries (1851) there was little development in the manufacturing industries of Australia. Reference to that period will be found in previous issues of the Year Book (see No. 6, page 524).

(ii.) *Later Progress.* Soon after the discovery of gold, the construction of the first railways (1854) and the re-establishment of regular steamship communication with Europe (1856) helped to encourage the nascent industrial activity. The Colonies of New South Wales and Victoria, which had recently (1855) received the benefits of responsible government, soon turned their attention to the settlement of an agricultural population on the land. The Acts which were passed had a beneficial effect on the working classes, giving them opportunities for employment not previously open to them, and fostering the manufacturing industries by increasing the measure of primary production. During the following years the various manufacturing industries prospered. The statistics of the States are not sufficiently complete or uniform to enable a statement of the progress of these industries to be given. The following table, however, shewing, so far as returns are available, the number of factories and the number of employees in each State at decennial periods since 1861, will serve to indicate generally the progress which has been made:—

## NUMBER OF FACTORIES AND EMPLOYEES IN EACH STATE, 1861 to 1912.

| Year.                | N.S.W.  | Victoria. | Queensland. | S. Aust. | W. Aust. | Tasmania. | C'wealth. |
|----------------------|---------|-----------|-------------|----------|----------|-----------|-----------|
| NUMBER OF FACTORIES. |         |           |             |          |          |           |           |
| 1861                 | 601     | 531       | ...         | ...      | ...      | ...       | ...       |
| 1871                 | 1,813   | 1,740     | ...         | ...      | ...      | ...       | ...       |
| 1881                 | 2,961   | 2,488     | 571†        | 823†     | ...      | ...       | ...       |
| 1891                 | 3,056   | 3,141     | 1,328†      | 996†     | 175      | ...       | ...       |
| 1901                 | 3,367   | 3,249     | 2,110†      | 1,335†   | 662      | 420*      | 11,143†   |
| 1911                 | 5,039   | 5,126     | 1,657       | 1,814    | 710      | 609       | 14,455    |
| 1912                 | 5,162   | 5,263     | 1,790       | 1,841    | 711      | 611       | 14,878    |
| NUMBER OF EMPLOYEES. |         |           |             |          |          |           |           |
| 1861                 | ...     | 4,395     | ...         | ...      | ...      | ...       | ...       |
| 1871                 | 13,583  | 19,569    | ...         | 5,629†   | ...      | ...       | ...       |
| 1881                 | 31,191  | 43,209    | ...         | 10,995†  | ...      | ...       | ...       |
| 1891                 | 50,879  | 53,525    | ...         | 14,099†  | ...      | ...       | ...       |
| 1901                 | 66,135  | 66,529    | 26,172†     | 19,283†  | 12,198   | 7,466*    | 197,783†  |
| 1911                 | 108,624 | 111,948   | 37,156      | 27,885   | 15,799   | 10,298    | 311,710   |
| 1912                 | 115,561 | 116,108   | 40,948      | 28,500   | 16,382   | 9,957     | 327,456   |

\* For 1902. † Not on same basis as other States. ‡ Not on same basis for some of States as in 1911.

NOTE.—In this and all subsequent tables, except where specially mentioned, "Number of Employees" includes working proprietors.

Since the inauguration of the Commonwealth, the throwing open of the whole of the Australian markets to the industrial products of each State has facilitated the internal distribution of the products of Australian industry.

**2. Defects in Industrial Statistics.**—A complete statistical account of the growth of the manufacturing industries in Australia unfortunately cannot be given for any lengthy period, owing to the fact that the necessary statistics have not been collected in past years by the several States upon a definite and identical basis. Even in respect of either the definition of a "factory" or (so far as they might be included in related returns) the statistics of persons employed therein, there was formerly no common agreement. The relatively minor place that manufacturing industry held in relation to the total activity of Australia was, perhaps, responsible for the fact that the necessity for uniform method was not earlier recognised.

In 1896 it was agreed, as between Victoria and New South Wales, to adopt a common definition of the term "factory," viz., "any factory, workshop, or mill where four or more persons are employed or power is used." This agreement was adopted for the States generally at the Conference of State Statisticians in 1902, when it was decided, however, that the term "factory" should include also "all establishments, whether making for the trade, wholesale or retail, or for export." It was further agreed that industries should be arranged, as far as possible, under a uniform classification. As a result of the conference of 1902 a higher degree of uniformity in the collection and presentation of industrial statistics was attained in the several States, so that returns upon which anything like a proper comparative study of the development and progress of various manufacturing industries in the Commonwealth may be based, date back only as far as the year 1903, when the resolutions of the conference first came to be put into force. All the States did not, however, fall completely into line, and, as may be seen in the succeeding parts of this section, the comparisons afforded by the returns for the years 1903 to 1906 inclusive, are in some cases subject to various limitations. At the Conference of Statisticians held in Melbourne in 1906 special consideration was given to the methods to be adopted for the collection of statistical information regarding primary and secondary production and industry. A definite classification of industries was adopted, and a set of forms for the collection and compilation of industrial statistics on a definite and uniform basis in each State was agreed upon. The States have not, even yet, fallen entirely into line in collecting and classifying the returns. The particulars for the past four years are, however, in more complete co-ordination than formerly, and it is now possible to give particulars for the several States in greater detail and on a more uniform basis throughout.

**3. Classification of Manufacturing Industries.**—Under the classification adopted at the Conference of Statisticians held in 1906, factories were placed under nineteen different categories, according to the nature of the industry carried on therein; many of the categories were also subdivided. Where two or more industries are carried on by one proprietor in one building, each industry is, when possible, treated as a separate establishment. The statement given below shews the classification which has been adopted; it must be understood, however, that this classification does not pretend to be exhaustive, but merely serves as a guide for the collection and presentation of statistics in the several States on a definite and uniform basis:—

## CLASSIFICATION OF MANUFACTURING INDUSTRIES.

|  |   |   |
|--|---|---|
| <p><b>CLASS I.—TREATING RAW MATERIALS, ETC.</b></p> <p>Boiling-down, Tallow Refining, etc.</p> <p>Tanneries</p> <p>Woolscouring &amp; Fellmongering</p> <p>Chaff-cutting, etc.</p> <p><b>CLASS II.—OILS AND FAT, ETC.</b></p> <p>Oil and Grease</p> <p>Soap and Candles</p> <p><b>CLASS III.—STONE, CLAY, GLASS, ETC.</b></p> <p>Bricks and Tiles</p> <p>Glass (including Bottles)</p> <p>Glass (Ornamental)</p> <p>Lime, Plaster, Cement and Asphalt</p> <p>Marble, Slate, etc.</p> <p>Modelling, etc.</p> <p>Pottery and Earthenware</p> <p><b>CLASS IV.—WORKING IN WOOD.</b></p> <p>Boxes and Cases</p> <p>Cooperage</p> <p>Joinery</p> <p>Saw Mills</p> <p>Wood-turning, etc.</p> <p><b>CLASS V.—METAL WORKS, MACHINERY, ETC.</b></p> <p>Agricultural Implements</p> <p>Brass and Copper</p> <p>Cutlery</p> <p>Engineering</p> <p>Galvanised Iron-working</p> <p>Ironworks and Foundries</p> <p>Lead Mills</p> <p>Railway Carriages</p> <p>Railway and Tramway Workshops</p> <p>Smelting</p> <p>Stoves and Ovens</p> <p>Tinsmithing</p> <p>Wireworking</p> <p>Other Metal Works</p> <p><b>CLASS VI.—FOOD AND DRINK, ETC.</b></p> <p>Bacon Curing</p> <p>Butter Factories</p> <p>Butterine and Margarine</p> <p>Cheese Factories</p> <p>Condensed Milk</p> <p>Meat and Fish Preserving</p> <p>Biscuits</p> <p>Confectionery</p> | <p>Corn-flour, Oatmeal, etc.</p> <p>Flour Mills</p> <p>Jam and Fruit Canning</p> <p>Pickles, Sauces, and Vinegar</p> <p>Sugar Mills</p> <p>Sugar Refining</p> <p>Aerated Waters, Cordials, etc.</p> <p>Breweries</p> <p>Condiments, Coffee, Spices, etc.</p> <p>Distilleries</p> <p>Ice and Refrigerating</p> <p>Malting</p> <p>Tobacco, Cigars, etc.</p> <p><b>CLASS VII.—CLOTHING AND TEXTILE FABRICS.</b></p> <p>Woollen and Tweed Mills</p> <p>Boots and Shoes</p> <p>Slop Clothing</p> <p>Clothing (Tailoring)</p> <p>Dressmaking and Millinery—Makers' material</p> <p>Customers' material</p> <p>Dyeworks and Cleaning</p> <p>Furriers</p> <p>Hats and Caps</p> <p>Waterproof and Oilskin</p> <p>Shirts, Ties, and Scarfs</p> <p>Rope and Cordage</p> <p>Tents and Tarpaulins</p> <p><b>CLASS VIII.—BOOKS, PAPER, PRINTING, ETC.</b></p> <p>Electrotyping &amp; Stereotyping</p> <p>Paper-making, Paper Boxes, Bags, etc.</p> <p>Photo-engraving</p> <p>Printing and Binding</p> <p><b>CLASS IX.—MUSICAL INSTRUMENTS, ETC.</b></p> <p>Musical Instruments and Sewing Machines</p> <p><b>CLASS X.—ARMS &amp; EXPLOSIVES</b></p> <p>Arms</p> <p>Explosives</p> <p><b>CLASS XI.—VEHICLES, SADDLERY, HARNESS, ETC.</b></p> <p>Coach and Wagon Building</p> <p>Cycles</p> <p>Perambulators</p> <p>Saddlery, Harness, etc.</p> <p>Spokes, etc.</p> | <p><b>CLASS XII.—SHIP AND BOAT BUILDING AND REPAIRING.</b></p> <p>Docks and Slips</p> <p>Sailmaking</p> <p>Ship and Boat Building and Repairing</p> <p><b>CLASS XIII.—FURNITURE, BEDDING, ETC.</b></p> <p>Bedding, Flock, &amp; Upholstery</p> <p>Billiard Tables</p> <p>Furniture and Cabinet Making</p> <p>Picture Frames</p> <p>Window Blinds</p> <p><b>CLASS XIV.—DRUGS AND CHEMICALS, ETC.</b></p> <p>Chemicals, Drugs, and Medicines</p> <p>Fertilisers</p> <p>Paints, Varnishes, and By-products</p> <p><b>CLASS XV.—SURGICAL AND OTHER SCIENTIFIC INSTRUMENTS.</b></p> <p>Surgical, Optical, and other Scientific Instruments</p> <p><b>CLASS XVI.—TIMEPIECES, JEWELLERY, &amp; PLATED WARE.</b></p> <p>Electro-plating</p> <p>Manufacturing Jewellery, etc.</p> <p><b>CLASS XVII.—HEAT, LIGHT, AND POWER.</b></p> <p>Coke Works</p> <p>Electric Apparatus</p> <p>Electric Light and Power</p> <p>Gas Works and Kerosene</p> <p>Lamps and Fittings, etc.</p> <p>Hydraulic Power</p> <p><b>CLASS XVIII.—LEATHERWARE (N.E.I.)</b></p> <p>Leather Belting, Fancy Leather, Portmanteaux &amp; Bags</p> <p><b>CLASS XIX.—MINOR WARES.</b></p> <p>Basket and Wickerware, Matting, etc.</p> <p>Brooms and Brushware</p> <p>Rubber Goods</p> <p>Toys</p> <p>Umbrellas</p> <p>Other Industries</p> |
|--|---|---|

## § 2. Number of Manufactories.

1. **General.**—In stating the number of factories in the States of the Commonwealth it is to be remembered that in the collection of statistics, for years prior to 1907, the same basis has not been adopted in each State. In Queensland, for example, prior to 1906, the statistics included all establishments where two or more hands were employed, except Government railway workshops, which were not included till 1907. The difference in other respects is not material.

In the following table, shewing the total number of manufactories in the Commonwealth during the years 1903 and 1908 to 1912, it should be noted that not only are the results affected by differences of classification prior to 1907, but also that the number of

factories from year to year does not unequivocally indicate a change in the position of the industry, since amalgamations may account for part of the reduction of the numbers. (See § 3, 5.)

### MANUFACTORIES OF THE COMMONWEALTH, 1903, and 1908 to 1912.

| Year.    | N.S.W. | Victoria. | Queensland. | South Aust. | West. Aust. | Tasmania. | C'wealth. |
|----------|--------|-----------|-------------|-------------|-------------|-----------|-----------|
| 1903 ... | 3,476  | 4,151     | 2,001*      | 906*†       | 586         | 431       | 11,551    |
| 1908 ... | 4,453  | 4,608     | 1,371       | 1,237       | 627         | 557       | 12,853    |
| 1909 ... | 4,581  | 4,755     | 1,420       | 1,265       | 632         | 576       | 13,229    |
| 1910 ... | 4,821  | 4,873     | 1,563       | 1,278       | 680         | 635       | 13,850    |
| 1911 ... | 5,039  | 5,126     | 1,657       | 1,314       | 710         | 609       | 14,455    |
| 1912 ... | 5,162  | 5,263     | 1,790       | 1,341       | 711         | 611       | 14,878    |

\* Not on same basis as other States. † 1904 results, those for 1903 not available.

(i.) *Classification of Factories in Commonwealth, 1908 to 1912.* The following table shews the total number of factories in the Commonwealth at the end of each year from 1908 to 1912, classified on the basis indicated in § 1, 3 hereof:—

### CLASSIFICATION OF FACTORIES IN THE COMMONWEALTH, 1908 to 1912.

| Class of Industry.  | 1908.  | 1909.  | 1910.  | 1911.  | 1912.  |
|---|--------|--------|--------|--------|--------|
|   | No.    | No.    | No.    | No.    | No.    |
| I. Treating raw material, product of agricultural and pastoral pursuits, etc. ... | 812    | 855    | 855    | 857    | 871    |

| Total ...   | 12,853 | 13,229 | 13,850 | 14,455 | 14,878 |

For the purpose of the returns in the above table the definition of a factory adopted at the Conference of Statisticians in 1902 (see § 1, 2 hereof) is used, viz., "Any factory, workshop or mill where four or more persons are employed or power is used." The total increase in the number of factories according to this table from 1908 to 1912 was 2025, or an average of 506 a year. The state of the manufacturing industries throughout Australia cannot, however, be gauged from a mere enumeration of the number of factories. Some of the factories concerned were practically in their infancy, employing but few hands, while others were developed on a large scale. Also, as pointed out previously, amalgamations may in some instances account for a reduction in the numbers.

(ii.) *Classification of Factories in each State, 1912.* The following table shews the number of factories in each State of the Commonwealth at the end of the year 1912, classified according to the nature of the industry. (See classification given in § 1, 3 hereof):—

## CLASSIFICATION OF FACTORIES IN EACH STATE, 1912.

| Class of Industry.  | N.S.W. | Vic.  | Q'land. | S. Aus. | W. Aus. | Tas. | Cwltb. |
|---|--------|-------|---------|---------|---------|------|--------|
|   | No.    | No.   | No.     | No.     | No.     | No.  | No.    |
| I. Treating raw material, product of agricul. and pastoral pursuits, etc. | 287    | 335   | 50      | 129     | 31      | 39   | 871    |
| II. Treating oils and fats, animal, vegetable, etc.                       | 45     | 24    | 15      | 11      | 4       | 3    | 102    |
| III. Processes in stone, clay, glass, etc.                                | 207    | 222   | 38      | 90      | 42      | 20   | 709    |
| IV. Working in wood   | 689    | 413   | 329     | 98      | 72      | 151  | 1,752  |
| V. Metal works, machinery, etc.   | 536    | 714   | 231     | 179     | 72      | 47   | 1,779  |
| VI. Connected with food and drink, etc.                                   | 765    | 652   | 414     | 251     | 138     | 111  | 2,331  |
| VII. Clothing and textile fabrics, etc.                                   | 997    | 1,398 | 256     | 230     | 138     | 96   | 3,115  |
| VIII. Books, paper, printing & engraving                                  | 426    | 427   | 147     | 74      | 59      | 25   | 1,158  |
| IX. Musical instruments, etc.   | 14     | 5     | ...     | 2       | ...     | ...  | 21     |
| X. Arms and explosives  | 6      | 9     | ...     | 1       | ...     | ...  | 16     |
| XI. Vehicles and fittings, saddlery and harness, etc.                     | 393    | 434   | 158     | 151     | 57      | 56   | 1,249  |
| XII. Ship and boat building & repairing                                   | 47     | 13    | 13      | 11      | 5       | 8    | 97     |
| XIII. Furniture, bedding, and upholstery                                  | 220    | 255   | 81      | 55      | 34      | 25   | 670    |
| XIV. Drugs, chemicals, and by-products                                    | 87     | 88    | 3       | 12      | 11      | 1    | 202    |
| XV. Surgical and other scientific instruments                             | 13     | 18    | 6       | 2       | 5       | ...  | 44     |
| XVI. Jewellery, timepieces, & platedware                                  | 53     | 85    | 11      | 15      | 5       | 8    | 177    |
| XVII. Heat, light, and power  | 203    | 90    | 94      | 14      | 26      | 15   | 372    |
| XVIII. Leatherware, n.e.l.  | 24     | 32    | 4       | 3       | 3       | ...  | 66     |
| XIX. Minor wares, n.e.l.  | 60     | 49    | 10      | 13      | 9       | 6    | 147    |
| Total ...   | 5,162  | 5,263 | 1,790   | 1,341   | 711     | 611  | 14,878 |

2. Use of Mechanical Power.—The principal motive power is steam, but the chief towns possess electric power stations owned either by the Government, or by public bodies or private companies. From these many factories find it convenient to derive their motive power.

The following table shews the number of factories in which machinery was worked by steam, gas, oil, or electricity, and the horse-power of engines or motors used, in each State and in the Commonwealth, during the year 1912 :—

## UTILISATION OF MECHANICAL POWER IN FACTORIES IN EACH STATE, 1912.

| State.            | Number of Establishments.                                 |         |        | Actual Horse-power of Engines Used. |        |       |              |         |
|-------------------|---|---------|--------|-------------------------------------|--------|-------|--------------|---------|
|                   | Using Machinery worked by Steam, Gas, Oil, or Electricity | Others. | Total. | Steam.                              | Gas.   | Oil.  | Electricity. | Total.  |
|                   | No.   | No.     | No.    | H.P.                                | H.P.   | H.P.  | H.P.         | H.P.    |
| New South Wales   | 3,775   | 1,387   | 5,162  | 130,479                             | 16,028 | 1,181 | 26,652       | 174,340 |
| Victoria ...      | 3,551   | 1,712   | 5,263  | 59,262                              | 13,745 | 1,778 | 14,505       | 89,290  |
| Queensland        | 1,301   | 489     | 1,790  | 36,706                              | 5,733  | 1,079 | 4,396        | 47,914  |
| South Australia   | 953   | 388     | 1,341  | 21,119                              | 5,217  | 1,885 | 4,624        | 32,845  |
| Western Australia | 533   | 178     | 711    | 24,594                              | 2,886  | 668   | 4,134        | 32,252  |
| Tasmania          | 445   | 166     | 611    | 12,068                              | 296    | 238   | 2,486        | 15,088  |
| Commonwealth      | 10,558  | 4,320   | 14,878 | 284,228                             | 43,905 | 6,829 | 56,797       | 391,759 |

A comparison of the above table with that immediately preceding will explain the preponderance of horse-power employed in the New South Wales factories, this State possessing by far the largest number of industries demanding a considerable amount of power; Victoria, on the other hand, has the largest number of establishments, such as those connected with clothing and textile fabrics, wherein much less mechanical power is utilised.

The number of establishments in the Commonwealth using machinery worked by steam, gas, oil, or electricity was 10,558, being 70.96 per cent.; 4320 establishments, representing 29.04 per cent., used no mechanical power. The total average horse-power in use was 391,759, of which engines in which the motive power was steam formed 72.55 per cent.; gas, 11.21 per cent.; oil, 1.74 per cent.; and electricity, 14.50 per cent. During 1912 there were 586 more establishments using power than in 1911, the increase in horse-power employed being 48,209, or over fourteen per cent.

### § 3. Numbers Employed in Australian Factories.

**1. Total Number Employed.**—Each person employed in and about a factory, in whatever capacity, is now included as a factory employee, consequently every proprietor who works in his business is counted as an employee, and all "outworkers" (see paragraph 6 hereinafter) are also included. The individuals embraced may be classed under the following heads, viz.:—(i.) Working proprietors; (ii.) managers and overseers; (iii.) accountants and clerks; (iv.) enginedrivers and firemen; (v.) skilled and unskilled workers in the factories, mills, or workshops; (vi.) carters and messengers; and (vii.) others.

(i.) *Average Numbers Employed, 1908 to 1912.* The following table shews, for each year from 1908 to 1912 inclusive, (a) the average numbers of persons (including both sexes and all ages) employed in manufacturing industries in each State; (b) the percentage of the numbers employed in each State on the total numbers employed in the Commonwealth; and (c) the numbers employed per ten thousand of the mean population in each State and the Commonwealth:—

#### AVERAGE NUMBER OF PERSONS EMPLOYED IN MANUFACTURING INDUSTRIES, 1908 to 1912.

| Year.                             | N.S.W.  | Victoria. | Q'land. | S. Aust. | W. Aust. | Tasmania. | C'wealth. |
|-----------------------------------|---------|-----------|---------|----------|----------|-----------|-----------|
| AVERAGE NUMBER.                   |         |           |         |          |          |           |           |
| 1908                              | 89,098  | 93,808    | 29,200  | 24,236   | 12,425   | 8,727     | 257,494   |

| PERCENTAGE ON COMMONWEALTH TOTAL. |         |           |         |          |          |           |           |
| 1908                              | 34.60   | 36.42     | 11.34   | 9.42     | 4.83     | 3.39      | 100.00    |
| 1909                              | 34.39   | 36.51     | 11.06   | 9.64     | 4.81     | 3.59      | 100.00    |
| 1910                              | 34.76   | 35.61     | 11.83*  | 9.41     | 4.91     | 3.48      | 100.00    |
| 1911                              | 34.85   | 35.91     | 11.92*  | 8.95     | 5.07     | 3.30      | 100.00    |
| 1912                              | 35.29   | 35.46     | 12.51*  | 8.70     | 5.00     | 3.04      | 100.00    |
| PER 10,000 OF MEAN POPULATION.    |         |           |         |          |          |           |           |
| 1908                              | 566     | 756       | 527     | 635      | 482      | 465       | 614       |
| 1909                              | 574     | 772       | 518     | 656      | 487      | 503       | 624       |
| 1910                              | 611     | 797       | 574*    | 673      | 521      | 522       | 657       |
| 1911                              | 654     | 848       | 605*    | 679      | 551      | 541       | 694       |
| 1912                              | 665     | 856       | 648*    | 676      | 543      | 519       | 705       |

\* Including a number of drapery and tailoring shops making to order of customer; this class of establishment was omitted in Queensland in years previous to 1910.

(ii.) *Rates of Increase, 1908 to 1912.* From the preceding table it may be seen that there has been a general increase in the average number of persons employed in manufacturing industries during the period referred to. The following table shews the percentage of increase during each year on the average number for the preceding year:—

**PERCENTAGE OF INCREASE IN AVERAGE NUMBER EMPLOYED, 1908 to 1912.**

| Years.      | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tasmania. | C'wealth. |
|-------------|--------|-----------|---------|----------|----------|-----------|-----------|
| 1907-8 ...  | 3.04   | 2.75      | 4.46    | 6.90     | — 1.44   | 6.31      | 3.49      |
| 1908-9 ...  | 2.92   | 3.78      | 1.04    | 6.08     | 3.23     | 9.60      | 3.56      |
| 1909-10 ... | 8.77   | 4.95      | 15.05*  | 5.06     | 9.99     | 4.34      | 7.61      |
| 1910-11 ... | 8.94   | 9.56      | 9.46*   | 3.32     | 11.99    | 3.19      | 8.65      |
| 1911-12 ... | 6.35   | 3.72      | 10.20   | 2.12     | 3.69     | — 3.31    | 5.03      |

Note. (—) signifies a decrease. \* See note (\*) to preceding table.

**2. Classification of Numbers Employed in Factories in the Commonwealth, 1908 to 1912.**—The following table gives a classification of the average numbers of persons employed in factories of different descriptions in the Commonwealth during the years 1908 to 1912 inclusive:—

**AVERAGE NUMBER OF PERSONS EMPLOYED IN VARIOUS FACTORIES IN THE COMMONWEALTH, 1908 to 1912.**

| Class of Industry.  | 1908.   | 1909.   | 1910.   | 1911.   | 1912.   |
|---|---------|---------|---------|---------|---------|
| I. Treating raw material, product of agricultural and pastoral pursuits, etc. ... | 9,042   | 9,549   | 9,655   | 9,805   | 9,624   |
| II. Treating oils and fats, animal, vegetable, etc. ...                           | 1,735   | 1,812   | 1,872   | 2,019   | 2,091   |
| III. Processes in stone, clay, glass, etc. ...                                    | 9,420   | 9,605   | 10,737  | 12,033  | 12,909  |
| IV. Working in wood ...   | 21,310  | 22,487  | 24,520  | 27,948  | 30,660  |
| V. Metal works, machinery, etc. ...   | 48,505  | 49,753  | 54,238  | 60,538  | 66,472  |
| VI. Connected with food and drink, etc. ...                                       | 40,652  | 41,006  | 42,921  | 45,623  | 46,812  |
| VII. Clothing and textile fabrics, etc. ...                                       | 70,075  | 73,567  | 78,983  | 83,845  | 84,651  |
| VIII. Books, paper, printing and engraving ...                                    | 21,448  | 21,943  | 23,064  | 24,282  | 25,077  |
| IX. Musical instruments, etc. ...   | 444     | 433     | 553     | 607     | 628     |
| X. Arms and explosives ...  | 339     | 377     | 431     | 508     | 599     |
| XI. Vehicles and fittings, saddlery and harness, etc. ...                         | 10,784  | 11,365  | 12,484  | 13,294  | 13,400  |
| XII. Ship and boat building and repairing ...                                     | 2,278   | 2,220   | 2,508   | 2,920   | 3,621   |
| XIII. Furniture, bedding and upholstery ...                                       | 7,117   | 7,638   | 8,434   | 9,480   | 10,405  |
| XIV. Drugs, chemicals and by-products ...   | 3,086   | 3,391   | 3,827   | 4,165   | 4,381   |
| XV. Surgical and other scientific instruments ...                                 | 176     | 173     | 190     | 233     | 238     |
| XVI. Jewellery, timepieces, and platedware ...                                    | 1,771   | 1,800   | 1,896   | 2,142   | 2,302   |
| XVII. Heat, light, and power ...  | 5,754   | 5,986   | 6,735   | 7,651   | 8,550   |
| XVIII. Leatherware, n.e.i. ...  | 893     | 924     | 1,037   | 1,226   | 1,231   |
| XIX. Minor wares, n.e.i. ...  | 2,665   | 2,631   | 2,783   | 3,321   | 3,295   |
| Total ...   | 257,494 | 266,661 | 286,928 | 311,710 | 327,456 |

The total increase in the average number of hands employed from 1908 to 1912 was 69,962, or an annual average of 17,490. The increase was general throughout all the various classes of industry. The greatest development took place in Classes V. and VII., the increases being 17,967 and 14,586 respectively.

**3. Classification of Numbers Employed in each State, according to Class of Industry, 1912.**—The following table shews a similar classification of employees in manufacturing industries in each State for the year 1912:—

**AVERAGE NUMBER OF PERSONS EMPLOYED IN VARIOUS FACTORIES IN  
EACH STATE, 1912.**

| Class of Industry.  | N.S.W.  | Vic.    | Q'land. | S. Aus.        | W. Aus. | Tas.  | C'with. |
|---|---------|---------|---------|----------------|---------|-------|---------|
| I. Treating raw material, product of agricul. and pastoral pursuits, etc. | 3,872   | 3,379   | 723     | 1,075          | 247     | 328   | 9,624   |
| II. Treating oils and fats, animal, vegetable, etc.                       | 895     | 663     | 166     | 264            | 69      | 34    | 2,091   |
| III. Processes in stone, clay, glass, etc.                                | 5,932   | 4,207   | 619     | 1,354          | 574     | 223   | 12,909  |
| IV. Working in wood   | 8,973   | 7,191   | 5,707   | 1,858          | 4,891   | 2,040 | 30,660  |
| V. Metal works, machinery, etc.   | 25,550  | 20,126  | 7,399   | 8,096          | 3,210   | 2,091 | 66,472  |
| VI. Connected with food and drink, etc.                                   | 14,249  | 14,335  | 11,553  | 3,564          | 1,612   | 1,499 | 46,812  |
| VII. Clothing and textile fabrics, etc.                                   | 27,089  | 39,770  | 8,054   | 5,441          | 2,623   | 1,684 | 84,661  |
| VIII. Books, paper, printing & engraving                                  | 9,441   | 8,901   | 2,918   | 1,924          | 1,174   | 719   | 25,077  |
| IX. Musical instruments, etc.   | 416     | 189     | ...     | 23             | ...     | ...   | 628     |
| X. Arms and explosives  | 188     | 707     | ...     | 4              | ...     | ...   | 899     |
| XI. Vehicles and fittings, saddlery, and harness, etc.                    | 4,415   | 4,748   | 1,458   | 1,668          | 622     | 489   | 13,400  |
| XII. Ship and boat building & repairing                                   | 3,169   | 240     | 117     | 192            | 26      | 77    | 3,821   |
| XIII. Furniture, bedding, and upholstery                                  | 3,974   | 3,263   | 1,170   | 1,144          | 469     | 385   | 10,405  |
| XIV. Drugs, chemicals, and by-products                                    | 1,547   | 1,804   | 65      | 697            | 266     | 2     | 4,381   |
| XV. Surgical and other scientific instruments                             | 97      | 90      | 28      | 7              | 16      | ...   | 238     |
| XVI. Jewellery, timepieces, & platedware                                  | 863     | 1,037   | 114     | 178            | 70      | 40    | 2,302   |
| XVII. Heat, light, and power  | 3,387   | 3,052   | 633     | 803            | 371     | 304   | 8,550   |
| XVIII. Leatherware, n.e.i.  | 495     | 605     | 76      | 2 <sup>p</sup> | 27      | ...   | 1,231   |
| XIX. Minor wares, n.e.i.  | 1,009   | 1,801   | 148     | 180            | 115     | 42    | 3,295   |
| Total ... ..  | 115,561 | 116,108 | 40,948  | 28,500         | 16,382  | 9,957 | 327,456 |

The largest number employed in any particular class in the Commonwealth was in Class VII., in which there were 84,661 employees, or 25.85 per cent. of the whole number. The class affording employment to the smallest number of hands was Class XV., in which there were 238 hands, or 0.07 per cent. of the total number of employees. Classes VI., VII., and VIII. comprise those industries in which female labour is largely employed. (See § 4, 5 hereof.)

**4. Classification of Numbers Employed in each State according to Nature of Employment, 1912.**—In the following table the average numbers of persons employed in each State during the year 1912 are classified according to the nature of their employment:—

**AVERAGE NUMBER OF PERSONS EMPLOYED IN EACH STATE, CLASSIFIED  
ACCORDING TO NATURE OF EMPLOYMENT, 1912.**

| State.                | Average Number of Persons Employed. |                        |                         |                             |  |                                 | Total.  |
|-----------------------|-------------------------------------|------------------------|-------------------------|-----------------------------|--|---------------------------------|---------|
|                       | Working Proprietors.                | Managers and Overseers | Accountants and Clerks. | Engine-drivers and Firemen. | Workers, Skilled & Unskilled in Factory, Mill or Workshop. | Carters, Messengers and Others. |         |
| New South Wales ...   | 4,572                               | 3,569                  | 4,284                   | 2,674                       | 97,871   | 2,591                           | 115,561 |

| Western Australia ... | 511                                 | 562                    | 626                     | 477                         | 12,583   | 1,623                           | 16,382  |
| Tasmania ...          | 496                                 | 415                    | 390                     | 442                         | 7,747  | 467                             | 9,957   |
| Commonwealth ...      | 13,779                              | 9,790                  | 11,558                  | 7,344                       | 273,201  | 11,784                          | 327,456 |

\* Including outworkers.

## 5. Classification of Factories according to Number of Hands Employed, 1912.—

(i.) The number of factories in each State classified according to the number of hands employed, and the total number of hands employed therein, are shewn in the following table:—

**CLASSIFICATION OF FACTORIES IN EACH STATE ACCORDING TO NUMBER  
OF HANDS EMPLOYED, 1912.**

| No. of Persons<br>Employed in<br>each Factory. | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas. | C'wealth. |
|--|--------|-----------|---------|----------|----------|------|-----------|
| NUMBER OF FACTORIES.                           |        |           |         |          |          |      |           |
| Under 4 ...                                    | 831    | 800       | 197     | 154      | 113      | 108  | 2,203     |
| 4 ...  | 478    | 588       | 166     | 145      | 60       | 65   | 1,502     |
| 5 to 10 ...                                    | 1,793  | 1,844     | 648     | 520      | 246      | 244  | 5,295     |
| 11 to 20 ...                                   | 930    | 939       | 341     | 235      | 129      | 86   | 2,660     |
| 21 to 50 ...                                   | 681    | 674       | 274     | 186      | 94       | 74   | 1,983     |
| 51 to 100 ...                                  | 252    | 223       | 89      | 59       | 46       | 21   | 690       |
| Over 100 ...                                   | 197    | 195       | 75      | 42       | 23       | 13   | 545       |
| Total ...                                      | 5,162  | 5,263     | 1,790   | 1,341    | 711      | 611  | 14,878    |

**AVERAGE NUMBER OF HANDS EMPLOYED.**

|               |         |         |        |        |        |       |         |
|---------------|---------|---------|--------|--------|--------|-------|---------|
| Under 4 ...   | 1,943   | 1,912   | 473    | 387    | 247    | 242   | 5,204   |
| 4 ...         | 1,912   | 2,352   | 664    | 580    | 240    | 260   | 6,008   |
| 5 to 10 ...   | 12,468  | 12,831  | 4,600  | 3,610  | 1,694  | 1,720 | 36,923  |
| 11 to 20 ...  | 13,661  | 13,805  | 5,043  | 3,455  | 1,933  | 1,199 | 39,096  |
| 21 to 50 ...  | 21,185  | 21,298  | 8,668  | 6,024  | 2,990  | 2,276 | 62,441  |
| 51 to 100 ... | 18,008  | 15,368  | 6,575  | 4,211  | 3,089  | 1,434 | 48,685  |
| Over 100 ...  | 46,384  | 48,542  | 14,925 | 10,233 | 6,189  | 2,826 | 129,099 |
| Total ...     | 115,561 | 116,108 | 40,948 | 28,500 | 16,382 | 9,957 | 327,456 |

(ii.) Reference to the following table will shew the tendency of the ratio of the number of hands employed in the larger establishments to still further increase and that of the smaller factories to diminish. In 1908 the ratio of hands in factories employing under 21 hands was 29.72 per cent. of total employees in factories, and in those where over 100 hands were engaged 36.33 per cent., whereas in 1912 the percentages were 26.63 and 39.43 respectively. The number of factories with 20 hands or under in 1908 was 80.46 per cent., this number decreasing to 78.37 in 1912, whereas the larger factories employing over 100 hands shewed an increase from 3.20 to 3.66 per cent. The percentage of hands in factories employing from 21 to 100 hands was virtually the same during each of the two years. The average number employed in all establishments in 1908 was 20.03, and in 1912, 22.01.

**CLASSIFICATION OF FACTORIES IN THE COMMONWEALTH ACCORDING TO  
NUMBER OF HANDS EMPLOYED DURING THE YEARS 1908 to 1912.**

| Year.                         | Establishments Employing on the Average— |        |                           |         |                           |         |                           |         |
|-------------------------------|--|--------|---------------------------|---------|---------------------------|---------|---------------------------|---------|
|                               | 20 hands and under.                      |        | 21 to 100 hands.          |         | 101 hands and upwards.    |         | Total.                    |         |

**6. Outworkers.**—The term “outworker” or “homeworker” has acquired a special meaning in connection with manufacturing industries, and technically embraces only those to whom work is given out by factory owners to be wrought upon in the employees’ own homes. Individuals working for themselves are not included. The following table gives particulars of the average number of outworkers connected with factories in each State during each year from 1908 to 1912 inclusive :—

**NUMBER OF OUTWORKERS\* CONNECTED WITH FACTORIES, 1908 to 1912.**

| Year.    | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas. | C'wealth. |
|----------|--------|-----------|---------|----------|----------|------|-----------|
| 1908 ... | 596    | 1,457     | 171     | 74       | 11       | 11   | 2,320     |
| 1909 ... | 630    | 1,695     | 144     | 65       | 13       | ...  | 2,547     |
| 1910 ... | 720    | 1,584     | 224     | 68       | 20       | 76   | 2,692     |
| 1911 ... | 784    | 1,906     | 158     | 88       | 15       | 96   | 3,047     |
| 1912 ... | 895    | 1,959     | 140     | 71       | 14       | 86   | 3,165     |

\* In all tables relating to number of hands employed in factories outworkers are included.

The Factories Acts in each State contain provisions regulating the employment of outworkers. Generally records of out-work must be kept by factory proprietors, specifying the names and remuneration of workers, and stating the places where the work is done. Further particulars are given in a later part of this book. (See Section XXVII. *Industrial Unionism and Industrial Legislation.*)

### § 4. Sex Distribution in Factories.

1. **Employment of Females in Factories.**—In all the States the employment of female labour in factories is now regulated by Act of Parliament. In Victoria the first Act dealing with the subject was passed in the year 1873, and provided that no female should be employed for more than eight hours a day without the permission of the Chief Secretary. The number of working hours for women is now limited to forty-eight per week in all the States, overtime being allowed only with the permission of the Departments, and then to a limited extent. The maximum periods of continuous labour, and the intervals of cessation therefrom, are also prescribed by the several Acts. Further reference is made to the restrictions regarding the employment of females in a later part of this book. (See Section XXVII. *Industrial Unionism and Industrial Legislation.*)

2. **Distribution of Employees according to Sex, 1908 to 1912.**—In New South Wales the ratio of the number of females employed in factories to the number of males during 1886 was about one to seven; in 1891 one to six; in 1903 it became about one to four; and is now rather lower than one to three. In Victoria the ratio of females to males during the year 1886 was about one to five. Five years later (1891) it was somewhat less, but in 1896 had increased to about one woman to three men, and at present is slightly under one to two. In the remaining States the ratios during 1912 were—Queensland and South Australia—a little under one female employed to every four males, Western Australia one to five, and in Tasmania one to six. The proportion for the whole of the Commonwealth was just over one to three. The employment of women is, however, largely confined to a few trades.

The great prosperity in clothing and textile industries is one of the main causes of increase in female employment. Certain trades are specifically known as women's trades, such as clothing and textile trades, preparation of food, book-binding, and lighter work connected with the drug trade, as for example wrapping. In common with commercial establishments, a considerable number of women are also employed as clerks and typists in factories.

(i.) *Average Number of Males and Females Employed, 1908 to 1912.* The following table shews the average number of male and female employees in factories in each State from 1908 to 1912:—

#### AVERAGE NUMBER OF MALES AND FEMALES EMPLOYED IN MANUFACTURING INDUSTRIES, 1908 to 1912.

| State.                | 1908.   | 1909.   | 1910.   | 1911.   | 1912.   |
|-----------------------|---------|---------|---------|---------|---------|
| MALES.                |         |         |         |         |         |
| New South Wales ...   | 67,616  | 69,184  | 75,384  | 82,083  | 88,178  |
| Victoria ...          | 60,873  | 62,822  | 66,309  | 73,573  | 77,565  |
| Queensland ...        | 24,639  | 24,877  | *27,165 | *29,832 | *33,254 |
| South Australia ...   | 19,640  | 20,753  | 21,864  | 22,629  | 23,083  |
| Western Australia ... | 10,453  | 10,703  | 11,654  | 13,212  | 13,805  |
| Tasmania ...          | 7,334   | 8,132   | 8,277   | 8,737   | 8,391   |
| Commonwealth ...      | 190,555 | 196,471 | 210,653 | 230,066 | 244,276 |

**AVERAGE NUMBER OF MALES AND FEMALES EMPLOYED IN  
MANUFACTURING INDUSTRIES, 1908 to 1912—Continued.**

| State.                | 1908.  | 1909.  | 1910.  | 1911.  | 1912.  |
|-----------------------|--------|--------|--------|--------|--------|
| <b>FEMALES.</b>       |        |        |        |        |        |
| New South Wales ...   | 21,482 | 22,518 | 24,327 | 26,541 | 27,383 |
| Victoria ...          | 32,935 | 34,533 | 35,867 | 38,375 | 38,543 |
| Queensland ...        | 4,561  | 4,627  | *6,779 | *7,324 | 7,694  |
| South Australia ...   | 4,596  | 4,956  | 5,146  | 5,256  | 5,417  |
| Western Australia ... | 1,972  | 2,123  | 2,453  | 2,587  | 2,577  |
| Tasmania ...          | 1,393  | 1,433  | 1,703  | 1,561  | 1,566  |
| Commonwealth ...      | 66,939 | 70,190 | 76,275 | 81,644 | 83,180 |

\* See Note (\*) to § 3, 1 (i).

It will be seen that during the years specified there has been for the whole Commonwealth a total increase in the number of male employees of 53,721, or an annual average of 13,430, and in the number of female employees a total increase of 16,241, or an annual average of 4060.

(ii.) *Average Number of Males and Females Employed per 10,000 of Mean Population, 1908 to 1912.* The following table shews the average number of male and female employees per 10,000 of the mean male and female population respectively in each State from 1908 to 1912 :—

**AVERAGE NUMBER OF MALE AND FEMALE FACTORY EMPLOYEES PER 10,000  
OF MEAN MALE AND FEMALE POPULATION RESPECTIVELY, 1908 to 1912.**

| State.                | 1908. | 1909. | 1910. | 1911. | 1912. |

Note.—The minus (—) sign indicates decrease. \* See note (\*) to § 3. 1 (i).

The above tables shew that in each State for the first three years of the quinquennial period under discussion, with a few exceptions, there has been relatively a larger increase in the number of female than in the number of male employees. This position, however, was reversed in 1911 and 1912, when the percentage of increase of male employees exceeded that of female in every State, with the exception of New South Wales in 1911 and South Australia in 1912. This matter is referred to further in the following paragraph.

4. **Ratio of Female Employment in Factories.**—The extent to which females are employed in the factories of the Commonwealth may perhaps be best shewn by giving the number of females to every 100 male employees for each State for each year from 1908 to 1912 inclusive:—

**NUMBER OF FEMALES PER 100 MALES IN AUSTRALIAN FACTORIES, 1908 to 1912.**

| Year. | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.  | C'wealth. |
|-------|--------|-----------|---------|----------|----------|-------|-----------|
| 1908  | 31.77  | 54.10     | 18.51   | 23.36    | 18.86    | 18.99 | 35.12     |
| 1909  | 32.55  | 54.97     | 18.60   | 23.88    | 19.74    | 17.62 | 35.73     |
| 1910  | 32.26  | 54.09     | *24.95  | 23.54    | 21.05    | 20.58 | 36.20     |
| 1911  | 32.32  | 52.16     | *24.55  | 23.20    | 19.58    | 17.87 | 35.48     |
| 1912  | 31.05  | 49.69     | *23.14  | 23.47    | 18.67    | 18.66 | 34.05     |

\* See note (\*) to § 3. 1 (i).

This table shews that the proportion of the sexes has not materially changed during the past five years, the ratio of females to every hundred males employed increasing only from 35.12 in 1908 to 35.48 in 1911. The 1912 figures shew the reduced ratio of 34.05. The tables given in the succeeding paragraph shew that these comparatively high ratios have been due not so much to the incursion of female labour into what may be termed men's trades, as to the activity in those trades in which women are ordinarily engaged, more especially in dressmaking, millinery, etc.

5. **Employment of Females in Particular Industries, 1912.**—The employment of women in manufacturing industries in Australia is largely confined to a few trades, of which the more important are comprised in Classes VI., VII., and VIII., viz., in connection with food, drink, etc., clothing and textile fabrics, and books, paper, printing etc. The following table shews the average number of females employed in each of these classes during the year 1912 in each State, and also shews the percentages of the average number so employed on the total average number of females employed in all classes of factories :—

**AVERAGE NUMBER OF FEMALES EMPLOYED IN PARTICULAR INDUSTRIES,  
AND PERCENTAGES ON AVERAGE TOTAL EMPLOYED, 1912.**

| Class. | N.S.W. | Vict. | Q'land. | S. Aust. | W. Aust. | Tas. | Cwth. |
|--------|--------|-------|---------|----------|----------|------|-------|
|--------|--------|-------|---------|----------|----------|------|-------|

AVERAGE NUMBER.

|   |        |        |       |       |       |       |        |
|---|--------|--------|-------|-------|-------|-------|--------|
| VI. Food, drink, etc. ....              | 3,476  | 3,434  | 599   | 519   | 170   | 260   | 8,458  |
| VII. Clothing and textile fabrics ....  | 19,273 | 30,024 | 6,097 | 4,088 | 2,057 | 1,123 | 62,662 |
| VIII. Books, paper, printing, etc. .... | 2,390  | 2,303  | 659   | 528   | 228   | 89    | 6,197  |
| All other classes ....                  | 2,244  | 2,782  | 339   | 282   | 122   | 94    | 5,863  |
| Total ... ..                            | 27,383 | 38,543 | 7,694 | 5,417 | 2,577 | 1,566 | 83,180 |

PERCENTAGES ON TOTAL AVERAGE FEMALE EMPLOYEES.

|   |        |        |        |        |        |        |        |
|---|--------|--------|--------|--------|--------|--------|--------|
| VI. Food, drink, etc. ....              | 12.70  | 8.91   | 7.79   | 9.58   | 6.60   | 16.60  | 10.17  |
| VII. Clothing and textile fabrics ....  | 70.38  | 77.90  | 79.24  | 75.47  | 79.82  | 71.71  | 75.33  |
| VIII. Books, paper, printing, etc. .... | 8.73   | 5.97   | 8.57   | 9.74   | 8.95   | 5.69   | 7.45   |
| All other classes ....                  | 8.19   | 7.22   | 4.40   | 5.21   | 4.73   | 6.00   | 7.05   |
| Total ... ..                            | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 |

It will be seen that by far the greater part of the total number of females employed in factories work in one or other of the three classes of industry indicated, Class VII. being the most important. The classification of the employment of females in the several industries in that class, and the ratio they bore to males so employed, are shewn in the following table :—

## FEMALE EMPLOYMENT IN EACH INDUSTRY IN CLASS VII., DURING 1912.

| Industry.                | New South Wales. |        |                             | Victoria. |        |                             | Other States. |        |                             |

## § 5. Child Labour in Factories.

1. **Conditions of Child Labour.**—The employment of young persons in factories in each State of the Commonwealth is regulated by Acts of Parliament in a similar manner to the employment of female labour. Excepting under special circumstances, children under a certain age may not be employed in factories. The minimum age in all the States is 14, with the exception of South Australia, where it is 13 years, and Victoria, where the minimum for females is 15 years. Other restrictions on the employment of young persons in factories are more particularly referred to in a later part of this book. (See Section XXVII. *Industrial Unionism and Industrial Legislation*.) The general object of the restrictions imposed is to assure that a proper period shall be devoted to primary education, and that the early years of toil shall not exhaust the worker before the attainment of full growth.

2. **Average Number of Children Employed in Factories, 1908 to 1912.**—In the statistical compilations of the various States the term "child" may be taken to denote any person under sixteen years of age, excepting in New South Wales, where it denoted, for years prior to 1907, any person under fifteen. The following table shews the average number of children of each sex employed in manufacturing industries in each State during the years 1908 to 1912. During the period under review, there was a decrease in the average number employed in New South Wales and Victoria of 16 in the former, and 1722 in the latter State, the other States all shewed an increase, amounting in all to 515 persons.

## AVERAGE NUMBER OF CHILDREN EMPLOYED IN FACTORIES, 1908 to 1912.

| State.            | 1908. | 1909. | 1910.  | 1911.  | 1912. |

| Commonwealth ...      | 14,726 | 13,864 | 13,936 | 13,921 | 13,503 |

\* See Note (\*) to § 3. 1 (i).

**3. Percentage of Children to Total Persons Employed.**—The foregoing table shews a general increase in several of the States in the number of children employed in factories during the past quinquennial period. These increases, however, when examined in conjunction with the total number of persons employed, shew that in every State, with the exception of Tasmania, a fairly regular decrease in the percentage of child labour is in evidence. This decrease is particularly noticeable in Victoria, the percentage falling from 6.52 in 1908 to 3.78 in 1912.

**PERCENTAGE OF CHILDREN IN FACTORIES TO TOTAL NUMBER OF EMPLOYEES,  
1908 to 1912.**

| State.                | 1908. | 1909. | 1910. | 1911. | 1912. |
|-----------------------|-------|-------|-------|-------|-------|

| Commonwealth ...      | 5.72  | 5.20  | 4.86  | 4.47  | 4.12  |

**4. Industries Employing Child Labour, 1912.**—The employment of children is largely confined to a limited number of industries, the most important of which are specified in the table below, which shews the average number of children of each sex employed in the several industries indicated in each State during the year 1912 :—

## NUMBER OF CHILDREN ENGAGED IN VARIOUS INDUSTRIES, 1912.

| Class. | Industry.                                       | N.S.W. |     | Victoria. |     | Q'land. |     | S. Aust. |     | W.A. |     | Tas. |     | C'w'lt'h. |       |

5. **Apprenticeship.**—It is obvious that the age of apprenticeship in each State must be limited by the conditions governing the employment of child labour in factories. The early Apprentices' Acts in some of the States are apparently in conflict on this point with the Factories Acts. The statutes limiting the age at which children may begin to work may be regarded as applicable by way of preventing too early apprenticeship, so also may those directing that education be continued up to a certain age or standard.

Indentures must be entered into specifying the conditions of the employment. Apprenticeships may not exceed seven years in duration, and become inoperative at twenty-one years of age, or in the case of women, on marriage.

The Arbitration Courts and Wages Boards have power to limit the number of apprentices which may be taken into a factory and specify the term of apprenticeship. No general statistics of the number of apprentices in Australia have been collected up to the present time. Other enactments relating to child labour are referred to in Section XXVII. of this book, *Industrial Unionism and Industrial Legislation*.

## § 6. Amount of Wages Paid and Value of Production.

1. **Introduction.**—The importance of the manufacturing industries of the Commonwealth is indicated by the fact that the total value of the output for 1912 was £148,775,407, of which amount the sum of £38,275,620 represents the value of the raw materials used. The difference between these two amounts, viz., £60,499,787, represents the amount by which the value of the raw materials was enhanced in the process of manufacture. The total amount of salaries and wages paid in factories during 1912 was £31,287,492.

2. **Amount of Salaries and Wages Paid, 1912.**—The total amount of salaries and wages paid during the year 1912 in various classes of factories in the Commonwealth (excluding all sums drawn by working proprietors) is shewn in the following table.

It has been found impracticable to shew satisfactorily in this book the rates of wages paid to employees in various classes of manufacturing industries in Australia, owing to the facts—firstly, that the rates in many industries vary very considerably in different parts of the country; and secondly, that the necessary particulars are not collected by the several States on a uniform basis; while for some of the States the information given is meagre and unsatisfactory.

**AMOUNT OF SALARIES AND WAGES PAID IN FACTORIES IN COMMONWEALTH, 1912.\***

| Class of Industry.  | N.S.W.     | Vict.      | Q'land.   | S. Aust.  | W. Aust.  | Tas.    | C'wlth.    |

\* Excluding all amounts drawn by working proprietors.

The maximum amount of salaries and wages paid in any particular class was in Class V., the amount being £8,190,789, or 26.15 per cent. on the total amount; the minimum amount was in Class XV., £21,836, or 0.07 per cent. on the total amount. The State in which the largest amount was paid was New South Wales. The following statement shews the total amount of salaries and wages paid, and the average amount paid per employee in each State, during each of the years 1908 to 1912; the figures are exclusive of the amounts drawn from the business by working proprietors:—

**AMOUNT OF SALARIES AND WAGES PAID AND AVERAGE AMOUNT PER ANNUM PAID PER EMPLOYEE, 1908 to 1912.**

| Year. | Particulars.             | N.S.W.     | Vic.       | Q'land.   | S. Aust.  | W. Aust.  | Tas.    | C'wlth.    |
|-------|--------------------------|------------|------------|-----------|-----------|-----------|---------|------------|

|       | Average per employee ... | 90.78      | 78.18      | 86.79     | 90.44     | 123.93    | 78.81   | 87.04      |
| 1911  | Total amount paid ...    | 10,047,656 | 8,911,019  | 3,113,835 | 2,645,386 | 1,982,883 | 827,592 | 27,528,371 |
|       | Average per employee ... | 96.35      | 83.48      | 87.15     | 99.64     | 129.80    | 84.47   | 92.26      |
| 1912  | Total amount paid ...    | 11,592,052 | 10,102,244 | 3,699,065 | 2,869,653 | 2,169,144 | 855,334 | 31,287,492 |
|       | Average per employee ... | 104.44     | 91.19      | 93.88     | 105.62    | 136.67    | 90.41   | 99.74      |

In comparing the figures in the above table regard should be paid to the nature of certain industries which are carried on to a greater extent in some States than in others (see § 2 hereof). In Victoria, for instance, where, with the exception of Tasmania, the average is lowest, there are a large number of factories and hands employed in Class VII., and in that class wages are low, a great many women and children being employed. The position occupied by Western Australia is principally due to the high ratio of male to female employees in that State.

It will be noted that there has been a persistent increase in the average wage paid per employee in each of the States during the period under review, despite the tendency of the number of females employed in certain industries to increase at a higher ratio than males. Taking the Commonwealth as a whole, during the period 1908-12 there has been an increase of 57.35 per cent. on the total amount of wages paid and 23.15 per cent. on the average paid per employee.

The following tables shew the approximate amount paid in salaries and wages to males and females in each class of industry in each State during 1912, and total amounts paid to each sex in New South Wales and Victorian factories during the last four years, in South Australia and Tasmania during 1911 and 1912, and for Queensland and Western Australia during 1912:—

**AMOUNT\* OF SALARIES AND WAGES PAID TO MALE AND FEMALE HANDS  
EMPLOYED IN EACH CLASS OF INDUSTRY IN THE SEVERAL STATES OF  
THE COMMONWEALTH DURING 1912.**

| Class of Industry.   | N.S.W.     | Vic.      | Q'land.   | S. Aust.  | W. A.     | Tas.    | C'wealth.  |

3. **Value of Fuel and Light used in Factories, 1912.**—The amount expended in factories on fuel and light is of considerable importance; in 1912 it amounted to £3,047,384, being an increase on the previous year's figures of £294,434. The classes of industry in which fuel was most extensively used were Class V., Metal Works, Machinery, etc., £1,031,533; Class VI., Connected with Food, Drink, etc., £571,724; Class XVII., Heat, Light, Power, etc., £517,017, of which amount £430,902 was expended on generating

electric light and power; and Class III., £403,976, of which £317,734 was represented in brick and pottery works, etc., and glass factories. The following tables shew the value of fuel and light used in the different classes of industry in the several States of the Commonwealth during 1912, and of the total used for each of the last five years :—

#### VALUE OF FUEL AND LIGHT USED IN FACTORIES IN COMMONWEALTH, 1912.

| Class of Industry.   | N.S.W.    | Vic.    | Q'land. | S.A.    | W.A.    | Tas.    | C'with.   |

\* Figures estimated.

4. *Value of Raw Materials used in Factories, 1912.*—The total value of raw materials worked up (i.e., exclusive of fuel, lubricants, etc.) in factories in the Commonwealth during 1912 was £88,275,620, which represents 59.33 per cent. of the total value of the finished products. (See next paragraph hereof.) The following table shews the value of the raw materials worked up in various classes of industry in each State during the year 1912 :—

## VALUE OF RAW MATERIALS WORKED UP IN FACTORIES IN COMMONWEALTH, 1912.

| Class of Industry.  | N.S.W.     | Vic.       | Q'land.    | S.A.      | W.A.      | Tas.      | C'wlth.    |
|---|------------|------------|------------|-----------|-----------|-----------|------------|
|   | £          | £          | £          | £         | £         | £         | £          |
| I. Treating raw material, product of agricultural and pastoral pursuits, etc. ... | 3,880,346  | 2,463,407  | 1,387,212  | 719,590   | 161,970   | 166,433   | 8,778,958  |
| II. Treating oils and fats, animal, vegetable, etc. ...                           | 783,901    | 428,229    | 77,035     | 121,497   | 57,207    | 8,469     | 1,476,338  |
| III. Processes in stone, clay, glass, etc. ...                                    | 340,550    | 211,925    | 10,224     | 43,992    | 17,670    | 6,488     | 630,849    |
| IV. Working in wood ...   | 2,260,095  | 1,070,193  | 782,101    | 743,142   | 104,161   | 125,800   | 5,085,492  |
| V. Metal wks., machinery, etc. ...  | 8,678,576  | 3,036,937  | 1,393,082  | 2,611,605 | 712,677   | 1,000,982 | 17,433,859 |

| VII. Clothing and textile fabrics, etc. ...                                       | 2,842,762  | 4,421,265  | 789,128    | 521,225   | 278,805   | 125,095   | 8,978,280  |
| VIII. Books, paper, printing, and engraving ...                                   | 898,053    | 903,714    | 148,429    | 188,210   | 98,698    | 49,341    | 2,286,445  |
| IX. Musical instruments, etc. ...   | 68,908     | 16,160     | ...        | 1,545     | ...       | ...       | 86,613     |
| X. Arms and explosives ...  | 13,192     | 131,511    | ...        | 800       | ...       | ...       | 145,503    |
| XI. Vehicles and fittings, saddlery and harness, etc. ...                         | 433,249    | 417,580    | 130,470    | 211,147   | 71,471    | 45,043    | 1,308,960  |
| XII. Ship and boat building and repairing ...                                     | 189,018    | 15,080     | 8,416      | 11,812    | 3,351     | 7,134     | 234,811    |
| XIII. Furniture, bedding, and upholstery ...                                      | 567,159    | 509,997    | 115,316    | 109,511   | 73,960    | 27,795    | 1,403,738  |
| XIV. Drugs, chemicals, and by-products ...  | 544,730    | 631,310    | 14,774     | 235,840   | 126,291   | 885       | 1,553,830  |
| XV. Surgical and other scientific instruments ...                                 | 7,296      | 6,843      | 2,179      | 150       | 915       | ...       | 17,383     |
| XVI. Jewellery, timepieces, and platedware ...                                    | 130,981    | 187,411    | 14,465     | 24,672    | 20,524    | 3,876     | 381,929    |
| XVII. Heat, light, and power ...  | 564,232    | 326,609    | 26,711     | 54,999    | 23,863    | 19,880    | 1,016,294  |
| XVIII. Leatherware, n.e.i. ...  | 140,601    | 182,434    | 9,080      | 3,929     | 3,230     | ...       | 339,274    |
| XIX. Minor wares, n.e.i. ...  | 188,659    | 557,567    | 10,877     | 16,735    | 10,300    | 2,341     | 786,479    |
| Total ...   | 37,122,441 | 27,002,302 | 11,078,954 | 8,199,110 | 2,586,195 | 2,286,618 | 88,275,620 |

The class in which the maximum value of raw materials was used was Class VI., "Connected with Food and Drink, etc.," the value being £36,330,585. The next important class in order of value was Class V., "Metal Works, Machinery, etc.," in which raw materials to the value of £17,433,859 were used. The class in which the minimum value appears is Class XV., "Surgical and other Scientific Instruments," the value being only £17,383. The year 1910 was the first for which reliable and complete returns were collected in every State relating to the value of raw materials worked up in factories; the following table, however, gives particulars for the five years ended 1912, so far as information is available:—

## VALUE OF RAW MATERIALS WORKED UP IN FACTORIES IN COMMONWEALTH DURING THE YEARS 1908 to 1912.

| Year.    | N.S.W.     | Victoria.  | Q'land.    | S. Aust.  | W. Aust.  | Tas.       | C'wealth.  |
|----------|------------|------------|------------|-----------|-----------|------------|------------|
|          | £          | £          | £          | £         | £         | £          | £          |
| 1908 ... | 25,507,414 | 18,662,070 | 6,946,550  | 6,689,376 | 1,592,216 | *1,560,000 | 60,957,626 |

\* Estimated on basis of partial returns and subsequent years' figures.

5. Total Value of Output of Manufacturing Industries, 1912.—The value of the output of new goods manufactured and repairs effected in factories of various classes in each State during the year 1912 is shewn in the following table. The figures given represent not only the increased value due to the process of manufacture, but also include the value of the raw materials used. The difference between the value of the materials used and the total output (see paragraph 6 hereof) is the real value of production from manufactories:—

## TOTAL VALUE OF OUTPUT OF COMMONWEALTH, 1912.

| Class of Industry.  | N.S.W.     | Victoria.  | Q'land.    | S.A.       | W.A.      | Tas.      | C'w'lth.    |
|---|------------|------------|------------|------------|-----------|-----------|-------------|
|   | £          | £          | £          | £          | £         | £         | £           |
| I. Treating raw material, product of agricultural & pastoral pursuits, etc. | 4,643,811  | 3,082,047  | 1,621,730  | 897,590    | 202,559   | 205,811   | 10,653,548  |
| II. Treating oils and fats, animal, vegetable, etc.                         | 1,099,693  | 632,707    | 125,855    | 193,312    | 78,709    | 13,852    | 2,144,128   |
| III. Processes in stone, clay, glass, etc.                                  | 1,807,287  | 1,063,019  | 122,712    | 307,797    | 162,383   | 44,515    | 3,507,713   |

| IX. Musical instruments, etc.   | 154,504    | 43,759     | ...        | 4,800      | ...       | ...       | 203,063     |
| X. Arms and explosives  | 17,085     | 215,516    | ...        | 1,361      | ...       | ...       | 233,962     |
| XI. Vehicles and fittings, saddlery and harness, etc.                       | 1,079,984  | 1,040,452  | 342,629    | 475,972    | 172,045   | 97,361    | 3,208,443   |
| XII. Ship and boat building and repairing                                   | 700,023    | 59,667     | 27,703     | 40,711     | 7,242     | 15,571    | 850,917     |
| XIII. Furniture, bedding, and upholstery                                    | 1,171,320  | 988,464    | 269,312    | 279,845    | 151,884   | 73,038    | 2,933,863   |
| XIV. Drugs, chemicals, and by-products                                      | 1,008,795  | 1,069,246  | 25,379     | 387,232    | 185,730   | 1,224     | 2,677,606   |
| XV. Surgical and other scientific instruments                               | 25,424     | 21,375     | 8,013      | 2,010      | 2,845     | ...       | 59,667      |
| XVI. Jewellery, timepieces, and platedware                                  | 286,317    | 382,168    | 28,414     | 58,463     | 34,125    | 10,634    | 800,121     |
| XVII. Heat, light, and power  | 2,526,546  | 1,319,674  | 287,996    | 315,253    | 302,303   | 150,203   | 4,901,975   |
| XVIII. Leatherware, n.e.i.  | 225,893    | 275,118    | 15,143     | 7,332      | 7,837     | ...       | 531,323     |
| XIX. Minor wares, n.e.i.  | 311,846    | 849,420    | 21,502     | 40,701     | 23,637    | 5,201     | 1,252,307   |
| Total   | 61,163,328 | 45,410,773 | 18,798,904 | 13,438,218 | 6,092,268 | 3,871,916 | 148,775,407 |

It may be seen that the State of New South Wales far outstrips the other States in the total value of the output of her factories, the value being £61,163,328, or 41.11 per cent. on the total for the Commonwealth. The next State in order of value is Victoria, which produced 30.52 per cent.; the value of the output of Queensland was 12.64 per cent.; of South Australia 9.03 per cent.; of Western Australia 4.10 per cent.; and of Tasmania 2.60 per cent. The four most important classes in order of value of output (Classes VI., V., VII. and I.) are the same as in order of value of raw materials used. The following statement shews the value of output of factories in each State during the five years ended 1912:—

TOTAL VALUE OF OUTPUT OF FACTORIES IN COMMONWEALTH DURING  
THE YEARS 1908 to 1912.

| Year. | N.S.W.     | Victoria.  | Q'land.    | S.A.       | W.A.      | Tas.       | C'wealth.   |
|-------|------------|------------|------------|------------|-----------|------------|-------------|
|       | £          | £          | £          | £          | £         | £          | £           |
| 1908  | 40,163,826 | 30,787,760 | 11,182,009 | 10,471,671 | 4,056,365 | *2,868,000 | 99,529,631  |
| 1909  | 42,960,689 | 32,898,235 | 12,823,695 | 9,928,105  | 4,008,604 | *3,339,000 | 105,958,328 |
| 1910  | 49,615,643 | 36,660,854 | 15,792,109 | 11,184,695 | 4,533,611 | 3,073,216  | 120,860,158 |
| 1911  | 54,346,011 | 41,747,863 | 15,675,662 | 12,416,981 | 5,311,086 | 3,525,087  | 133,022,090 |
| 1912  | 61,163,328 | 45,410,773 | 18,798,904 | 13,438,218 | 6,092,268 | 3,871,916  | 148,775,407 |

## PER HEAD OF MEAN POPULATION.

| Year. | N.S.W. | Victoria. | Q'land. | S.A.  | W.A.  | Tas.  | C'wealth. |
|-------|--------|-----------|---------|-------|-------|-------|-----------|
|       |        |           |         |       |       |       |           |
| 1908  | 25.53  | 24.82     | 20.60   | 27.44 | 15.73 | 15.30 | 23.73     |
| 1909  | 26.88  | 26.09     | 23.16   | 25.33 | 15.23 | 17.53 | 24.79     |
| 1910  | 30.38  | 28.59     | 26.69   | 27.88 | 16.73 | 16.09 | 27.66     |
| 1911  | 32.70  | 31.62     | 25.52   | 30.19 | 18.52 | 18.52 | 29.62     |
| 1912  | 35.22  | 33.48     | 29.77   | 31.87 | 20.21 | 20.20 | 32.03     |

\* See note (\*) to last table § 6.

6. **Value of Production of Manufacturing Industries, 1912.**—The difference between the figures given in paragraph 5 and the corresponding figures in paragraph 4 hereof represents the amount added to the value of the raw materials by the process of manufacture. This is the real measure of the value of production of manufacturing industries. The following table shews the value added in this manner in each State during the year 1912 for the various classes of factories:—

**VALUE OF PRODUCTION OF MANUFACTURING INDUSTRIES IN  
COMMONWEALTH, 1912.**

| Class of Industry.  | N.S.W.     | Victoria.  | Q'land.   | S.A.      | W.A.      | Tas.      | C'wealth.  |
|---|------------|------------|-----------|-----------|-----------|-----------|------------|
|   | £          | £          | £         | £         | £         | £         | £          |
| I. Treating raw material, product of agricultural and pastoral pursuits, etc. ... | 763,465    | 618,640    | 234,518   | 178,000   | 40,589    | 39,378    | 1,874,590  |
| II. Treating oils and fats, animal, vegetable, etc. ...                           | 315,792    | 204,478    | 48,820    | 71,815    | 21,502    | 5,353     | 667,790    |
| III. Processes in stone, clay, glass, etc. ...                                    | 1,466,737  | 851,094    | 112,488   | 263,805   | 144,713   | 38,027    | 2,876,864  |
| IV. Working in wood ...   | 1,441,144  | 1,128,079  | 1,016,748 | 336,662   | 1,029,983 | 243,176   | 5,195,792  |
| V. Metal works, machinery, etc. ...   | 6,693,956  | 3,359,786  | 1,210,782 | 1,725,863 | 553,125   | 468,944   | 14,012,456 |
| VI. Connected with food and drink, etc. ...                                       | 4,196,868  | 3,616,410  | 3,079,441 | 946,665   | 590,898   | 272,347   | 12,702,629 |
| VII. Clothing and textile fabrics, etc. ...                                       | 2,855,325  | 3,625,974  | 707,577   | 492,463   | 263,831   | 145,235   | 8,090,465  |
| VIII. Books, paper, printing, and engraving ...                                   | 1,647,888  | 1,721,653  | 615,773   | 281,295   | 307,689   | 126,470   | 4,700,768  |
| IX. Musical instruments, etc. ...   | 85,596     | 27,599     | ...       | 3,255     | ...       | ...       | 116,450    |
| X. Arms and explosives ...  | 3,893      | 84,005     | ...       | 561       | ...       | ...       | 88,459     |
| XI. Vehicles and fittings, saddlery and harness, etc. ...                         | 646,735    | 622,872    | 212,159   | 264,825   | 100,574   | 52,318    | 1,899,483  |
| XII. Ship and boat building and repairing ...                                     | 511,005    | 44,587     | 19,287    | 28,899    | 3,831     | 8,437     | 616,106    |
| XIII. Furniture, bedding, and upholstery ...                                      | 604,161    | 478,467    | 153,996   | 170,334   | 77,924    | 45,243    | 1,530,125  |
| XIV. Drugs, chemicals, and by-products ...  | 464,065    | 437,936    | 10,605    | 151,392   | 59,439    | 339       | 1,123,776  |
| XV. Surgical and other scientific instruments ...                                 | 18,128     | 14,532     | 5,834     | 1,860     | 1,930     | ...       | 42,284     |
| XVI. Jewellery, timepieces, and plated ware ...                                   | 155,336    | 194,757    | 13,949    | 33,791    | 13,601    | 6,758     | 418,192    |
| XVII. Heat, light, and power ...  | 1,962,314  | 993,065    | 261,285   | 260,254   | 278,440   | 130,323   | 3,885,681  |
| XVIII. Leatherware, n.e.l. ...  | 85,292     | 92,634     | 6,063     | 3,403     | 4,607     | ...       | 192,049    |
| XIX. Minor wares, n.e.l. ...  | 123,187    | 291,853    | 10,623    | 23,966    | 13,337    | 2,860     | 465,828    |
| Total ...   | 24,040,887 | 18,408,471 | 7,719,950 | 5,239,108 | 3,506,073 | 1,585,298 | 60,493,787 |

It may be seen that the amount of the value added in each State is in the same order as in the case of value of output. The value added to raw material by process of manufacture and amount per head of mean population is shewn in the following statement for the years 1908 to 1912:—

**VALUE OF PRODUCTION OF MANUFACTURING INDUSTRIES IN COMMONWEALTH,  
1908 to 1912.**

| Year.                        | N.S.W.     | Victoria.  | Queensland. | S. Aust.  | W. Aust.  | Tas.       | C'wealth.. |
|------------------------------|------------|------------|-------------|-----------|-----------|------------|------------|
| VALUE.                       |            |            |             |           |           |            |            |
|                              | £          | £          | £           | £         | £         | £          | £          |
| 1908 ...                     | 14,656,412 | 12,125,690 | 4,235,459   | 3,782,295 | 2,464,149 | *1,308,000 | 38,572,005 |
| 1909 ...                     | 15,646,203 | 13,191,705 | 5,165,500   | 3,923,646 | 2,479,393 | *1,523,000 | 41,929,447 |
| 1910 ...                     | 18,236,039 | 14,719,599 | 6,315,290   | 4,489,440 | 2,723,652 | 1,616,877  | 48,100,897 |
| 1911 ...                     | 20,675,060 | 16,718,338 | 6,887,327   | 4,912,402 | 3,251,740 | 1,572,847  | 54,017,714 |

| PER HEAD OF MEAN POPULATION. |            |            |             |           |           |            |            |
| 1908 ...                     | 9.32       | 9.77       | 7.80        | 10.01     | 9.56      | 6.98       | 9.20       |
| 1909 ...                     | 9.79       | 10.46      | 9.33        | 10.01     | 9.42      | 8.01       | 9.81       |
| 1910 ...                     | 11.17      | 11.48      | 10.68       | 11.19     | 10.05     | 8.47       | 11.01      |
| 1911 ...                     | 12.44      | 12.66      | 11.21       | 11.95     | 11.34     | 8.26       | 12.08      |
| 1912 ...                     | 13.84      | 13.57      | 12.22       | 12.43     | 11.63     | 8.27       | 13.03      |

\* See note (\*) to last table § 6, 4.

It may thus be seen that in 1912 the positions of the States, in regard to total value of output of factories per head of mean population, coincide in regard to value added per head, with the exception of Queensland and South Australia, whose positions are reversed.

As the total value of the output for the Commonwealth was estimated at £148,775,407, there remained, after payment of £88,275,620, the value of the raw materials used, of £31,287,492 for salaries and wages, and of £3,047,384 for fuel, the sum of £26,164,911 to provide for all other expenditure and profits. The following table gives corresponding particulars for each State, expressed absolutely and as percentages of the total value of the output:—

**VALUE OF OUTPUT AND COST OF PRODUCTION IN COMMONWEALTH  
FACTORIES, 1912.**

| State.                | Raw<br>Materials<br>Used. | Fuel and<br>Light. | Salaries<br>and Wages. | All other<br>Expenditure<br>Interest,<br>and Profits. | Total Value<br>of Output. |

## § 7. Land, Buildings, Plant and Machinery.

1. **General.**—As an indication of the permanent character and stability of the industries which have been established in the Commonwealth, it may be noted that the values of land and buildings and of plant and machinery used in the factories are rapidly increasing. Thus, for the whole Commonwealth the total value of land and buildings and plant and machinery has increased from 1906 to 1912 by £22,245,562, *i.e.*, from £46,824,489 to £69,270,051, or at the rate of £3,740,927 per annum.

The following statement shews for the year 1912 the values of land and buildings and of plant and machinery used in connection with manufacturing industries in each State:—

**VALUE OF LAND, BUILDINGS, PLANT AND MACHINERY IN CONNECTION WITH  
MANUFACTURING INDUSTRIES, 1912.**

| Value of—               | N.S.W.     | Victoria.  | Q'land.   | S. Aust.  | W. Aust.  | Tas.      | C'wlth.    |
|-------------------------|------------|------------|-----------|-----------|-----------|-----------|------------|
|                         | £          | £          | £         | £         | £         | £         | £          |
| Land and buildings ...  | 14,765,810 | 10,362,661 | 3,524,991 | 3,150,834 | 1,910,372 | 1,094,488 | 34,809,156 |
| Plant and machinery ... | 13,795,195 | 9,095,134  | 5,442,471 | 2,725,540 | 2,241,536 | 1,161,019 | 34,460,895 |
| Total ...               | 28,561,005 | 19,457,795 | 8,967,462 | 5,876,374 | 4,151,908 | 2,255,507 | 69,270,051 |

It may be seen from the above table that the total capital invested in land, buildings, plant, and machinery in manufacturing industries in the Commonwealth during the year 1912 was approximately £69,270,051 (or £14 12s. 8d. per head of population); of that sum £34,809,156 was invested in land and buildings occupied as manufactories, the remaining £34,460,895 being the value of the plant and machinery used in connection therewith.

**2. Value of Land and Buildings.**—The value of the land and buildings occupied in connection with manufacturing industries may be conveniently classified according to the nature of the industry conducted therein.

(i.) *Total Value in Commonwealth, 1908 to 1912.* The following table shews for the whole Commonwealth the approximate values of land and buildings occupied in connection with manufacturing industries of various classes during each year from 1908 to 1912 inclusive:—

**VALUE OF LAND AND BUILDINGS OCCUPIED AS FACTORIES IN COMMONWEALTH,  
1908 to 1912.**

| Class of Industry.  | 1908.      | 1909.      | 1910.      | 1911.      | 1912.      |
|---|------------|------------|------------|------------|------------|
|   | £          | £          | £          | £          | £          |
| I. Treating raw material, product of agricultural and pastoral pursuits, etc. ... | 847,113    | 870,588    | 921,785    | 978,978    | 1,004,221  |
| II. Treating oils & fats, animal, vegetable, etc. ...                             | 359,624    | 370,681    | 394,079    | 445,499    | 449,453    |
| III. Processes in stone, clay, glass, etc. ...                                    | 937,753    | 956,733    | 1,073,612  | 1,228,889  | 1,382,062  |
| IV. Working in wood ...   | 1,195,581  | 1,285,267  | 1,492,673  | 1,668,045  | 1,923,963  |
| V. Metal works, machinery, etc. ...   | 4,378,755  | 4,415,525  | 4,554,693  | 5,000,274  | 5,437,718  |
| VI. Connected with food and drink, etc. ...                                       | 7,161,845  | 7,191,976  | 7,399,625  | 8,167,496  | 8,259,066  |
| VII. Clothing and textile fabrics, etc. ...                                       | 3,377,905  | 3,809,148  | 4,191,488  | 4,601,924  | 4,928,474  |
| VIII. Books, paper, printing, and engraving ...                                   | 2,483,693  | 2,642,029  | 2,779,754  | 2,964,466  | 3,150,049  |
| IX. Musical instruments, etc. ...   | 31,054     | 33,314     | 75,632     | 82,168     | 85,731     |
| X. Arms and explosives ...  | 34,586     | 33,016     | 38,763     | 41,462     | 112,300    |
| XI. Vehicles & fittings, saddlery & harness, etc. ...                             | 1,172,556  | 1,186,750  | 1,325,152  | 1,453,077  | 1,654,488  |
| XII. Ship and boat building and repairing ...                                     | 988,141    | 1,033,513  | 1,052,868  | 1,163,299  | 1,261,647  |
| XIII. Furniture, bedding, and upholstery ...                                      | 659,604    | 690,588    | 757,485    | 893,408    | 1,043,680  |
| XIV. Drugs, chemicals, and by-products ...  | 531,765    | 543,507    | 687,162    | 760,441    | 823,429    |
| XV. Surgical and other scientific instruments ...                                 | 33,054     | 56,378     | 56,149     | 61,703     | 59,308     |
| XVI. Jewellery, timepieces, and platedware ...                                    | 226,352    | 232,483    | 271,834    | 300,717    | 344,306    |
| XVII. Heat, light, and power ...  | 1,928,734  | 2,026,611  | 2,112,220  | 2,320,348  | 2,511,317  |
| XVIII. Leatherware, n.e.i. ...  | 91,036     | 83,578     | 100,006    | 111,506    | 120,646    |
| XIX. Minor wares, n.e.i. ...  | 218,540    | 210,325    | 220,984    | 250,550    | 257,298    |
| Total ...   | 26,657,991 | 27,672,010 | 29,506,054 | 32,494,250 | 34,809,156 |

It may be seen from the above table that the total net increase during the four years was £8,144,480, or an annual average of £2,036,120. The largest increases were in Classes VII., VI., and V., and amounted to £1,550,569, £1,097,221, and £1,058,963 respectively.

(ii.) *Value in each State, 1912.* The following table gives similar information for each State up to the 31st December, 1912:—

## VALUE OF LAND AND BUILDINGS OCCUPIED AS FACTORIES IN EACH STATE, 1912.

| Class of Industry.   | N.S.W.     | Victoria.  | Q'land.   | S.A.      | W.A.      | Tas.      | C'w'lth.   |
|--|------------|------------|-----------|-----------|-----------|-----------|------------|
|  | £          | £          | £         | £         | £         | £         | £          |
| I. Treating raw material, product of agricultural and pastoral pursuits, etc. .... | 394,917    | 400,418    | 58,731    | 107,001   | 26,980    | 16,174    | 1,004,221  |
| II. Treating oils and fats, animal, vegetable, etc. ....                           | 235,903    | 102,950    | 25,554    | 66,881    | 13,850    | 4,315     | 449,453    |
| III. Processes in stone, clay, glass, etc. ....                                    | 760,788    | 397,011    | 50,889    | 107,253   | 43,861    | 222,260   | 1,382,062  |
| IV. Working in wood ....   | 937,395    | 357,166    | 192,027   | 150,606   | 201,570   | 85,199    | 1,923,963  |
| V. Metal works, machinery, etc. ....   | 2,460,350  | 1,299,909  | 566,198   | 532,551   | 486,553   | 92,157    | 5,437,716  |
| VI. Connected with food and drink, etc. ....                                       | 2,644,498  | 2,459,897  | 1,404,610 | 745,183   | 430,184   | 574,694   | 8,259,066  |
| VII. Clothing and textile fabrics, etc. ....                                       | 2,184,444  | 1,744,148  | 324,542   | 403,923   | 161,345   | 110,072   | 4,926,474  |
| VIII. Books, paper, printing and engraving ....                                    | 1,280,913  | 897,453    | 429,712   | 297,914   | 198,095   | 45,962    | 3,150,049  |
| IX. Musical instruments, etc. ....   | 59,276     | 23,355     | ...       | 3,100     | ...       | ...       | 85,731     |
| X. Arms and explosives ....  | 67,485     | 41,315     | ...       | 3,500     | ...       | ...       | 112,300    |
| XI. Vehicles and fittings, saddlery and harness, etc. ....                         | 668,522    | 459,551    | 144,579   | 244,211   | 84,710    | 52,915    | 1,654,488  |
| XII. Ship and boat building and repairing ....                                     | 712,842    | 475,120    | 9,155     | 59,810    | 2,120     | 2,600     | 1,261,647  |
| XIII. Furniture, bedding and upholstery ....                                       | 447,420    | 330,634    | 97,514    | 90,208    | 46,689    | 31,215    | 1,043,680  |
| XIV. Drugs, chemicals, and by-products ....  | 279,635    | 312,015    | 10,500    | 138,654   | 81,625    | 1,000     | 823,429    |
| XV. Surgical and other scientific instruments ....                                 | 27,568     | 15,540     | 11,910    | 2,400     | 1,890     | ...       | 59,308     |
| XVI. Jewellery, timepieces, and platedware ....                                    | 151,274    | 120,356    | 17,806    | 39,620    | 6,500     | 8,750     | 344,306    |
| XVII. Heat, light, and power ....  | 1,289,812  | 778,445    | 162,208   | 132,997   | 103,830   | 44,025    | 2,511,317  |
| XVIII. Leatherware, n.e.i. ....  | 50,213     | 51,723     | 9,000     | 4,160     | 5,550     | ...       | 120,646    |
| XIX. Minor wares, n.e.i. ....  | 112,555    | 95,655     | 10,056    | 20,862    | 15,020    | 3,150     | 257,298    |
| Total ... ..   | 14,765,810 | 10,362,661 | 3,524,991 | 3,150,834 | 1,910,372 | 1,094,488 | 34,809,156 |

The maximum value for the Commonwealth of land and buildings in any particular class was in Class VI., amounting to £8,259,066, or 23.73 per cent. on the total value. The next classes in importance were Classes V., VII., VIII., and XVII., in which the values were £5,437,718, £4,928,474, £3,150,049, and £2,511,317 respectively. The sum of the values for the five classes mentioned amounted to £24,286,624, or 69.77 per cent. on the total value for all classes.

(iii.) *Total Value in each State, 1908 to 1912.* The following table shews the total value of land and buildings occupied as manufactories in each State at the end of each year from 1908 to 1912 inclusive:—

**TOTAL VALUE OF LAND AND BUILDINGS OCCUPIED AS FACTORIES IN  
EACH STATE, 1908 to 1912.**

| Year.   | N.S.W.     | Victoria.  | Queensland. | S. Aust.  | W. Aust.  | Tasmania. | C'wealth.  |
|---------|------------|------------|-------------|-----------|-----------|-----------|------------|
|         | £          | £          | £           | £         | £         | £         | £          |
| 1908... | 10,390,260 | 8,589,027  | 2,763,085   | 2,304,965 | 1,565,756 | 1,044,898 | 26,657,991 |
| 1909... | 11,014,362 | 8,642,544  | 2,888,923   | 2,425,970 | 1,522,692 | 1,177,719 | 27,672,010 |
| 1910... | 12,108,776 | 9,012,263  | 3,045,974   | 2,641,973 | 1,674,953 | 1,022,115 | 29,506,054 |
| 1911... | 13,474,455 | 9,921,520  | 3,277,776   | 2,950,170 | 1,819,342 | 1,050,987 | 32,494,250 |
| 1912... | 14,765,810 | 10,362,661 | 3,524,991   | 3,150,834 | 1,910,372 | 1,094,488 | 34,809,156 |

It may be seen that since 1908 there has been a general, though in two States an irregular increase; the temporary fall in Western Australia was probably due to the

general reduction in values of real estate in that State during the past few years. The fall in Tasmania for 1910 was due to the closing down of a large pyrites works.

3. **Value of Plant and Machinery.**—The following table shews for the whole Commonwealth the approximate value of plant and machinery used in connection with factories at the end of each year from 1908 to 1912 inclusive:—

**VALUE OF PLANT AND MACHINERY USED IN FACTORIES IN COMMONWEALTH,  
1908 to 1912.**

| Class of Industry.  | 1908.      | 1909.      | 1910.      | 1911.      | 1912.      |
|---|------------|------------|------------|------------|------------|
|   | £          | £          | £          | £          | £          |
| I. Treating raw material, product of agricultural and pastoral pursuits, etc. | 671,015    | 754,556    | 829,255    | 877,820    | 926,966    |
| II. Treating oils & fats, animal, vegetable, etc.                             | 349,897    | 349,479    | 360,660    | 435,315    | 417,231    |
| III. Processes in stone, clay, glass, etc.                                    | 833,809    | 901,193    | 1,109,199  | 1,299,774  | 1,491,383  |

| XIII. Furniture, bedding, and upholstery                                      | 117,481    | 126,000    | 150,774    | 177,924    | 207,211    |
| XIV. Drugs, chemicals, and by-products  | 398,028    | 435,019    | 517,781    | 602,276    | 629,402    |
| XV. Surgical and other scientific instruments                                 | 8,144      | 9,215      | 9,929      | 11,158     | 11,615     |
| XVI. Jewellery, timepieces, and platedware                                    | 46,160     | 43,980     | 49,400     | 61,765     | 61,791     |
| XVII. Heat, light, and power  | 5,481,769  | 5,561,333  | 5,961,816  | 6,611,770  | 7,392,958  |
| XVIII. Leatherware, n.e.i.  | 18,989     | 19,555     | 24,651     | 25,565     | 27,695     |
| XIX. Minor wares, n.e.i.  | 95,503     | 116,097    | 120,669    | 138,896    | 145,141    |
| Total ...   | 25,927,763 | 26,855,212 | 28,976,735 | 31,599,209 | 34,460,895 |

It may be seen that during the period in question there has been a steady and substantial net increase amounting in all to £8,533,132, or an annual average of £2,133,283. The increase has occurred in all classes of industry, the largest increase being in Class XVII., "Heat, Light, and Power," amounting to £1,911,199, while the two next largest were in Class V., "Metal Works, Machinery, etc.," amounting to £1,674,700, and and Class VI., "Connected with Food and Drink, etc.," with an increase of £1,285,053.

(i.) *Total Value in each State, 1908 to 1912.* The classified figures in the preceding table for the whole Commonwealth are shewn below for each State. It will be seen that the progress in value referred to is general throughout the States. New South Wales shews by far the largest increase, viz., £4,076,353; while Victoria comes next with £2,137,528.

**VALUE OF PLANT AND MACHINERY IN FACTORIES, 1908 to 1912.**

| Year. | N.S.W.     | Victoria. | Queensland. | S. Aust.  | W. Aust.  | Tasmania. | C'wealth.  |
|-------|------------|-----------|-------------|-----------|-----------|-----------|------------|
|       | £          | £         | £           | £         | £         | £         | £          |
| 1908  | 9,718,842  | 6,957,606 | 4,470,145   | 2,064,097 | 1,744,652 | 972,421   | 25,927,763 |
| 1909  | 10,330,724 | 7,140,304 | 4,457,314   | 2,135,203 | 1,728,207 | 1,063,460 | 26,855,212 |
| 1910  | 11,578,620 | 7,601,085 | 4,631,519   | 2,225,718 | 1,893,602 | 1,046,191 | 28,976,735 |
| 1911  | 12,510,600 | 8,336,373 | 4,947,259   | 2,506,000 | 2,082,777 | 1,216,200 | 31,599,209 |
| 1912  | 13,795,195 | 9,095,134 | 5,442,471   | 2,725,540 | 2,241,536 | 1,161,019 | 34,460,895 |

(ii.) *Classified Value in each State, 1912.* The following table shews the value of plant and machinery used in factories in each State during the year 1912, classified according to the nature of the industry in which used:—

## VALUE OF PLANT AND MACHINERY USED IN FACTORIES IN EACH STATE, 1912.

| Class of Industry.   | N.S.W.     | Victoria. | Q'land.   | S. Aust.  | W. Aust.  | Tas.      | Commonwealth. |
|--|------------|-----------|-----------|-----------|-----------|-----------|---------------|
|  | £          | £         | £         | £         | £         | £         | £             |
| I. Treating raw material, product of agricultural and pastoral pursuits, etc. .... | 374,577    | 292,812   | 128,866   | 70,567    | 21,525    | 38,619    | 926,966       |
| II. Treating oils and fats, animal, vegetable, etc. ....                           | 212,958    | 128,600   | 39,729    | 25,044    | 9,675     | 1,225     | 417,231       |
| III. Processes in stone, clay, glass, etc. ....                                    | 902,759    | 356,914   | 70,978    | 103,493   | 43,665    | 13,574    | 1,491,383     |
| IV. Working in wood ....   | 799,652    | 440,216   | 478,353   | 73,407    | 504,317   | 159,491   | 2,455,436     |
| V. Metal wks., machinery, etc. ....  | 3,098,426  | 1,287,628 | 698,588   | 498,185   | 360,829   | 364,700   | 6,308,356     |
| VI. Connected with food and drink, etc. ....                                       | 2,962,061  | 1,993,895 | 2,989,082 | 550,316   | 390,511   | 143,870   | 9,029,735     |
| VII. Clothing and textile fabrics, etc. ....                                       | 500,297    | 813,123   | 132,500   | 86,196    | 36,386    | 51,935    | 1,620,437     |
| VIII. Books, paper, printing, and engraving ....                                   | 1,045,208  | 865,312   | 265,444   | 212,604   | 171,231   | 68,240    | 2,628,039     |
| IX. Musical instruments, etc. ....   | 13,779     | 6,451     | ...       | 730       | ...       | ...       | 20,960        |
| X. Arms and explosives ....  | 90,747     | 67,706    | ...       | 400       | ...       | ...       | 158,823       |
| XI. Vehicles and fittings, saddlery and harness, etc. ....                         | 111,620    | 103,847   | 36,306    | 46,323    | 20,677    | 11,160    | 329,933       |
| XII. Ship and boat building and repairing ....                                     | 496,131    | 71,524    | 11,418    | 13,760    | 545       | 4,405     | 597,783       |
| XIII. Furniture, bedding, and upholstery ....                                      | 61,749     | 63,051    | 29,041    | 33,838    | 13,195    | 6,337     | 207,211       |
| XIV. Drugs, chemicals, and by-products ....  | 218,198    | 179,606   | 4,600     | 125,079   | 101,416   | 500       | 629,402       |
| XV. Surgical and other scientific instruments ....                                 | 4,522      | 3,701     | 1,567     | 950       | 875       | ...       | 11,615        |
| XVI. Jewellery, timepieces, and platedware ....                                    | 25,737     | 24,949    | 3,572     | 4,885     | 1,223     | 1,425     | 61,791        |
| XVII. Heat, light, and power ....  | 2,802,203  | 2,305,774 | 549,932   | 877,041   | 562,819   | 295,189   | 7,392,958     |
| XVIII. Leatherware, n.e.i. ....  | 11,440     | 13,812    | 1,354     | 339       | 750       | ...       | 27,695        |
| XIX. Minor wares, n.e.i. ....  | 63,161     | 76,210    | 1,141     | 2,383     | 1,897     | 349       | 145,141       |
| Total ... ..   | 13,795,195 | 9,095,134 | 5,442,471 | 2,725,540 | 2,241,536 | 1,161,019 | 34,460,895    |

The greatest value for any particular class of industry is for Class VI., "Connected with Food and Drink, etc.," and amounts to £9,029,735, or 26.20 per cent. on the total for all classes. The next in order of importance is Class XVII., "Heat, Light, and Power," which amounts to £7,392,958, or 21.45 per cent. on the total; followed by Class V., "Metal Works, Machinery, etc.," amounting to £6,308,356, or 18.31 per cent. on the total value. The total for the three classes just specified amounts to £22,731,049, or 65.96 per cent. on the total value for all classes.

## § 8. Individual Industries.

1. **General.**—The preceding remarks and tables furnish a general view of the recent development of particular classes of industries in Australia treated under the nineteen categories referred to in § 1, 3 hereof. In order to make the information complete, it must necessarily be supplemented by details exhibiting the development of individual industries. This alone will furnish adequate information as to the channels into which the main efforts of Australian manufacture flow. While it is not possible, within the limits of this article, to give anything like a detailed account of the manufacturing industries of the Commonwealth, it is proposed to deal herein with such particular industries as are of special importance by reason of the number of persons employed, the number of factories, the amount of capital invested therein, the value of the production, or other features of special interest. In cases where there are only one or two establishments of a particular class in any State, returns relative to output are not published, in order to avoid disclosing information as to the operations of individual factories.

**2. Tanning Industry.**—In Class I. (see § 1. 3 hereof) the most important industry is tanning: Until recent years the production of tanneries in Australia was confined to the coarser class of leathers, but lately the tanning of the finer skins has been undertaken with satisfactory results. The position of the industry in the several States in 1912 was as follows:—

### TANNERIES, 1912.

| Items.                                     | N.S.W.  | Vic.      | Q'land. | S.A.    | W.A.   | Tas.   | C'wlth.   |

| Value added in process of manufacture £    | 192,779 | 311,800   | 48,654  | 39,547  | 9,322  | 15,200 | 617,302   |

(i.) *Progress of Tanning, etc. Industries, 1908 to 1912.* The development of the tanning, fellmongering, and wool-scouring industries during the period 1908 to 1912 is shewn in the following table, from which it will be seen that though the numbers of factories and employees are almost stationary, the value of plant and machinery shews a satisfactory increase, amounting to no less than 43.74 per cent. during the period under consideration.

### DEVELOPMENT OF TANNING, FELLMONGERING, Etc., INDUSTRIES, 1908 to 1912.

| State.              | Number of Factories. |       |       |       |       | Number of Employees. |       |       |       |       | Approximate Value of Plant and Machinery. |           |           |           |           |

**3. Soap and Candle Factories.**—In Class II. (see § 1. 3 hereof) the manufactures of soap and candles are the most important industries. These two manufactures are frequently carried on in the same establishments, so that separate returns cannot be obtained; it may, however, be said generally that the manufacture of soap is the more important of the two. The following table gives particulars of soap and candle factories in each State during the year 1912:—

SOAP AND CANDLE FACTORIES, 1912.

| Items.                                  | N.S.W.    | Vic.    | Qld.    | S.A.    | W.A.   | Tas.  | Cwlth.    |

(ii.) *Production of Soap and Candles, 1908 to 1912.* The subjoined statement shews that, taking the Commonwealth as a whole, there has been a considerable and consistent increase in the output of soap during the past four years. The quantity of candles produced during 1911 and 1912, shews a falling off as compared with the two previous years, but a slight increase over the output of 1908.

PRODUCTION OF SOAP AND CANDLES, 1908 to 1912.

| Value added in process of manufacture  | £ 1,341,305 | 1,050,507 | 1,001,140 | 322,737   | 1,025,087 | 241,422 | 4,982,198 |

5. *Agricultural Implement Factories.*—The manufacture of agricultural implements is an important industry in Australia, and is of particular interest owing to the fact that it is one of the first industries to which what has been called the "New Protection" system was sought to be applied (see Section XXVII. hereof). The nature of the machines manufactured may be gathered from the machines scheduled in the Customs tariff, 1906-7, which includes stripper harvesters, strippers, stump-jump ploughs, disc cultivators, winnowers, corn-shellers and baggers, drills, and other implements usually employed in agriculture. The stripper-harvester, which combines the stripper with a mechanism for winnowing and bagging grain, is an Australian invention, and is exported to many countries.

The following table gives particulars of the agricultural implement works of Australia for the year 1912 :—

#### AGRICULTURAL IMPLEMENT WORKS, 1912.

| Items.                                 | N.S.W.    | Victoria | Q'land. | S.Aust. | W.A.   | Tas. | C'w'lth.  |
|--|-----------|----------|---------|---------|--------|------|-----------|
| Number of factories ... ..             | 22        | 67       | 4       | 57      | 7      | 2    | 159       |
| " employees ... ..                     | 613       | 2,665    | 113     | 1,229   | 99     | 14   | 4,733     |
| Actual horse-power of engines employed | 190       | 1,014    | 48      | 1,071   | 86     | 10   | 2,419     |
| Approx. value of land and buildings    | £ 77,849  | 163,528  | 4,884   | 72,397  | 11,940 | 750  | 331,348   |
| " plant and machinery                  | £ 24,822  | 161,294  | 5,782   | 79,307  | 10,093 | 625  | 281,923   |

| Value of fuel used ... ..              | £ 2,025   | 19,388   | *       | 7,932   | 881    | *    | 30,961    |
| Value of raw material worked up        | £ 249,161 | 329,397  | *       | 112,678 | 46,480 | *    | 751,596   |
| Total value of output ... ..           | £ 347,421 | 799,217  | *       | 297,105 | 65,340 | *    | 1,538,421 |
| Value added in process of manufacture  | £ 98,260  | 469,820  | *       | 184,427 | 18,860 | *    | 786,825   |

\* To avoid disclosing output, etc., of any one establishment, details for these States are not given.

*Development of Agricultural Implement Works.* The following table shews the progress of this industry during the years 1908 to 1912 to have been very satisfactory. During the four years the number of establishments increased  $13\frac{1}{2}$  per cent., the number of employees 51 per cent., and the value of plant and machinery 107 per cent. :—

| Tas.    | 9                    | 7     | 9     | 3     | 2     | 34                   | 29    | 32    | 22    | 14    | 235                                       | 845     | 920     | 615     | 625     |
| C'wth.  | 140                  | 148   | 150   | 155   | 159   | 3,134                | 4,081 | 4,868 | 5,156 | 4,733 | 136,238                                   | 169,778 | 208,185 | 245,025 | 281,923 |

6. **Engineering, Ironworks, and Foundries.**—The classification in these industries is not very satisfactory. Generally, engineering shops, ironworks, and foundries are included, as also are factories for making nails, safes, patterns, meters, and springs. Railway workshops, agricultural implement factories, cyanide, smelting, pyrites, and metallurgical works, galvanised iron, stoves and ovens, and wire working establishments are not included. The combination of industries is rendered necessary by the limited classification still adopted by some of the States.

## ENGINEERING, IRONWORKS, AND FOUNDRIES, 1912.

| Items.                                   | N.S.W.      | Vic.      | Q'land. | S.A.    | W.A.    | Tas.   | C'w'lth.  |
|--|-------------|-----------|---------|---------|---------|--------|-----------|
| Number of factories ...                  | 283         | 359       | 90      | 56      | 54      | 24     | 877       |
| employees ...                            | 9,411       | 9,171     | 2,983   | 1,911   | 1,175   | 500    | 25,151    |
| Actual horse-power of engines employed   | 8,093       | 6,489     | 1,628   | 1,348   | 842     | 344    | 18,744    |
| Approx. value of land and buildings £    | 862,423     | 534,102   | 166,633 | 93,080  | 92,301  | 37,630 | 1,792,169 |
| plant and machinery £                    | 831,769     | 687,870   | 183,651 | 110,048 | 91,754  | 48,386 | 1,933,478 |
| Total amount of wages paid during year £ | 1,063,480   | 1,040,038 | 319,392 | 222,063 | 150,073 | 46,134 | 2,846,190 |
| Value of fuel used ...                   | £ 57,898    | 87,390    | 16,855  | 17,077  | 12,974  | 3,535  | 195,729   |
| Value of raw materials worked up         | £ 1,490,602 | 1,246,137 | 354,172 | 227,035 | 186,041 | 32,192 | 3,536,179 |
| Total value of output ...                | £ 3,142,322 | 2,822,972 | 923,665 | 539,310 | 405,682 | 96,109 | 7,930,060 |
| Value added in process of manufacture £  | 1,651,720   | 1,576,835 | 569,493 | 312,275 | 219,641 | 63,917 | 4,393,881 |

In addition to engineering works which supply local domestic requirements, there are now a number of large and important establishments which engage in the manufacture of special classes of machinery and implements. The manufacture of mining and smelting machinery and apparatus forms an important section of this industry, and many Australian mines have been locally equipped.

7. **Railway Carriages and Rolling Stock, Railway and Tramway Workshops.**—The railway workshops of Australia form an important item in the metal and machinery class, and are chiefly State institutions. The following table gives the details concerning them, but includes also private establishments manufacturing rolling stock :—

## RAILWAY CARRIAGES AND ROLLING STOCK, RAILWAY AND TRAMWAY WORKSHOPS, 1912.

| Items.                                  | N.S.W.      | Vic.      | Q'land. | S. Aust. | W. Aust. | Tas.   | C'w'lth.  |
|---|-------------|-----------|---------|----------|----------|--------|-----------|
| Number of factories ...                 | 26          | 15        | 9       | 8        | 8        | 7      | 73        |
| employees ...                           | 8,552       | 4,631     | 2,099   | 2,197    | 1,897    | 286    | 19,662    |
| Actual h.p. of engines employed         | 4,345       | 1,229     | 1,467   | 511      | 1,954    | 131    | 9,637     |
| Approx. value of land and buildings £   | 889,979     | 316,936   | 234,846 | 256,690  | 373,062  | 7,060  | 2,128,273 |
| Approx. value of plant and machinery £  | 637,718     | 232,610   | 187,996 | 169,019  | 257,957  | 78,410 | 1,563,710 |
| Total amt. of wages paid during year £  | 1,173,512   | 626,258   | 285,109 | 297,590  | 282,241  | 38,001 | 2,702,711 |
| Value of fuel used ...                  | £ 26,322    | 19,904    | 7,279   | 5,473    | 15,478   | 1,020  | 75,476    |
| Value of raw material worked up         | £ 2,142,526 | 1,653,116 | 495,800 | 552,375  | 786,713  | 64,691 | 5,695,921 |
| Total value of output ...               | £ 795,371   | 876,576   | 207,780 | 195,354  | 477,382  | 22,274 | 2,574,737 |
| Value added in process of manufacture £ | 1,347,155   | 776,540   | 285,020 | 357,021  | 309,331  | 42,417 | 3,129,484 |

In addition to the above, a railway workshop was in operation in the Northern Territory during 1912. The work is almost exclusively repairs to stock, etc., no new

goods being manufactured. For the sake of convenience this establishment is not included in any of the tables in this publication. Nine hands were employed during the year, wages and salaries £1460. The cost of materials used was £872, and of fuel £76, and the value of output was £3317, and of land and buildings £14,684.

8. **Smelting Works, etc.**—The subjoined table gives particulars of metal smelting, cyanide, pyrites, and metallurgical works. The classification of these works does not appear to be carried out on an uniform basis in the several States, and the combination of industries is, therefore, somewhat unsatisfactory. The returns do not include particulars of plants used on mines.

#### SMELTING, CYANIDE, PYRITES, Etc., WORKS, 1912.

| Items.                                  | N.S.W.      | Vic.    | Q'land. | S.A.      | W.A. | Tas.      | C'w'lth.   |
|---|-------------|---------|---------|-----------|------|-----------|------------|
| Number of factories ... ..              | 35          | 86      | 13      | 6         | ...  | 4         | 144        |
| employees ... ..                        | 3,708       | 687     | 891     | 1,605     | ...  | 1,150     | 8,041      |
| Actual horse-power of engines employed  | 14,081      | 405     | 1,659   | 3,832     | ...  | 3,910     | 23,917     |
| Approx. value of land and buildings £   | 265,269     | 12,462  | 20,226  | 19,748    | ...  | 38,877    | 356,582    |
| " plant and machinery £                 | 1,401,428   | 55,877  | 262,731 | 68,420    | ...  | 233,799   | 2,022,255  |
| Total am't of wages paid during year £  | 667,380     | 56,178  | 116,285 | 267,189   | ...  | 158,926   | 1,265,958  |
| Value of fuel used ... ..               | £ 434,889   | 5,896   | 19,097  | 135,230   | ...  | 104,601   | 699,715    |
| Value of raw material worked up         | £ 5,392,155 | 99,050  | 599,706 | 1,783,588 | ...  | 932,797   | 8,806,296  |
| Total value of output ... ..            | £ 8,400,025 | 218,956 | 717,931 | 2,481,701 | ...  | 1,278,457 | 13,097,070 |
| Value added in process of manufacture £ | 3,007,870   | 119,906 | 118,225 | 699,113   | ...  | 345,660   | 4,290,774  |

\* See third paragraph below.

In New South Wales and Queensland the above figures represent smelting works; those for Victoria include seventy-eight cyanide works, two metallurgical, four pyrites, and two smelting works; South Australia four cyanide and two smelting; and Tasmania three smelting and one cyanide works.

The largest output for the year under review was in New South Wales, viz., £8,400,025, or 64.14 per cent. on the total output for the Commonwealth. South Australia came next with £2,481,701, or 18.95 per cent.; this amount is made up of £2,474,863 smelting and £6838 cyanide. Of the total for Tasmania the output of smelting was £1,187,815, the balance £90,642 representing that obtained from cyanide works. The output in Victoria was £109,151, £12,422, £66,470, and £30,913 from cyanide, metallurgical, pyrites, and smelting works in the order named.

In Western Australia all the plants are worked on the mines and are therefore not included.

9. **Bacon-curing Factories.**—The following table gives particulars of factories engaged in bacon-curing in each State during the year 1912 :—

#### BACON-CURING FACTORIES, 1912.

| Items.                                    | N.S.W.    | Vic.    | Q'land. | S.A.   | W.A.    | Tas.   | C'w'lth.  |
|---|-----------|---------|---------|--------|---------|--------|-----------|
| Number of factories ... ..                | 21        | 29      | 7       | 12     | 3       | 6      | 78        |
| employees ... ..                          | 196       | 434     | 258     | 71     | 18      | 33     | 1,040     |
| Actual horse-power of engines employed    | 332       | 512     | 287     | 58     | 46      | 50     | 1,285     |
| Approx. value of land and buildings £     | 73,782    | 74,812  | 51,582  | 11,293 | 6,188   | 6,294  | 222,951   |
| " plant and machinery £                   | 27,175    | 42,398  | 29,107  | 4,625  | 1,070   | 2,750  | 107,125   |
| Total amount of salaries and wages paid £ | 28,738    | 45,794  | 29,220  | 7,245  | 3,270   | 3,072  | 117,339   |
| Value of fuel used ... ..                 | £ 3,958   | 4,965   | 3,527   | 713    | 320     | 619    | 14,102    |
| Value of raw material worked up           | £ 382,780 | 533,483 | 236,000 | 78,772 | 99,550  | 24,816 | 1,355,401 |
| Total value of output ... ..              | £ 456,486 | 634,366 | 380,434 | 93,671 | 109,110 | 33,880 | 1,707,947 |
| Value added in process of manufacture £   | 73,706    | 100,883 | 144,434 | 14,899 | 9,560   | 9,064  | 352,546   |

Further information regarding the bacon-curing industry may be found in Section IX., *Farmyard and Dairy Production*.

*Quantity and Value of Production, 1912.* The following table shews the number of pigs killed and the quantity and value of the production of bacon-curing factories in each State during the year 1912 :—

## PRODUCTION OF BACON-CURING FACTORIES, 1912.

| Particulars.             | N.S.W.  | Victoria. | Q'land. | S. Aust. | W. Aust.* | Tasmania. | C'wealth. |

The butter, cheese and condensed milk industries are dealt with more fully in Section IX., *Farmyard and Dairy Production*.

**11. Meat and Fish Preserving, Ice and Refrigerating Works.**—These industries are now of considerable importance in Australia. The freezing of various kinds of produce for export has long been an established industry. Large freezing works have been installed at many ports in the Commonwealth for the purpose of freezing produce chiefly for export, and insulated space for the carriage of frozen produce is provided by a number of steamship companies trading between Australia and other parts of the world. Particulars regarding the export of frozen beef and mutton may be found on pages 284 and 288 hereof respectively. Special terms have been made by the Commonwealth Government in its English mail contract for the provision by the contractors of ample cold-storage facilities. The export of frozen produce is stated to be capable of considerable expansion. The particulars given in the subjoined table include ice-making and freezing works, and also meat-canning factories, separate particulars for each item for all the States not being available.

### MEAT AND FISH-PRESERVING, ICE AND REFRIGERATING WORKS, 1912.

| Items.                                 | N.S.W.     | Vic.      | Q'land.   | S.A.    | W.A.   | Tas.  | C'w'lt'h. |

| Cattle        | "   | No. | 50,941  | 10,793    | 335,014 | 1,495    | ...      | ...  | 398,243   |
| Pigs          | "   | No. | ...     | 3,120     | ...     | ...      | ...      | ...  | 3,120     |

Large quantities of rabbits, hares, and poultry were treated in freezing works, for which, however, complete returns are not available. During 1912, 1,072,464 pairs of rabbits and hares were treated in Victoria, and 274,379 rabbits in South Australia. Exclusive of Victoria, for which State particulars are not available, the returns shew that 70,803 tons of ice, valued at £147,512, were manufactured in the Commonwealth in 1912.

12. **Biscuit Manufactories.**—The following table gives particulars regarding establishments at which the manufacture of biscuits, cakes, etc., was carried on in each State during the year 1912:—

## BISCUIT, Etc., MANUFACTORIES, 1912.

| Items.                                 | N.S.W.    | Vic.      | Q'land.   | S.A.     | W.A.     | Tas.     | C'w'lth.    |

| Value added in process of manufacture  | £ 185,027 | £ 232,382 | £ 89,561  | £ 29,534 | £ 26,735 | £ 23,398 | £ 586,937   |

13. **Jam and Fruit Preserving, Pickles, Sauces, and Vinegar Manufactories.**—The jam and fruit preserving industry has increased in importance of late years, consequent on the extension of fruit-growing. As an exporting industry it is comparatively young, but is of increasing value, and is stated to be capable of considerable expansion. The subjoined table gives particulars of factories at which these industries were carried on in each State during the year 1912. Separate returns for the individual industries are not available for most of the States.

## JAM AND FRUIT PRESERVING, PICKLES, SAUCES, AND VINEGAR MANUFACTORIES, 1912.

| Items.                                 | N.S.W.    | Vic.      | Q'land.  | S.A.      | W.A.     | Tas.      | C'w'lth.    |

\* The manufacture of cornflour, oatmeal, etc., was worked in conjunction with these establishments.

(i.) *Production of Flour Mills, 1908 to 1912.* The production of flour by the mills in each State of the Commonwealth in the years 1908 to 1912 was as follows :—

## FLOUR MILLS—PRODUCTION, 1908 to 1912.

| Year. | N.S.W.  | Victoria. | Q'land. | Sth. Aust. | West. Aust. | Tasmania. | C'wealth. |
|-------|---------|-----------|---------|------------|-------------|-----------|-----------|
|       | Tons.*  | Tons.*    | Tons.*  | Tons.*     | Tons.*      | Tons.*    | Tons.*    |
| 1908  | 180,843 | 192,687   | 22,266  | 107,742    | 31,424      | 17,426    | 552,388   |
| 1909  | 214,426 | 215,547   | 29,451  | 97,967     | 24,878      | 21,419    | 603,688   |
| 1910  | 242,813 | 225,282   | 27,559  | 95,885     | 36,818      | 20,925    | 649,282   |
| 1911  | 253,556 | 247,434   | 27,960  | 100,374    | 40,642      | 21,335    | 691,301   |
| 1912  | 255,359 | 225,376   | 25,855  | 103,100    | 49,319      | 18,044    | 677,053   |

\* Tons of 2000 lbs.

The total production of flour for the Commonwealth for 1912, viz., 677,053 tons, was valued at £5,796,251; in addition 302,363 tons of bran and pollard, valued at £1,717,949, were made. The total quantity of wheat ground in 1912 was 32,711,285 bushels.

16. **Sugar Mills.**—The following table shews the position of the cane-crushing branch of the sugar-making industry in 1912. This industry is carried on in Queensland and New South Wales, the only States of the Commonwealth in which the sugar-cane is grown.

## SUGAR MILLS, 1912.

| Items.                                     | N.S.W.    | Queensland. | Total.    |

| Total value of output ... ..               | £ 216,962 | 1,388,626   | 1,605,588 |
| Value added in course of manufacture £     | 111,635   | 641,069     | 752,704   |

The product of the sugar mill is raw sugar and molasses, the former being sent to the refineries in different parts of Australia for further treatment. Part of the molasses produced is used in distillation, part is turned into food cake for cattle, and part is used for manuring land, but the greater part produced is put to no use whatever. The following tables shew the progress of this industry in each State from the dates at which information is first obtainable :—

## SUGAR MILLS, NEW SOUTH WALES, 1870 to 1912.

| Items.                  | 1870. | 1877.   | 1886.   | 1891.     | 1896.     | 1901.     | 1909.     | 1910.   | 1911.   | 1912.   |

| Cane crushed tons       | ...   | ...     | ...     | ...       | ...       | ...       | 131,063   | 160,311 | 167,799 | 141,274 |
| Sugar produced tons     | 677   | 7,537   | 13,750  | 16,033    | 28,557    | 19,519    | 14,810    | 20,115  | 17,299  | 16,817  |
| Molasses produced gals. | ...   | 345,543 | 507,000 | 1,074,080 | 2,520,580 | 1,300,909 | 1,072,400 | 918,900 | 796,440 | 667,100 |

The reduction in the number of New South Wales mills is due chiefly to the tendency towards concentration of cane-crushing in mills fitted with modern machinery, and the consequent closing of the small home mill. On the north coast of New South Wales some land formerly devoted to sugar-growing has been turned into pastures in connection with the dairying industry.

## SUGAR MILLS, QUEENSLAND, 1868 to 1912.

| Items.                  | 1868.  | 1876.   | 1886.     | 1891.      | 1896.     | 1901.     | 1909.      | 1910.      | 1911.      | 1912.     |

\* Not available. † 1890. ‡ Tons of cane crushed.

Information regarding the cultivation of sugar-cane and the bounties payable on cane grown by white labour may be found in the section of this book dealing with *Agricultural Production*. (See pages 336 to 340.)

**17. Sugar Refineries.**—The establishment of the sugar-refining industry considerably antedates the establishment of the sugar-milling industry, the raw material operated upon being originally brought chiefly from Mauritius and the East. In 1912 there were two sugar refineries in each of the States of Victoria and Queensland, and one in each of the States of New South Wales and South Australia. The returns for the individual States cannot be disclosed.

In the six refineries in the Commonwealth, an average number of 1608 hands was employed during the year 1912. The approximate value of land and buildings was £418,755; of plant and machinery, £942,599; and the total amount of wages paid during the year was £191,246.

As regards production, the amount of crude sugar used was 236,254 tons, and of refined sugar produced 229,573 tons, valued at £3,834,497.

**18. Breweries.**—Established at an early date in Australia, the main feature of the history of the brewing industry has been the change from the small local brewery in every township of moderate size to the large centralised city brewery. A recent amalgamation in Melbourne resulted in the closing of several large breweries. A workmen's co-operative brewery has been opened in Sydney and a co-operative brewery has been opened in Melbourne by a number of "free" hotelkeepers.

The following table gives particulars of breweries in each State during the year 1912:—

#### BREWERIES, 1912.

*Production of Spirits and Materials Used, 1912.* The total quantity of brandy distilled in 1912 was 151,952 proof gallons, and of other spirits was 2,169,668 proof gallons. The materials used comprised 460,929 cwt. of molasses and sugar, and 2,320,465 gallons of wine. Particulars for the separate States are not available for publication.

20. **Tobacco, Cigars and Cigarettes.**—During the year 1912 there were thirty-three establishments in which the manufacture of tobacco, cigars, and cigarettes was carried on. There were no factories engaged in this industry in Tasmania.

(ii.) *Development of Industry.* This industry was among the first to be established in Australia. In 1861 New South Wales had eleven factories, producing 177,744 lbs. of manufactured tobacco; in the same year there was one factory in Victoria, but the quantity of tobacco manufactured is not available. The Australian market has for many years been largely supplied with local manufactures. The quantities imported into Australia during 1912 were—manufactured tobacco 2,610,816 lbs., cigars 408,607 lbs. and cigarettes 147,365 lbs., while the quantities manufactured in Australian factories were respectively 10,298,241 lbs., 388,906 lbs. and 2,605,840 lbs. The following tables show the development of the tobacco industry in the several States and the Commonwealth during recent years:—

### DEVELOPMENT OF TOBACCO, CIGAR, AND CIGARETTE FACTORIES, 1908 to 1912.

| State.    | Number of Factories. |       |       |       |       | Number of Persons Employed. |       |       |       |       | Approximate Value of Plant and Machinery. |           |           |          |           |

\* There are no tobacco factories in Tasmania.

21. **Woollen and Tweed Mills.**—The manufacture of woollens and tweeds was established in Australia at an early period in its history, the first record in New South

Wales dating back to 1801, and was under Government control, when a few blankets were made by the convicts; the first record in Victoria was in 1867. The following table, which gives particulars of the mills in each State during the year 1912, shews that the industry is now well established:—

### WOOLLEN AND TWEED MILLS, 1912.

| Items.                                     | N.S.W.    | Vic.    | Q'ld.  | S.A.   | W.A. | Tas.   | C'with. |

\* Including one cotton ginning establishment.

(ii.) *Quantity and Value of Production, 1912.* The production of the woollen mills of Australia consists chiefly of tweed cloths, flannels, and blankets, all of which have acquired a reputation for purity and durability. Detailed particulars for the several States are not available for publication. The total length of tweed and cloth manufactured was over 2,250,000 yards, valued at, approximately, £350,000. In New South Wales 1,143,046 yards of tweed and cloth, in Victoria 1,013,444 yards, and in Tasmania 20,549 yards were manufactured. The production of flannel in the Commonwealth in 1912 amounted to over 5,000,000 yards, valued at £350,000, and of blankets, shawls, and rugs upwards of 850,000, valued at about £230,000, were manufactured.

No cotton spinning or weaving or linen weaving is carried on in Australia. Cotton ginning has been carried on at periods far apart in the northern States, and a mill was lately reopened at Ipswich in Queensland. For particulars of the quantity ginned on which bounties were paid, see page 351.

22. *Boots and Shoes.*—Among the manufactures of Australia the boot and shoe industry holds an important place both in respect to the employment afforded by it and the range of its output. The following table shews particulars of this industry for each State during the year 1912:—

## BOOT AND SHOE FACTORIES, 1912.

| Items.                                  | N.S.W.    | Vic.      | Q'land. | S.A.    | W.A.   | Tas.   | C'w'lth.  |

(ii.) *Quantity and Value of Production, 1912.* Particulars regarding the quantity and value of the production of hat and cap factories in each State are not available for separate publication. The total value of hats and caps made in Australia in 1912 was £822,222.

24. *Coach and Wagon Building Works.*—This industry forms the principal branch of manufacture in Class XI. (see § 1, 3 above). The subjoined table gives particulars of factories in this branch of industry in each State during the year 1912. The returns include establishments for the manufacture of wheels, spokes, etc.

## COACH AND WAGON BUILDING WORKS, 1912.

## SECTION XIV.

## WATER CONSERVATION AND IRRIGATION.

## § 1. Artesian Water.

1. **General.**—In every country in which droughts are recurrent, there are few problems the solution of which is of greater importance than that of an adequate system of water conservation. Much has been done in the Commonwealth so far as the supply of water to centres of population is concerned, and a description of several of the metropolitan water works will be found herein, viz., in the section dealing with "Local Government." In May, 1912, an interstate conference on artesian water was held in Sydney, at which it was agreed that combined Governmental action should be taken with reference to delimitation of the artesian basin, hydrographic survey, analyses and utilisation of artesian water, etc.

(i.) *The Great Australian Artesian Basin.* In speaking of the "Great Australian Artesian Basin," the area is understood which includes (a) considerably more than one-half of Queensland, taking in practically all that State lying west of the Great Dividing Range, with the exception of an area in the north-west contiguous to the Northern Territory; (b) a considerable strip of New South Wales along its northern boundary and west of the Great Dividing Range; and (c) the north-eastern part of South Australia proper, together with the extreme south-eastern corner of the Northern Territory. This basin (shewn approximately by the map on page 505) is said to be the largest yet discovered, and is about 569,000 square miles, of which 376,000 square miles are in Queensland, 90,000 square miles in South Australia, 83,000 square miles in New South Wales, and 20,000 square miles in the Northern Territory. The area of the intake beds is estimated at 60,010 square miles, viz., 50,000 square miles in Queensland and 10,010 square miles in New South Wales. A description of the basin and its geological formation will be found in previous issues of the Year Book (see No. 6, p. 569).

(ii.) *The Western Australian Basins.* The Western Australian Basins fall naturally within five distinct groups, viz., the Eucla Basin, in the extreme south-east of the State, and extending well into South Australia along the shores of the Great Australian Bight; the Coastal Plain Basin, west of the Darling Range; the North-West Basin, between the Murchison and Ashburton Rivers; the Desert Basin, between the De Grey and Fitzroy Rivers; and the Gulf Basin, between Cambridge Gulf and Queen's Channel.

The Recent and Tertiary strata which enter Western Australia at its eastern border, and which have a prevailing dip towards the Great Australian Bight, form the Eucla artesian water area. But where boring operations have been undertaken, the water has been found to be salt or brackish, and there are other conditions affecting the supply, such as local variations in the thickness of the beds, their relative porosity, and the unevenness of the floor upon which they rest, which, so far, have not been examined with sufficient thoroughness to enable many particulars to be given in regard to this basin.

In the Coastal Plain Basin to the west of the Darling Ranges artesian boring has, on the other hand, been carried on successfully for many years.

(iii.) *The Murray River Basin.* In August, 1910, a report was issued by the Government Geologist of South Australia on the geology of the country south and east of the Murray River, with special reference to subterranean water supply in wells and bores along the Pinnaroo and Bordertown railways. The tertiary formation in the district under consideration occupies the western portion of a vast basin or depression, of which the greater part extends eastward into Victoria and northward into New South Wales. This basin is bounded on the west by the azoic and palæozoic rocks of the Mount Lofty and other ranges, extending northwards from near the mouth of the Murray to the Barrier Ranges, and on the east and north-east by the ranges of Victoria and New South Wales. This tertiary water-basin is occupied by a succession of sedimentary formations, both porous and impervious. It is of interest to note that the waters of the Murray River are partly supplied by influx from the water-bearing beds of this basin; this is proved by the fact that, at low water, springs are observed at certain places flowing into it from beneath the limestone cliffs from Pyap Bend downwards. Similar springs must exist along the courses of other branches of the River Murray system, where they cut through the tertiary formation.

(iv.) *Plutonic or Meteoric Waters.* In previous Year Books will be found the theory of Professor Gregory<sup>1</sup> as to the origin of the water in the Australian artesian basin, together with the objections held thereto by the Government Geologist of New South Wales.<sup>2</sup> (See Year Book No. 6, p. 570.)

(v.) *Particulars of Artesian and Sub-artesian Bores, 1912.* The following table gives particulars of artesian and sub-artesian bores in each State and in the Commonwealth up to the end of the year 1912:—

**COMMONWEALTH AND STATES.—PARTICULARS OF ARTESIAN AND  
SUB-ARTESIAN BORES, 1912.**

| Particulars.                              | N.S.W.  | Vict.*  | Q'land.   | S. Aust.* | W. Aust.† | Tas. | C'wlth.   |

\* Government bores only. † Exclusive of 36 private bores. ‡ Not available.

2. *New South Wales.*—Artesian boring in New South Wales dates from 1879, when a private bore was put down on the Kallara pastoral holding, between Bourke and Wilcannia. The first Government bore was that at Goonery, on the Bourke-Wanaaring road, completed in 1884. At the end of 1912, out of 483 known artesian bores in New South Wales, 193 were Government bores.

1. See *J. W. Gregory, F.R.S., D.Sc.*: "The Dead Heart of Australia." London, John Murray, 1906.

2. *E. F. Pittman, A.R.S.M., Government Geologist of New South Wales*: "Problems of the Artesian Water Supply of Australia, with special reference to Professor Gregory's Theory." (Clarke Memorial Lecture, delivered before the Royal Society of New South Wales, 31st October, 1907.)

The distribution of these bores was as follows:—

### NEW SOUTH WALES ARTESIAN BORES ON 31st DECEMBER, 1912.

| Particulars.                     |     |         |  | State.      | Private. | Total.   |

\* Exclusive of 21 Government and 23 private bores which failed; the total depth bored being 27,566 feet and 30,227 feet respectively. † Excluding the flow from seventeen pumping bores, the particulars of which are not available. ‡ Not available.

Of the wells at the end of 1912, the depth is stated in 487 cases, ranging from 46 to 4338 feet. There is a preponderance of wells from 1000 to 2000 feet in depth, but neither the shallow wells under 500 feet, nor the very deep wells over 3000 feet are so numerous in proportion as in Queensland. The two deepest wells in New South Wales are those at Boronga, in the County of Stapylton, with a depth of 4338 feet and a daily outflow of 1,062,133 gallons; and at Dolgelly, in the Parish of Careunga, in County Stapylton, with a depth of 4086 feet, and an outflow of 622,185 gallons per day. The largest outflow is stated to be that at the Boobora bore, in the County of Stapylton, which yields 1,133,300 gallons a day, and has a depth of 3225 feet.

The Zetz Spa, much used as a mineral water in New South Wales, comes from Ballimore, near Dubbo.

It may be said that the cost of artesian wells works out at an average of about 20s. per lineal foot; it depends, of course, upon the depth to which boring operations have to be extended, and on the accessibility of the bore to a railway station. The practice is to line the bore with three strings of casing, ten, eight and six inches in diameter respectively. The ten and eight inch strings are inserted as far as may be considered necessary, and the six-inch string generally taken to the bottom of the bore. Recent contract prices per lineal foot for a bore complete are as follows:—To 1000 feet, 27s. per foot; 1000 to 1500 feet, 17s. 9d.; 1500 to 2000 feet, 18s. 3d.; 2000 to 2500 feet, 19s. 3d.; 2500 to 3000 feet, 21s. 3d.; 3000 to 3500 feet, 23s. 9d.; 3500 to 4000 feet, 30s. The increased cost per lineal foot for the first 1000 feet is owing to the insertion of the three strings of casing.

3. **Victoria.**—Victoria lies altogether outside the Great Australian Artesian Basin, and as water is obtainable in most parts of the State at shallow depths, there has not been much occasion for artesian boring. As early as 1884, however, an artesian well was bored at Sale, which for a number of years gave a supply of about 100,000 gallons per day until, either through corrosion of the casing or by choking up with sand from below, the flow ceased. In 1905 a new bore was therefore put down, which at a depth of 277 feet yielded sufficient water to fill Lake Guthridge, a local depression. But as the water was impure, and contained too much sulphuretted hydrogen, boring operations were continued to 520 feet, when the lowering of the casing shut off the supply of water. A further bore was then put down at some distance from the first, and this, at a depth of 238 feet, yielded a fresh

and clear water supply, which at present is stated to be about 145,000 gallons per day. Further trouble, however, has been experienced owing to failure of casing, and a fresh bore is being put down.

In the late eighties a number of bores were put down in the North-Western part of the State, varying from 200 to over 2000 feet in depth, but without any notable success. In 1897 a Board reported on boring for artesian water supply in the Mallee country, but this report was adverse, except as regards the extreme northern portion thereof. In 1906 eight bores were put down on the Overnewton Estate, Maribyrnong, to depths varying from 147 to 272 feet; small supplies of good and medium water for stock purposes were obtained, but only one of the wells yielded water fit for domestic purposes. In 1908 boring was commenced in the Mallee country near the Border east of Pinnaroo in South Australia, and a line of bores from the Border to Kow Plains has proved the existence of a large sheet of underground water. Altogether, forty-two bores have been sunk, and their depths vary from 150 to 600 feet, the water rising to within from 200 to 7 feet of the surface. In three instances the bores flow, the water rising from four to seventeen feet above the surface. The fresh water extends nearly as far east as the 142nd meridian and its northern limit is approximately the 35th parallel. Information as to the geological formation of this district is given on page 499 preceding.

At the end of 1912 the number of existing Government bores in use in Victoria was 58, from which supplies are obtained by pumping. The total depth bored amounted to 22,000 feet, while the maximum and minimum depths at which water was struck were 588 and 131 feet respectively. There are also seventy-two existing private bores, with a total depth of about 162,000 feet.

4. **Queensland.**—A return relating to the 30th June, 1912, classifies the Queensland artesian bores under the following headings:—

**QUEENSLAND ARTESIAN BORES ON 30th JUNE, 1912.**

| Sunk by—                           | Artesian<br>Flows. | Sub-Artesian<br>or Pumped<br>Supplies. | In Progress,<br>Abandoned,<br>or Uncertain. | Total |
|------------------------------------|--------------------|--|---|-------|
| Government ... ..                  | 35                 | 36                                     | 151   | 222   |
| Local governing authorities ... .. | 19                 | 9                                      | 18  | 46    |
| Private owners ... ..              | 731                | 284                                    | 428   | 1,443 |
| Total ... ..                       | 785                | 329                                    | 597   | 1,711 |

Of the 785 flowing bores, 57 were of less than 10,000 gallons per day; 161 from 10,001 to 150,000 gallons; 318 from 150,001 to 750,000 gallons; 145 from 750,001 to 1,500,000 gallons; 65 from 1,500,001 to 2,500,000 gallons; and 39 from 2,500,001 to 4,500,000 gallons. The deepest well was one known as Bimerah Run No. 3, White-wood, lying between the Barcoo and Thomson Rivers; this had a depth of 5045 feet, and was stated to yield 70,000 gallons daily. This flow is, of course, a comparatively small one, many wells yielding, when uncontrolled, from one to three million gallons a day. A well at Cunnamulla is stated to have a daily flow, when uncontrolled, of no less than 4,500,000 gallons. The waters of many of the wells have been analysed, and some found suitable for wool-scouring only, others are suitable for watering stock but not for irrigation, owing to the presence of alkali; others again serve for both stock and irrigation, while some, such as those containing sulphuretted hydrogen, are not of any use. Water fit for stock may generally be said to be "safe" for domestic purposes in spite of its slightly mineral taste. The wells yielding the mineral waters known as "Helidon Spa," "Boonah Spa," and "Junot Spa," which are much in use in Queensland and New South Wales, are shallow wells from 60 to 200 feet in depth.

The following table shews particulars as to Queensland bores at the end of June, 1913 :—

**QUEENSLAND ARTESIAN AND SUB-ARTESIAN BORES ON 30th JUNE, 1913.**

| Particulars.                              | State and Local Authorities. | Private.    | Total.      |

5. **South Australia.**—The information about artesian wells is somewhat meagre. Early in 1908 a list of twenty-five of the principal Government bores was published, of which four were under 1000 feet in depth, twelve from 1000 to 2000 feet, two from 2000 to 3000 feet, and seven over 3000 feet. The deepest flowing well was at Goyder's Lagoon, on the Hergott to Birdsville route, measuring 4580 feet, and yielding \*600,000 gallons per day. A bore at Patchawarra, 35 miles north of Innamincka, was, in October, 1912, down to 5161 feet, but had not at that depth struck the subterranean water. The maximum flow, viz., 1,250,000 gallons, is obtained at Coonie Creek.

The following table shews particulars as to South Australian bores at the end of December, 1912:—

**SOUTH AUSTRALIAN BORES, 1912.**

| Particulars.  | Artesian and Sub-artesian. |

\* Exclusive of abandoned bores.

† Not available.

(i.) *Bores along Bordertown Railway.* The sinking of bores across the Ninety-mile Desert between the Murray and the Victorian boundary was commenced in 1886 at Coonalpyn; with the exception, however, of salt water at 55 ft., none was reported to have been struck. Ki Ki bore was sunk in 1887, and at 361 ft. a good supply of water fit for stock was struck. Tintinarra bore was sunk in 1887; it was artesian when first tapped. The water was found to be fit for locomotive engines and is still used for that purpose. The bore at Emu Flat was also sunk in 1887.

In all these bores water was found in porous beds of Eocene (Tertiary) age.

(ii.) *Bores along and near Pinnaroo Railway Line.* Several bores have been successfully put down in the Pinnaroo country. In 1904 the first bore was sunk in this district at Cotton, and numerous successful bores have since been put down by the Public Works Department, and subsequently by the residents of the district. The depth of water level from the surface ranges from 15 to 200 feet, and the maximum outflow is 48,000 gallons per day at the Gosden bore. Several wells, ranging in depth from 55 ft. to 221 ft., have also been sunk in this district.

The latest Government bore is situated  $7\frac{1}{2}$  miles south of Brown's Well, near the terminus of the proposed railway from Tailem Bend. The depth of this bore is 220 ft., and the water, which is in large supply, rises to within 52 ft. of the surface. The water is fresh, containing  $\frac{1}{4}$  oz. salts and other solid matter per gallon.

**6. Western Australia.**—(i.) *The Goldfields Water Supply of Western Australia.* The scheme by which the Government of Western Australia undertook to provide a permanent supply of water for the population on the eastern goldfields of that State comes properly under the heading of "Water Supply Works." A description of the scheme is fully given in previous issues of the Year Book. (See No. 6, p. 576.)

In August, 1912, the administration of the Goldfields Water Supply and of the Mines Water Supply was transferred to a new department, the Water Supply, Sewerage and Drainage Department. The statistics in connection with this department will be found in the section of this book dealing with *Local Government*.

At the end of the year 1912 the total number of Government bores west of the Darling Range was 64, and there were 36 private bores recorded in addition. This record is, however, incomplete, and the following particulars refer to Government bores only. The total depth bored is given as 75,102 feet. The total cost of construction of State bores at the end of the year 1912 was about £123,900, of which amount £11,500 was spent in 1912. The total daily flow of the Government bores is stated as 24,000,000 gallons. The maximum and minimum depths of State bores were 4016 feet and 175 feet respectively, and the maximum and minimum temperatures  $140^{\circ}$  and  $60^{\circ}$  Fahrenheit. The maximum outflow, 4,000,000 gallons per day, was obtained at Leederville in connection with the Metropolitan Water Supply at 2097 feet. The expenditure for the year 1912-13 was £8000, and the total expenditure since the inception of the work approximates £126,000.

As already stated, no artesian water has been found east of the Darling Ranges, although a large number of shallow bores yield either fresh or salt water.

### § 3. Irrigation Plants.

**1. General.**—Australia's first experiments in irrigation were made with the object of bringing under cultivation areas in which an inadequate rainfall rendered agricultural and even pastoral occupations precarious and intermittent, and, although these original settlements have for the most part proved fairly successful, most of the States, instead of promoting new settlements in unoccupied regions, are adopting the policy of making existing settlement closer, by repurchasing big estates and large farms, subdividing them into holdings of suitable sizes for cultivation, and selling the land upon easy terms of payment. It is in connection with this Closer Settlement policy that the special value of irrigation is recognised.

**2. New South Wales.**—(i.) *Irrigation Trusts.* The first action by the Government of this State for the establishment of irrigation settlements was taken under Acts of Parliament which authorised the formation of irrigation trusts in the vicinity of Wentworth in 1890, Hay in 1892, and Balranald in 1893. The Wentworth Trust controlled

an area of 10,600 acres, but has been dissolved and its powers assumed by Government. A pumping plant has been provided and channels laid out for the irrigation of an area of 1500 acres, of which 1000 acres are at the present time under successful occupation, largely for the production of horticultural crops and a small amount of lucerne. The original area under the Hay Trust was 12,847 acres, but in 1896 this was reduced to 3000 acres. The pumping plant and channels provide for the irrigation of 900 acres, which are under occupation, principally in connection with the growth of fodder crops for dairying, a small area being under horticultural crops. No works for the supply of water have yet been carried out by the Balranald Trust, which controls an area of 1000 acres. It is improbable that any irrigation will be provided in this area in the near future.

(ii.) *Private Irrigation.* Irrigation by private individuals is almost entirely carried out by pumping plants licensed under the provisions of the Water Rights Act. The largest plants draw their supplies from the River Murray for irrigating areas of from 600 to 700 acres of lucerne grown for stock-feeding purposes.

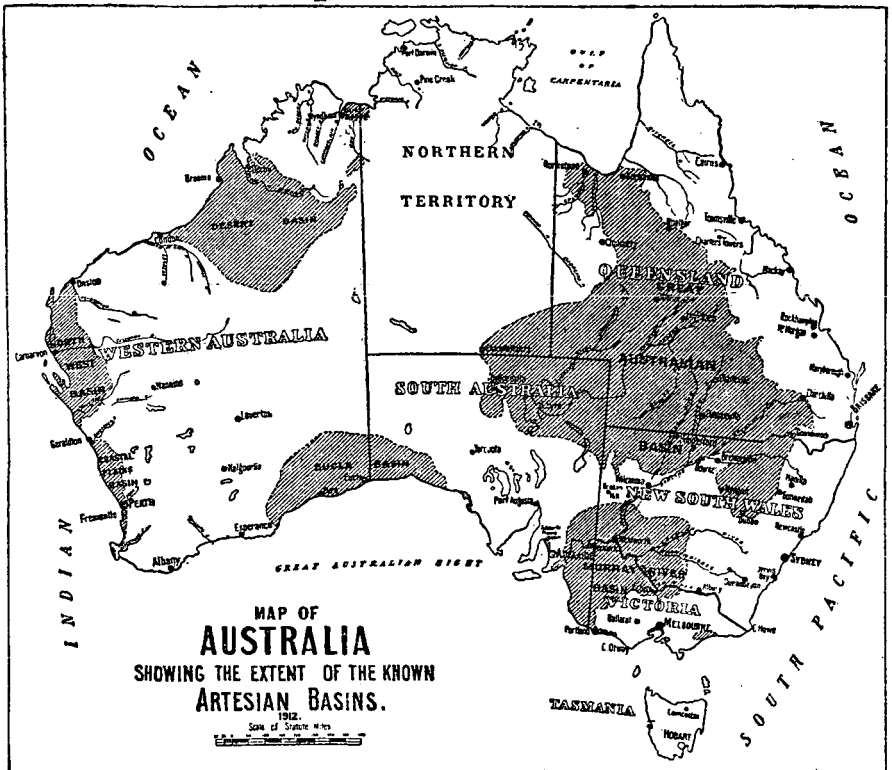

(iii.) *The Murrumbidgee Northern Irrigation Scheme.* This scheme provides for the utilisation of a large proportion of the waters flowing from the Murrumbidgee catchment area in normal seasons. The works which are necessary to provide for the conservation of these waters consist in the first place of a large storage reservoir in which the water is to be retained by a weir known as the "Burrinjuck Dam." This dam is being constructed across the channel of the Murrumbidgee River, about three miles below the confluence of the Goodradigbee River. The catchment area above this point is 5000 square miles.

The retaining wall will have a total height of 240 feet from its crest to the deepest foundation level; the total length will be 784 feet curved in plan to a radius of 1200 feet; the thickness at the crest will be 18 feet and at the base 170 feet. The maximum depth of the water stored will be 224 feet, the total volume being 33,630 million cubic feet. The wall itself will contain about 600,000 tons of material, and will require about 50,000 tons of cement for its construction. The work is now partially completed and it is estimated that it will be finished in 1914. The object of constructing this weir is to regulate the supply of water, so that the large volumes which are afforded by the winter rains and the melting snows of the spring may be retained and made available to supplement the natural flow of the river in the dry months of the summer, when irrigation water is most required. The volumes of water thus made available for irrigation requirements will be conveyed in the channel of the Murrumbidgee River for a distance of 200 miles from the storage to a point above the town of Narrandera at Berembded, where a reservoir, known as the Berembded Weir, is in course of construction, with the object of diverting supplies by gravitation into the irrigation lands. A main canal, capable of carrying 1005 cubic feet per second, is being constructed from the Berembded Weir for the purpose of conveying the waters to the irrigable lands situated along the base of the hills to the west of the town of Narrandera.

It is proposed that the State Government shall acquire and subdivide for the purposes of intense culture the whole of these irrigable areas, which consist of about 200,000 acres of first-class and 360,000 acres of second-class land. The main canal will be capable of carrying to these areas only about one half of the water which will be made available for irrigation by the construction of the Burrinjuck dam. No determination has yet been arrived at as to whether the additional available volumes will be utilised for irrigating further areas of these same lands on the northern side of the river, or whether a separate canal will be constructed for the purpose of carrying supplies to lands on the southern side.

It is stated that the conditions as regards water-supply, soil, and climate are such as to ensure the success of the scheme, and it is anticipated that when the whole of the lands are settled there will be an addition of at least 50,000 people to the population within the district. It is expected that, in addition to the horticultural crops which

MAP SHEWING THE POSITION AND EXTENT OF THE "AUSTRALIAN  
ARTESIAN BASINS."

This map was prepared by the Interstate Conference on Artesian Water, held in Sydney during May, 1912. It contains the latest facts relative to the various artesian basins of the Australian continent. Of these basins the most important is the Great Australian Basin, which is about 569,000 square miles in extent, viz.:—About 376,000 square miles in Queensland, 90,000 square miles in South Australia, 83,000 square miles in New South Wales, and 20,000 square miles in the Northern Territory. The Murray River Basin extends over South-Western New South Wales, North-Western Victoria, and South-Eastern South Australia. The Western Australian Basins fall naturally within five groups, viz.:—The Eucla Basin, the Coastal Plains Basin, the North-West Basin, the Desert Basin, and the Gulf Basin. (See also pages 498 to 503.)

will be grown, the supplies of fodder which will be afforded by the irrigation settlement will be sufficient to obviate the evil effects of droughts in the surrounding pastoral districts and will thus largely increase their stock-carrying capacity and productiveness.

(iv.) *Other Irrigation Schemes.* The following proposals are under investigation by the State Irrigation Department :—

- (a) *Lachlan River.* The construction of a storage reservoir on this river at a place known as Wyangala, below the confluence of the Abercrombie River, for the purpose of affording water in the river channel for pastoral purposes and for the irrigation of small areas along the river banks by pumping.
- (b) *Macquarie River.* The construction of a storage reservoir on this river at Burrendong, below the confluence of the Cudgegong River, for the purpose of affording water by gravitation for the irrigation of certain lands to the west of Narromine.
- (c) *Murray River.* The construction of a storage reservoir across the Murray River at Cambaroona, above Albury, in order to supply water by gravitation through a canal which will be taken off at Bungowannah, below Albury, for the irrigation of high-class lands lying between the Murray and the Billa-bong Creek near the town of Berrigan.
- (d) *Hunter River.* The construction of storage reservoirs on the Upper Hunter or Goulburn River with a view to supplying water by pumping from the Hunter River to the adjoining lands and supplementing the water supply of Newcastle. It is stated that the valley of this river is one of the most fertile districts in the State and that it is capable of carrying a dense population under the conditions of intense culture by irrigation.
- (e) *Darling River.* The conversion of Lake Menindie into a large permanent storage by means of a diversion weir across the Darling River and of a canal through Lake Pamamaroo, the water so stored to be utilised in the irrigation of the bed of Lake Cawndilla and of certain lands to the south-west.
- (f) *Warragamba River.* A scheme has been prepared for the construction of a large storage dam on the Warragamba River, so as to retain a depth of 225 feet and a volume of 103,000 million gallons of water. This would be available for the supply of 80 million gallons daily for the domestic services of Sydney, 30 million gallons daily for trade purposes, and 80 million gallons daily for irrigation purposes in the county of Cumberland.

It is proposed that the water for domestic purposes should be conveyed and delivered at Potts Hill through 48 miles of open concrete channel and pipes; that the supplies for trade purposes should be delivered in the vicinity of the Great Western Railway, between St. Mary's and Penrith; and that the lands situated along the banks of the Nepean River and in the valley of South Creek should be irrigated.

3. *Victoria.*—(i.) *Classification of Works.* The Water Conservation Works in Victoria naturally divide themselves into those providing mainly a domestic supply, such as the Yan Yean works, controlled by the Melbourne and Metropolitan Board of Works; the Coliban, Broken River, Kerang Lakes, and Mallee Supply Works, which, although now administered by the State Rivers and Water Supply Commission, are properly local

government works; other works for domestic supply controlled by Water Works Trusts or Municipal Corporations; and irrigation works proper. With the exception of the last-named class particulars as to these works will be found in the section on "Local Government" of this book.

(ii.) *Works Controlled by the Commission.* With the exception of the First Mildura Irrigation and Water Supply Trust, all of the irrigation schemes and the more important domestic and stock water-supply works in rural districts are vested in and controlled by the State Rivers and Water Supply Commission, which was created by the Water Act 1905, in force since 1st May, 1906. The works under the control of this body, which is composed of three members, may be classified as follows:—(a) Irrigation schemes; and (b) Domestic and stock schemes, included in which are a number for providing town supplies, the principal being the Coliban system.

(a) *Irrigation Schemes.* This division comprises the schemes constructed and under construction for the supply of water to between twenty to thirty irrigation districts. Up to 1906 these schemes were controlled by local Trusts which had obtained the moneys for the construction on loans from the State. By the Water Act 1905 all local control was abolished and the districts were transferred to the State Rivers and Water Supply Commission. Since that date the Government has adopted a vigorous irrigation policy and the capital expenditure at 30th June, 1913, on water supply in the irrigation and water supply districts under the control of the Commission was £4,527,358. The irrigation works draw their supplies mainly from headworks constructed on the Murray, Goulburn, and Loddon rivers. The cost of these works, which now stands at £1,194,776, is not debited to the districts benefited, but is borne entirely by the State. Within the last three years the State has adopted the policy of purchasing large areas of land commanded by these schemes and subdividing them for intensive culture. The settlement of the areas on these lines will mean a large increase in the population of the State. The management and supervision of these areas were formerly vested in two bodies—the Closer Settlement Board and the Water Supply Commission, but in order to do away with this dual control, the Amending Closer Settlement Act of 1912 was passed, transferring to the Water Supply Commission the entire management, leasing, and general supervision of all lands within irrigation districts.

(b) *Domestic and Stock Schemes.* The second division takes into account the schemes constructed and under construction for the supply of water for domestic and stock purposes to very large tracts of country. The principal works of this division are situated in the Wimmera and Mallee districts, and cover an area of about 6000 square miles. Since its inception, the Commission has spent upon the various works in the Wimmera and Sea Lake district the sum of £250,000. In addition to the Commission's districts some large areas are still administered by local authorities.

It should be mentioned that in 1899 the State deemed it advisable to write off the sum of £1,073,000 from capital accounts of the local bodies then controlling the works in each of the above divisions.

(iii.) *Mildura.* The first settlement of Mildura dates from 1884. After being managed until 1887 by Chaffey Bros., and then until 1895 by the Mildura Irrigation Company Limited, it was in that year taken over by the First Mildura Irrigation Trust and has since then made great progress. Its population at the Census of 1911, was 6145. Water is pumped from the Murray River by five pumping stations, each capable of raising 2,500,000 gallons per hour. The length of the irrigation channels is 280 miles. For the year ending 30th June, 1913, the receipts of the Trust aggregated £30,695, and its expenditure £28,964. For the same period the area of land under cultivation and the record of water acres were 12,307 and 36,960 acres respectively, the value of the fruit crops for the year being £400,000.

No precise figures are available as to the capital cost of the works at Mildura; probably the sum was not less than £180,000. The amount due to Government is £73,929, exclusive of £13,303 for accumulations of interest.

(iv.) *Lands supplied with Water within the State.* The area of country lands within the State artificially supplied with water for domestic and ordinary use and for watering stock is approximately 20,500 square miles, equal to about 13,120,000 acres. The extent of land under irrigated culture, for all kinds of crop, is 249,983 acres, an increase of 20,150 acres over the area irrigated in the previous year. The above total includes about 14,500 acres, watered under yearly permits granting authority to divert water from streams throughout the State. Further progress has been made during the year in bringing all such diversions under the control of the Commission, 719 permits authorizing diversions for irrigation, domestic and stock, and power purposes being now in force.

4. **Queensland.**—The main irrigation works in Queensland are as follow:—(a) those at Ayr, which utilise the waters of the Burdekin River, and shallow wells on its banks; (b) those at Bingera, near Bundaberg, which utilise water pumped from the Burnett River just above the point of meeting of the salt and fresh waters, and (c) those at Fairymeade, which utilise water pumped from a number of shallow spear wells sunk on the alluvial flats on the north side of the Burnett River and about six miles from Bundaberg. There were 596 irrigators in the State in 1912, chiefly farmers and graziers, and the area irrigated was 9420 acres.

5. **South Australia.**—(i.) *The Renmark Irrigation Trust.* The Renmark Irrigation Trust was established in 1893 on similar lines to Mildura, but on a smaller scale. At present the extent of the land assessed for the purpose of the trust is approximately 5200 acres, and maintains a population of 2500. The value of Renmark products has now reached the sum of over £130,000 per annum. It is claimed that without irrigation the land would barely feed 500 sheep.

(ii.) *Other Waterworks.* A number of country water works are under the control of the Public Works Department. As, however, they are not irrigation works properly so called, but are used for supplying water for domestic purposes, etc., to several towns, no further reference will be made to them in this chapter. (See Section XXVI., *Local Government.*)

(iii.) *Area under Irrigation.* Until 1910, irrigation in South Australia, with the exception of the schemes already mentioned, made little, if any, progress; but in that year an Irrigation and Reclamation Works Department was created, and the first report of the Director has now been issued. The Government is at present proceeding with the irrigation schemes along the Murray as fast as possible. The Cobdogla station, formerly held under grazing permits, has been resumed by the Crown, and as a result of the surveys to 30th June, 1913, 11,400 acres at Cobdogla and 3000 acres at Berri have been found available for irrigation. The area comprises practically the whole of the original Lake Bonney irrigation scheme, and is contiguous to the Berri irrigation area, which contains a further 19,000 acres of the Cobdogla run. It is proposed to start the reticulation with channels for an area of 5000 acres, between the Cobdogla homestead and Lake Barmera (formerly Lake Bonney), which lends itself to economical irrigation. A large central pumping station will be erected at the south end of the lake, and will command the whole of the irrigation area, including the 5000 acres, the maximum lift being about 90 feet. In the section dealing with Closer Settlement (page 250) the subject of irrigation areas in South Australia has already been referred to.

**6. Western Australia.**—A Bill for the conservation and utilisation of water for industrial irrigation and for the construction of irrigation works is now before Parliament. Preliminary surveys have been made to ascertain suitable sites for impounding water on several rivers, and the results indicate the possibilities of impounding 4,113,000,000 gallons of water, which, it is estimated, would serve 100,000 acres of irrigated land. Works have been commenced on the Harvey River, which will be the first scheme to be put into active operation.

**7. Conflicting Interests.**—The relative rights of the States of New South Wales, Victoria, and South Australia to the waters of the Murray River are undetermined. Territorially the south bank of the Murray was the boundary between the two former States, *i.e.*, the region of the River itself, up to the point where it enters South Australia, was wholly within New South Wales.

At the Federal conventions which preceded the establishment of the Commonwealth the South Australian representatives expressed their fear lest too much irrigation on the Murray and Darling might impair the navigability of the latter river, and the result was the insertion of a provision in the Commonwealth Constitution which reads as follows:—  
*"Section 100.*—The Commonwealth shall not, by any law or regulation of trade or commerce, abridge the right of a State or the residents therein to the reasonable use of the waters of rivers for conservation and irrigation."

Under this section negotiations have for several years been in progress between the three interested States. In January, 1911, a conference took place in Melbourne between the Premiers of New South Wales, Victoria, and South Australia on the Murray Waters question. Briefly stated, the results of the conference were that South Australia was to be allowed to carry out storage works at Lake Victoria, New South Wales, and lock her own portion of the Murray at her own expense, but New South Wales and Victoria would not recognise the claims of navigation in any way, and would not bind themselves to deliver any quantity of water at the point of intake into South Australia. No rights to navigation were conceded by New South Wales and Victoria, and the upper portions of the river were left free for irrigation.

In 1913 the three States appointed a board of engineers to carry out investigations, with a view to ascertain means which would be conducive to a settlement of the question of the River Murray and its tributaries. The board in its report stated that it was agreed that the interests of irrigation are more important than those of navigation, and that the heavy expense of maintaining the latter is not warranted.

The following agreement was suggested for apportionment of the cost of works and of water between the three States:—

The States of New South Wales and Victoria to bear in equal shares the cost of the Cumberoona and any further storages on the streams above Albury, and, in proportion to proposed diversions, the cost of any joint works in the River Murray to raise the level for purposes of diversion.

South Australia to bear the cost of all works proposed to be constructed by her in the Lake Victoria agreement, as ratified by the State Parliament, together with all works within her own territory.

The flow of the River Murray at Albury, including the natural or regulated flow of the Mitta and Kiewa rivers, and as regulated by the Cumberoona storage, to be shared equally by New South Wales and Victoria, subject to any quantity agreed to be sent down the river for riparian use and for supply to South Australia.

New South Wales and Victoria to each have full use of her own tributaries below Albury, and to have the right to divert the flows thereof, or, alternatively, equivalent volumes from the Murray below their affluences, subject to the provision from such

tributaries, or her share of the flow at Albury, or both, of contributions towards the share allotted to South Australia, and the allowance for riparian use on the main stream from the affluence of such tributary, or from Albury to Lake Victoria.

The proportion of the contribution by New South Wales and Victoria to the share allotted to South Australia, and for riparian use in the main stream to be that which the mean natural flow of the tributaries of each State below Albury measured at the points of affluence with the Murray, with half the actual mean flow at Albury added in each case, bear to each other. In calculating the mean flow of the Darling for this purpose, a deduction is to be made to the extent of any water diverted by the State of Queensland.

The minimum quantity to be allowed to pass to South Australia in each year to be sufficient to fill Lake Victoria storage once, and, in addition, to maintain, with the aid of the water returned from Lake Victoria, a regulated supply at Lake Victoria outlet of 114,000 acre feet per month during the months August to April inclusive, and 47,000 acre feet per month for the months May to July inclusive, these being the provisions for domestic and stock supply, losses by evaporation and percolation in Lake Victoria, like losses and lockage in the river from Lake Victoria to the river mouth (but not including Lakes Alexandrina and Albert), and for irrigation in the form of a regulated supply of 67,000 acre feet per month for nine months. Provided that these allowances and the allowance to the up-stream States to be reduced *pro rata* in such abnormal seasons as those of 1902 and 1903.

Divided in accordance with this agreement the share of regulated water in each State would be approximately :—New South Wales : 1,957,000 acre feet, of which some 85,000 acre feet are now diverted for use. Victoria : 2,219,000 acre feet, of which some 600,000 acre feet are now diverted for use. South Australia : 603,000 acre feet, of which some 56,000 acre feet (plus losses in distribution) are now diverted for use.

## SECTION XV.

## COMMERCE.

## § 1. Introductory.

1. **Constitutional Powers of the Commonwealth in regard to Commerce.**—The powers vested in the Commonwealth Parliament by the Commonwealth Constitution Act with respect to trade and commerce will be found on page 25 (section 51 (i.) and pp. 31 to 33 (sections 86-95) of this volume.

## § 2. Commonwealth Commercial Legislation.

1. **Customs Act 1901 (No. 6 of 1901).**—“An Act relating to the Customs,” assented to on the 3rd October, 1901, came into operation by proclamation on the 4th October, 1901. This provided for the establishment of the necessary administrative machinery for all matters pertaining to the customs, and prescribed, *inter alia*, the manner in which customs duties shall be computed and paid. It does not, however, determine the rates thereof.

During the interval between the inception of the Commonwealth, viz., on 1st January, 1901, and the coming into operation of the Customs Act 1901, the Customs Acts of the several States were administered by the Executive Government of the Commonwealth, under section 86 of the Constitution.

2. **Customs Tariff Act 1902 (No. 14 of 1902).**—The first Commonwealth Customs Tariff imposing uniform rates of customs duty in all the States was introduced in the House of Representatives on the 8th October, 1901. “An Act relating to Duties of Customs,” assented to on the 16th September, 1902, made provision that uniform duties of customs specified in the tariff schedule should be imposed from the 8th October, 1901. From this date trade between the States became free, with, however, the exception, under section 95 of the Constitution Act, of the right of Western Australia to levy duty on the goods from other States for five years. [Repealed by the Customs Tariff Act 1908 (No. 7 of 1908).]

3. **Sea Carriage of Goods Act (No. 14 of 1904).**—“An Act relating to the Sea Carriage of Goods,” assented to on the 15th December, 1904, to commence on the 1st January, 1905, defines the responsibility of shipowners, charterers, masters, or agents in regard to goods carried.

4. **Secret Commission Act 1905 (No. 10 of 1905).**—“An Act relating to Secret Commissions, Rebates, and Profits,” assented to on the 16th November, 1905, provides that—“Any person who, without the full knowledge and consent of the principals directly or indirectly (a) being an agent of the principal, accepts or obtains, or agrees or offers to

accept or obtain, for any person, for himself, or for any person other than the principal; or (b) gives or agrees to give or offers to the agent of a principal, or to any person at the request of an agent of the principal, any gift or consideration as an inducement or reward for any act done or to be done, or any forbearance observed or to be observed, or any favour or disfavour shewn or to be shewn in relation to the principal's affairs or business or on the principal's behalf, or for obtaining or having obtained, or aiding or having aided to obtain for any person an agency or contract for or with the principal, shall be guilty of an indictable offence."

**5. Commerce (Trade Descriptions) Act 1905 (No. 16 of 1905).**—"An Act relating to Commerce with other Countries," assented to on the 8th December, 1905, and brought into operation by proclamation on the 8th June, 1906, gives power to compel the placing of a proper description on certain prescribed goods, or on packages containing the same, being imports or exports of the Commonwealth.

The operation of the Act is restricted to the following classes of goods:—(a) Articles used for food or drink by man, or used in the manufacture or preparation of articles used for food or drink by man; or (b) medicines or medicinal preparations for internal or external use; or (c) manures; or (d) apparel (including boots and shoes), and the materials from which such apparel is manufactured; or (e) jewellery; or (f) seeds and plants.

**6. Australian Industries Preservation Act 1906 (No. 9 of 1906).**—"An Act for the Preservation of Australian Industries and for the Repression of Destructive Monopolies," assented to 24th September, 1906, provides that any person or any corporation making or engaging or continuing in any combination "with intent to restrain trade or commerce to the detriment of the public or with intent to destroy or injure by means of unfair competition any Australian industry the preservation of which is advantageous to the Commonwealth, having due regard to the interests of the producers, workers, or consumers," or any person or corporation monopolising or attempting or conspiring to monopolise any part of the trade of the Commonwealth with intent to control, to the detriment of the public, the supply or price of any service, merchandise, or commodity, is guilty of an offence. (Amended, see Acts No. 5 of 1908 and No. 26 of 1909-1910.)

**7. Customs Tariff 1906 (No. 14 of 1906).**—"An Act relating to Duties of Customs" amends the Customs Tariff of 1902 in relation to the duties on harvesters and agricultural implements and machinery and prescribes the prices to be the maximum prices of Australian harvesters and drills delivered to the purchaser at the railway station or port nearest to the factory where they are made. [Repealed by Customs Tariff Act 1908 (No. 7 of 1908).]

**8. Customs Tariff (South African Preference) 1906 (No. 17 of 1906).**—"An Act relating to Preferential Duties of Customs on certain goods the produce or manufacture of the British Colonies or Protectorates in South Africa which are included within the South African Customs Union," assented to 12th October, 1906, to operate from 1st October, 1906, provides for special preferential rates of duty on certain goods imported from and being the produce of any of the Colonies or Protectorates included within the South African Customs Union.

**9. Australian Industries Preservation Act 1907 (No. 5 of 1908).**—"An Act to amend the Australian Industries Preservation Act 1907," assented to 14th April, 1908, provides additional machinery for procuring evidence of offences against the principal Act.

**10. Customs Tariff 1908 (No. 7 of 1908).**—"An Act relating to Duties of Customs," assented to 3rd June, 1908, repeals Section 5 of the Customs Tariff 1902 (No. 14 of 1902) and the schedule of that Act and the whole of the Customs Tariff 1906 (No. 14 of 1906)

as from 8th August, 1907, and imposes new rates of Customs Duties. This Act provides preference rates of customs duties on certain "goods the produce or manufacture of the United Kingdom."

**11. Customs Tariff Amendment Act 1908 (No. 13 of 1908).**—"An Act to amend the Tariff Act of 1908," assented to 10th June, 1908. The purpose of this Act is merely to remove possible doubt as to the intention of the original Acts.

**12. Australian Industries Preservation Act 1909 (No. 26 of 1909).**—"An Act to amend the Australian Industries Preservation Acts 1906-1907" formally repeals Sections 5 and 8 of the parent Act, which were declared by the High Court to be *ultra vires*; also provides that, in relation to trade and commerce with other countries or among the States, the payment of rebates, or the refusal to sell, "either absolutely or except upon disadvantageous conditions," with the purpose of promoting exclusive dealing, shall be an offence.

**13. Customs (Interstate Accounts) Act 1910 (No. 9 of 1910).**—Repeals Sections 272 and 273 of the Customs Act 1901. These sections relate to the passing of dutiable goods from one State to another State of the Commonwealth, and their repeal was consequent on the termination of the book-keeping system of accounts between the Commonwealth Government and the Governments of the States, in favour of a system of payments based on population.

**14. Australian Industries Preservation Act 1910 (No. 29 of 1910).**—"An Act to amend the Australian Industries Preservation Act 1906-1909." This Act removes from the principal Act the obligation to prove *intent* to restrain trade and detriment to the public.

**15. Customs Act 1910 (No. 36 of 1910).**—"An Act to amend the Customs Act 1901" gives the Customs control of all goods for export, the exportation of which is subject to compliance with any condition or restriction under any Act or regulation, extends the machinery provisions for the prevention of the importation or exportation of goods which are prohibited imports or exports respectively, amends the provisions for the payment of duty under protest, gives the Governor-General power to prescribe the nature, size, and material of the coverings for packages, and the maximum or minimum weight or quantity to be contained in any one package of goods imported or exported, or transported coastwise from one State to another; the condition of preparation or manufacture for export of any articles used for, or in the manufacture of, food or drink by man; the conditions as to purity, soundness, and freedom from disease to be conformed to by the goods for export.

**16. Customs Tariff 1910 (No. 39 of 1910).**—"An Act relating to Duties of Customs," amends the Customs Tariff of 1908 by more explicit definition of certain tariff items, and by alteration of some rates of duty.

**17. Customs Tariff 1911 (No. 19 of 1911).**—"An Act relating to Duties of Customs," amends the Customs Tariff 1908-10 by alteration of some rates of duty.

**18. Interstate Commission Act 1912 (No. 33 of 1912).**—In accordance with the provisions of the Commonwealth Constitution Act—Sections 101 to 104 (see page 33 *ante*)—an Act relating to the Interstate Commission was assented to on the 24th December, 1912. This Act provides for the appointment of the Commission, and cognate matters.

### § 3. Method of Recording Imports and Exports.

1. **Value of Imports.**—The recorded value of goods imported from countries beyond the Commonwealth represents the amount on which duty is payable or would be payable if the duty were charged *ad valorem*. The value of goods is taken to be 10 per cent. in advance of the fair market value in the principal markets of the country whence the goods were exported, the increase being intended to represent roughly the cost plus insurance, freight and other charges to the place of landing.

2. **Value of Exports.**—The recorded value of goods exported is taken to represent the value in the principal markets of the Commonwealth in the ordinary commercial acceptance of the term.

3. **Records of Past Years.**—In the years preceding federation each State independently recorded its trade, and in so doing did not distinguish other Australian States from foreign countries. As the aggregation of the records of the several States is, necessarily, the only available means of ascertaining the trade of Australia for comparison with later years, it is unfortunate that past records of values and the direction of imports were not on uniform lines admitting of the preparation of a record for Australia as a whole. On the introduction of the Customs Act 1901, the methods of recording values were made uniform throughout the States, but it was not until September, 1903, that a fundamental defect in the system of recording transhipped goods was remedied. Up to this date goods arriving in any Australian port for transshipment to a port in another Australian State were recorded at the latter port only, where they were ordinarily recorded as from the transshipping State, and not as an import from the overseas country.

In recording exports an analogous defect also existed in most of the States, since goods despatched from one Australian State for transshipment in another State to an overseas country were simply recorded in the former as an export to the transshipping State; thus no proper record of the export overseas was made. Owing to this defect the overseas trade prior to September, 1903, is understated by an amount which it is impossible to accurately estimate, since it varies with the development of the shipping facilities of the States concerned. To discover the direction of the transhipped trade is not possible. The figures presented in the tables hereinafter are therefore the values as recorded, and must be taken as subject to the defects explained.

4. **Vessels (Ships) Imported and Exported.**—The imports or exports of vessels were not recorded prior to the year 1905. The value of vessels imported during each of the years 1905-1912 were as follows:—1905, £265,957; 1906, £366,300; 1907, £680,700; 1908, £700,500; 1909, £757,100; 1910, £711,850; 1911, £340,045; 1912, £1,257,655. The exports during the same years were:—1905, £79,975; 1906, £51,365; 1907, £90,201; 1908, £82,355; 1909, £38,600; 1910, £72,000; 1911, £17,605; 1912, £66,300.

5. **Ships' Stores.**—Prior to 1906 goods shipped in Australian ports on board overseas ships as ships' stores were included in the general exports. From 1906 ships stores have been specially recorded as such, and omitted from the return of exports. The value of ships' stores during 1906 amounted to £875,966 (of which bunker coal represented £575,471, or 65.7 per cent.), during 1907 to £998,897 (bunker coal representing £663,724, or 66.45 per cent.), during 1908 to £1,196,106 (bunker coal £867,707, or 72.55 per cent.), during 1909 to £1,071,677 (bunker coal £781,113, or 72.90 per cent.), during 1910 to £1,080,133 (bunker coal £740,567, or 68.57 per cent.), during 1911 to £1,238,446 (bunker coal £858,783, or 69.35 per cent.), and during 1912, to £1,431,985 (bunker coal £1,008,259, or 70.41 per cent.).

### § 4. Oversea Trade.

1. **Total Oversea Trade.**—The following table shews the total trade of the Commonwealth with overseas countries from the earliest date for which records are available. In consequence of the defects of record, referred to in the preceding section, the results can be only approximate to the actual figures. The very marked rise and sudden fall in the value of imports during the period 1837 to 1842 were contemporaneous with heavy land speculation and a subsequent severe financial crisis. The great increase of trade in the early fifties is due to the discovery of gold. In the State of Victoria the value of imports from overseas countries increased from £500,000 in 1851 to nearly £11,000,000 in 1853, and to £13,000,000 in 1854; while in New South Wales similar imports rose from £1,390,000 in 1851 to £5,500,000 in 1854, when the total imports into the Commonwealth reached the sum of £34 13s. 10d. per head, and the total trade £56 3s. 10d. per head of the population. The rapid influx of persons anxious to share the good fortunes of these times, however, soon reduced the value of the trade per head, till, in 1858, it had declined to £31 19s. 6d. per head. The period 1867-1872 shews a marked reduction in the value of trade per head. For some years prior to this period New South Wales had experienced a succession of indifferent seasons, and Victoria was suffering from a congested labour market consequent on the decline of alluvial gold-mining in that State. This congestion of the labour market during the years 1862 to 1866 gave rise to the agitation for a protective tariff to provide employment in manufactures, and in April, 1866, the Tariff Act, which expressed the protective policy since adhered to in Victoria, was assented to.

#### OVERSEA TRADE OF COMMONWEALTH, 1826 to 1913.

| Year. | Recorded Value. |          |         | Value per Inhabitant. <sup>1</sup> |          |         | Percentage<br>of<br>Exports<br>on<br>Imports. |
|-------|-----------------|----------|---------|------------------------------------|----------|---------|---|
|       | Imports.        | Exports. | Total.  | Imports.                           | Exports. | Total.  |   |
|       | £1,000.         | £1,000.  | £1,000. | £ s. d.                            | £ s. d.  | £ s. d. | %   |

1. Reckoned on mean population of the year.

2. Preliminary figures.

The graphs illustrating the movement of the oversea trade of Australia (see pages 523 and 524) shew that periods of depressed trade have been recurrent at more or less regular intervals of from seven to nine years, and measured by population, each succeeding depression since 1855 has carried the trade per head lower than the preceding one, until the lowest point was reached in 1894.

The year 1892 marked the beginning of a period of acute financial stress, culminating in the commercial crisis of 1893. The collapse of these years is plainly reflected in the trade records of that period, the trade of 1894 falling to £54,028,227, a decline of no less than 26.75 per cent. in three years. In 1895 there was a slight recovery, and a continuous upward movement until 1901, when the trade reached £92,130,183, or £24 6s. 1d. per head. A decline, due to drought, in the exports of agricultural, pastoral, and dairy produce, reduced the trade of 1902 to £84,591,037, but although in the next year there was a further shrinkage in the exports of agricultural produce, the increase in the value of the exports of metals, specie, butter, and wool was so large as to effect an increase in the total trade. From 1902 the increase in the value of trade continued, till in 1907 it reached the amount of £124,633,280, equal to £30 4s. 5d. per inhabitant.

The imports during 1907 were, doubtless, to some extent inflated by the importation of goods in anticipation of the tariff revision of that year. The trade of 1908 shews a decline of £10,523,000 as compared with 1907, of which £8,513,000 was in the value of exports, notwithstanding an increase of £3,447,767 in the export of gold and specie. This decline in the value of exports was largely due to reduced prices ruling for wool and metals in consequence of the financial crisis in the United States during the previous year, and in lesser degree to the smaller exports of agricultural and pastoral produce, due to the unfavourable season experienced in some of the States.

The trade of 1909 per head of population was slightly more than in 1908, notwithstanding that the gold exports were less by £5,193,587. In 1910 the value of imports per head was higher than in any year since 1885, and the value of exports was—excepting the years 1906 and 1907—the highest since 1857. The high value of exports is particularly striking when considered in conjunction with the exceptionally small exports of gold. The exports of gold, already much reduced in 1909 as compared with 1908, were in 1910 still further reduced by £4,264,368 to £4,108,783, the smallest recorded since 1892. During 1911 the exports of gold bullion and specie again increased to £11,540,782. The continued increase in the value of imports during 1912 and 1913, while the value of exports remained stationary, is referred to in the succeeding paragraph. The particular classes of goods from which the increases in trade arise are shewn on pages 639 to 641.

**2. Ratio between Exports and Imports.**—The foregoing table shews the percentage of exports on imports for each year. From this it will be seen that, with few exceptions, due to temporary dislocations of trade, prior to 1892 the balance of trade has been on the side of imports, but from 1891 to 1912 the reverse has been the case. The excess of imports in the earlier years represents the introduction of capital in the form of Government loans and for investment in private undertakings, and the excess of exports represents mainly the interest and profit on the earlier investments, repayment of loans to foreign bondholders, and also freight on trade, which is carried mainly by ships of the United Kingdom and foreign countries.

The marked change in the balance of trade, which is in the direction of that of twenty years ago, is a striking feature of the trade returns for 1912. The decline in the ratio of exports to imports has been due, mainly, to the loans recently raised in London by the Governments of the various States of the Commonwealth. The proceeds of these loans, of course, swell the import returns, but, as no immediate payment beyond an instalment of interest has to be made in return, the export figures are affected to a very minor degree, until such time as the principal of the debt is repaid. The larger number of immigrants has, also, to some extent affected the balance of trade by the introduction of capital. The following table shews for the last twelve years the balance of trade of

the Commonwealth as shewn by the records of imports and exports for each year, and, also, the modification of these figures as affected by loans raised in London by the States:—

### EFFECT OF LOANS ON THE RECORDED BALANCE OF TRADE.

| Year.       | Excess of Exports as Recorded. |           | Net Amount of Debt Raised or Redeemed(—) in London. | Excess of Exports Modified by Elimination of Loans. |           |
|-------------|--------------------------------|-----------|---|---|-----------|
|             | Amount.                        | Per cent. | Amount.   | Amount.   | Per cent. |
|             | £1,000.                        |           | £1,000.   | £1,000.   |           |
| 1902 ... .. | 3,239                          | 100       | 5,014   | 8,253   | 100       |
| 1903 ... .. | 10,439                         | 322       | 1,658   | 12,097  | 146       |
| 1904 ... .. | 20,465                         | 632       | 753   | 21,218  | 257       |
| 1905 ... .. | 18,494                         | 571       | 1,968   | 20,462  | 248       |
| 1906 ... .. | 24,993                         | 771       | 5,308   | 19,685  | 238       |
| 1907 ... .. | 21,015                         | 649       | 2,259   | 18,756  | 227       |
| 1908 ... .. | 14,512                         | 448       | 6,088   | 20,600  | 249       |
| 1909 ... .. | 14,147                         | 436       | 2,562   | 16,709  | 202       |
| 1910 ... .. | 14,477                         | 447       | 2,904   | 11,573  | 140       |
| 1911 ... .. | 12,518                         | 386       | 3,123   | 15,641  | 189       |

| 1913 ... .. | 1,211                          | 137       | 5,590*  | 4,379   | ...       |

\* June to December, 1913.

The trade balances would be further modified by the loans of local governing bodies, by the imports of capital for private enterprises, and by the addition to or absorption of bank balances held in London on Australian account. Particulars of such transactions are not available. In regard to the importation of private capital, it may not be without significance that the tariff of 1908 was followed by a pronounced diminution in the excess of exports, the suggestion being that industrial enterprise had been augmented by imported capital.

The general relationship between the balance of trade of the Commonwealth and the borrowing of money abroad is demonstrated by the following figures:—

### BALANCE OF TRADE AND PUBLIC DEBT.

| Period.          | Annual Average. |          |           |          |           |
|------------------|-----------------|----------|-----------|----------|-----------|
|                  | Imports.        | Exports. | Excess of |          | New Debt. |
|                  |                 |          | Imports.  | Exports. |           |
|                  | Mill. £.        | Mill. £. | Mill. £.  | Mill. £. | Mill. £.  |
| 1867-1871 ... .. | 17.8            | 20.0     | ...       | 2.2      | 1.7       |
| 1872-1876 ... .. | 23.4            | 24.6     | ...       | 1.2      | 2.6       |
| 1877-1881 ... .. | 25.5            | 24.6     | 1.0       | ...      | 5.2       |
| 1882-1886 ... .. | 35.8            | 26.8     | 9.0       | ...      | 10.6      |
| 1887-1891 ... .. | 35.4            | 29.4     | 6.0       | ...      | 7.4       |
| 1892-1896 ... .. | 25.6            | 33.0     | ...       | 7.4      | 3.8       |
| 1897-1901 ... .. | 36.2            | 44.4     | ...       | 8.2      | 3.2       |
| 1902-1906 ... .. | 39.6            | 55.2     | ...       | 15.6     | 0.8       |
| 1907-1911 ... .. | 56.0            | 71.2     | ...       | 15.2     | 1.3       |
| 1912-1913 ... .. | 79.0            | 79.0     | ...       | ...      | 12.0      |

\* Subsequent to 1897 these figures relate to moneys raised outside of Australia only. Prior to 1893 the amounts raised locally were insignificant, but it is probable that the amount of new debt raised during 1892-5 is somewhat overstated.

## § 5. Direction of Trade.

1. **Country of Shipment and Country of Origin.**—The following table shews, for the years 1908 and 1912, the value of imports recorded as direct from the principal countries, and also the disposition of the value of imports against the countries where they were produced or manufactured. A similar comparison for the years 1905-11 will be found in previous issues of this work.

### COMMONWEALTH IMPORTS FROM COUNTRIES OF SHIPMENT AND COUNTRIES OF ORIGIN, 1908 and 1912.

| Country.                                    | Imports according to— |              |                   |              |                    |              |                   |              |

The only country from which the value of direct imports exceeds by any large amount the value of the imports of goods which were manufactured or produced therein, that is to say, the only country which shews a balance of any magnitude as a distributor of the goods of other countries to Australia, is the United Kingdom. The records of our imports therefrom during the year 1912 shew that while the total direct imports from that country amounted to £45,925,156, the value of the manufactures or produce of the United Kingdom itself, imported from all countries whatsoever during the same year, was £39,124,829. From the foregoing figures it appears that goods to the value of at least £6,800,327 were received from other countries through the United Kingdom.

Other countries which shew balances as distributors to Australia, though absolutely of much less amount, are Belgium, Hong Kong, New Zealand, Straits Settlements, and Ceylon. The countries mentioned are, of course, not the only countries through which goods are indirectly imported into Australia, for the direct imports from other countries, notably France and Germany, include considerable values which are not of the

produce of those countries. These values, however, are more than balanced by value of French and German goods received through the United Kingdom and other countries.

2. **Direct Imports according to Country of Shipment.**—The following table, shewing the average yearly value of imports from each of the principal countries during each succeeding quinquennial period from 1892 to 1911, and for the year 1912, shews considerable change in direction of imports during the past twenty years. The countries mentioned in this table are those where the goods were shipped or whence they were directly consigned to Australia.

**TRADE OF THE COMMONWEALTH WITH VARIOUS COUNTRIES, 1892 to 1912.**

| Country.  | Yearly Average of Quinquennial Periods. |            |            |            | Year 1912. |
|---|---|------------|------------|------------|------------|

**3. Imports from the United Kingdom.**—The foregoing tables shew that while the actual value of direct imports from the United Kingdom during 1912 is above the yearly average of the period under review, being double that of the quinquennium 1897-1901, and nearly double that of the quinquennium 1902-6, the proportion to total imports has diminished, having fallen from 70.91 per cent. during the years 1892-6 to 58.76 per cent.

GRAPHS SHEWING VALUES OF TOTAL TRADE, EXPORTS, AND IMPORTS OF  
COMMONWEALTH, 1826 to 1913.

EXPLANATION OF GRAPHS.—The base of each square represents an interval of five years, and the vertical height five million pounds sterling for Imports and Exports, and ten million pounds sterling for Total Trade. The scales for Total Trade and Exports are on the left and that for Imports on the right hand side of the graphs.

GRAPHS SHEWING THE VALUES PER HEAD OF POPULATION OF TOTAL TRADE,  
EXPORTS AND IMPORTS OF COMMONWEALTH, 1826 to 1913.  
(See pages 516 and 517.)

EXPLANATION OF GRAPHS.—The base of each square represents an interval of five years, and the vertical height fifty shillings per head of the population. The basic lines of Imports and Exports are *nil* per head, and that of Total Trade is five pounds sterling per head.

in 1912. The position of the United Kingdom as indicated by her percentage proportion of the total trade is largely affected by the imports of vegetable foodstuffs, a branch of trade in which the United Kingdom cannot participate. The apparent diversion of Australian trade from Great Britain is more fully dealt with in sub-section 11 of this chapter. The values of the principal imports of United Kingdom origin during the year 1912 are as follows:—

Ale and beer, £481,886; apparel and textiles—apparel, £3,236,644, textiles, £9,001,802; arms, ammunition and explosives, £712,456; books and periodicals, £618,976; brushware, £84,996; earthenware, etc., £318,056; clocks and watches, £43,616; cocoa and chocolate, £141,340; confectionery, £330,121; cordage, metal, £120,403; cordage, other, £151,783; cutlery, £273,928; drugs and chemicals—alkalies (soda), £117,444, fertilisers, £52,756, medicines, £181,778, other drugs and chemicals, £577,164; electrical and gas appliances, £268,744; electrical materials, £587,438; fancy goods, £244,082; fish, fresh and preserved, £201,864; furniture, £130,324; glass and glassware, £177,452; indiarubber and manufactures, £260,914; instruments, musical, £102,312; instruments, scientific, surgical, etc., £100,571; iron and steel—pig iron, £193,486, bar, hoop, ingot, etc., £337,729, scrap, £74,277, girders, beams, etc., £226,190, plate and sheet, galvanised or corrugated, £1,905,802, not galvanised or corrugated, £245,889, pipes and tubes, £680,513, rails, fishplates, etc., £844,733, tinned plates, plain, £504,257; wire, £125,800; wire netting, £229,575; jewellery and precious stones, £260,952; leather and leather manufactures, £138,485; machines and machinery, £2,510,052; metals, manufactures of, £2,655,430; milk, preserved, £11,495; oils (not essential), £335,667; paints and colours, £456,703; paper, £834,431; pickles, sauces, etc., £156,020; soap, £53,001; specie, £531,878; spirits, £336,621; stationery, £299,931; tobacco, £70,672; tools of trade, £342,179; varnishes, £91,945; vehicles—bicycles, etc., £191,263, motors, £727,371, other vehicles, £157,583; vessels (ships), £1,165,750; yarns, £332,717.

4. **Imports Shipped from British Possessions.**—The growth of the value of imports from other British possessions during the past twenty years has been such as to increase the proportion to total imports from 11.48 per cent. in the years 1892-6 to 12.26 per cent. in 1912, the actual values being respectively £2,953,848 and £9,581,206. Of the total imports from British possessions during 1912, 34.99 per cent., or 4.29 per cent. of all imports, was from New Zealand; 21.98 per cent., or 2.17 per cent. of all imports, from India; 11.31 per cent., or 1.38 per cent. of all imports from Canada; and 9.02 per cent., or 1.11 per cent. of all imports, from Ceylon.

5. **Principal Imports, the Produce of British Possessions, 1912.**—These are as follows:—

(i.) *Canada.* Apparel and textiles, £16,546; boots and shoes, £8881; drugs and chemicals, £21,209; fish, £77,340; furniture, £23,644; indiarubber and manufactures £27,931; agricultural implements and machinery, £250,699; other machines and machinery, £15,732; metal manufactures, £43,569; paper, £185,781; timber, £70,922; motor chassis, £135,800, motor bodies, £27,135, other vehicles, £25,040.

(ii.) *Ceylon.* Coir fibre, £3428; nuts, £27,446; rubber and manufactures, £63,147; tea, £734,116. The large increase in the imports from Ceylon—from £217,138 during the years 1891-5, to £849,588 in 1912—is due to the displacement of China teas in the Australian markets by those of India and Ceylon. Of the total imports of tea during the year 1912, 52.80 per cent. was the produce of Ceylon.

(iii.) *Fiji.* Bananas, £154,509; copra, £40,973; sugar—produce of cane, £84,379, molasses, £9237.

(iv.) *India.* Bags and sacks, £1,003,955; hessians, £215,369; cameos, precious stones, unset, £56,186; carpets, mats, etc., £25,308; coffee and chicory, £47,567; cotton, raw, £11,680; other unmanufactured fibres, £16,708; iron pig, £28,311; linseed, £19,336; rice, £273,411; shellac, £9174; oils—castor, £49,753, linseed, £4473; skins and hides, £32,379; spices, £16,770; tea, £337,665; timber, £20,847; wax, paraffin, £28,289; yarns, £13,237.

(v.) *Mauritius*. Sugar, £115,449.

(vi.) *New Zealand*. Apparel and textiles, £15,066; animals—horses, £122,378, sheep, £10,220; military stores, £8391; fibre, flax, and hemp, £60,647; fish, £44,567; gold, bullion and ore, £1,086,355; grain, barley, £53,067; hops, £13,896; implements and machinery (agricultural), £9112; machines and machinery, £7097; meats, £31,807; seeds, £55,097; skins and hides, £95,863; timber, £657,017; wool, £5204.

(vii.) *Papua*. Gold bullion and ore, £56,177.

(viii.) *South African Union*. Bark, tanning, £50,918; explosives, £19,508; precious stones, £190,637.

(ix.) *Straits Settlements*. Spices, £49,599; sago and tapioca, £70,014; canes and rattans, etc., unmanufactured, £9224; rubber, and rubber manufactures, £21,673.

**6. Imports Shipped from Foreign Countries.**—The imports direct from foreign countries during the year 1912 represented 28.98 per cent. of the total imports, as compared with 17.61 per cent. during the years 1892-6. Of the total imports into Australia shipped from foreign countries 22.71 per cent.—6.58 per cent. of all imports—was from Germany, and 41.71 per cent.—12.09 per cent. of all imports—was from the United States.

**7. Principal Imports the Produce of Foreign Countries, 1912.**—The details are as follow :—

(i.) *Austria-Hungary*. Apparel and textiles, £140,861; furniture, £35,680; china-ware, £14,661; glassware, £12,718; fancy goods, £16,132; jewellery and precious stones, £18,922; paper and stationery, £21,428; pipes, smoking, etc., £15,837.

(ii.) *Belgium*. Apparel, £110,405; textiles, £144,292; candles, £1248; cement, £25,879; drugs, chemicals, and fertilisers, £7803; glass and glassware, £181,579; iron and steel—partly manufactured, £127,821, girders, beams, etc., £6506, pipes and tubes, £11,392, plate and sheet, £35,021, railway iron, £125,033, wire, £3464; jewellery, £31,313; machines and machinery, £13,935; matches and vestas, £19,712; metal manufactures, £103,540; motors and parts, £74,264; paper, £35,711, zinc manufactures, £16,243.

(iii.) *Chile*. Barley, £28,022; soda nitrate, £32,448.

(iv.) *China*. Apparel and textiles, £133,854; cotton, raw, £13,357; fish, £15,711; fruit, £9683; ginger, £14,626; rice, £62,133; nuts, £19,141; oils, £14,673; tea, £85,592.

The decline of the value of imports from China during the past twenty years is due to the loss of the tea trade, which now draws its supplies mainly from India and Ceylon.

(v.) *France*. Apparel and textiles, £932,607; cream of tartar, £182,917; other drugs and chemicals, £40,287, fruits, £13,495; fancy goods, £60,340; jewellery, £17,857; time-pieces, £8019; pipes, smoking, etc., £77,560; motor vehicles and parts, £235,525; perfumery, £29,154; resin, £19,287; rubber manufactures, £53,652; leather, £17,936; spirits, £151,349; tiles, £11,428; wine, £138,810; machinery and manufactures of metal, £67,850.

(vi.) *Germany*. Ale and beer, £125,552; apparel and textiles, £1,915,135; arms, ammunition and explosives, £76,679; brushware, £31,750; cement, £144,564; chinaware, etc., £66,072, earthenware, £28,573; drugs and chemicals—calcium carbide, £6488, dyes, £20,243; fertilisers, £51,339, other drugs, etc., £157,833; fancy goods, £151,977; furniture, £17,312; minor articles for furniture, £5496; glass and glassware, £138,759; hops, £14,427; indiarubber manufactures, £222,042; metals and manufactures of metals—iron and steel—bar, hoop, ingot, etc., £206,478, plate and sheet, £70,402, pipes and tubes, £81,210, railway iron, £89,739, tools of trade, £37,874; wire, £340,936; wire netting, £174,534; machines and machinery, £281,253; lamps and lampware, £49,486; electrical and gas appliances, £60,922; other manufactures of metals, £621,698; jewellery, cameos, etc., £102,857; leather and leather manufactures (excluding boots and shoes), £84,255;

musical instruments, £504,666; paper, £198,452; spirits, £28,012; stationery, £94,781; tobacco, £13,239; paints and varnishes, £22,032.

(vii.) *Italy.* Apparel and textiles, £191,576; fruits, £29,276; matches and vestas, £22,783; marble and stone, £40,549; oils, olive, £13,792, essential, £17,715; nuts, £18,742; sulphur, £68,479; motors and parts, £88,639.

(viii.) *Japan.* Apparel and textiles, £484,449; bags, baskets, etc., £36,491; china-ware and earthenware, £17,916; fancy goods, £15,000; fertilisers (superphosphates), £90,221; furniture, £15,934; rice, £11,401; oils and waxes, £60,045; spices, £6898; sulphur, £37,666; timber, etc., £76,278.

(ix.) *Java.* Cotton, raw, £5100; hats and caps, £2370; rice, £10,744; kapok, £130,704; rubber, £1435; sugar, £988,049; tobacco, £2260; tea, £162,604.

(x.) *Netherlands.* Apparel and textiles, £54,820; cocoa and chocolate, £72,710; cameos and precious stones, £6384; metal manufactures, £21,005; paper, £41,799; spirits, £143,740.

(xi.) *Norway.* Calcium carbide, £72,273; fish, £124,928; milk, preserved, £7902; paper, £135,174; timber, £374,283.

(xii.) *Philippine Islands.* Flax and hemp, £93,374; cigars, £47,119.

(xiii.) *Russia.* Flax, £5374; oils, £19,995; timber, £87,624.

(xiv.) *Sweden.* Calcium carbide, £48,922; earthenware, glassware, etc., £7355; electrical machinery and fittings, £7128; cream separators, £57,343; matches and vestas, £22,489; paper, £228,588; telephones, £44,416; timber, £233,997.

(xv.) *Switzerland.* Apparel and textiles, £865,265; cigars, £14,617; cocoa and chocolate, manufactured, £135,140; confectionery, £103,215; milk, £6464; watches, £129,833.

(xvi.) *United States of America.* Apparel and textiles—Boots and shoes, £138,915; other apparel, £200,695; textiles, £272,973; arms, £58,410; ammunition and explosives, £63,184; cameras, magic lanterns, phonographs, etc., £72,377; clocks and watches, £106,836; fancy goods, &c., £118,754; fish, £242,028; furniture, £121,650; glass and glassware, £43,981; glucose, £42,485; indiarubber manufactures, £113,484; leather, £359,895; meats, £93,037; medicines, £91,045; metal manufactures—iron and steel: bars, ingots, hoops, etc., £72,528, girders, beams, etc., £30,386, pipes and tubes, £145,572, plate and sheet, £235,459, railway iron, £214,852; tools of trade, £304,893; wire, £352,335; machines and machinery, agricultural, £192,335; other machines and machinery, £1,315,327; other metal manufactures, £549,800; musical instruments, £57,058; oils, fats and waxes—benzine and gasoline, £225,295; kerosene, £610,262, lubricating oils and greases, £187,051, paraffin wax, £25,471, turpentine, £66,772; paints and varnishes, £96,825; paper, £260,277; resin, £63,221; soap, £68,267; stationery, £106,987; surgical and dental instruments, £56,875; timber, £1,314,321; tobacco, cigars, etc., £759,213; wood manufactures, £114,226; vehicles, motors and parts, £427,846; other vehicles and parts, £164,986.

8. *Direction of Exports.*—The following table shews the average yearly value of exports to principal countries during each quinquennial period from 1892 to 1911 and for the year 1912. As in the case of the import trade, considerable alteration in the direction of exports is evident. The largest increases in exports to British possessions are shewn to the South African Union and to India and Ceylon. During the South African war large shipments of gold were sent from the Commonwealth to that country, and the decline in the value of the exports to South Africa is due to the cessation of these shipments together with a decline in the exports of timber. The exports to India and Ceylon are also mainly of gold, of which exceptionally heavy shipments were made during 1904, 1911 and 1912. The large increase in the case of Belgium, Germany, and France is not entirely due to increased purchases by those countries of

Australian goods, but is due in some measure to the larger quantities of wool, skins, etc., shipped direct to the Continent, instead of, as formerly, reaching the Continent through London. The figures given below, however, do not, even now, denote the total purchases by European countries of Australian produce, as large quantities are still distributed from London.

**TRADE OF THE COMMONWEALTH WITH VARIOUS COUNTRIES, 1892 to 1912.**

**EXPORTS (INCLUDING BULLION AND SPECIE).**

| Country.   | Yearly Average of Quinquennial Periods. |            |            |            | Year<br>1912. |

9. Exports to the United Kingdom.—Notwithstanding an increase of 36.50 per cent. in the actual value of exports to the United Kingdom during the year 1912 as compared with the yearly average of the period 1892-96, the proportion of the total

exports despatched to the United Kingdom has fallen from 69.65 per cent. in the earlier period to 39.77 per cent. in the year 1912. This decrease is, to some extent, undoubtedly due to the fact that wool and other commodities which were formerly despatched to the United Kingdom, and distributed from that centre, are now to a greater extent shipped direct to continental ports.

The principal exports to the United Kingdom during the year 1912 were as follows:— Butter, £2,942,434; fruit—apples, £304,479, other, including pulp, £53,026; grain and pulse—wheat, £4,528,590; flour, £326,423, other, £22,643; hair, £30,640; jewellery and precious stones, £151,791; leather, £431,997; meat, frozen—beef, £1,245,536, mutton, £908,059, lamb, £591,589, rabbits and hares, £313,806, other frozen meat, £56,396; potted meat, £102,931; meat, preserved in tins, £489,595; minerals and metals—copper—concentrates, £2976, ingots, £160,445, in matte, £679,776, ore, £95,099; gold—bullion, £506,207, in matte, £313,192, ore, £56,077; silver—bullion, £73,782, in matte, £216,722, silver and silver-lead—concentrates, £19,835, ore, £23,878; lead—pig, £696,026, in matte, £329,780; ores, other, £58,576; tin, ingots and ore, £646,784; zinc concentrates, £80,798; oil, cocoanut, £155,848; pearlshell, £427,085; skins—hides, £430,609, rabbit and hare, £342,276, sheep, £670,816, other skins, £263,255; specie, gold, £381,172; tallow, £1,142,748; timber, £80,259; wine, £85,076; wool—greasy, £8,586,824; scoured, £1,831,653.

**10. Exports to British Possessions.**—The exports from the Commonwealth to other British Possessions are largely composed of gold despatched to India and Ceylon. These gold shipments to which further reference is made on page 542 were particularly heavy in 1912, being greater in that year than in any year since 1894. Of the total exports to British Possessions during 1912, viz., £16,887,944, as much as £10,458,641 or 61.93 per cent. was gold.

**11. Principal Exports to British Possessions, 1912.**—These are as follow:—

(i.) *Canada.* Butter, £4673; meats, £45,394; oil, cocoanut, £2707; skins, £81,392; timber, undressed, £5893; wool, £7155.

(ii.) *Ceylon.* Butter, £11,951; gold, bullion, £96,632; fodder, £5835; horses, £3403; grain—flour, £31,616; lead, pig, £21,050; silver, bullion, £247,658; soap, £11,187; specie, £7,107,355; sugar, £2061.

(iii.) *Fiji.* Apparel and textiles—apparel, including boots and shoes, £18,126; textiles, £11,105; bags, sacks, and cordage, £5026; biscuits, £23,907; coal, £14,756; drugs and chemicals—fertilizers, £10,718, other, £9019; grain, prepared—bran, pollard, and sharps, £30,793; flour, £20,740; machines and machinery, £10,021; metal manufactures, £41,989; oils, £7818; specie, £25,000; timber, undressed, £18,119; vehicles £8227; vessels, £1250.

(iv.) *Hong Kong.* Butter, £25,574; fish, £34,515; flour, £17,133; lead, pig, £92,199; sandalwood, £11,567; specie, gold, £615,053; copper, ingots, £12,293.

(v.) *India.* Coal, £62,045; gold, bullion, £797,655; specie, £1,273,280; horses, £129,186; hay and chaff, £11,886; lead, pig, £20,358; meats, £1692; silver bullion, £258,715; tallow, £13,469; timber, undressed, £213,403; wool, £18,739; flour, £13,099.

(vi.) *New Zealand.* Apparel, textiles, etc.:—apparel—boots and shoes, £3599; other apparel, £26,658; textiles, £51,081; bags and sacks, £19,574; bark, tanning, £34,224; books and periodicals, £78,956; cameras, magic lanterns, phonographs, etc., £45,633; coal, £209,591; copper, ingots, £11,678; drugs and chemicals—fertilisers, £94,483; medicines, £39,404; other drugs, etc., £38,488; electrical materials, £9506; fodders, £1297; fruit, fresh, £44,454, dried, £20,459; glass and glassware, £10,028; grain—flour, £11,377; rice, £30,661; horses, £11,465; india rubber manufactures, £86,398; iron, pig, £1589; jewellery and precious stones, £18,021; lead, pig, £24,459; leather and leather manufactures, £45,690; metals, manufactures of—agricultural implements and machinery, £17,556; other machines and machinery, £78,532; other manufactures of metals, £81,671; oils, etc., £18,076; onions, £6459; plants, trees and bulbs, £13,949; salt, £13,794; seeds, £9963; soap, £32,510; specie—gold, £290,000; spirits, £25,976; stationery, £93,838; sugar, £7646; tea, £62,031; timber, £174,225; tin, ingots, £32,271; tobacco, £92,638; wine, £26,900.

(vii.) *Papua.* Apparel and textiles, etc., £15,396; flour, £4239; machinery and manufactures of metal, £19,753; meats, £13,124; rice, £10,651; tobacco, £7041.

(viii.) *South African Union.* Animals, living—sheep, £49,683; butter, £113,099; fruits—fresh, £4653; other, £4129; grain—wheat, £355,813; flour, £221,532; jams and jellies, £10,204; leather, £91,801; meats, frozen beef, £97,601; mutton and lamb, £23,919; other meats, £38,046; oil, cocoanut, £2209; seeds, £4029; specie, gold, £25,000; tallow, unrefined, £65,131; timber, £271,700.

(ix.) *Straits Settlements.* Butter, £35,914; coal, £62,005; grain, flour, £133,054; horses, £11,322; machines and machinery, £11,982; meats, £49,738; specie, gold, £227,292; tin ore, £387,524; tin concentrates, £18,602.

**12. Exports to Foreign Countries.**—The foregoing table shews a very great increase in the value of exports to foreign countries, both in actual amounts and in relation to total exports. The value of exports to foreign countries during 1912 shews an increase of 326 per cent. over similar figures for the years 1892-6, thus increasing the proportion per cent. of all exports from 21.82 per cent. in the earlier years to 33.88 per cent. in 1912. This increase is largely due to the direct consignment of wool and other produce to European countries, instead of distributing from London, as in the earlier years. A striking feature in this table is the apparent contraction of exports to the United States. From the figures given in the table, it would appear that the sales to the United States were less in 1912 than the annual average during the past fifteen years. These figures, however, include gold bullion and specie, which during the quinquennium 1897-1901 amounted to an average of nearly £3,000,000 per annum, and about £1,300,000 during the period 1902-6, whereas during 1912 no gold bullion or specie was shipped to the United States of America.

**13. Principal Exports to Foreign Countries, 1912.**—These are as follow:—

(i.) *Argentine Republic.* Agricultural implements and machinery, £107,420; coal, £11,120; timber, £4447.

(ii.) *Belgium.* Bark, tanning, £15,520; copper, £776,743; grain, wheat, £279,449; lead, £39,036; leather, £11,119; silver and silver-lead ore, £94,594; concentrates £805,697; hides and skins, £658,047; tallow, £51,496; timber, £19,300; tin, £14,460; wool, £2,480,348; zinc ore, £1661, concentrates, £1,260,642.

(iii.) *Chile*. Coal, £463,231.

(iv.) *China*. Butter, £35,789; copper, £28,406; flour, £15,918; lead, £38,521; sandalwood, £16,619; specie, gold, £27,587; leather, £11,497.

(v.) *Egypt*. Butter, £13,060; flour, £56,557; meats—beef, £24,537, mutton and lamb, £8282, other meats, £2664; wheat, £85,970.

(vi.) *France*. Concentrates—silver, £56,200, zinc, £132,901; copper ingots, £128,760; hides and skins, £1,017,597; lead, £42,441; ores, £19,734; tallow, £56,713; wheat, £10,913; wool, £6,527,854.

(vii.) *Germany*. Bark, tanning, £20,630; concentrates—silver, £94,933, zinc, £307,768; copper, £642,744; fruit, fresh, £62,217; grain—wheat, £115,340; hides and skins, £214,056; lead, £70,638; linseed cake and oilcake, £2070; meats, preserved in tins, £8058; oil, cocoanut, £9669; ores—silver and silver lead, £95,292, wolfram, £64,154; zinc, £12,150, other ores, £11,855; precious stones, unset, £25,502; sausage casings, £72,191; specie, gold, £400,351; tallow, £5662; timber, £18,844; tin ingots, £53,397; wool, £5,050,974.

(viii.) *Italy*. Copper matte, £36,060; lead, £7050; meats, preserved, £28,630; skins, £126,209; tallow £69,264; tin ingots, £11,681; wool, £230,536.

(ix.) *Japan*. Butter, £5713; grain, wheat, £7844; hides, £8378; lead, £233,154; manures, £28,385; oils, £19,661; tallow, £78,891; wool, £703,371.

(x.) *Java*. Butter, £81,898; cattle, £19,282; coal, £105,905; fertilisers, £12,244; flour, £256,531; cattle, £19,282; horses, £13,459; meats, £12,994; gold, specie, £25,000.

(xi.) *Netherlands*. Concentrates—silver, £36,988, zinc, £180,967; tallow, £21,207; wool, £5972; gold ore, £10,372.

(xii.) *Peru*. Coal, £32,644; wheat, £237,915.

(xiii.) *Philippine Islands*. Butter, £40,296; cattle, £35,884; coal, £54,932; flour, £149,500; fodder, £23,695; horses, £5449; meats—bacon and hams, £24,906, beef, £162,555, mutton and lamb, £9271, pork, £5000, other meats, £9211.

(xiv.) *United States of America*. Coal, £55,580; copper, £686,683; gold, in matte, £143,337; hides and skins, £458,935; pearlshell, £95,155; silver in matte, £24,627; tin, £33,828; wool, £460,275.

## § 6. Development of Export Trade to Eastern Countries.

1. **Trade with Eastern Countries.**—The following tables shew the value of exports from the Commonwealth to Eastern countries during the last five years in comparison with the year 1901. The principal countries concerned in this trade are China, India, Ceylon, Japan, Java, Philippine Islands, Straits Settlements, and Hong Kong, and the particulars given in the tables apply to these countries only:—

**VALUE OF PRINCIPAL ITEMS OF MERCHANDISE EXPORTED FROM THE  
COMMONWEALTH TO EASTERN COUNTRIES, 1901 to 1912.**

It may be mentioned that exports of gold from Australia to eastern countries, chiefly to India and Ceylon, have no bearing upon the business connections of the Commonwealth with those countries, as the destination of these gold shipments, which are merely a contribution towards the liquidation of the international obligations of the Commonwealth, is determined almost entirely by London bankers.

The following tables shew the value of the principal articles exported to each of the undermentioned eastern countries during each of the years 1901 and 1908 to 1912:—

**VALUE OF COMMONWEALTH EXPORTS OF MERCHANDISE TO PRINCIPAL EASTERN  
COUNTRIES, 1901 and 1908-12.**

These exports of coal are chiefly from New South Wales. The decline in the exports of coal is, doubtless, due to the coal miners' strike in November, 1909. Mr. J. B. Suttor, Commercial Commissioner for New South Wales in the East, in his report for 1909 says that, owing to the uncertainty of deliveries from Australia, in consequence of labour troubles, the time is far distant when the trade will again reach the dimensions of recent years. The import returns for the Philippines show 274,767 tons of coal at 2.66 dollars per ton from Japan during 1912, against 119,502 from Australia at 2.42 dollars per ton.

**COPPER.**

| Country.               | 1901.  | 1908.   | 1909.  | 1910.  | 1911.  | 1912.  |

| Total ...              | 31,380 | 29,445 | 35,541 | 47,041 | 64,843 | 61,416 |

The exports given above for the year 1912 were shipped from the following States:—New South Wales, £7840 ; Victoria, £4118; Queensland, £48,756; South Australia, £693; Western Australia, £9.

### SANDALWOOD.

| Country.             | 1901.  | 1908.  | 1909.  | 1910.  | 1911.  | 1912.  |
|----------------------|--------|--------|--------|--------|--------|--------|
|                      | £      | £      | £      | £      | £      | £      |
| China ...            | 7,905  | 6,238  | 12,180 | 7,332  | 2,348  | 16,619 |
| Hong Kong ...        | 53,991 | 65,037 | 25,546 | 71,672 | 62,566 | 11,567 |
| India and Ceylon ... | ...    | 5,604  | 2,358  | 6,301  | 2,505  | 3,455  |
| Straits Settlements  | 15,341 | 589    | 5,036  | 3,319  | 5,967  | 1,034  |
| Total ...            | 77,237 | 77,468 | 45,120 | 88,624 | 73,386 | 32,675 |

These exports of sandalwood in 1912 were shipped from Queensland, £5142; and Western Australia, £27,533.

### SKINS, HOOFES, HORNS, BONES, SINEWS, AND TALLOW.

| Country.               | 1901.  | 1908.  | 1909.  | 1910.  | 1911.  | 1912.   |
|------------------------|--------|--------|--------|--------|--------|---------|
|                        | £      | £      | £      | £      | £      | £       |
| China ...              | ...    | 14     | 36     | ...    | 977    | 661     |
| Hong Kong ...          | 1,234  | 1,706  | 779    | 401    | 129    | 403     |
| India and Ceylon ...   | 2,761  | 5,319  | 2,958  | 3,485  | 9,880  | 13,538  |
| Japan ...              | 11,829 | 35,459 | 40,363 | 23,145 | 72,509 | 109,562 |
| Java ...               | ...    | 315    | 1,305  | 337    | 1,296  | 909     |
| Philippine Islands ... | 165    | 91     | 626    | 389    | 577    | 397     |
| Straits Settlements    | 430    | 263    | 361    | 401    | 333    | 808     |
| Total ...              | 16,419 | 43,167 | 46,428 | 28,158 | 85,701 | 126,278 |

The above exports of skins, etc., in 1912 were shipped from the several States as follows:—New South Wales, £43,915; Victoria, £12,635; Queensland, £69,515; South Australia, £1; Northern Territory, £212.

## TIN ORE.

| Country.            | 1901. | 1908.   | 1909.   | 1910.   | 1911.   | 1912.   |
|---------------------|-------|---------|---------|---------|---------|---------|
|                     | £     | £       | £       | £       | £       | £       |
| Straits Settlements | 4,096 | 205,114 | 186,191 | 194,066 | 277,961 | 387,524 |

The export of tin ore to the Straits Settlements—the centre of the world's tin production—is for the purpose of treatment, and was shipped from the several States during 1912 as follows:—New South Wales, £201,141; Queensland, £135,311; Western Australia, £25,572; Northern Territory, £25,500.

## TIMBER, UNDRESSED.

| Country.               | 1901.  | 1908.   | 1909.   | 1910.   | 1911.   | 1912.   |
|------------------------|--------|---------|---------|---------|---------|---------|
|                        | £      | £       | £       | £       | £       | £       |
| China ...              | 4,090  | 13,060  | 26,606  | 2,699   | 14,250  | 2       |
| Hong Kong ...          | ...    | 29,015  | 30,298  | 19,590  | 763     | 3       |
| India and Ceylon ...   | 61,246 | 278,372 | 379,349 | 307,001 | 362,549 | 217,556 |
| Japan ...              | 418    | 4,332   | 1,296   | 781     | 476     | 972     |
| Java ...               | 20     | 251     | 56      | 307     | 15      | 1,298   |
| Philippine Islands ... | 9,278  | 30,849  | 3,372   | 21,132  | 19,616  | 414     |
| Straits Settlements... | 4,861  | 11,443  | 6,370   | 320     | 380     | 506     |
| Total ...              | 79,913 | 367,322 | 447,347 | 351,830 | 398,049 | 220,751 |

The above exports of timber during 1912 from the several States were shipped as follows:—New South Wales, £5892; Victoria, £507; Queensland, £725; Western Australia, £213,627.

## WOOL.

| Country.             | 1901.  | 1908.   | 1909.   | 1910.   | 1911.   | 1912.   |
|----------------------|--------|---------|---------|---------|---------|---------|
|                      | £      | £       | £       | £       | £       | £       |
| China ...            | ...    | 300     | 250     | ...     | 560     | ...     |
| Hong Kong ...        | ...    | ...     | ...     | ...     | ...     | 23      |
| India and Ceylon ... | 7,853  | 21,708  | 16,657  | 24,268  | 21,290  | 18,739  |
| Japan ...            | 48,653 | 125,408 | 264,630 | 420,622 | 459,000 | 703,371 |
| Java ...             | 112    | ...     | ...     | ...     | ...     | ...     |
| Total...             | 56,618 | 147,416 | 281,537 | 444,890 | 480,850 | 722,133 |

The wool exported to the East by the several States during 1912 was shipped as follows:—New South Wales, £656,385; Victoria, £19,007; Queensland, £46,741.

## § 7. Trade of Commonwealth since Federation.

1. **Classified Summary of Australian Trade.**—The tables hereunder present the trade of the Commonwealth during each of the years 1901 and 1908 to 1912, arranged in classes according to the nature of the goods:—

## STATISTICAL CLASSIFICATION OF IMPORTS AND EXPORTS.

| Class. | Articles.  |
|--------|--|
| I.     | FOODSTUFFS of animal origin, excluding, however, living animals.   |
| II.    | FOODSTUFFS of vegetable origin, and common salt.   |
| III.   | BEVERAGES, non-alcoholic only, and the substances used in making them.   |
| IV.    | SPIRITS AND ALCOHOLIC LIQUORS, including spirits for industrial purposes, and such pharmaceutical preparations as are dutiable as spirits. |
| V.     | TOBACCO, and all preparations thereof.   |
| VI.    | LIVE ANIMALS.  |
| VII.   | ANIMAL SUBSTANCES, mainly unmanufactured, which are not foodstuffs.  |
| VIII.  | VEGETABLE SUBSTANCES and non-manufactured fibres.  |
| IX.    | APPAREL, TEXTILES, and various manufactured fibres.  |
| X.     | OILS, FATS, AND WAXES.   |
| XI.    | PAINTS AND VARNISHES.  |
| XII.   | STONES AND MINERALS, used industrially.  |
| XIII.  | SPECIE, gold, silver, and bronze.  |
| XIV.   | METALS, UNMANUFACTURED, and ores.  |
| XV.    | METALS, PARTLY MANUFACTURED.   |
| XVI.   | METALS, MANUFACTURED, including machinery.   |
| XVII.  | LEATHER AND MANUFACTURES of leather, together with all substitutes thereof, and also INDIARUBBER AND INDIARUBBER MANUFACTURES.             |
| XVIII. | WOOD AND WICKER, both raw and manufactured.  |
| XIX.   | EARTHENWARE, CEMENTS, CHINA, GLASS AND STONWARE.   |
| XX.    | PAPER AND STATIONERY.  |
| XXI.   | JEWELLERY, TIMEPIECES, AND FANCY GOODS.  |
| XXII.  | OPTICAL, SURGICAL, AND SCIENTIFIC INSTRUMENTS.   |
| XXIII. | DRUGS, CHEMICALS, AND FERTILISERS.   |
| XXIV.  | MISCELLANEOUS.   |

## COMMONWEALTH IMPORTS ARRANGED IN CLASSES, 1901 and 1908 to 1912.

| Classes.                                  | 1901.      | 1908.      | 1909.      | 1910.      | 1911.      | 1912.      |
|---|------------|------------|------------|------------|------------|------------|
|   | £          | £          | £          | £          | £          | £          |

| Grand total ... ..                        | 42,433,811 | 49,799,273 | 51,171,896 | 60,014,351 | 66,967,488 | 78,158,600 |

The exports are shewn according to the same classification, and the usual distinction is made between exports of Australian produce and re-exports. It will be seen what

a small proportion of the total exports is made up by re-exports, and that the latter consist largely of specie minted from imported gold.

**COMMONWEALTH EXPORTS ARRANGED IN CLASSES, AND DISTINGUISHING  
AUSTRALIAN AND THE PRODUCE OF OTHER COUNTRIES,  
1901 and 1908 to 1912.**

| XIV. Metals, unmanufactd., ores, etc.... | 8,926,013   | 11,735,792  | 10,330,604  | 10,350,312  | 10,692,568  | 12,387,735  |
| XV. Metals, part manufactured ...        | 17,609      | 46,170      | 40,436      | 41,916      | 35,222      | 44,311      |
| XVI. Metals, manufactured ...            | 313,996     | 439,346     | 413,897     | 482,745     | 519,477     | 571,822     |
| XVII. Leather, etc. ....                 | 673,766     | 616,544     | 576,764     | 636,571     | 648,877     | 771,171     |
| XVIII. Wood, etc. ....                   | 698,159     | 1,074,883   | 1,063,431   | 1,058,207   | 1,116,548   | 941,676     |
| XIX. Earthenware, etc. ....              | 29,937      | 47,944      | 26,781      | 30,123      | 29,204      | 34,617      |
| XX. Paper, etc. ....                     | 74,342      | 125,915     | 121,312     | 133,169     | 146,906     | 183,722     |
| XXI. Jewellery, etc. ....                | 122,409     | 201,287     | 205,045     | 282,561     | 310,407     | 258,148     |
| XXII. Instruments, etc. ....             | 14,062      | 60,388      | 62,609      | 61,047      | 71,794      | 99,419      |
| XXIII. Drugs, etc. ....                  | 129,275     | 260,641     | 258,083     | 295,039     | 305,374     | 323,313     |
| XXIV. Miscellaneous ...                  | 251,540     | 344,787     | 304,474     | 367,770     | 385,292     | 469,161     |
| Total ...                                | 49,696,172  | 64,311,058  | 65,318,836  | 74,491,150  | 79,482,258  | 79,096,090  |

From the above table it will be seen that there has been a very substantial expansion in the principal divisions of the export trade of the Commonwealth. Compared with 1901 the exports in 1912 of animal foodstuffs, principally butter and meat, shew an increase of 93.61 per cent.; vegetable foodstuffs, principally wheat, shew an increase during the same period of 89.12 per cent.; animal substances—wool, skins, etc.—shew an increase of 86.65 per cent.; oils, fats, and waxes—mainly tallow—an increase of 114.19 per cent.; and metals, ores, etc. an increase of 38.76 per cent.

## § 8. Movement of Specie and Bullion.

1. **Specie and Bullion.**—The following tables shew the value of gold and silver bullion and specie, including bronze specie, imported and exported during the years 1901 and 1908 to 1912:—

COMMONWEALTH IMPORTS AND EXPORTS OF SPECIE AND BULLION,  
1901 and 1908 to 1912.

| Items.            | 1901.   | 1908.     | 1909.     | 1910.     | 1911.     | 1912.     |

| Total Foreign Countries | 11,154   | 2,199     | 13,353    | 512,404    | 1,758     | 514,162    |
| Grand total ...         | 542,937  | 1,132,303 | 1,675,240 | 10,477,595 | 1,984,005 | 12,416,600 |

**2. Imports of Bullion and Specie.**—Of the total imports of bullion and specie into the Commonwealth during 1912, 67.20 per cent. was in the form of gold bullion, and was received almost entirely from New Zealand for the purpose of minting.

**3. Exports of Bullion and Specie.**—Of the total exports of bullion and specie during 1912, gold represented 95.05 per cent., 83.79 per cent. being in the form of specie, and 11.26 per cent. bullion.

The countries which appear as the largest recipients of gold from Australia are Ceylon, India, United Kingdom, Hong Kong, and Germany, in the order named, but as large amounts of gold, recorded as exported to Ceylon, are shipped *under option*, and may be despatched thence to any other country, the actual amount received by each country cannot be stated. Moreover, the dimensions of the gold shipments from Australia to particular countries are without any significance regarding the business transactions between Australia and those countries. Shipments of gold merely represent a contribution towards the liquidation of liabilities or the establishment of credit abroad; and Great Britain being the principal creditor and banker, shipments of gold from the Commonwealth are for the most part directed by London bankers to suit their requirements.

## § 9. Effects of Prices on the Values of Exports.

**1. Significance of Price in Totals.**—In comparing the value of exports from, and also imports into, any country for a series of years the question naturally arises as to how much any variation in the aggregate value is due to fluctuations in prices, and how much to increase or decrease of actual quantities, for, in aggregates expressed only in value—the only possible method when the commodities differ—the two sources of variation are confused.

The scheme of comparison followed hereinafter is that of the British Board of Trade. This is to select all such articles of export as are recorded by units of quantity, and to apply to the quantities exported during each year the average price per unit ruling in some year, arbitrarily taken for the purposes of comparison as the basic year. The ratio which the total actually recorded for the year under review bears to the total obtained by applying to the quantities of the year under review the average prices ruling during the basic year, may be called the “price-level” of the latter—as compared with the former—for the group of commodities considered, and may be taken (so it is assumed in the method of the British Board of Trade) as a measure of the effect of the change of price in the intervening period. Since the value of the articles used in the calculations represents as much as 83 per cent. of all exports during 1912—after excluding specie and gold bullion, which are not subject to price changes—a fairly extensive basis is afforded on which to found an estimate of the effect of prices over the full range of exports.

**2. Effect of Prices.**—The following table shews the values of exports as actually recorded in each year, together with the values computed on the assumption that the prices of 1901 were maintained. The table also shews the yearly “price-levels,” based upon the results so ascertained.

This table obviously furnishes a measure of the influence of prices on the value of exports of each year since 1901. Column IV.—values computed on 1901 prices—represents the volume of exports (less specie and gold bullion), expressed in the common

denomination of value, and from the figures therein it will be seen that, had the prices of 1901 remained constant, the value of the exports of merchandise during the year 1912, for example, would have been £53,175,536 only, instead of £67,214,874—the value actually recorded. The difference between these amounts (£14,039,338) results from a rise of 26.4 per cent. (i.e., from 1000 to 1264) in the price of commodities for the period intervening between 1901 and 1912.

It will be seen from the column of "Price-Levels" that prices as indicated by the Commonwealth exports rose steadily from the beginning of the decade to the year 1907. The financial crisis in the United States of America caused a pronounced fall in the prices of 1908. Owing to the large proportion of the aggregate value of exports represented by wool and wheat, any change in the price of these commodities has a marked effect on the index-numbers for the total group of exports, and it is to their influence that the fall of prices in 1911 is mainly due.

### EFFECT OF PRICES ON THE VALUE OF COMMONWEALTH EXPORTS AND EXPORT PRICE-LEVELS FOR THE PERIOD 1901 to 1912.

(BASIC YEAR, 1901.)

| Year.    | Exports of Specie and Gold Bullion. | Other Exports.      |                                 | Total Exports (including Specie and Gold Bullion). |                                 | Price-Levels. <sup>1</sup><br>Year 1901 = 1000. |

1. These are index-numbers for the total group of exports, excluding specie and gold bullion.

**3. Influence of Quantity and Price on Total Increased Value of Exports.**—The estimated actual and relative effects of the influence of—(i.) increase or decrease in the exports of specie and gold bullion, (ii.) increase or decrease of *quantities* of other exports, (iii.) variation of prices on the value of the exports of each year compared with 1901, are shewn below.

From the following figures it will be seen that exports of 1912, for example, of specie and gold bullion compared with 1901, shew a decrease of 17.19 per cent., other exports (merchandise) shew an increase of 50.43 per cent. in quantities, and an increase of 26.40 per cent. in the group-prices. These several influences effect an aggregate increase of £29,399,918, or 59.16 per cent., over 1901 as follows:—By increased quantities of merchandise, £17,827,140 (60.64 per cent.); by increased prices, £14,039,338 (47.75 per cent.) accompanied by a decrease of £2,466,560 (17.19 per cent.) in the exports of specie and gold.

## § 10. External Trade of Australia and other Countries.

1. **Essentials of Comparisons.**—Direct comparisons of the external trade of any two countries are possible only when the general conditions prevailing therein, and the scheme of record, are sensibly identical. For example, in regard to the mere matter of record, it may be observed that in one country the value of imports may be the value at the port of shipment, while in another the cost of freight, insurance, and charges may be added thereto. Or again, the values of imports and exports in the one may be declared by merchants, whereas in the other they may be the official prices, fixed from time to time by a commission constituted for the purpose. The figures relating to the external trade of any country are also affected in varying degree by the extent to which they include transit or re-export trade. Including bullion and specie, the transit trade of Belgium, for example, represents approximately 40 per cent. of the gross trade recorded; of Switzerland, 45 per cent.; of France, 20 per cent.; and of the United

Kingdom, 15 per cent.; whereas in Australia the same element represents only 4 per cent., and in New Zealand even less.

2. **"Special Trade" of Various Countries.**—Special trade may be defined, agreeably to the practice of the British Board of Trade, as (a) imports entered for consumption in the country (as distinguished from imports for transhipment or re-export) and (b) exports of domestic products.

In the following table the figures relate, as nearly as is possible, to imports entered for consumption in the various countries quoted, and to exports of their domestic products. It is to be noted, however, that these figures do not unequivocally denote the same thing throughout, since, in the United Kingdom and other manufacturing countries, raw or partly manufactured materials are imported as for home consumption, and, after undergoing some process of manufacture or further modification, are re-exported as domestic production, and further, the statistical records of many countries do not distinguish between bullion and specie imported for the use of the particular country (home consumption) and the amount in transit, nor between the exports of that produced within the country and that re-exported. Nevertheless, a comparison of this character reveals approximately the extent of the external trade which otherwise would not be manifest.

From the following table it may be seen that, for the particular years indicated, the value of the total trade per inhabitant was greatest in Belgium (£44 8s. 1d. per head); the next country in order of value per inhabitant was New Zealand (£40 14s. 3d. per head), followed by Switzerland (£33 1s. 6d. per head). Australia comes fourth (£31 10s. 9d. per head), and is considerably in advance of the next country, viz., Denmark (£23 9s. 2d. per head):—

**TRADE OF VARIOUS COUNTRIES (IMPORTS FOR HOME CONSUMPTION AND EXPORTS OF DOMESTIC PRODUCTS, INCLUDING BULLION AND SPECIE), FOR LATEST AVAILABLE YEAR.**

\* Preliminary figures.

3. **External Trade as a Measure of Prosperity.**—External trade is not necessarily a measure of the prosperity of a country. Comparisons can be accepted as furnishing satisfactory indications of the relative progress or welfare of different countries, only when taken together with all other facts that should be considered in this connection. It is, for example, obvious that the external trade of a community depends not only upon the aggregate of its requirements, but also upon the extent to which it fails to supply requirements from its own resources. A community largely self-contained, for example, may have but a small external trade per head, and yet, by virtue of its capacity to produce and manufacture its own raw material, may actually enjoy greater prosperity and a higher standard of living than another country whose external trade per head is

much greater. The same observation applies equally to comparisons of the trade of the same country at different periods. A young country, the industries and export trade of which are mainly connected with raw or natural products, may, for example, through internal development, find the growth of its external trade diminishing per head of population without necessarily suffering any real diminution in the well-being of its people. And it is further obvious that circumstances may arise when enlargement of both imports and exports is actually a consequence of temporary economic difficulties. For example, in 1903, owing to shortage in the local supply, it became necessary to *import* wheat and flour into Australia to the value of £2,556,968, and to meet the charges for this by equivalent *exports*, the effect, considered *per se*, being to enlarge both. In this case the increase is not an evidence of prosperity.

4. **Australian Trade Evidence of Prosperity.**—Despite the above suggestions regarding the necessity of caution so as to avoid hasty inferences based upon aggregate trade, a consideration of its general characteristics over a number of years, and of its marked development, will suffice to shew that Australian affairs are progressing favourably.

### § 11. Trade of the United Kingdom with Australia.

1. **Proportion of Trade from United Kingdom.**—The percentages given in the following table shew the proportions of the imports into Australia from the United Kingdom, and from other countries mentioned, during each of the years 1886 to 1912:—

**PROPORTION OF COMMONWEALTH IMPORT TRADE FROM VARIOUS COUNTRIES, 1886 to 1912.**

| Year. | Percentage Proportions from— |                 |         |                |                        | Year. | Percentage Proportions from— |                  |         |                |                        |
|-------|------------------------------|-----------------|---------|----------------|------------------------|-------|------------------------------|------------------|---------|----------------|------------------------|
|       | United K'dom                 | British Poss'ns | Germ'y. | United States. | Total Foreign C'tries. |       | United K'dom.                | British Poss'ns. | Germ'y. | United States. | Total Foreign C'tries. |
| 1886  | 73.37                        | 11.23           | 2.05    | 6.11           | 15.40                  | 1900  | 61.28                        | 11.28            | 6.54    | 12.16          | 27.44                  |
| 1887  | 72.26                        | 12.50           | 2.28    | 5.37           | 15.24                  | 1901  | 59.47                        | 11.22            | 6.59    | 13.80          | 29.31                  |
| 1888  | 71.62                        | 12.03           | 2.71    | 6.48           | 16.35                  | 1902  | 58.64                        | 13.22            | 6.53    | 12.27          | 28.14                  |
| 1889  | 68.98                        | 13.45           | 3.65    | 6.67           | 17.57                  | 1903  | 52.51                        | 13.17            | 6.24    | 16.84          | 34.32                  |
| 1890  | 68.08                        | 12.66           | 4.77    | 6.54           | 19.26                  | 1904  | 60.68                        | 12.22            | 7.17    | 12.40          | 27.10                  |
| 1891  | 70.15                        | 11.40           | 4.53    | 6.79           | 18.45                  | 1905  | 60.17                        | 14.04            | 6.42    | 11.70          | 25.79                  |
| 1892  | 70.74                        | 11.37           | 4.32    | 6.04           | 17.89                  | 1906  | 59.39                        | 15.09            | 7.16    | 10.36          | 25.52                  |
| 1893  | 72.78                        | 12.14           | 3.40    | 4.98           | 15.08                  | 1907  | 61.59                        | 12.93            | 6.85    | 11.33          | 25.48                  |
| 1894  | 71.92                        | 11.96           | 3.78    | 5.39           | 16.12                  | 1908  | 60.10                        | 12.83            | 7.05    | 12.13          | 27.07                  |
| 1895  | 71.62                        | 11.46           | 4.42    | 5.95           | 16.92                  | 1909  | 60.92                        | 13.45            | 6.51    | 9.78           | 25.63                  |
| 1896  | 68.28                        | 10.74           | 5.31    | 8.59           | 20.98                  | 1910  | 61.06                        | 13.11            | 6.30    | 10.82          | 25.83                  |
| 1897  | 66.22                        | 10.72           | 5.75    | 10.10          | 23.06                  | 1911  | 58.98                        | 12.86            | 6.63    | 11.57          | 28.16                  |
| 1898  | 66.62                        | 10.88           | 5.86    | 10.16          | 22.50                  | 1912  | 58.76                        | 12.26            | 6.58    | 12.09          | 28.98                  |
| 1899  | 61.85                        | 11.75           | 6.07    | 13.00          | 26.40                  |       |                              |                  |         |                |                        |

In order to draw accurate conclusions from the above table, however, special attention must be given to the nature of imports from the United States, since the imports from that country have in some years been increased by imports of breadstuffs, a trade in which the United Kingdom could not participate. The years affected by the imports of breadstuffs were 1886, 1889, 1896, 1897, and 1903. Increased imports of such items as kerosene oil and timber also tend to increase the proportion of imports from the United States without any prejudicial effect on the trade of the United Kingdom. Similar modification is not necessary in regard to Germany, as the nature of the imports from that country is substantially the same as from the United Kingdom.

It has already been pointed out in this chapter that, prior to the year 1905, imports into the Commonwealth were recorded only against the country whence they were directly imported. Although the values of direct imports do not afford satisfactory data, it is necessary for any comparison extending further back than 1905 to use such figures. These figures are unsatisfactory on account of the varying proportions of indirect trade.

In order to furnish a comparison free from the influence of such trade as, from its nature, is not open to the United Kingdom, the following table, shewing the direct imports during the years 1886, 1906, 1911 and 1912 of the principal classes of goods which enter largely into the trade of the countries named, has been prepared. It may be mentioned that the imports for the year 1886 were extracted from the "Statistical Registers" of the

several States for a comparison—published in a previous issue—with the year 1906, and as their compilation involved a large amount of labour they are again utilised for comparison with the later years.

**PRINCIPAL DIRECT IMPORTS INTO THE COMMONWEALTH FROM THE UNITED KINGDOM, GERMANY, AND THE UNITED STATES, 1886, 1906, 1911 and 1912.**

| Nature of Imports.  | Year. | United Kingdom. | Germany.  | United States. | All Countries. |
|---|-------|-----------------|-----------|----------------|----------------|
|   |       | £               | £         | £              | £              |
| Foodstuffs of animal origin ...   | 1886  | 348,950         | 5,603     | 70,959         | 674,296        |

|   | { 1906 | 71.98           | 7.94     | 7.79           | 100           |
|   | { 1908 | 71.29           | 7.66     | 8.84           | 100           |
|   | { 1909 | 72.70           | 7.10     | 7.12           | 100           |
|   | { 1910 | 71.04           | 6.91     | 8.07           | 100           |
|   | { 1911 | 69.91           | 7.16     | 8.95           | 100           |
|   | { 1912 | 68.20           | 7.19     | 9.22           | 100           |
| Total imports (less bullion and specie)                                   | { 1886 | 73.71           | 2.06     | 6.16           | 100           |
|   | { 1906 | 62.34           | 7.55     | 10.92          | 100           |
|   | { 1908 | 61.11           | 7.32     | 12.42          | 100           |
|   | { 1909 | 62.10           | 6.64     | 9.98           | 100           |
|   | { 1910 | 61.82           | 6.44     | 11.07          | 100           |
|   | { 1911 | 60.28           | 6.82     | 11.93          | 100           |
|   | { 1912 | 59.66           | 6.71     | 12.35          | 100           |

The foregoing table shews that the share of the United Kingdom, as indicated by the records according to "Country of Shipment," in the trade of those classes of goods enumerated—representing over 70 per cent. of the total imports from that country—has declined from 89.31 per cent. of the whole in 1886 to 68.20 per cent. in 1912. The value of these imports from the United Kingdom has increased from £20,489,153 in 1886 to only £35,426,069 in 1912, or by 72.90 per cent., while the total value of similar imports

has increased from £22,937,818 to £51,939,310, or by 126.45 per cent. Had the same proportion of the total trade been shipped from the United Kingdom during 1912 as in 1886 it would have represented £46,394,669 instead of £35,426,069.

The following table gives an analysis of the imports during the years 1908-1912 according to the countries of origin of the goods, and has been extended to include the products of Belgium and France. (See subsequent section dealing with "Preference.")

**IMPORTS INTO THE COMMONWEALTH OF PRODUCTS OR MANUFACTURES OF THE UNITED KINGDOM, BELGIUM, FRANCE, GERMANY, AND THE UNITED STATES OF AMERICA DURING THE YEARS 1908 TO 1912.**

| Nature of Imports.  | Year. | United Kingdom. | Belgium   | France.   | Germany.  | U.S. of America. | All Countries |
|---|-------|-----------------|-----------|-----------|-----------|------------------|---------------|
|   |       | £               | £         | £         | £         | £                | £             |

NOTE.—1905 figures were last shewn in No. 3, 1906 figures in No. 5, and 1907 figures in No. 6 Year Book.  
 † Mainly pig iron and bar and rod iron.

In the above table, the totals only of the several classes of goods mentioned have been dealt with. On pages 557 *et seq.* will be found a more detailed analysis, shewing the principal items of United Kingdom origin, in which goods favoured by preferential tariff rates are distinguished from other imports.

**COMMONWEALTH PERCENTAGE ON TOTAL IMPORTS, OF IMPORTS OF PRODUCTS OR MANUFACTURES OF THE UNITED KINGDOM, BELGIUM, FRANCE, GERMANY; AND THE UNITED STATES OF AMERICA DURING THE YEARS 1908 to 1912.**

| Nature of Imports.  | Year. | United Kingdom. | Belgium. | France. | Germany. | U.S.A. | All Countries |
|---|-------|-----------------|----------|---------|----------|--------|---------------|
| Foodstuffs of animal origin   | 1908  | 39.19           | 0.04     | 0.61    | 1.20     | 27.25  | 100           |
|   | 1909  | 41.23           | 0.60     | 0.72    | 0.90     | 24.16  | 100           |
|   | 1910  | 35.83           | 0.14     | 0.44    | 0.73     | 27.75  | 100           |
|   | 1911  | 32.65           | 0.11     | 0.39    | 1.02     | 27.73  | 100           |

A comparison of the results given in the immediately preceding tables with those given on pages 548 and 549 discloses the value of the export trade of other countries which reaches the Commonwealth through the United Kingdom.

**2. Preferential Tariff.**—The Tariff Act of 1908, at present in force, provides preferential tariff rates in favour of goods produced or manufactured in the United Kingdom. On the introduction of the preferential treatment of British goods, it was required that British material or labour should represent not less than one-fourth the value of such goods. From the 1st September, 1911, it has been required, in regard to goods only partially manufactured in the United Kingdom, that the final process or processes of manufacture shall have been performed in the United Kingdom, and that the expenditure in material of British production and/or British labour shall have been not less than one-fourth of the factory or works' cost of the goods in the finished state.

In the analyses given in this section the results shewn are those obtained by applying the tariff rates to the imports of the year, whether entered for consumption or re-exported. The re-exports are, however, relatively small.

The following table presents an analysis of the imports during 1912, distinguishing those affected—favourably or adversely—by the preferential provisions of the tariff, from those not affected:—

#### COMMONWEALTH IMPORTS, 1912, PREFERENTIAL AND NON-PREFERENTIAL.

| Particulars.                               | Country of Origin. |                      |                    |            |

| Free ... ..                                | 9,400,476          | 4,054,931            | 8,310,768          | 21,766,175 |
| Dutiable ... ..                            | 3,885,407          | 3,041,626            | 7,641,344          | 14,568,377 |
| Total ... ..                               | 13,285,883         | 7,096,557            | 15,952,112         | 36,334,552 |
| Total merchandise ... ..                   | 38,589,434         | 7,529,535            | 30,364,391         | 76,483,360 |
| Bullion and specie ... ..                  | 535,395            | 1,123,238            | 16,607             | 1,675,240  |
| Total imports ... ..                       | 39,124,829         | 8,652,773            | 30,380,998         | 78,158,600 |

Of the total imports of merchandise (£76,483,360), £40,148,808, or 52.49 per cent., would be affected by the preferential tariff.

The imports during 1912 of United Kingdom origin, favoured by preference, amounted to £25,303,551, representing 65.57 per cent. of the total imports of merchandise from that country, against £21,118,057 (65.24 per cent.) during 1911. Under the preferential

tariff these imports would be subject to duty equivalent to an average *ad valorem* rate of 13.68 per cent., as compared with an average rate of 18.72 per cent. which the same goods would be required to pay under the general tariff rates—an advantage of £1,274,657 in the amount of duty. The actual amount of rebate allowed on United Kingdom goods entered for home consumption during 1912, under the varying rates of duty, was £1,265,684.

The following tables give the comparative results of an application of the preferential tariff rates and the general tariff rates to the imports from the United Kingdom, British Possessions and foreign countries respectively :—

## FROM FOREIGN COUNTRIES.

|                                  |             |           |             |           |            |
|----------------------------------|-------------|-----------|-------------|-----------|------------|
| Imports similar to group A above | £ 2,402,828 | £ 121,176 | Rate % 5.04 | £ ...     | Rate % ... |
| " " " B "                        | 12,009,451  | 2,985,531 | 24.86       | 2,341,609 | 19.50      |
| Total ... ..                     | 14,412,279  | 3,106,707 | 21.56       | 2,341,609 | 16.25      |

The proportion of the imports from British Possessions adversely affected by the preference to the United Kingdom is relatively small, representing only 5.75 per cent. of the imports of merchandise from those countries. The surcharge of duty on imports from British Possessions during 1912 amounted to £22,787 as against £14,857, in 1911. The sum of £22,787 would, on the basis of the trade of 1912, represent the loss of revenue involved in an extension of the preference given to the United Kingdom to the

rest of the Empire, as in the preferential scheme of New Zealand. The British Possessions chiefly affected are India, Canada, Straits Settlements, and New Zealand.

The surcharge on imports, affected by preference, from foreign countries during 1912 would amount to £765,093, as against £642,038 during 1911.

**3. Effect of Preference.**—It may again be mentioned here that the system of recording imports according to "country of origin," was introduced only from the beginning of 1905, and it is evident that in the earlier period of its operation, some goods, imported through the United Kingdom, were wrongly described as of United Kingdom origin. Particular instances in which manufactures of foreign countries have obviously been credited to the United Kingdom are alluded to later. When the question of revenue became involved, and a more exact description of the goods was insisted upon, goods which might formerly have been accepted and recorded as British would be correctly classed as foreign.

A comparison of the returns of the British Board of Trade (showing the exports of produce or manufacture of the United Kingdom to Australia) with the import returns of the Commonwealth, supports the belief that the proportion of the trade credited to the United Kingdom in this country during the years 1905 and 1906 is too high. If this supposition be correct, the apparent decline in the proportion of British goods, as compared with the years mentioned, indicated by the Commonwealth records, is somewhat misleading.

In regard to imports of United Kingdom origin, it has been shewn in previous issues that, while the results for the later years are in substantial agreement, those ascertained from the Commonwealth import returns for 1905 are 8.35 per cent. above those ascertained from the returns of the British Board of Trade.

If it be conceded that the figures of the British Board of Trade for 1905 and 1906 with 10 per cent. added are nearer the truth than the Commonwealth records for those years, and in the subsequent years the Commonwealth figures be accepted, the results would be approximately as follows:—

#### IMPORTS OF UNITED KINGDOM ORIGIN, 1905 to 1912.

| Year. | Preferential Imports. |                                   | Non-Preferential Imports.* |                                       | Total.*    |                             |

| 1909  | 16,482,000            | 66.80                             | 9,137,000                  | 49.94                                 | 25,619,000 | 59.61                       |
| 1910  | 19,049,000            | 65.88                             | 10,821,000                 | 48.37                                 | 29,870,000 | 58.23                       |
| 1911  | 21,118,000            | 63.58                             | 10,957,000                 | 46.81                                 | 32,075,000 | 56.66                       |
| 1912  | 25,304,000            | 63.02                             | 12,963,000                 | 50.27                                 | 38,267,000 | 58.04                       |

\* See note (\*) to second table on following page. † The figures for these years are based on export returns of the United Kingdom.

From this table it will be observed that instead of declining rapidly since 1905, as indicated by the Commonwealth records, the position of the United Kingdom has been, on the whole, well maintained up to and including the year 1910. The records for 1911, and 1912, however, shew a very pronounced decline in the preferential group, as com-

pared with the immediately preceding years, while in the non-preferential group a very substantial improvement is apparent.

The effect of industrial troubles in the United Kingdom during 1911 on her relative position in the Commonwealth import trade cannot, of course, be measured, but it is more than probable that it has been material. It is also possible that the revised definition of "origin" (see page 520) has had the apparent effect of reducing the value of United Kingdom goods and correspondingly increasing those of other countries.

The following comparative tables shew the proportion of imports—preferential and non-preferential, respectively—recorded in the Commonwealth as of United Kingdom origin during the years 1905-1912:—

### PREFERENTIAL IMPORTS, 1905 to 1912.

| Year. | Country of Origin. |       |                      |      |                    |       |            |     |
|-------|--------------------|-------|----------------------|------|--------------------|-------|------------|-----|

\* In order to obtain a more satisfactory comparison only goods of a character similar to those affected by preferential rates have been included in this table. Articles such as fruits, grain, cocoa beans, raw coffee, tea, sugar, unmanufactured tobacco, hides, fibres, kerosene, timber, etc., which are not produced in the United Kingdom, have been excluded. The proportion of these goods recorded as of United Kingdom origin during 1912 was only 3.06 per cent.

† See modified figures in the first table on the preceding page.

The pronounced recovery of the United Kingdom, in the non-preferential group, in 1912 has been largely due to the larger imports of mercantile ships. In 1912 the imports of ships of United Kingdom origin were valued at £1,146,922 representing 92.59 per cent. of the total of such imports. If these ships be entirely omitted the share of the United Kingdom would be 46.45 per cent. in 1911, and 48.14 per cent. in 1912, instead of 46.81 per cent. and 50.27 per cent. respectively.

The principal classes of imports affected by preference are "apparel, textiles and manufactured fibres," and "manufactures of metals, including machinery." Together these two classes represented 65 per cent. of all imports affected by the preferential tariff during 1912, the former class representing 40 per cent. and the latter 25 per cent. The following analysis gives the particulars of the imports of these groups, as recorded, for the past eight years:—

\* The amount credited to the United Kingdom in these years is considered to be in excess of the truth.

The large proportion of the trade in non-preferential textiles supplied by British Possessions is almost entirely composed of jute goods from India.

If the figures for 1905 and 1906 be ignored (on account of their doubtful accuracy) it will be seen from the above table, referring to preferential imports, that there has been little variation in the distribution of the textile trade as between the United Kingdom and foreign countries, and the same stability is maintained throughout the several lines shewn in the following detailed table.

The increasing share of this trade supplied by foreign countries is largely due to the increased imports of the following items:—Minor articles for apparel from Austria-Hungary and Germany; furs from Germany and Russia; cotton socks and stockings from Germany; canvas and duck from United States of America.

The detailed tables which are appended shew the relative proportions of the various classes of textile goods supplied by the United Kingdom. In regard to those textile goods affected by preference, the figures shew that since 1907 (the first year with which satisfactory comparisons can be made), the share of the United Kingdom has been substantially maintained in nearly all the lines enumerated below, the aggregate result being that in the year 1912 69.11 per cent. was supplied as against 70.20 per cent. in 1907.

The value and proportion of the more important items, included in the above groups of apparel and textiles, recorded as of United Kingdom manufacture, are given below:—

In the metal trade, the position of the United Kingdom in both the preferential and non-preferential divisions, has been much improved as compared with 1911, when an unusually large proportion of this trade was supplied by Germany and the United States. It is probable, however, that the pronounced movements—in opposite directions—during the years 1911 and 1912 were, to some extent, a consequence of the dockers' strike in England, causing goods which should have been shipped in the earlier year to be held over till 1912.

The imports of metals and manufactures of metals afford the most satisfactory data available by which to measure the effects of preference, for the reasons that—(i.) the value of the trade is evenly divided between the preferential and non-preferential divisions, and (ii.) the goods in both groups are similar in character, and are, consequently, manufactured and distributed under similar conditions. It is, therefore, interesting to observe the general similarity between the variations of the proportions of the trade supplied by the United Kingdom in each of the two divisions of this group. It will be noticed that in each year the direction of the movement has been identical, and, although the degree of variation has not been the same year by year, the proportions supplied by the United Kingdom in 1912 were in both divisions identical with those of 1906, the figures being:—Preferential, 73.35, 73.35; non-preferential, 53.22, 53.24. These results are illustrated by the diagram.

PERCENTAGE PROPORTION OF IMPORTS SUPPLIED BY THE UNITED KINGDOM. %

(A) Metal manufactures—preferential. (B) Metal manufactures—non-preferential.  
(C) Total—preferential imports. (D) Total—non-preferential imports.

It is thus evident that the influences responsible for the fluctuations in the distribution of the trade have been common to both the preferential and non-preferential divisions, preferential tariff having had no differential effect in this important branch of trade.

The relatively small proportion of the non-preferential division of metal trade is due chiefly to the following items:—Agricultural implements and machinery, mainly supplied by Canada and the United States; sewing machines, largely supplied by the United States and Germany; iron and steel wire, mainly supplied by the United States and Germany; iron hoop, largely supplied by Germany, the United States, and Belgium; and iron ingots, blooms, etc., which in 1912 were supplied in almost equal proportions by the United Kingdom, Belgium, and Germany.

The countries from which the principal supplies of rails, fishplates, etc., were drawn, and the percentage proportion supplied by each, are shewn in the following table:—

The imports of steel rails indicate that there are influences, outweighing the effect of tariff preference, affecting the distribution of the trade, for, notwithstanding that the preference has been in operation throughout the whole of the period, the proportion supplied by the United Kingdom fell from 89.46 per cent. in 1907 to 46.27 per cent. in 1911, rising again to 64.98 per cent. in 1912.

Other classes of goods which furnish useful data for measuring the effects of the preferential tariff are paints and paper. The share of the United Kingdom in the supply of these goods to the Commonwealth during the years 1907 and 1909 to 1912 is given below:—

#### IMPORTS OF PAINTS OF UNITED KINGDOM ORIGIN, 1907 and 1909 to 1912.

|                      | 1907.    |           | 1909.    |           | 1910.    |           | 1911.     |           | 1912.     |           |
|----------------------|----------|-----------|----------|-----------|----------|-----------|-----------|-----------|-----------|-----------|
|                      | Value.   | Per cent. | Value.   | Per cent. | Value.   | Per cent. | Value.    | Per cent. | Value.    | Per cent. |
| Preferential ...     | £ 65,278 | 68.22     | £ 71,413 | 73.02     | £ 88,246 | 71.84     | £ 107,660 | 68.06     | £ 135,187 | 71.02     |
| Non-preferential ... | 232,623  | 85.88     | 207,909  | 85.27     | 223,395  | 85.52     | 205,309   | 86.60     | 321,516   | 87.78     |

It will be seen from the above figures that although the gain of the United Kingdom, between the first and last years of the period under review, is somewhat greater in the preferential than in the non-preferential division, there is nothing to indicate an advantage accruing from a constant cause such as tariff preference, for on the 1911 figures the non-preferential division shewed a gain and the preferential division a loss to the United Kingdom.

#### IMPORTS OF PAPER OF UNITED KINGDOM ORIGIN, 1907 and 1909 to 1912.

With regard to the paper trade also, there is an absence of satisfactory evidence of benefit from the preferential tariff, inasmuch as there is no greater regularity of movement or greater stability in the share of the United Kingdom in the preferential than in the non-preferential division. It will be observed that the United Kingdom attained its highest position in the preferential division in 1909, and in the non-preferential division in 1910, but has since lost ground in both. It will be noticed, further, that until 1912, when her position was lost largely through failure to maintain her share in the larger imports of printing paper, the United Kingdom had made greater gain in the non-preferential division. The imports of printing paper during 1912 were valued at £906,431, as compared with £726,415 during 1911. Of the increase Sweden supplied 29 per cent., Canada 26 per cent., the United States of America 25 per cent., and the United Kingdom only 13 per cent. To maintain the position as in 1911 the United Kingdom should have supplied 42.23 per cent. The import of Swedish printing paper into the Commonwealth have increased from £7,743 in 1907 to £104,931 in 1912.

A further list of items, preferential and non-preferential, recorded as of United Kingdom origin is appended:—

## PRINCIPAL OTHER PREFERENTIAL IMPORTS, 1907 and 1909 to 1912.

4. **Preferential Tariff of New Zealand.**—"The Preferential and Reciprocal Trade Act 1903" of New Zealand introduced preferential rates of duty in favour of the produce of the British Dominions by imposing extra duties on certain imports which were the produce or manufacture of other countries. The list of preferential items was materially extended by the New Zealand "Tariff Act 1907," from the 31st March, 1908.

The following tables present an analysis of the imports into New Zealand during 1912, distinguishing those which would be affected by an application of the preferential provisions of the "Tariff Act 1907":—

**NEW ZEALAND—IMPORTS, 1912, PREFERENTIAL AND NON-PREFERENTIAL.**

5. **Preferential Tariff of South Africa.**—Preference to goods of United Kingdom origin was first granted by the South African Customs Union Convention of 1903 from the 15th August of that year, and similar treatment was extended to Canada from the 1st July, 1904. The present preferential tariff of the South African Customs Union (Convention, 1906, and amendments, 1908) applies to produce of United Kingdom, Canada, New Zealand and the Commonwealth.

An analysis of the trade of South Africa is appended :—

**6. Preferential Tariff of Canada.**—Preferential tariff treatment of goods of the United Kingdom and certain British Possessions was first given by Canada in 1897.

The published trade returns of Canada do not permit of an analysis similar to those given for the Commonwealth, New Zealand, and South Africa.

**7. Preferential Tariff Comparisons.**—The following table presents a comparative statement of the imports into the Commonwealth, New Zealand, and South Africa during 1912, the imports of each country having been analysed according to the application of its own tariff :—

**APPLICATION OF PREFERENTIAL TARIFFS.—COMPARATIVE STATEMENT, 1912.**

| Particulars.  | C'wealth<br>of<br>Australia. | Dominion<br>of<br>New Zealand. | Customs<br>Union of<br>South Africa. |
|---|------------------------------|--------------------------------|--------------------------------------|
| 1. Total imports of merchandise ...   | £ 76,483,360                 | 20,576,579                     | 39,647,945                           |
| 2. " " from favoured countries £  | 38,589,434                   | 16,497,591*                    | 25,465,324                           |
| 3. Imports from favoured countries, p.c. to item 1  | 50.45                        | 83.00                          | 64.22                                |
| 4. Imports affected (favourably or adversely) by preferential rates ... ..                        | £ 40,148,808                 | 7,106,719                      | 31,471,033                           |
| 5. Imports affected (favourably or adversely) by preferential rates, per cent. to total item 1... | 52.49                        | 37.84                          | 79.39                                |
| 6. Imports favoured by preferential rates £   | 25,303,551                   | 5,769,537*                     | 21,429,518                           |
| 7. " " " p.c. to item 1   | 33.08                        | 30.72                          | 54.05                                |
| 8. " " " " "  | 65.25                        | 34.97                          | 84.15                                |
| 9. Amount of rebate ... ..  | £ 1,274,657                  | 715,250                        | 652,866                              |
| 10. Rate of rebate per cent. <i>ad val.</i> ... ..  | 5.04                         | 12.40                          | 3.05                                 |

\* See note to table on page 563.

From the foregoing it will be observed that the preferential schemes, as at present in force in the different parts of the Empire, are by no means uniform. The preferential tariff of New Zealand applies to a wider range of countries than that of any other part of the Empire, inasmuch as the advantage of the lower tariff rates is extended to all parts of the British dominions, while those of Canada and South Africa apply to the United Kingdom and reciprocating British Possessions, and that of the Commonwealth to the United Kingdom only. Apart from the British preferential tariff, however, the Commonwealth, in consideration of its participation in the South African preference, gives a preference to certain products of that country. New Zealand and South Africa have also a special reciprocal trade agreement in addition to the main schemes of preference. Canada, under the Customs Tariff Act of 1907, makes provision for an intermediate tariff, which may be applied to the produce of *foreign* countries. Canada already has a reciprocal trade agreement with France.

The margin between the rates of duty applied to British and foreign goods, respectively, is also higher in New Zealand than in the Commonwealth or South Africa, though in the latter countries the preferential tariff affects a greater proportion of the trade. On the basis of the imports into New Zealand during 1912 the average margin of preference was 12.40 per cent. of the value of the goods, while in the Commonwealth the similar margin was 5.04 per cent., and in South Africa 3.05 per cent. The average rate of duty charged in New Zealand on British goods, subject to preferential rates, was 13.01 per cent., while the same goods if of foreign origin would have had to pay 25.41 per cent. In the Commonwealth the collateral rates were 13.68 per cent. and 18.72 per cent. respectively, and in South Africa 10.63 per cent. and 13.68 per cent.

**8. Comparative Results of Preferential Tariffs of Australia, New Zealand, and South Africa.**—The following table shews the apparent aggregate results of the preferential tariffs of the Commonwealth of Australia, the Dominion of New Zealand, and the Union of South Africa. The figures shew the value of preferential and non-preferential imports from favoured countries, and the percentage proportion of such imports in relation to the total imports of similar goods:—

#### IMPORTS FAVOURED BY PREFERENTIAL TARIFFS, 1908 to 1912.

| Year.    | South Africa.<br>Preference, 3%. |           | Commonwealth.<br>Preference 5%. |           | New Zealand.<br>Preference, 12%. |           |

#### IMPORTS UNAFFECTED BY PREFERENTIAL TARIFFS, 1908 to 1912.

|          |            |        |            |       |            |       |
|----------|------------|--------|------------|-------|------------|-------|
| 1908 ... | 1,826,774  | 39.60  | 9,006,821  | 50.70 | 9,805,369  | 84.40 |
| 1909 ... | 2,075,982  | 40.77  | 9,137,146  | 49.94 | 8,681,006  | 85.25 |
| 1910 ... | *3,697,588 | *51.17 | 10,820,679 | 48.37 | 9,627,786  | 83.86 |
| 1911 ... | 3,138,193  | 46.20  | 10,956,913 | 46.81 | 9,876,257  | 82.92 |
| 1912 ... | 4,035,806  | 49.35  | 12,962,899 | 50.27 | 10,728,054 | 79.66 |

\* The large increase and improvement in the relative position of favoured countries in this group is due to the large increase in the imports of "Government stores," of which 87 per cent. in 1910 was from favoured countries, principally from the United Kingdom.

From the above table it will be seen that, in regard to the Commonwealth, the proportion of the trade supplied by the United Kingdom has fallen in both the preferential and non-preferential divisions, the decline being greater in the former division. In South Africa the proportion of the trade in the preferential division supplied by favoured countries has also fallen, while, on the other hand, the proportion supplied in the non-preferential division has largely increased. In New Zealand, where the preference amounts to about 12 per cent. on the value of the goods, against 5 per cent. in Australia, and 3 per cent. in South Africa, the position of the favoured countries has been well maintained in the preferential, though it has declined materially in the non-preferential division.

The quinquennial average effect (1908-12), corresponding to the preference of 3, 5, and 12 per cent., appears to be to reduce the proportional decrease of trade in the ratios respectively of 1.17, 0.89, and 0.41.

**9. South African Preference.**—Under the Commonwealth Customs Tariff (South African Preference) Act, No. 17 of 1906, preferential rates of duty were prescribed for certain goods “when those goods are imported from and are the manufacture of any of the British South African Colonies or Protectorates which are included within the South African Customs Union.”

Preference to South African States was further confirmed by the Customs Tariff Amendment Act 1908 (No. 13 of 1908).

The imports, during 1912, affected by the above-mentioned Act were as follows:—

**IMPORTS INTO THE COMMONWEALTH DURING 1912 OF ARTICLES ENTITLED TO PREFERENCE UNDER THE SOUTH AFRICAN PREFERENCE ACT AND THE VALUE OF THE PREFERENCE THEREON.**

| Particulars.                     | Rate of Rebate. | Imports.  |         | Amount of Rebate. |

## § 12. Imports of Dutiable and Free Goods.

**1. Classified Statement of Imports.**—The following table shews, classified according to their nature, and distinguishing between dutiable and free goods, the estimated value of imports entered for home consumption during 1912, together with the amount and equivalent *ad valorem* rates of duty collected thereon. As no record is made of the

value, entered for home consumption, of goods subject to specific duties, the value has been estimated on the basis of the value of corresponding imports. The free goods entered for home consumption have been taken to be the total imports of free goods less the value of similar goods re-exported.

**VALUE OF GOODS (EXCLUDING BULLION AND SPECIE) ENTERED FOR CONSUMPTION IN THE COMMONWEALTH, AND DUTY COLLECTED THEREON, 1912.**

| Classification of Imports. |   | Value Entered for Consumption. |                     |            | Duty Collected, less Refunds. | Equivalent <i>ad valorem</i> rate per cent. on— |              |
|----------------------------|---|--------------------------------|---------------------|------------|-------------------------------|---|--------------|
|                            |   | Dutiable.                      | Free. (Net Imports) | Total.     |                               | Dutiable Imports.                               | All Imports. |
|                            |   | £                              | £                   | £          |                               | %   | %            |

\* Unmanufactured tobacco is admitted to Canada free of duty. † Exclusive of Maoris.

‡ Tobacco is admitted free of Customs duty from the Philippine Islands.

In 1906—the last full year of operation of the 1902 tariff—free goods represented 35.18 per cent. of the total imports of merchandise into the Commonwealth. The tariff of 1908 extended the free list so that in 1908 the proportion of free goods increased to 39.69 per cent., but it has fallen to 38.10 per cent., in 1912. The tariff of 1908, while extending the free list, increased the average rates on the goods subject to duty. Excluding drinks and tobacco the average rate of duty on dutiable goods during 1906 was 17.04, in 1908 it was 21.30, and in 1912 it was 21.03 per cent. The combined effect of the extension of the free list with an increase of duties on the remaining goods has been that in 1912 the average rate of duty over the total imports of merchandise was 17.53 per cent., against 17.59 per cent. in 1906.

From the above table it will be seen that, excluding spirits, etc., and tobacco, the average rate of duty charged in the Commonwealth on dutiable goods imported during 1912 was 1.00 per cent. *ad valorem* lower than in New Zealand, and about 2.83 per cent. lower than in Canada, and was only a little more than one half the rate charged in the United States. On the other hand the proportion of free goods was smaller in the Commonwealth than in New Zealand or the United States, though larger than in Canada. Over the total imports the equivalent *ad valorem* rates range from 16.24 per cent. in New Zealand to 18.58 per cent. in the United States. The influence of the various rates charged on stimulants and tobacco in smoothing out the differences in average *ad valorem* rates on the total imports should not be lost sight of. About 80 per cent. of the value of tobacco imported into Canada is unmanufactured tobacco admitted free of duty, and subject only to excise on manufacture.

## SECTION XVI.

## SHIPPING.

## § 1. General.

1. **Record of Shipping before Federation.**—Prior to Federation it was customary for each State to regard the matter of shipping purely from the State standpoint, and vessels arriving from or departing to countries beyond Australia, via other Australian States, were recorded as if direct from or to the oversea country. Thus a mail steamer from the United Kingdom, which made Fremantle her first port of call in Australia, would be recorded not only there, but also again in Adelaide, Melbourne and Sydney, as an arrival from the United Kingdom. Consequently, any aggregation, especially of the recent shipping records of the different States, would repeatedly include a large proportion of the shipping visiting Australia. In earlier years, when many vessels sailed from the various State ports direct for their destination, the error of repeated inclusion was less serious, but as the commerce of Australia developed, more and more ports of call were included in the voyage of each vessel, and this made the mere aggregation of State records correspondingly misleading. It has, as a matter of fact, led to some erroneous publications of statistical results and deductions.

2. **Shipping since Federation.**—With the inauguration of the Commonwealth, the statistics of its shipping, especially of its oversea shipping, became of greater intrinsic importance. As an index of the position of Australia among the trading countries of the world, such statistics had a constitutional importance commensurate with Commonwealth interests, and correspondingly greater than those of individual States, and the nationality of the shipping trading with Australia became also a matter of greater moment.

3. **Difficulties of Comparisons of Total Shipping.**—From what was said in paragraph 1 above, it is obviously impossible now to obtain results for Australia not subject to the defect of repeated inclusions of the same vessels. Unfortunately, the statistical records of the first three years of Federal history are subject to the same defect, and do not admit of direct comparison with those now kept. A careful estimate of the extent and effect of repeated inclusion has been made and applied to the records of the earlier years, so as to extend the comparative results to those years. The error of such estimation will be negligible for comparative purposes.

4. **Present System of Record.**—The present system of record treats Australia as a unit, and counts, therefore, only one entry and one clearance for each visit to the Commonwealth. Repeated voyages of any vessel are, of course, included.

On arrival of every vessel at a port in the Commonwealth, whether from an oversea country or from another port within the Commonwealth, the master is required to deliver to the Customs officer a form giving all particulars, necessary for statistical purposes, in regard to the ship, passengers and crew. Similarly, on departure from a port a form containing corresponding information is lodged. These forms, which provide a complete record of the movements of every vessel in Commonwealth waters, are at the end of each month forwarded by the Customs officer at each port to the Commonwealth Bureau of Statistics, and furnish the material for the compilation of the Shipping and Migration Returns.

Under the system previously in force it was found that the estimates of population, in so far as they were based on seaward movement, were very unsatisfactory, and it is believed that the method referred to above gives decidedly better results.

## § 2. Oversea Shipping.

1. **Total Oversea Shipping.**—In order to extend, as indicated, the comparison of the oversea shipping to the earliest years for which any records are available, an estimate of its probable amount has been made. This estimate is based on a comparison of the results obtained by merely aggregating State statistics with the defect of multiple records, and the results obtained under the present system, which avoids the multiple record. From the nature of the case it is obvious that the ratio of repeated inclusion to the total traffic has been continually advancing, and this fact has been duly taken into account in deducing the results in the following table:—

### TOTAL OVERSEA SHIPPING ENTERED AND CLEARED THE COMMONWEALTH, 1822 to 1912 (MULTIPLE RECORD EXCLUDED BY ESTIMATION PRIOR TO 1904).

| Year. | Vessels. | Tons.   | Year. | Vessels. | Tons.     | Year. | Vessels. | Tons.      |
|-------|----------|---------|-------|----------|-----------|-------|----------|------------|
| 1822  | 73       | 30,683  | 1853  | 3,364    | 1,490,422 | 1883  | 3,857    | 3,433,102  |

| 1848  | 1,182    | 305,840 | 1879  | 3,344    | 2,151,338 | 1909  | 3,910    | 8,516,751  |
| 1849  | 1,137    | 355,886 | 1880  | 3,078    | 2,177,877 | 1910  | 4,048    | 9,333,146  |
| 1850  | 1,300    | 425,206 | 1881  | 3,284    | 2,549,364 | 1911  | 4,174    | 9,964,801  |
| 1851  | 1,576    | 515,061 | 1882  | 3,652    | 3,010,944 | 1912  | 4,052    | 10,275,314 |
| 1852  | 1,896    | 844,243 |       |          |           |       |          |            |

It will be borne in mind that while the above figures in themselves have no absolute significance, nevertheless, on the assumption that the element of duplication has been in fairly constant ratio, they furnish the best available indication of the growth of Australian oversea shipping.

2. **Comparison with other Countries.**—The place of Australia among various countries in regard to oversea shipping is indicated in the following table, both absolutely and in respect of tonnage per head of population:—

### OVERSEA SHIPPING OF VARIOUS COUNTRIES.

| Country.            | Year.       | Tonnage Entered and Cleared. |                 | Country.       | Year. | Tonnage Entered and Cleared. |                 |
|---------------------|-------------|------------------------------|-----------------|----------------|-------|------------------------------|-----------------|
|                     |             | Total.                       | Per Inhabitant. |                |       | Total.                       | Per Inhabitant. |
| Argentine Rep. .... | 1907        | 22,994,473                   | 4.1             | Japan          | 1911  | 40,103,283                   | 0.8             |
| Belgium             | 1911        | 31,804,274                   | 4.2             | New Zealand    | 1912  | 3,340,722                    | 3.2             |

In respect of these tables it may be pointed out that the statistics for any country do not fully disclose the extent of its shipping communication with particular countries. The reason for this is that vessels are recorded as arriving from, or departing to, a particular country, whereas, as a matter of fact, many regular lines of steamers call and transact business at the ports of several countries in the course of a single voyage. The lines of steamers trading between Australia and Japan, for example, often call at New Guinea, the Philippine Islands, China, etc., but, being intermediate ports, these countries are not referred to in the statistical records. Similarly, in the case of the large mail steamers passing through the Suez Canal, a steamer may call at Colombo, Aden, Port Said, Genoa, Marseilles, London, Antwerp, and Bremerhaven, yet obviously can only be credited as cleared for one of these ports, to the consequent exclusion of all the other ports from the records. Further reference is made in the following paragraphs to the more important of those countries with which the shipping of the Commonwealth is not fully represented in the foregoing tables.

**4. General Trend of Shipping.**—(i.) *General.* A grouping of countries into larger geographical divisions, as in the following tables, shews more readily the general direction of Australian shipping, and to some extent, avoids the limitations of the records in relation to particular countries, by covering more closely the main trade routes.

It has already been shewn in the opening section of this chapter, that direct comparisons of the annual oversea shipping of the Commonwealth are possible only since the beginning of 1904.

A comparison of the total tonnage of shipping which entered and cleared the Commonwealth during 1912 with similar records for 1908 shews an increase of 1,694,163 tons, or 19.74 per cent., vessels with cargo having increased by 2,193,233 tons, or 30.86 per cent., while vessels in ballast decreased by 499,070 tons, or 33.87 per cent.

(ii.) *Shipping with the United Kingdom and European Countries.* The shipping between the Commonwealth and the United Kingdom and European countries during the past five years shews that steady increase which indicates the consistent development of a well-established trade. The shipping in this direction during 1912 amounted to 4,230,369 tons, or 41.2 per cent. of the total oversea shipping of the Commonwealth, and was recorded against the several countries as follows:—United Kingdom, 2,994,876 tons (70.8 per cent.); Germany, 777,005 tons (18.4 per cent.); France, 141,253 tons (3.3 per cent.); Belgium, 180,872 tons (4.3 per cent.); other European countries, 136,363 tons (3.2 per cent.).

The foregoing figures appear to shew that while the tonnage between the Commonwealth and the United Kingdom increased by 885,210 tons, equal to an increase of 41.96 per cent., the tonnage between the Commonwealth and European continental countries has increased by 339,206 tons, or by 37.85 per cent., or, in other words, that 72.30 per cent. of the increase was credited to the United Kingdom and 27.70 to the latter countries. As already explained, however, no real significance can be attached to these figures, for, in many instances, it must be regarded as almost accidental whether tonnage be recorded against the United Kingdom or against Belgium, Germany, or France.

The failure of the statistical records to present, in all cases, the full measure of the shipping communication between particular countries is illustrated by the case of Italy. Although the mail steamers which pass through the Suez Canal call at Naples and Genoa, and during 1912 embarked or landed at those ports 5018 passengers for or from Australia, and also carried a direct trade valued at £1,062,413 between Italy and the Commonwealth, the records for the year shew only five vessels as passing between the two countries.

(iii.) *Shipping with New Zealand.* The tonnage of shipping between the Commonwealth and New Zealand shews a very satisfactory expansion from 1,667,565 tons in 1908 to 2,110,083 tons in 1912, an increase of 442,518 tons, or 26.54 per cent., during the four years. The shipping with New Zealand represented 20.54 per cent. of the total shipping of the Commonwealth during 1912.

(iv.) *Shipping with Asiatic Countries and Islands in the Pacific.* The total tonnage between the Commonwealth and Eastern countries during 1912 amounted to 1,893,664 tons, or 18.43 per cent. of the whole, representing a decrease of 139,826 tons, or 6.88 per cent., as compared with 1908. This decline is more than covered by the smaller tonnage entered in ballast. In 1908 the tonnage in ballast which entered from Asiatic countries was unusually large, amounting to 413,089 tons, as compared with 104,197 tons in 1912. During the same period the outward tonnage with cargo declined by 14,273 tons and that in ballast by 24,196 tons. The shipping between the Commonwealth and the Philippine Islands has declined from 352,673 tons in 1908 to 151,336 tons in 1912. This has been due mainly to the smaller coal trade from Newcastle. The tonnage between the Commonwealth and Japan, Straits Settlements, Hong Kong, India, and Ceylon has also declined materially. Owing to the limitation of the records, already alluded to, the figures given in the tables do not represent the full volume of the shipping between the Commonwealth and the Philippines. In addition to the shipping recorded to the Philippine Islands, the regular steam lines between the Commonwealth and Japan make Manila a regular port of call, and it is by these vessels that the general trade—apart from the coal

trade—is chiefly carried. The whole of the shipping which was recorded as entering the Commonwealth during 1912 from the Philippines (56,216 tons) was, with the exception of 7472 tons, in ballast, and of the 95,120 tons which was recorded as cleared for that country, 52,740 tons cleared from the coal port of Newcastle. The tonnage between the Commonwealth and Papua has increased rapidly during the past five years. In 1908 the tonnage recorded between these two countries was 55,601 tons, and in 1912 139,419 tons. There has also been a very marked expansion of the shipping to and from the Dutch East Indies during later years, the tonnage having increased from 87,243 tons in 1908 to 223,093 tons in 1912. The shipping with the South Sea Islands, too, shews an expanding trade.

(v.) *Shipping with Africa.* The shipping tonnage recorded between the Commonwealth and African countries during 1912 amounted to 258,849 tons, this tonnage, though only little more than half the tonnage of 1911, represents an increase as compared with 1908 of 33,051 tons. Much of the trade between South Africa and Australia, however, is carried by steamers calling at ports in the former country on their voyages between the Commonwealth and the United Kingdom, and which are not shewn in relation to African ports in the shipping returns. Shipping tonnage with African countries—mainly confined to Cape Colony, Natal, and Portuguese East Africa—has been subject to great fluctuations. From 649,802 tons in 1905 it fell to 225,798 tons in 1908, rose again to 501,789 tons in 1911, falling to 258,849 tons in 1912. An inspection of the following tables, however, shews that these figures are of no significance as an index of the transport requirements between the two countries, inasmuch as of the total tonnage passing between the two countries, 175,020 tons were from Africa to Australia, with only 83,829 tons the other way. Moreover, of the 175,020 tons which entered the Commonwealth from Africa, 151,459 tons, or 86.5 per cent., were represented by vessels in ballast seeking freights from Australian ports.

(vi.) *Shipping with North and Central America.* The shipping of the Commonwealth with these countries during 1912 amounted to 802,395 tons (7.8 per cent. of the whole) representing, as compared with 1908, an increase of 49,269 tons. The 802,395 tons of shipping with North and Central America during 1912 were recorded against the several countries as follows:—United States, 602,803 tons (75.1 per cent.); Canada, 167,390 tons (20.9 per cent.); and Mexico, 32,202 tons (4.0 per cent.).

(vii.) *Shipping with South America.* The shipping between the Commonwealth and South American countries during 1912—979,904 tons—represented an increase of 84,735 tons as compared with 1908. The outward shipping in this direction has been mainly engaged in the carriage of coal and wheat to Chile and Peru. Of the total shipping tonnage between the Commonwealth and South America during 1912, 807,088 tons, or 82.4 per cent., is credited to the coal port of Newcastle, 258,890 tons having entered and 548,198 tons having cleared at that port, while of the same total 68,096 tons entered and 22,562 tons cleared at the port of Sydney. Of the South American countries, Chile is responsible for 685,140 tons (69.9 per cent.); Peru, 100,363 tons (10.2 per cent.); Argentine Republic, 64,073 tons (6.5 per cent.); Brazil, 62,967 tons (6.4 per cent.); Uruguay, 61,476 tons (6.3 per cent.); and Ecuador, 5935 tons (0.7 per cent.).

An important fact, from its bearing on freight rates and its consequent possible effect on the coal trade of New South Wales with South America, is the absence of return freights from that country. Of the 386,366 tons of shipping which entered the Commonwealth from South America during 1912, only thirteen vessels, totalling 31,291 tons, carried cargo.

## GENERAL DIRECTION OF THE SHIPPING OF THE COMMONWEALTH, 1908 to 1912,

## TONNAGE ENTERED.

5. **Nationality of Oversea Shipping.**—As will be seen from the following table, the greater part of the shipping visiting the Commonwealth is of British nationality. During 1912 British shipping represented 73.13 per cent. of the total tonnage which entered and cleared the Commonwealth.

The tonnage of Australian-owned vessels engaged in the oversea trade represents 8.65 per cent. of the total, and the tonnage of New Zealand vessels 12.40 per cent. Both are engaged mainly in the trade with New Zealand and eastern countries. An examination of the figures in the above table shews that, of the increase in tonnage in 1912 as compared with 1908, viz., 1,694,163 tons, 1,195,604 tons (70.57 per cent.) were British, and 498,559 tons (29.43 per cent.) were foreign, or, in other words, the British tonnage in 1912 shewed an increase of 18.92 per cent. over 1908, while that of foreign countries increased by 22.04 per cent. The proportion of British tonnage in the total shipping which entered and cleared the Commonwealth, though shewing a decline during the last two years, was slightly larger in 1912 than in 1909.

The relative proportion of British and foreign tonnage which entered and cleared the Commonwealth during the last five years, apart from tonnage in ballast, is given below. From these figures, which may be considered to indicate more closely the proportion of the actual carrying trade done, than does the total tonnage, it will be seen that the proportion of British tonnage was lower during 1912 than in any other year shewn. Since 1904, when the shipping statistics were first compiled in their present form, the proportion of British ships entered and cleared with cargo has only once been lower, viz.; in the year 1906, when the proportion of British tonnage was 74.42 per cent.

**PROPORTION OF TONNAGE OF BRITISH AND FOREIGN NATIONALITY ENTERED  
AND CLEARED THE COMMONWEALTH WITH CARGO, 1908 to 1912.**

| Nationality. |     |     |     | 1908.  | 1909.  | 1910.  | 1911.  | 1912.  |

| Foreign      | ... | ... | ... | 23.50  | 24.35  | 22.66  | 24.21  | 25.29  |
| Total        | ... | ... | ... | 100.00 | 100.00 | 100.00 | 100.00 | 100.00 |

That the proportion of foreign tonnage should increase is to be expected as the natural corollary of the extension of the trade of the Commonwealth with foreign countries. This is particularly patent in regard to Germany and France. Both of these countries desire to increase their mercantile marine, and it is therefore natural that the increased direct trade between themselves and Australia should be carried by their own vessels rather than by the vessels of a third country. The Royal Dutch Packet Company has established a line of steamers between Java and other islands of the East Indies and Australia. The Hungarian Levant Steamship Company also maintains a cargo service between the Commonwealth and Adriatic ports.

The more important competitors for the Australian shipping trade among the foreign nations are France, Germany, and Norway, and it is therefore of interest to consider the general direction of their activity. It is well to bear in mind, when comparing the figures in the table on the next page, that the French shipping from and to France and to New Caledonia is practically identical with the steamers of the Messageries Maritimes, which maintain a regular service between France and New Caledonia via Australian ports, and that the German shipping from and to Germany consists mainly of the vessels of two lines, the Norddeutscher Lloyd, and the German-Australian Steamship Company, which have had regular and frequent services to Australian ports for many years.

### SHIPPING OF PRINCIPAL FOREIGN NATIONS BETWEEN AUSTRALIA AND OTHER COUNTRIES DURING 1912.

A further analysis is appended, distinguishing between steam and sailing vessels of British and foreign nationality, which entered and cleared the Commonwealth during the years 1908-12. Steam tonnage during 1912 was 2,010,012 tons greater than in 1908, 1,360,838 tons (*i.e.*, 67.70 per cent.) of the increase being British, and 649,174 tons (*i.e.*, 32.30 per cent.) being foreign. The tonnage of sailing vessels shews a decrease during the same period of 315,849 tons, British tonnage having fallen by 165,234 tons, and that of foreign nations by 150,615 tons.

As might be expected, the proportion of sailing vessels engaged in carrying the trade of the Commonwealth is shewn to be rapidly decreasing, having fallen during the period under review from 19 per cent. to 12 per cent. of the total tonnage. In this branch of shipping the foreign element is stronger than the British.

**6. Tonnage in Ballast.**—The following table shews the tonnage of oversea vessels which entered and cleared the Commonwealth in ballast during the years 1908-12. Of the total British tonnage which entered during 1912, 13.31 per cent. was in ballast, and of foreign tonnage 27.34 per cent. was in similar condition. Of the total tonnage which entered the Commonwealth during 1912, 17.08 per cent. was in ballast, while of the tonnage cleared 1.81 per cent. only was without cargo.

**TONNAGE ENTERED AND CLEARED IN BALLAST, 1908 to 1912.**

Vessels in search of freights arrive in Australia from all parts of the world. The tonnage which entered each State of the Commonwealth, in ballast, during 1912, was as follows:—

**TONNAGE OF OVERSEA VESSELS IN BALLAST WHICH ENTERED EACH STATE  
OF THE COMMONWEALTH DURING THE YEAR 1912.**

| State ...               | N.S.W.  | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.   | N. Terr. | C'wealth. |
|-------------------------|---------|-----------|---------|----------|----------|--------|----------|-----------|
| Tonnage ...             | 617,471 | 8,045     | 5,936   | 97,804   | 137,779  | 12,238 | 2,382    | 881,655   |
| Percentage of total ... | 70.04   | 0.91      | 0.67    | 11.09    | 15.63    | 1.39   | 0.27     | 100.00    |

The large exports of coal from New South Wales afford special inducements to vessels in search of freights. During 1912, 617,471 tons, or 70.04 per cent. of all ballast tonnage arriving in Australia, entered in New South Wales, 510,744 tons having entered at the coal port of Newcastle. The tonnage in ballast into New South Wales is mainly for coal cargo, into South Australia for wheat, and into Western Australia for timber. The relatively large tonnage in ballast recorded in Tasmania is mainly due to French vessels calling at Hobart for orders.

### § 3. Shipping of Ports.

1. **Shipping of Ports.**—Appended is an abstract of the total shipping tonnage—over-sea and coastwise—which entered the more important ports of Australia during the year 1912, together with similar information in regard to some of the ports of New Zealand and and of the United Kingdom for the same year :—

**SHIPPING OF PORTS, AUSTRALIA AND VARIOUS COUNTRIES, 1912.**

| Port.               | Tonnage Entered. | Port.                           | Tonnage Entered. |

| Auckland ...        | 1,882,213        | Belfast ...                     | 3,347,588        |
| Dunedin ...         | 1,074,441        | Dublin ...                      | 2,628,542        |

\* Exclusive of coastal shipping, particulars of which are not available.

From the figures above it may be seen that the shipping business of the port of Sydney is only exceeded by that of four ports in the United Kingdom, viz., London, Liverpool, Cardiff, and the Tyne.

### § 4. Vessels Built and Registered.

1. **Vessels Registered.**—The following table shews the number and net tonnage of steam, sailing, and other vessels not self-propelled, on the registers of the various States and of the Northern Territory of the Commonwealth of Australia:—

#### VESSELS ON THE REGISTER, 31st DECEMBER, 1912.

| State.                 | Steam.               |              |        |              | Sailing.                           |              |        |              | Barges,<br>Hulks,<br>Dredges,<br>etc., not<br>Self-<br>propelled. | Total. |              |         |

2. **Vessels Built.**—The following tables shew the number and tonnage of vessels built in the Commonwealth during each of the years 1901-1912, so far as such information can be ascertained from the Shipping Registers of the various States. The Merchant Shipping Act, under which vessels are registered in Australia, however, does not make it compulsory to register vessels under 15 tons burthen if engaged in river or coastal trade. Larger vessels are also exempt from registration if not engaged in trade. Yachts and small trading vessels may be, and frequently are, registered at the request of the owners. As the Shipping Registers have been, and are, the source of information, it follows that the figures given below will be subject to additions in the future, inasmuch as vessels already built may be added to the register at some future date.

#### VESSELS BUILT IN THE COMMONWEALTH, 1901 to 1912.

##### NUMBER.

| Year.    | Steamers Built of— |       |        |            |        | Oil Motor Vessels. | Sailing. | Pontoons, Dredges, etc. | Total. |

## § 5. Interstate Shipping.

1. **Total Vessels and Tonnage.**—In the following tables are shewn the number and tonnage of vessels recorded as having entered each State of the Commonwealth from any other State therein, and similarly, the number and tonnage clearing from each State to other Commonwealth States. The table gives results for the quinquennial intervals since 1891 and for 1912. The shipping on the Murray River, between the States of New South Wales, Victoria and South Australia, is not included:—

\* Included with South Australia.

The figures presented in the above table include oversea vessels—largely mail boats—passing from one State to another. This renders the results somewhat unsatisfactory.

In the earlier part of this section attention was drawn to the custom in vogue prior to Federation of recording vessels from or to "oversea countries via other Commonwealth States" as *direct* from or to the oversea country. At each port in Australia these vessels were, on the inward voyage (to Australia), entered as from the oversea country, and cleared to the next Australian port as "interstate"; on the return journey—the outward voyage—they were entered as "interstate," and cleared as for the oversea country. In order to preserve the continuity of the records of the shipping communication of the several States with oversea countries this method has been followed in continuation of the pre-existing practice, excepting that vessels arriving or departing via other Commonwealth States are now so recorded instead of as "direct."

From the above it will be seen that while certain movements of the vessels referred to are included in the interstate shipping, other movements of the same vessels, between the same ports, are not so included.

To ascertain the aggregate movement of shipping between the States during the year 1912, including the total interstate movements of oversea vessels, the figures in the following table must be added to those of the preceding one:—

**SHIPPING ENTERED AND CLEARED FROM AND TO OVERSEA COUNTRIES VIA  
OTHER COMMONWEALTH STATES, 1912.**

| State.                 | Entered.    |           | Cleared. |           | Total.   |            |

**2. Total Interstate Movement of Shipping.**—From the foregoing it has been seen that the interstate movement of shipping includes two very different elements, viz.:—(i.) Oversea ships moving from State to State, and (ii.) the movement of ships engaged solely in the interstate carrying trade. These two elements are approximately as follows:—

**TOTAL INTERSTATE MOVEMENT OF SHIPPING, 1908 to 1912.**

|                                       | 1908.      | 1909.      | 1910.      | 1911.      | 1912.      |

**3. Vessels Engaged Solely in Interstate Trade.**—The elimination of the element of oversea vessels, included in the interstate shipping returns, cannot be accurately effected ; nevertheless, a close approximation is furnished if it be assumed that vessels *entered* in the several States as from “oversea countries via other Commonwealth States” have really been *cleared* from other States as “interstate,” and further, that the vessels *cleared* to “oversea countries via other Commonwealth States” have likewise been *entered* as “interstate.” Applying this suggestion, and so eliminating all interstate movements of oversea vessels, the number and tonnage of vessels engaged solely in the interstate trade during the years 1908 to 1912 will be found to be as follows :—

NUMBER AND TONNAGE OF VESSELS ENGAGED SOLELY IN INTERSTATE TRADE,  
1908 to 1912.

| Year.    | Entered. |           | Cleared. |           |
|----------|----------|-----------|----------|-----------|
|          | No.      | Tons.     | No.      | Tons.     |
| 1908 ... | 4,706    | 5,961,617 | 4,654    | 5,916,339 |
| 1909 ... | 4,375    | 5,850,749 | 4,353    | 5,854,313 |
| 1910 ... | 4,645    | 6,384,108 | 4,674    | 6,471,566 |
| 1911 ... | 4,794    | 6,548,069 | 4,811    | 6,570,019 |
| 1912 ... | 5,000    | 6,809,428 | 4,990    | 6,809,426 |

This treatment cannot be extended to the individual States, as the records do not disclose the particular relationship of the States concerned.

**4. Interstate and Coastal Services.**—The foundation of the coastal steamship services in Australia dates back to the year 1851, when a regular trade was established between Melbourne and Geelong by the small screw steamer *Express*. Early in the fifties a company was formed in Tasmania with a capital of £40,000 for the purpose of purchasing steamboats, and employing them in the carriage of passengers and goods between Hobart

and Melbourne. This service was commenced in 1852, and was thus the first regular interstate service in Australia. About this time the great influx of population and the increase in commerce, caused chiefly by the gold discoveries, emphasised the desirability of establishing more regular and quicker means of communication between the principal ports of Australia, and in 1862 the regular interstate service between New South Wales and Victoria was inaugurated by the s.s. *You Yangs*, which was put into commission in regular service between Melbourne, Sydney, and Newcastle. In 1875 a company was formed in Adelaide for the purpose of supplying suitable steamers for the requirements of the trade between Adelaide and Melbourne. The first two steamers of the company were named the *South Australian* and the *Victorian*, and were small vessels of only 400 tons burthen. From the start success attended these enterprises, and the services thus initiated were rapidly extended and their operations broadened. Numerous other companies were formed to cope with the increasing trade between ports in the Commonwealth, and the companies engaged from time to time added to their fleets of steamers by the acquisition of more modern and rapid vessels, until at the end of the year 1912 the total net tonnage owned by the twenty-four companies from whom returns have been received amounted to 179,996 tons. A summary of the various mail services carried on during the year 1912 is given in Section XVIII. of this work.

The subjoined table gives particulars, so far as they are available, of all steamships engaged in regular interstate or coastal services at the end of each of the years 1901 and 1908 to 1912. The figures for 1908 and subsequent years include particulars relating to a number of smaller companies which did not supply returns for 1901, though they were, for the most part, carrying on business in that year.

\* In some cases the vessels included in the above return were subsequently recovered. † The large number of wrecks during 1908 was due to cyclones on the north-west coast of Western Australia destroying a large number of the pearling vessels.

## SECTION XVII.

## ROADS AND RAILWAYS.

## § 1. Roads and Bridges.

1. **Introduction.**—In Year Books No. 1 (pages 541 to 551) and No. 2 (pages 675 to 685), a brief historical account was given of the construction and development of roads in Australia. It is not proposed to repeat that account in the present issue of the Year Book.

2. **Expenditure on Roads and Bridges.**—Figures shewing the total expenditure on roads and bridges in the States are not available. The subjoined statement, however, gives the amounts of total loan expenditures by the States Government up to the 30th June, 1913:—

**ROADS AND BRIDGES.—TOTAL LOAN EXPENDITURE OF EACH STATE AND OF THE COMMONWEALTH UP TO THE 30th JUNE, 1913.**

| State, etc. ... | N.S.W.     | Victoria. | Q'land.  | S. Aust.   | W. Aust. | Tasmania.* | C'wealth.  |
|-----------------|------------|-----------|----------|------------|----------|------------|------------|
| Expenditure     | £1,839,076 | £176,475  | £923,656 | £1,464,736 | £301,244 | £4,023,274 | £8,728,461 |

\* Including harbours, rivers, and lighthouses.

The following table shews the annual expenditure from loans on roads and bridges by the central Governments in each State and in the Commonwealth during the year 1901 and from 1908 to 1913:—

**ROADS AND BRIDGES.—LOAN EXPENDITURE BY STATE GOVERNMENTS, 1901-2 and 1908-13.**

| Year.       | N.S.W.  | Victoria. | Q'land. | S. Aust. | W. Aust. | Tasmania.            | C'wealth.           |

1. For the calendar year 1902. 2. Not available. 3. Exclusive of Tasmania.  
4. See note \* to previous table.

The two tables given above shew only a small proportion of the actual expenditure upon roads and bridges in the different States, for the reason that (a) there have been large expenditures from revenue, both by the central Governments and by local authorities, and (b) the State Governments have in many cases voted grants and subsidies on the amount of rates collected, and have issued loans to local authorities either for the express purpose of the construction of roads and bridges or for the general purpose of public works construction. Returns of expenditure, where available, are given below for each State. Although no revenue is now derived directly from roads and bridges, they are indirectly of great value to the community, forming, next to railways and public lands, the most considerable item of national property.

3. **New South Wales.**—The control of all roads, bridges, and ferries in New South Wales is now regulated by the Local Government Act 1906, which came into force on the 1st January, 1907 (see Section xxvi. *Local Government*). Under the provisions of this Act, the eastern and central divisions of the State are divided into shires and municipalities for the general purposes of local government, for the endowment of which a sum of not less than £150,000 is payable annually out of the consolidated revenue on the basis of a percentage subsidy on the proceeds of the general rates received by the District Councils. The control of all roads, bridges, and ferries (except those proclaimed "National" and those in the unincorporated areas of the Western Division) has been transferred from the Roads Department to the respective shires and municipal councils, who are now responsible for their construction and maintenance. Up to December, 1912, 38 miles of roads, 273 bridges, 54 wharves, 99 jetties, and 14 ferries have been proclaimed as "National" works. Power is given to construct new roads, to widen or close existing roads, to make by-laws for the regulation of traffic, etc.; in the case of the acquisition of land for the purpose of constructing new roads or of widening existing roads, the provisions of the Roads Act 1902 are incorporated. The Minister for Works is empowered to pay subsidies to the local authorities to maintain the roads. The roads leading to and within areas of lands which are made available for closer settlement will be constructed by the Government prior to transfer to the shires, as also will roads required mainly for tourists in districts not likely to produce revenue in rates to the local authorities.

(i.) *Principal Main Roads.* The four principal main roads in New South Wales run in the same direction as, and are roughly contiguous to, the four state-owned main railway lines. (a) *The Southern Road*, 385 miles in length, runs from Sydney to Albury, and before the days of railway construction, formed part of the highway over which the interstate traffic between Melbourne and Sydney used to flow. (b) *The South Coast Road*, 250 miles long, runs from Campbelltown along the top of the coast range and across the Illawarra district as far as Bega, from which place it extends as a minor road to the southern limits of the State. (c) *The Western Road*, 513 miles long, runs through Bathurst, Orange, and many other important towns as far as Bourke, on the Darling River. (d) *The Northern Road*, 405 miles in length, runs from Morpeth, near Newcastle, as far as Maryland, on the Queensland border.

(ii.) *Length and Classification of Roads and Bridges.* The length of roads in the State (exclusive of 38 miles proclaimed as "National works") in 1913 was approximately 94,796 miles, of which 9762 miles were controlled by municipalities, 79,079 by the shires, and 5945 miles were in the unincorporated areas of the Western Division. The following table gives particulars for the year 1912-13 of roads classified according to whether metalled, etc., formed only, cleared only, or natural surface:—

**NEW SOUTH WALES.—APPROXIMATE LENGTH OF ROADS, 1912-13.**

| Classification.        |     |     |     | Metalled,<br>Ballasted,<br>Gravelled<br>etc. | Formed<br>only. | Cleared<br>only. | Natural<br>surface. | Total. |

| Country Municipalities | ... | ... | ... | 2,553  | 1,549           | 1,851            | 1,824               | 7,777  |
| Shires                 | ... | ... | ... | 12,631                                       | 9,247           | 22,076           | 35,135              | 79,089 |
| Western Division       | ... | ... | ... | 91   | 145             | 3,160            | 2,549               | 5,945  |
| Total                  | ... | ... | ... | 16,447                                       | 11,294          | 27,303           | 39,752              | 94,796 |

(iii.) *Bridges, Culverts, and Ferries.* The more important bridges have been proclaimed under the provisions of the Local Government Act as "National works" (see above), and these, together with the bridges, etc., in the Western Division, remain under the control of, and are maintained by, the Public Works Department. Particulars of bridges, culverts, and ferries in the State in 1912-13 are given in the following table:—

**NEW SOUTH WALES.—BRIDGES, CULVERTS, AND FERRIES, 1912-13.**

\* Not available.

(iv.) *Expenditure on Roads and Bridges.* Since the year 1857 the total expenditure by the Roads Department and Roads Trust on roads and bridges is £24,980,691. In this expenditure is included the cost of administering the Department, services for other Departments, and payments on account of punt approaches and similar works incidental to the road traffic of the country. The amount expended from 1857 to the 30th June, 1900, for the next decennium, and for each succeeding financial year up to 1913, is given below. Until recent years, the expenditure on these works increased at a much faster rate than the population.

**NEW SOUTH WALES.—EXPENDITURE BY ROAD DEPARTMENTS AND ROAD TRUSTS, 1857 to 1913.**

| Period.                        | Expenditure by Roads Department. | Expenditure by Trustees. | Total.     |
|--------------------------------|----------------------------------|--------------------------|------------|
|                                | £                                | £                        | £          |
| 1857 to 30th June, 1900 ... .. | 18,714,078                       | 1,258,027                | 19,972,105 |
| 1900-09 ... ..                 | 4,605,766                        | 30,664                   | 4,636,430  |

| 1911-12 ... ..                 | 126,111                          | ...                      | 126,111    |
| 1912-13 ... ..                 | 120,719                          | ...                      | 120,719    |
| Total ... ..                   | 23,692,000                       | 1,288,691                | 24,980,691 |

The expenditure by the Department is now limited to the construction of roads in closer settlement areas and to the construction and maintenance of national bridges and ferries, and of works in the unincorporated areas of the Western Division.

4. *Victoria.*—Under the Local Government Act 1903, the control, construction, and maintenance of all roads, streets, and bridges are in the hands of Municipal Councils, who are empowered to open new roads, and to close, divert, or increase the width of any existing street or road, provided that no new road less than one chain in width may be opened without the consent of the Minister. The councils are also authorised to make and repair streets, lanes, or passages on private property, or

to form means of back access to private property, and may compel the owners of such property to pay the cost of so doing. Footways in front of houses or grounds may be kerbed, flagged, paved, or asphalted, and the owners of such houses or grounds must bear half the cost of so doing. The revenue of the councils is derived from rates which may be either ordinary or special. The councils are empowered to raise loans for the purpose of making or opening new streets and roads, and for diverting, altering, or increasing the width of streets and roads, provided that the amount of such loan must not exceed ten times the average income of the council during the three years immediately preceding.

(i.) *Country Roads Board.* With the object of improving the main roads of the State an Act (No. 2415) was passed on 23rd December, 1912, which empowers the Governor-in-Council to appoint a board, to consist of three members.

The duties of the board are to ascertain by survey and investigation what roads are main roads; the nature and extent of the resources of Victoria in metals, minerals, and materials suitable for the purposes of road-making and maintenance, and the most effective and economical methods for dealing with the same, and for supplying and utilizing the material in any part of Victoria; the most effective methods of road construction and maintenance; what deviations (if any) in existing roads or what new roads should be made so as to facilitate communication and improve the conditions of traffic; and to record, publish, and make available for general information the results of all such surveys and investigations. The duty of furnishing information that may be required is imposed on the municipal authorities.

The construction of permanent works and the maintenance of main roads are likewise to be carried out by the municipalities to the satisfaction of the board. The total cost of the works, in the first instance, is to be paid by the Treasury, but subsequently half the amount expended on permanent works and maintenance is to be refunded by the municipalities affected.

For the purpose of making permanent works, power is given to the Governor-in-Council to issue stock or debentures to the amount of £400,000 a year for five years, and the principal and interest are a charge upon the Consolidated Revenue of the State. The money so raised is to be placed to the credit of an account to be called "the Country Roads Board Loan Account," which will be debited with all payments made by the Treasurer towards the cost of permanent works. A sinking fund of 1 per cent. per annum on half the amount borrowed is authorised to be paid out of the Consolidated Revenue until half the amount borrowed is redeemed. An annual payment to the Treasurer of 6 per cent. on the amount due by each municipality in respect of permanent works is provided for, and the cost of maintenance, allocated to each municipality, must be paid before the 1st July in each year. A special rate not to exceed 6d. in the £1 on the net annual value of rateable property to meet the cost of permanent works and maintenance may be levied in any ward or riding of a municipality as the council may direct. In the event of default of payment by a municipality, the board may levy a rate to meet the amount owing. All fees and fines paid under the Motor Car Act, all moneys standing to the credit of the Municipal Fees and Fines Trust Fund, all fees paid on the registration or renewal of the registration of traction engines, and all fees received by the Crown after the 30th June, 1912, under the Unused Roads and Water Frontages Act 1903, are to be credited to the Country Roads Board Fund.

As soon as practicable after the termination of each year the board must present a report to the Minister setting forth its proceedings, the permanent works constructed, the mileage of the roads maintained, and an account of all moneys received and expended under the provisions of the Act.

(ii.) *General and Local Government Expenditure.* The gross amount expended directly by the State Government of Victoria on roads and bridges was £7,958,212 up to the end of June, 1902. The annual expenditure from ordinary revenue by municipalities is not

returned separately, but is included in Public Works Construction and Maintenance (see Section xxvi., *Local Government*). The subjoined table shews the cost from general revenue of municipalities of private streets, roads, etc., and also shews the amounts of municipal loan expenditure in 1901 and from 1908 to 1912:—

### VICTORIA.—EXPENDITURE ON ROADS AND BRIDGES, 1901 and 1908 to 1912.

| Financial Year. <sup>1</sup> | Annual Expenditure by State Government. | Municipal Loan Expenditure.  |         | Formation of Private Roads, Streets, Lanes, etc. <sup>2</sup> |         |

| 1909 ... ..                  | 99,572                                  | 21,389                       | 9,058   | 34,285  | 3,603   |
| 1910 ... ..                  | 102,309                                 | 25,311                       | 18,077  | 29,304  | 2,859   |
| 1911 ... ..                  | 67,001                                  | 41,247                       | 24,978  | 41,167  | 5,682   |
| 1912 ... ..                  | 58,917                                  | 28,237                       | 31,940  | 59,845  | 6,890   |

1. The financial years of Melbourne and Geelong end on the 31st December and the 31st August respectively; those of all other municipalities on the 30th September.

2. Including the cost of flagging, asphaltting footpaths, etc., but exclusive of loan expenditure.

5. **Queensland.**—In Queensland the construction and maintenance of public roads are controlled under a system of local self-government, for the purposes of which the whole State is divided into (a) towns and (b) shires. The duties, rights, and responsibilities of the local authorities with regard to roads, streets, and bridges are regulated by the Local Authorities Act of 1902. The councils are invested with full powers to open, close, divert, or widen streets, roads, and bridges, and to make by-laws for the regulation of traffic, etc. The members of the councils are elected by the ratepayers, and with the aid of executive officers they undertake the supervision and control of all necessary constructions and improvements of roads and bridges within their district. The rates which the councils are empowered to levy are supplemented by Government grants. Separate returns as to the expenditure by towns and shires on roads and bridges are not available, the amounts being included in the returns of expenditure on public works, particulars as to which expenditure may be found in the Section of this book on *Local Government*.

6. **South Australia.**—Under the provisions of the District Councils Acts, 1887 to 1904, and the Municipal Corporations Acts, 1890 to 1903, and of the Roads Acts, 1884 to 1908, the councils are invested with full powers as to the opening and making of new streets and roads, and the diverting, altering, or increasing the width of existing roads; as to raising, lowering, or altering the ground or soil of any street or road; and as to the construction, purchase, and management of bridges, culverts, ferries, and jetties.

(i.) *Main Roads and District Roads.* All the roads in each district are classified either as main roads or as district roads. Both classes of roads are under the direct control either of Municipal Corporations or of District Councils, but in the case of main roads the expenditure on construction and maintenance is chiefly provided for by Government grants, which are paid into a main road fund, while the expenditure on district roads is paid for out of general rates, and out of subsidies on the amount of such rates, granted by the central Government. Under the Main Roads Act 1908, a number of roads were declared to be main roads.

The total estimated length of streets and roads in South Australia up to the 30th June, 1912, was as follows:—

**SOUTH AUSTRALIA.—ESTIMATED LENGTH OF ROADS AND STREETS, 1912.**

| Particulars. |     |     |     | Woodblocked.  | Macadamised. | Other. | Total.               |
|--------------|-----|-----|-----|---------------|--------------|--------|----------------------|
| Miles        | ... | ... | ... | $\frac{1}{2}$ | 8,358        | 25,997 | 34,355 $\frac{1}{2}$ |

(ii.) *Expenditure by Corporations on Main and District Roads.* The following table shows the expenditure by municipal corporations on both main and district roads during 1901-2, and each year from 1908 to 1912 inclusive:—

**SOUTH AUSTRALIA.—EXPENDITURE BY CORPORATION ON STREETS, ROADS, AND BRIDGES, 1901-2 AND 1908-12.**

| Year. <sup>1</sup> | District Roads. |                |               | Main Roads Fund.       |        |                |               |

7. **Western Australia.**—In Western Australia the construction, maintenance, and management of roads and bridges throughout the State, except those within the boundaries of municipalities, are under the control of District Road Boards, constituted by the Roads Act, 1911.

(i.) *District Roads and Bridges.* Under the provisions of this Act any part of the State, not within a municipality, may be constituted by the Governor-in-Council into a Road District, under the control of a board of not less than five, nor more than eleven members elected by the ratepayers. The board is invested with full powers for controlling and managing all roads and bridges

within the district, and is empowered to make by-laws for the general regulation of traffic, to control the weight of engines and machines permitted to cross any bridge or culvert, to regulate the speed limits of vehicles, lights to be carried by vehicles, the lighting of streets and roads, and the licensing of bicycles and motor cars. A District Road Board may not, however, construct any road or street less than sixty-six feet wide, nor any bridge or culvert at a greater cost than £100, without the consent of the Minister. The construction of the more important bridges and culverts is generally carried out by the Government, the work, after completion, being handed over to the Road Board for maintenance. In case of land being required for the purpose of constructing a new street or road, or for widening an existing street or road, the provisions of the Public Works Act of 1902 are incorporated in the Roads Act. A board may levy general rates within its district not exceeding two shillings and sixpence nor less than ninepence in the £ on the annual ratable value, and, if valued on the basis of unimproved values of lands, the general rate must not be over threepence nor under one penny in the £ on the capital unimproved value. Boards are also empowered to raise loans for works or undertakings or to liquidate existing loans, but the amount of such loans must not be greater than seven times the average ordinary revenue of the board. In the case, however, of boards already indebted, borrowing power to the extent of ten times the said average is given, less the amount of existing loan indebtedness at time of borrowing. For the purpose of paying the interest on money borrowed a board may levy a special rate. District Road Boards may also exercise the powers of Drainage Boards under the provisions of the Land Drainage Act of 1900.

(ii.) *Municipal Streets, Roads, and Bridges.* As regards roads, streets, and bridges within municipalities, these are under the control of local authorities elected under the provisions of the Municipal Corporations Act 1906. The municipal councils are invested with full powers for making, maintaining, and managing all streets, roads, and bridges within the municipal area, and may request the Governor to declare any such land reserved, used, or by purchase or exchange acquired for a street or way, to be a public highway, and on such request the Governor may, by notice in the *Gazette*, proclaim such highway absolutely dedicated to the public.

(iii.) *Length of Roads, Number of Bridges, and Expenditure on Roads and Bridges.* The following table gives particulars of the operations of the Road District Boards since the 1st January, 1908 :—

**WESTERN AUSTRALIA.—PARTICULARS OF ROADS UNDER CONTROL OF DISTRICT ROAD BOARDS, 1908 to 1912.**

| Year ended the<br>30th June. | Area.   | Revenue.                  |                                  |                        |         | Expenditure. | Length of Roads.*   |                    |   |                     | No. of Bridges<br>and Culverts. |                    |

\* Approximate only.

1. Exclusive of three municipalities, which have not supplied the information. 2. Exclusive of three municipalities. 3. Including also particulars of four municipalities which were dissolved during the year.

8. *Tasmania*.—In 1906 all the existing Road Trusts and Main Road Boards were abolished by the Local Government Act, which provided that the councils of all municipalities constituted under the Act should exercise all powers conferred upon, and should be liable to all the obligations imposed upon Road District Trusts and Main Road Boards by the Roads Act of 1884. The whole State, with the exception of Hobart and Launceston, is divided into municipal districts, each of which is under the control of a warden and councillors, and is deemed to be a road district and a main road district for the purposes of the Roads Act 1884.

(i.) *Mileage of Roads and Number of Bridges*. The following table gives particulars for the year 1912 as to length of roads and number of bridges and culverts under the control of the municipalities:—

**TASMANIA.—ROADS AND BRIDGES IN MUNICIPALITIES, 1912.**

## § 2. Railways.

### (A) General.

1. **Improvements in Railway Statistics.**—In February, 1909, a report was issued by the Commonwealth Statistician to the Minister for Home Affairs on the subject of *The Desirability of Improved Statistics of Government Railways in Australia*. In this report a number of matters were specified in respect to which there was want of uniformity in the form and basis of the statistics published in the annual reports of the Railway Departments of the several States, and the importance and desirability of obtaining more complete and uniform statistics, especially with regard to "passenger-miles" and "ton-miles," were emphasised. This report was brought forward and considered by the Commissioners and General Managers of the Australian State Railways at their annual conference, held in Melbourne in May, 1909, with the result that resolutions were passed agreeing to publish in the annual reports of State Railway Departments the uniform statistics regarding all the matters referred to by the Commonwealth Statistician, with two exceptions, viz. :—(a) with respect to the classification of tonnage carried and the revenue derived therefrom (see further (B) paragraph 17 hereof), and (b) with respect to "passenger-mileage" and "ton-mileage" (see further (B) paragraph 18 hereof). The resolutions referred to were to take effect from 1st July, 1909.

2. **Railway Communication in the Commonwealth.**—An account of the progress in railway construction in Australia since the opening of the first line in 1855 will be found in previous issues of the Year Book (No. 6, p. 681). In the eastern, south-eastern, and southern parts of Australia there now exists a considerable network of railway lines converging from the various agricultural, pastoral and mining districts towards the principal ports, which are themselves connected by systems of lines roughly running parallel to the coast. These are shewn on the accompanying map. In the east, lines radiating from Townsville, Rockhampton, Brisbane, and Sydney extend inland in various directions for distances ranging up to over 600 miles; in the south-east there are numerous lines, those in Victoria converging towards Melbourne, while others in New South Wales have their terminus in Sydney; in the south there are three main lines, with numerous branches, running from Melbourne, while from Adelaide one main line, with several branches to the coastal towns, runs inland in a northerly direction for a distance of nearly 700 miles, and another line runs in a south-easterly direction to various ports and meeting the main line from Melbourne on the border of South Australia and Victoria. The main interstate line, (indicated by a heavier line in the map) which permits of direct communication between the four capital cities—Brisbane, Sydney, Melbourne, and Adelaide—covers a distance from end to end of 1790½ miles. This journey occupies just over three days, including one stop of 9 hours and 15 minutes at Sydney, and another of 3 hours 39 minutes at Melbourne. The distance between the capitals and the times occupied are as follow :—

|                       |     |           |     |                  |
|-----------------------|-----|-----------|-----|------------------|
| Brisbane to Sydney    | ... | 725 miles | ... | 26 hours 55 min. |
| Sydney to Melbourne   | ... | 582½ "    | ... | 16 " 51 "        |
| Melbourne to Adelaide | ... | 482½ "    | ... | 17 " 26 "        |

The longest railway journey which can be undertaken in Australia, on one continuous line of railway, is from Longreach in Queensland to Oodnadatta in South Australia, a total distance of 3303 miles. In Western Australia there is a connected system of main or trunk lines between the ports of the State and the agricultural, pastoral, and mining districts.

In the northern parts of Queensland and in the Northern Territory there are also a number of disconnected lines running inland from the more important ports. In Tasmania the principal towns are connected by a system of lines, and there are also, more especially in the western districts, several lines which have been constructed for the purpose of opening up mining districts.

**3. Mileage Open for Traffic.**—In all the States of the Commonwealth the principle that the control, construction, and maintenance of the railways should be in the hands of the Government has long been adhered to, excepting in cases presenting unusual circumstances. In various parts of the Commonwealth lines have been constructed and managed by private companies, but at the present time practically the whole of the railway traffic in the Commonwealth is in the hands of the various State Governments. A large proportion of the private lines which are at present running have been laid down for the purpose of opening up forest lands or mining districts, and are not generally used for the conveyance of passengers or the public conveyance of goods. (See D. *Private Railways*, hereinafter.)

(i.) *Mileage of Government and Private Lines, 1855 to 1913.* The subjoined table shews the mileage of both Government and private lines open for traffic (exclusive of sidings and cross-overs) in each State and also in the Commonwealth at suitable periods since the inauguration of railways in Australia in 1855 up to the year 1913. The figures from 1855 to 1881 are given as up to the end of the calendar year; later figures are as up to the end of the financial year ended on the 30th June, unless otherwise stated, excepting the mileages for private lines which are in all cases taken for the calendar year:—

**GOVERNMENT AND PRIVATE RAILWAYS.—MILEAGE OPEN, 1855 to 1913.**

| Year.       | N.S.W. | Vict.  | Q'land. | S. Aust. | W. Aust. | Tas.   | N. Ter. | C'wth.  |

| 1881 ...    | 1,040  | 1,247  | 800     | 845      | 92       | 168    | *       | 4,192   |
| 1890-1 ...  | 2,263  | 2,763  | 2,205   | 1,666    | 1,656    | 1,425  | 145     | 10,123  |
| 1900-1 ...  | 2,926  | 3,238  | 2,904   | 1,736    | 1,984    | \$618  | 145     | 13,551  |
| 1910-11 ... | 4,027  | 3,574  | 4,390   | 1,993    | 3,208    | 675    | 145     | 18,012  |
| 1911-12 ... | 4,098  | 3,673  | 4,633   | 1,997    | 3,430    | 701    | 145     | 18,677  |
| 1912-13 ... | 4,197  | 3,698  | 4,936   | 2,202    | 3,827½   | 729    | 145     | 19,734½ |

\* No railways yet constructed. † To the 31st December. This line between Goolwa and Port Elliot was opened in 1854 as a horse tramway, but now forms part of the railway system. ‡ To the 31st December, 1891. § To the 31st December, 1901.

It will be seen from the above table that the rate of construction up to the year 1871 was very slow, the average annual length of lines opened from 1861 to 1871 being only 80 miles for the whole Commonwealth. By the middle of the following decade, however, the principal mountain ranges had been crossed, and the work of construction could be proceeded with at a greater rate, and at a less cost per mile. The greatest period of activity was from 1881 to 1891, when the average annual length opened for traffic was 593 miles for the whole Commonwealth; the corresponding figures for the following periods from June 1891 to June 1901, and from June 1901 to June 1911, were 343 and 452 miles respectively.

**4. Comparative Mileage of State-owned and Private Lines, 1913.**—The subjoined table shews for each State and for the Commonwealth (a) the length of lines owned by the respective State Governments, all of which lines are of course open for general use by the

public, (b) the length of private lines available for general use by the public, and (c) the length not so available. The mileages specified in the case of State-owned lines are as up to the 30th June, 1913; those given for private lines are as up to the 31st December, 1912:—

**GOVERNMENT AND PRIVATE RAILWAYS.—COMPARATIVE MILEAGE OF STATE-OWNED LINES, OF PRIVATE LINES AVAILABLE FOR GENERAL TRAFFIC AND OF PRIVATE LINES NOT SO AVAILABLE, 1912-13.**

\* To the 31st December. † Including the mileage (478) of the Port Augusta to Oodnadatta line leased to the South Australian Government by the Commonwealth Government on 1st January, 1911.

The following statement shews the actual mileage opened for traffic in the year 1912-13, and also the annual average increase in mileage opened since 1903 in each State:—

#### GOVERNMENT RAILWAYS.—MILEAGE OPENED ANNUALLY.

| State ... ..  | N.S.W. | Vic. | Qld. | S.A. | W.A. | Tas. | N.T. | C'wlth |
|---|--------|------|------|------|------|------|------|--------|
| Mileage opened during 1912-13                         | 98     | 25   | 258  | 229  | 256  | 11   | ...  | 877    |
| Average annual mileage increase (1904 to 1913) ... .. | 79     | 26½  | 181  | 43   | 134  | 4½   | ...  | 468    |

NOTE.—Owing apparently to remeasurements of lines in New South Wales and Western Australia, the mileages given in this table do not agree with those open for traffic given in the previous table.

(i.) *New South Wales.* During the year ended 30th June, 1913, the following lines were opened for traffic:—Rookwood to Regent's Park (2 miles); Urana to Oaklands (16½ miles); and Dungog to Taree (83 miles).

(ii.) *Victoria.* The following lines were opened for traffic during 1912-13:—Noradjuha to Toolando (11½ miles); and Jeparit to Lorquon (13½ miles), a total of 25 miles.

(iii.) *Queensland.* The increase of 258 miles in the mileage opened for traffic in 1912-13 was due to the opening of the following lines:—Cordalba to Dallarnie (31 miles); Bundaberg to Woongarra Junction (1 mile); Mt. Morgan to Wowan (29 miles); Blackall to Malvernton (23 miles); Benarkin to Yarraman Creek (15 miles); Allora to Goomburra (9 miles); Thallon to Dirranbandi (39 miles); 17-Mile to Cooyar (21 miles); Westgate to Yarronvale (49 miles); Malbon to Duchess (36 miles); and Babinda to Mooliba (5 miles).

(iv.) *South Australia.* The lines opened for traffic in this State during the year 1912-13 were those from Tailem Bend to Brown's Wells ( $96\frac{1}{2}$  miles), Yeelanna to Minnipa Hill ( $106\frac{1}{2}$  miles), and Cummins to Ungarra (25 miles).

By the transfer to the Commonwealth Government of the line from Port Augusta to Oodnadatta, the railways of the State have undergone a reduction to the extent of 478 miles. This line has, however, been leased to the State by the Commonwealth Government as from the 1st January, 1911, and is therefore included in the mileage belonging to this State.

(v.) *Western Australia.* The following new sections of railway were taken over from the Public Works Department during the year 1912-13 and opened for public traffic:—Port Hedland-Marble Bar ( $114\frac{1}{2}$  miles), Tambellup to Ngowangerup ( $23\frac{1}{2}$  miles), Upper Darling Range extension ( $1\frac{1}{2}$  miles), Northampton to Ajana (33 miles), Ngowangerup to Ongerup ( $34\frac{1}{2}$  miles), and Quairading to Bruce Rock ( $48\frac{3}{4}$  miles), a total of  $255\frac{1}{2}$  miles.

(vi.) *Tasmania.* During the year 1912-13 an extension from Burnie as far as Wynyard (11 miles) was opened for traffic.

**2. Non-conformity of Gauge.**—With but few exceptions, all the railway lines in the Commonwealth open for general traffic are now owned and managed by the respective States in whose territory they run, but, unfortunately for the purpose of interstate traffic, the construction of the various systems in different parts of Australia has proceeded without uniformity of gauge. In 1846 Mr. Gladstone, then Colonial Secretary, recommended in a despatch to the Governor of New South Wales that the 4 ft. 8½ in. gauge should be adopted. In 1850, however, the engineer to the Sydney Railroad and Tramway Company strongly advocated the adoption of the 5 ft. 3 in. gauge, and in 1852 an Act was passed making it compulsory that all railways in New South Wales should be constructed to the wider gauge, the Governors of Victoria and South Australia being duly advised of the step that had been taken. In 1852, however, the company mentioned, having changed its engineer, also changed its views as to the gauge question, and in the following year succeeded in obtaining the repeal of the Act of 1852 and in passing another, under the provisions of which the narrower gauge was made imperative. This step was taken without the concurrence of the other States concerned, and a considerable amount of ill-feeling arose, especially in Victoria, where two private companies had already placed large orders for rolling stock constructed to the broad gauge originally chosen. The result was that it was decided in Victoria to adhere to the 5 ft. 3 in. gauge as the standard gauge for that State, while the Sydney Railroad and Tramway Company proceeded with the construction of its lines to the 4 ft. 8½ in. gauge, and these two gauges have since been adhered to as the standard gauges of the respective States. The Queensland Government had at the outset adopted a gauge of 3 ft. 6 in. as being best suited to the requirements of the colony, and has since adhered to that gauge throughout the State, so that all goods have to be discharged and reloaded at the boundary between that State and New South Wales. In South Australia the broad gauge of Victoria was at first adopted, and the part of the interstate line between Adelaide and the Victorian boundary was constructed to that gauge, so that the line from Melbourne to Adelaide is uniform. In the lines which have been constructed more recently, however, and in the Northern Territory, the South Australian Government has, with a view to economy in construction, adopted a gauge of 3 ft. 6 in. In Western Australia and Tasmania the 3 ft. 6 in. gauge was also adopted. It was recognised in both these States that the construction of railways was essential to their proper development, but as their financial

resources would not bear a heavy initial expenditure in connection with the establishment of railway lines, it was decided to adopt the narrow gauge. In Victoria, light railways have been constructed in recent years to a gauge of 2 ft. 6 in., whilst in Tasmania short lengths have been laid down to a 2 ft. gauge.

**3. Interstate Communication.**—Until the railway systems of the eastern States were connected at the common boundaries the inconvenience of non-conformity of gauge was not felt. Since then, however, the necessary transshipments of both passengers and goods have been a source of trouble, delay, and expense. On the 14th June, 1883, a railway bridge over the River Murray at Wodonga was opened for traffic, and communication was then established between Melbourne and Sydney. On the 19th January, 1887, the last section of the Victorian line to Serviceton, on the South Australian border, was completed, and a junction was thus effected with the South Australian line to Adelaide. On the 16th January, 1888, a junction was effected between the New South Wales and Queensland lines at Wallangarra, but there was still a break in the line from Sydney at the Hawkesbury River, thirty-six miles from Sydney. This last link was, however, completed on the 1st May, 1889, by the opening of the Hawkesbury River bridge, 2900 feet in length, and railway communication was thus established between the four capital cities, Brisbane, Sydney, Melbourne, and Adelaide.

The effect of the transcontinental railway now under construction will be that Western Australia will also be linked to the other States and an unbroken line of communication established from one end of the continent to the other. The construction, moreover, of lines, recently decided upon, connecting Victoria with the Riverina district in New South Wales and with the wheat growing districts of South Australia, will undoubtedly facilitate interstate exchange and will allow the produce of inland areas to find its natural outlet.

**4. Unification of Gauge.**—The development of the railway systems of the Commonwealth has shewn that the adoption of different gauges on the main lines in the several States was a serious error. The extra cost, delay, and inconvenience incurred by the necessity of transferring through-passengers and goods at places where there are breaks of gauge, though not at present of any appreciable magnitude, are becoming more serious as the volume of business increases. As an indication of the extra cost thus involved the junction charges on interstate traffic between New South Wales and Victoria range from 1s. 6d. to 2s. 6d. per ton.

Although the cost of alteration to a uniform gauge would be great, many propositions have from time to time been put forward with the object of securing such a gauge, and attention has been drawn to the importance of the unification of gauges before further expenditure on railway construction is incurred by the States. The problem is, however, one which is by no means easy of solution, and the difficulties are increased by the introduction of what may be called questions of local or State policy.

The first question that naturally arises in considering the problem is as to which gauge should be adopted as the universal gauge of the Commonwealth. As regards Government railways only, the New South Wales gauge has a mileage of 3930; Victoria and South Australia have a combined mileage of 4248 of 5 ft. 3 in. gauge; while Queensland, South Australia, Western Australia, and the Northern Territory have together 8968 miles of 3 ft. 6 in. gauge. By far the greater part of the mileage of private railways open for general traffic has also been constructed to the 3 ft. 6 in. gauge.

The mere question of preponderance of mileage, therefore, indicates the 3 ft. 6 in. gauge for adoption. But this question is obviously subordinate to those involving engineering and economic considerations. Thus, the relative efficiency from the widest point of view, the relative costs of alterations of permanent way and rolling stock, of carrying capacity and speed, that is to say, questions of a technical nature about which figures are not available, enter into the grounds for decision. As regards the unification of the New South Wales and Victorian lines, the advantage of reducing the broad gauge to the 4 ft. 8½ in. gauge is that there would be no necessity for the alteration of tunnels, cuttings, bridges, or viaducts.

In 1897 a conference was held between the Railway Commissioners of New South Wales, Victoria, and South Australia to consider and report upon the unification of the railway gauges of these States. In their report the Commissioners estimated the cost of converting all the lines in the three States to a 5 ft. 3 in. gauge at £4,260,000, and to one of 4 ft. 8½ in. at £2,360,500. In 1903 the question was again brought up, more particularly with regard to the proposed transcontinental line, and the Engineers-in-Chief reported in favour of a gauge of 4 ft. 8½ in. At the Premiers' Conference, held in January 1912, the subject was again under consideration, but no decision was come to.

In November 1912, another conference of railway engineers representing the six States and the Federal Government was held, and the question of unification of gauge was again discussed. The necessity for such a step was emphasised, and a conclusion was come to that the relative advantages of the 5 ft. 3 in. and 4 ft. 8½ in. gauges, from the point of view of efficiency and economy of working, were approximately equal, and that the determination of the most suitable gauge should be made on the basis of cost. Owing, however, to the fact that track mileage, ton mileage, and wages, had increased 90 per cent., 200 per cent., and 50 per cent., respectively, since 1897, together with a correspondingly large increase in the cost of material, the Conference estimated the cost of converting all lines to a 5 ft. 3 in. gauge at £51,659,000 and to a 4 ft. 8½ in. gauge at £37,164,000. It recommended that the latter gauge should be adopted, and pointed out that the longer the work of conversion was delayed, the greater the cost would become. An alternative scheme by which the main trunk lines and more important branches should be converted was also proposed, as possibly meeting immediate requirements and being, from a Federal point of view, perhaps a more attractive proposition, than any other which could be suggested at the present time. The estimated cost of this limited scheme was £12,142,000. The subject was again under discussion at the Premiers' Conference, held in Melbourne, in April 1914, when it was decided to refer the matter to the Interstate Commission, that the latter body might furnish a report as to the benefits of unification, its cost, and the apportionment of such cost.

In February, 1911, a conference of officers of the Commonwealth and State Governments was held in Melbourne under the presidency of the Minister for Defence to consider matters of defence as affected by the facilities for transport of troops and armaments in the event of war. The proposal laid before the conference was that a railway central staff should be formed, so that in case of war the Defence Department would have at hand not only a well considered scheme of mobilisation, but also an organised staff of men ready to carry out the work of transport.

**5. Average Mileage Worked, Train Miles Run, Number of Passenger Journeys, and Tonnage of Goods and Live Stock Carried, on Government Railways.** — The table at head of page 602 gives the actual mileage open for traffic at the end of each financial year, but, in considering the returns relating to revenue and expenditure, and other matters, it is desirable to know the average number of miles actually worked during each year. The next table shews the average number of miles worked, the total number of train miles run, the number of passenger journeys, and the tonnage of goods and live stock carried by the Government railways of each State during the years 1901-2 and 1908-13 inclusive:—

**GOVERNMENT RAILWAYS.—AVERAGE MILEAGE WORKED, TRAIN MILES RUN, NUMBER OF PASSENGER JOURNEYS, AND TONNAGE OF GOODS AND LIVE STOCK CARRIED, 1901 and 1908-13.**

| Year. | N.S.W. | Victoria. | Q'land. | Sth. Aust. | West. Aust. | Tasmania. | N. Ter. | C'wealth. |

\* For the calendar year 1902. The average mileage worked is larger than the actual mileage open, owing to the fact that the Government Railways have running powers over certain private lines. † Exclusive of Port Augusta-Oodnadatta line. ‡ These figures are partly estimated the actual returns excluding journeys by season ticket holders. § Exclusive of Port Augusta-Oodnadatta line for six months ended 30th June, 1911. ¶ Exclusive of live stock. \*\* Exclusive of live stock returns for Tasmania.

**6. Length and Gauge of Railway Systems in each State.**—A map shewing the State railway lines, and also some private lines open to the public for general traffic, in the different States of the Commonwealth is given on page 621 hereafter. In all the States the Government railways are grouped, for the convenience of administration and management, into several divisions or systems, some of which have already been briefly referred to above in dealing with the history of construction of the railways. The subjoined summary shews concisely the gauge and length of the main and branch lines included in each division or system of the different States of the Commonwealth for the year ended the 30th June, 1913:—

## GOVERNMENT RAILWAYS, 1912-13.

| Particulars.  |  |  |  |  | Length. | Gauge.  |
|---|--|--|--|--|---------|---------|
|   |  |  |  |  | Miles.  | ft. in. |
| <b>1. NEW SOUTH WALES.</b>  |  |  |  |  |         |         |
| (i.) The Northern line and branches—  |  |  |  |  |         |         |
| (a) Main line. Strathfield-Wallangarra ...  |  |  |  |  | 486½    | 4 8½    |
| (b) Branch lines ...  |  |  |  |  | 475     | 4 8½    |
| (ii.) The North Coast line and branches—  |  |  |  |  |         |         |
| (a) Main line. West Maitland-Murwillumbah ...   |  |  |  |  | 266½    | 4 8½    |
| (b) Branch lines ...  |  |  |  |  | 18      | 4 8½    |
| (iii.) The Western line and branches—   |  |  |  |  |         |         |
| (a) Main line. Granville-Bourke ...   |  |  |  |  | 495     | 4 8½    |
| (b) Branch lines ...  |  |  |  |  | 781     | 4 8½    |
| (iv.) The Southern line—  |  |  |  |  |         |         |
| (a) Main line. Granville-Wodonga ...  |  |  |  |  | 381     | 4 8½    |
| (b) Branch lines ...  |  |  |  |  | 840½    | 4 8½    |
| (v.) The South-coast (Illawarra) line—  |  |  |  |  |         |         |
| (a) Main line. Sydney to Nowra ...  |  |  |  |  | 93      | 4 8½    |
| (b) Branch lines ...  |  |  |  |  | 7       | 4 8½    |
| (vi.) Suburban lines ...  |  |  |  |  | 47      | 4 8½    |
| (vii.) Broken Hill line. Broken Hill-Tarrawingee ...  |  |  |  |  | 40      | 3 6     |
| Total ...   |  |  |  |  | 3,930   | ...     |
| <b>2. VICTORIA.</b>   |  |  |  |  |         |         |
| (i.) The South-eastern system—  |  |  |  |  |         |         |
| (a) Main lines. Dandenong-Port Albert, Aspendale-Stony Point ...  |  |  |  |  | 145     | 5 3     |
| (b) Branch lines ...  |  |  |  |  | 43½     | 5 3     |
| (ii.) The Eastern system—   |  |  |  |  |         |         |
| (a) Main lines. Dandenong-Bairnsdale, Bayswater-Gembrook, Croydon-Healesville ...   |  |  |  |  | 18      | 2 6     |
| (b) Branch lines ...  |  |  |  |  | 202     | 5 3     |
| (iii.) The North-eastern system—  |  |  |  |  | 97      | 5 3     |
| (a) Main line. Craigieburn-Wodonga ...  |  |  |  |  | 29      | 2 6     |
| (b) Branch lines ...  |  |  |  |  | 171     | 5 3     |
| (iv.) The Northern system—  |  |  |  |  | 30      | 2 6     |
| (a) Main line. Digger's Rest-Echuca ...   |  |  |  |  | 446½    | 5 3     |
| (b) Branch lines ...  |  |  |  |  | 135     | 5 3     |
| (v.) The North-western system—  |  |  |  |  | 1,021   | 5 3     |
| (a) Main line. Rockbank-Serviceton ...  |  |  |  |  | 266     | 5 3     |
| (b) Branch lines ...  |  |  |  |  | 259½    | 5 3     |
| (vi.) The Western and South-western system—   |  |  |  |  |         |         |
| (a) Main line. Werribee-Portland ...  |  |  |  |  | 272     | 5 3     |
| (b) Branch lines ...  |  |  |  |  | 44½     | 2 6     |
| (vii.) The Suburban system—   |  |  |  |  | 273½    | 5 3     |
| Including the lines to Aspendale, Dandenong, Bayswater, Croydon, Hurst's Bridge, Craigieburn, Digger's Rest, Rockbank, and Werribee ... |  |  |  |  | 194½    | 5 3     |
| Total ...   |  |  |  |  | 3,647½  | ...     |

| Particulars.                      |                               |                                     |     | Length. | Gauge.  |

7. Administration and Control of Government Railways.—In each State of the Commonwealth the policy has now been established that the railways should be kept under the control of the Government. This policy, as has been shewn, was early actualised in Australia, and, excepting in cases presenting unusual circumstances, may be regarded as the settled policy of the country. In previous Year Books (see No. 6, p. 693) will be found a description of the methods adopted by the various State Governments in the control and management of their railways.

8. Lines under Construction, and Authorised and Proposed Lines, 1913.—The following statement gives particulars up to the 30th June, 1913, of the mileage of Government railways (a) under construction, and (b) authorised for construction but not commenced :—

#### MILEAGE UNDER CONSTRUCTION AND AUTHORISED, 30th JUNE, 1913.

| Particulars.               | N.S.W.            | Vic.              | Q'land. | S.A.              | W.A. | Tas.             | Cwlth.              |
|----------------------------|-------------------|-------------------|---------|-------------------|------|------------------|---------------------|
| Mileage under construction | 534 $\frac{3}{4}$ | 242 $\frac{1}{4}$ | 360     | 154 $\frac{1}{4}$ | 471  | 12 $\frac{1}{4}$ | 1,774 $\frac{1}{2}$ |
| Mileage authorised         | 636               | 224               | 1,551   | 924               | 143  | ...              | 2,878               |

(i.) *Lines under Construction.* In spite of the great extension of State railways which has taken place since the year 1875 throughout the Commonwealth, there are still, in some of the States, tracts of country of immense area, which are as yet practically undeveloped, and in which little in the nature of permanent settlement has been accomplished; the general policy in the States is to extend the existing lines inland, in the form of light railways, as settlement increases, and although it is true that lines which were not likely to be commercially successful in the immediate future have been constructed from time to time, for the purpose of encouraging settlement, the general principle that the railways should be self-supporting is kept in view. (a) In *New South*

*Wales* the lines under construction are chiefly of the "pioneer" class, and are made with a view to affording railway communication over level country to districts in which the traffic would not warrant the expenditure necessary to provide thoroughly equipped lines. As the traffic increases the permanent way is strengthened in order to allow the heavy types of engines to run over it. It is probable that railway extension in New South Wales, in the near future, will be mainly confined to lines of the "pioneer" class. The lines under construction on 30th June, 1913, were those from Taree to Wauchope (47½ miles), Macksville to Coff's Harbour (55 miles), and Glenreagh to South Grafton (27½ miles). The construction of 85½ miles of line necessary to connect Wauchope with Glenreagh has been authorised, and this line, when completed, will form an alternative main route between Newcastle and Brisbane. Other lines under construction are as follow:—Moree to Mungindi (77 miles), Forbes to Stockinbingal (83½ miles), Wagga to Tumbarumba (76½ miles), Parkes to Peake Hill (31 miles), Muswellbrook to Merriwa (51 miles), Dunedoo to Coonabarrabran (71 miles), Finley to Tocumwal (11½ miles), and Galong to Burrowa (17½ miles). (b) *Victoria*. In this State the following lines were under construction by the Board of Land and Works on the 30th June, 1913:—5 ft. 3 in. gauge: White Cliffs to Yelta (9¾ miles), Bairnsdale to Orbost (60 miles), Gheringhap to Maroona (100¾ miles), Crowlands to Navarre (23 miles), Benalla to Tatong (18½ miles), Rushworth to Colbinabbin (12 miles), and Chillingollah to Manangatang (18½ miles), making in all 242½ miles. (c) *Queensland*. In December, 1910, the North Coast Railway Act was passed. Under this Act a series of lines, when constructed, will link up a number of existing lines in such a way that a through line will be obtained from Rockhampton to Cairns, *via* Mackay and Townsville, a total distance of 569 miles. By the completion of this line it will be possible to travel from Cairns to the southern border of the State at Wallangarra, a total distance of about 1198 miles. At the same time the Great Western Railway Act was passed. Under this Act provision is made for the extension in a westerly or south-westerly direction of the lines already constructed to Wallal, Blackall, Winton, and Malbon, in such a manner that they will form junctions with a line to be made running north-westerly from Tobermory to Camooweal. These extensions, together with the north-westerly line, will make an aggregate distance of 1282 miles to be constructed. With the completion of both these schemes the railways of this State will be brought into direct communication with each other on both their east and west boundaries. On the 30th June, 1913, the following lines were under construction:—Woodford to Kilcoy (17 miles), Gayndah to Mundubbera (23 miles), Keefton to Imbil (24 miles), Pialba to Urangan (4 miles), Logan to Canungra (21 miles), Dalby to Jandowae (28 miles), Miles to Juandah (44 miles), Cloncurry to Mount Cuthbert (42 miles), Malanda to Millaa Millaa (9 miles), and Dimbulah Junction to Mount Mulligan (29 miles). Of the Great Western Railway the following parts are under construction: Section A: From Yarronvale to Beechal Creek (26 miles); Section B: From Benlidi south-west (26 miles). The following parts of the North Coast Railway are under construction:—Section A: From Yaamba northwards towards St. Lawrence (20 miles); Section B: From Sarina southwards towards St. Lawrence (72 miles); Section D: From Ayr southwards to Burdekin River (5 miles); Section D: From Townsville northwards to Ingham (34 miles). (d) *South Australia*. In this State the lines under construction on the 30th June, 1913, were as follow:—Goodwood to Willunga (29½ miles), Brown's Well to Paringa (40½ miles), and Pinnaroo to the Victorian Border (3½ miles), 5 ft. 3 in. gauge; Ungarra to Darke's Peak (52½ miles), Darke's Peak to the Hundred of Solomon (28½ miles), 3 ft. 6 in. gauge. (e) In *Western Australia* the following lines were in course of construction by the Public Works Department on the 30th June, 1913:—Dwellingup to Hotham (27 miles), Wickiepin to Merredin (109 miles), Wongan Hills to Mullewa (198 miles), Brookton to Kunginn (50 miles), and Yilliminning to Kondinin (73 miles). (f) *Tasmania*. At the end of the year 1912-13, the line from Wynyard to Myalla was almost completed and was opened on 7th August, 1913.

(ii.) *Lines Authorised for Construction.* (a) *New South Wales*. In addition to the North coast railway extension between Wauchope and Glenreagh (85½ miles), the

construction of lines from Tullamore to Tottenham (33 miles), Condobolin to Broken Hill (373 miles), Glenreagh to Dorriggo (42 miles), Barellan to Mirool (32 miles), and Wyalong to Cudgellico (70½ miles) had been authorised up to 30th June, 1913. (b) In *Victoria* the following lines were authorised, but their construction had not been commenced up to the end of June, 1913:—5 ft. 3 in. gauge. Tallangatta to Cudgewa (42½ miles), Swan Hill to Piangil (27½ miles), Sea Lake towards Pier Millan (17½ miles), Heywood to Mumbannar (39½ miles), Elmore to Cohuna (57½ miles), Hamilton to Cavendish (15½ miles), Rainbow towards Nypto (10½ miles), and Linton to Skipton (12½ miles). (c) *Queensland*. In addition to the new lines upon which work has been commenced, lines from Kingaroy to Tarong (19 miles), Munbilla to Mt. Edwards (16 miles), Oakey to Mt. Russell (19 miles), Roma to Oralla (29 miles), Tomoulin to Cedar Creek (5 miles), and Wowan towards Dawson River (40 miles), have been approved of by Parliament, which has also authorised the construction of the following parts of the Great Western Railway: Section A, from Beechal Creek (169 miles); Section B, from 65 Miles (283 miles); Section B, from Winton (361 miles); and Section D, from Duchess (292 miles); and in the North Coast Railway, Section A, from Marlborough to St. Lawrence (81 miles); Section B, from 33 Miles south and Mackay northward (89 miles); Section C, from Midge Point to Proserpine (13 miles); Section D, from Armidale to near Cardwell (52 miles); Section E, from Mooliba to near Cardwell (83 miles). (d) In *South Australia* the construction of lines from Eudunda to Robertson (13½ miles), Mt. Gambier to the Victorian Border (12 miles), Alawoona to Loxton (21 miles), Karoonda to Peebinga (69 miles), Karoonda to Waikerie (76½ miles), on the 5 ft. 3 in. gauge, and from Minnipa to Decrés Bay (108 miles), and Yeelanna to Mt. Hope (23½ miles), on the 3 ft. 6 in. gauge, has been authorised during the year 1912-13. It is proposed to electrify the Adelaide-Glenelg (6½ miles) line at an estimated cost of £115,000, and also in newly settled districts to construct light lines to be run by District Councils. (e) In *Western Australia* the following lines were authorised for construction up to the 30th June, 1913: Wagin to Bowelling (60 miles), Wyalkatchem to Mt. Marshall (52 miles) and Toodyay-Bolgart Extension (31 miles). (f) In *Tasmania* the construction of a line, 20 miles long, from Burnie to Flowerdale, was authorised by Parliament.

(iii.) *Transcontinental Lines*.—(a) *Port Augusta to Kalgoorlie Line*. The Transcontinental Railway Bill, passed in 1907 by the Federal Houses of Parliament, provided for the expenditure of a sum of £20,000 for a preliminary survey of a railway line connecting Western Australia with the eastern States. This survey was commenced in 1908, and was completed in March, 1909. The route of the preliminary survey may be seen on reference to the map on page 621 hereof; the route *via* Tarcoola was, for several reasons, chosen in preference to that *via* Gawler Range and Fowler's Bay. The estimated cost of construction and equipment of the line on the basis of a 4 ft. 8½ in. gauge, from Port Augusta in South Australia to Kalgoorlie in the Western Australia goldfields, a distance of 1063 miles, is £3,988,000. In September, 1911, a Bill was introduced into the Commonwealth Parliament to authorise the construction of the line, and became law in December following. In South Australia an Act was passed enabling the Commonwealth to acquire lands for the railway in South Australia not exceeding one-eighth of a mile wide on either side of the line, but no town lands are to be included at any time. In Western Australia an Act was also passed by which all necessary lands are to be granted to the Commonwealth for railway purposes. A Railway Construction Department was created by the Federal Government to carry out the work, and on the 14th September, 1912, the first sod of the Kalgoorlie-Port Augusta Railway was turned by the Governor-General at Port Augusta. A commencement has also been made at Kalgoorlie, and it is estimated that the line, which is being built from both ends, and will have a gauge of 4 ft. 8½ in., will be completed in three years. To the 28th March, 1914, 69½ miles had been laid in the South Australian Division, and 82½ miles in the Western Australian Division. (b) *Northern Territory Transcontinental Line*. Prior to the taking over of the Northern

Territory by the Commonwealth in 1911, the South Australian Government had on more than one occasion considered the practicability of extending the main Northern line from Adelaide, which at present terminates at Oodnadatta, as far as Pine Creek, the southern terminus of the Northern Territory line from Darwin. In 1892 an Act was passed and tenders were invited for the construction of 1063 miles of 3 ft. 6 in. line on the land grant system, the grant of land offered amounting to nearly 80 million acres, but no tenders were accepted. In the Northern Territory Acceptance Act the construction of a transcontinental line from South Australia is provided for; under that Act the property in the railways from Port Augusta to Oodnadatta and from Darwin to Pine Creek has been transferred to the Commonwealth Government as from the 1st January, 1911. While the former of these lines is being worked under the control of the South Australian Commissioner by agreement between the South Australian and Federal Governments, the latter Government contemplates taking over the control of the line at an early date. In the meantime, the extension of the Darwin-Pine Creek line southward to the Katherine River is being proceeded with by the Federal Government.

9. **Cost of Construction and Equipment of Government Railways.**—The total cost of construction and equipment of the State railways of the Commonwealth at the 30th June, 1913, amounted to £171,226,323, or to an average of £9633 per mile open for traffic. Particulars as to the capital expenditure incurred in each State are given in the following table:—

**GOVERNMENT RAILWAYS.—COST OF CONSTRUCTION AND EQUIPMENT TO  
30th JUNE, 1913.**

| State or Territory in which<br>Situatcd. | Length of<br>Line Open. | Total Cost of<br>Construction<br>and<br>Equipment. | Average Cost<br>per Mile<br>Open. | Cost per Head<br>of<br>Population. |
|--|-------------------------|--|-----------------------------------|------------------------------------|
|  | Miles.                  | £  | £                                 | £                                  |
| New South Wales ... ..                   | 3,930                   | 57,003,036   | 14,505                            | 31.85                              |
| Victoria ... ..                          | 3,647                   | 47,568,336   | 13,043                            | 34.21                              |
| Queensland ... ..                        | 4,524                   | 29,758,652   | 6,578                             | 45.34                              |
| South Australia* ... ..                  | 2,168                   | 16,542,177   | 7,630                             | 38.14                              |

| Commonwealth ... ..                      | 17,775                  | 171,226,323  | 9,633                             | 35.65                              |

\* Including Port Augusta-Oodnadatta line.

It will be seen that the lowest average cost per mile open is in Western Australia, and is only £5225, which is less than one-half of the highest average cost, namely, £14,505 in New South Wales, compared with an average of £9633 for the whole Commonwealth. In Western Australia there have been comparatively few engineering difficulties to contend with, and also the system has been adopted in that State of giving contractors the right to carry traffic during the period of their contracts, with the result that, at all events in all goldfields railway contracts, the cost of construction has been considerably lessened.

(i.) *Reduction of Cost per Mile in Recent Years.* The average cost per mile of the lines constructed lately in the Commonwealth is very much less than the figure given in the above table, in consequence of the construction of light "pioneer" lines, which have already been referred to, and which it was originally considered in New South Wales could be laid down at a cost of £1750 per mile (exclusive of stations and bridges). It

should also be remembered that in the early days of railway construction there were considerable engineering difficulties to overcome, and that labour was scarce and dear. Since 1892 over one thousand four hundred miles of the "pioneer" lines have been opened in New South Wales, the average cost ranging from about £2000 to £7500 per mile, according to the difficulties met in the country traversed. The lowest cost per mile for any line previously constructed had been that of the line from Nyngan to Cobar, the average cost of which, to the end of June, 1913, was £3794. In Victoria also the cost of construction has been greatly reduced in recent years. The total cost to the 30th June, 1913, of the narrow gauge (2 ft. 6 in.) lines, having a length of one hundred and twenty-two miles, was only £324,438, which gives an average cost per mile of only £2659. In the other States also the cost of construction per mile has been reduced by building light railways as cheaply as possible. Fairly substantial permanent way is laid down with reduced ballast, and, as settlement progresses and traffic increases, the road is strengthened, and the stations and siding accommodation enlarged. The subjoined table gives examples of some of the more expensive lines, most of which were built in the early days :—

**GOVERNMENT RAILWAYS.—EXAMPLES OF LINES CONSTRUCTED AT LARGE CAPITAL EXPENDITURE PER MILE OPEN.**

| Line.                   | Gauge.  | Length.      |              |             |         | Total Cost. | Average Cost per Mile. | Date of Opening. |

\* Double lines and over.

The next table gives instances of lines which have been constructed in more recent years at a comparatively small cost per mile.

The average cost per mile of the 436.35 miles comprised in the above table was £36,907, whereas the average cost of the 365 miles referred to in the next table was £1840.

**GOVERNMENT RAILWAYS.—EXAMPLES OF LINES CONSTRUCTED AT SMALL CAPITAL EXPENDITURE PER MILE OPEN.**

| Line.                           | Gauge.  | Length. | Total Cost. | Average Cost per Mile. | Date of Opening. |

| Wycheproof to Sealake ...       | 5 3     | 48      | 76,406      | 1,595                  | 1895             |
| Ultima to Chillingollah ...     | 5 3     | 20½     | 30,539      | 1,516                  | 1909             |
| QUEENSLAND—                     |         |         |             |                        |                  |
| Dalby to Bell ...               | 3 6     | 23½     | 35,500      | 1,511                  | 1906             |
| Jericho to Blackall ...         | 3 6     | 71½     | 152,158     | 2,137                  | 1908             |
| SOUTH AUSTRALIA—                |         |         |             |                        |                  |
| Wandilo to Glencoe ...          | 3 6     | 9       | 11,454      | 1,255                  | 1904             |
| Cummins to Yeelanna ...         | 3 6     | 8½      | 14,104      | 1,598                  | 1909             |
| WESTERN AUSTRALIA—              |         |         |             |                        |                  |
| Southern Cross to Bullfinch ... | 3 6     | 22      | 36,821      | 1,674                  | 1911             |
| Narrogin to Wickepin ...        | 3 6     | 26½     | 40,142      | 1,515                  | 1909             |

The comparisons afforded in the two preceding tables are subject to certain limitations, inasmuch as the figures in each case represent the total cost to date, and the cost is naturally greater in the case of the older lines. Further, the figures given represent the cost of construction only (i.e., are exclusive of cost of equipment), and cannot therefore be directly compared with the average cost per mile open given in the preceding table.

(ii.) *Capital Cost of Construction and Equipment, Total and per Mile Open.* The increase in the total capital cost of construction and equipment of Government railways in each State and in the Commonwealth for 1901-2 and for each year from 1908 to 1913 is shewn in the following table:—

**GOVERNMENT RAILWAYS.—CAPITAL COST OF CONSTRUCTION AND EQUIPMENT,  
1901-2 and 1908-13.**

TOTAL COST (£,000 OMITTED).

\* For the calendar year 1902. Including Port Augusta-Oodnadatta line.

**11. Coaching, Goods, and Miscellaneous Receipts.**—The gross revenue is composed of (a) receipts from coaching traffic, including the carriage of mails, horses, parcels, etc., by passenger trains; (b) receipts from the carriage of goods and live stock, and (c) rents and miscellaneous items. The subjoined table shews the gross revenue for 1901-2 and 1908-13, classified according to the three chief sources of receipts. The total of the three items specified has already been given in the preceding paragraph hereof.

**COACHING, GOODS, AND MISCELLANEOUS RECEIPTS, 1901-2 and 1908-13.**

| 1912-13 | 103 | 91 | 28 | 53 | 93 | 12 | 6   | 386 |

\* Tasmanian figures for 1902 are for year ended the 31st December.

(i.) *New South Wales.* The total earnings for the past year amounted to £6,748,985, an increase over the previous year of £257,512. A satisfactory increase is shewn in passenger traffic receipts, but the goods traffic returns decreased by over £10,000. The net increase, though substantial, is considerably below that shewn in 1911-12.

(ii.) *Victoria.* In Victoria, coaching traffic receipts shewed an increase of £137,670 over the previous year, the increase in passenger receipts being £121,418. Goods traffic, on the other hand, decreased by £153,344.

(iii.) *Queensland.* In Queensland the increase in 1912-13 in gross earnings, £288,813 above 1911-12, is to some extent accounted for by the opening of new lines, but it is stated that the expansion of traffic upon the older established lines has been enormous. The chief increases in earnings were in respect of passengers £60,801, general merchandise £115,324, and minerals £64,589.

(iv.) *South Australia.* In this State every item of traffic gave an increased return on the figures of the previous year, the principal increases being in minerals (£39,494), general goods (£23,564), and passengers (£30,046). These figures are exclusive of the returns from the Port Augusta-Oodnadatta line.

(v.) *Western Australia.* In this State the earnings in 1912-13 shewed an increase of £153,249 as compared with 1911-12. Passenger traffic rendered an additional amount of £13,187, while goods and mineral receipts increased no less than £111,282.

(vi.) *Tasmania.* The gross revenue in 1912-13 shews an increase of £14,327 as compared with the previous year. This may be attributed to a good harvest, excellent markets on the mainland, renewed activity in mining, and the general prosperity of the State. Passenger traffic receipts afford an increase of £8659; while the increase in the revenue from goods and live stock is £6323.

The following table shews for the year 1912-13 the percentage which each class of receipts bears to the total gross revenue:—

**PERCENTAGE OF REVENUES FROM VARIOUS SOURCES ON TOTAL REVENUE, 1912-13.**

| Particulars.                              | N.S.W. | Vic.  | Qld.  | S.A.  | W.A.  | Tas.  | N. Ter. | C'wlth. |

| New South Wales ... | 1,446,004 | Western Australia ... | 1,037,360 |
| Victoria ...        | 2,628,556 | Tasmania ...          | 675,790   |

† Excluding the returns of the Port Augusta to Oodnadatta line.

The above table shews that, in the several States, there is a considerable difference in the amount of the average receipts per passenger journey. Disregarding the Northern Territory, this amount ranges from 5.94 pence in Victoria, where there is a large metropolitan suburban traffic, to 23.43 pence in Tasmania. The difference in these amounts cannot be accounted for by the amounts of rates charged, which are fairly uniform in the several States (see paragraph 20), but is largely due to the different traffic conditions which prevail on various lines in the Commonwealth (see paragraph 17). In order to adequately analyse these figures it would be necessary to have particulars regarding the number of passenger-miles, *i.e.*, the total distance travelled by passengers, in each State, which particulars are not generally available (see paragraph 18).

The preponderance in the number of passenger journeys in Victoria is accounted for, to a great extent, by the large number of metropolitan suburban passengers in that State. Of the total number of passengers carried in Victoria, 103,003,647 were metropolitan suburban passengers, *i.e.*, were carried between stations within twenty miles of Melbourne, while in New South Wales the number of suburban passengers (between stations within thirty-four miles of Sydney and Newcastle, and including Richmond and Braxton lines) was 70,732,975. In Sydney a large proportion of the metropolitan suburban traffic is carried on the electric and steam tramways, the number of passenger journeys during the year 1912-13 being 294,455,452. In Melbourne, on the other hand, the number of passengers carried on the cable tramways systems during the same period was 89,359,248; and on the St. Kilda-Brighton, Prahran-Malvern and the North Melbourne tramways was 13,617,964, making a total of 102,977,212, which is not as great as the number carried on the metropolitan suburban railways in Melbourne. This matter is referred to hereinafter. (See paragraph 17.)

**13. Goods and Live-Stock Traffic Receipts per Mile Worked, per Goods-train Mile, and per Ton Carried.**—The following table shews the gross receipts from goods and live-stock traffic per mile worked, per goods-train mile, and per ton carried, for the year ended the 30th June, 1913:—

| Commonwealth ...      | 31,354                            | 26,964                        | 11,153                                 | 644                      | 85.37                 | 99.27            |

\* The returns include the undermentioned mixed-train mileage, which has been divided between passenger-train miles and goods-train miles in the proportion of one-third and two-thirds respectively in the case of the following States:—

|                     |           |                       |           |
|---------------------|-----------|-----------------------|-----------|
| New South Wales ... | 1,446,004 | Western Australia ... | 1,037,360 |
| Victoria ...        | 2,628,556 | Tasmania ...          | 675,790   |

† Excluding the returns of the Port Augusta to Oodnadatta line.

From the above table it may be seen that, disregarding the Northern Territory, the average amount of freight paid per ton ranges from 79.97 pence in Tasmania to 135.29 pence in Queensland. The remarks made in the preceding paragraph (12) hereof with regard to the average fare paid per passenger and to passenger-miles, apply equally to the average amount of freight paid per ton and to ton-miles.

**14. Working Expenses.**—In order to make an adequate comparison of the working expenses of the Government railways in the several States, allowance should be made for the variation of gauges and of physical and traffic conditions, not only on the railways of the different States, but also on different portions of the same system. Where traffic is light, the percentage of working expenses is naturally greater than where traffic is heavy; and this is especially true in Australia, where ton-mile rates are in many cases based on a tapering principle—i.e., a lower rate per ton-mile is charged upon merchandise from remote interior districts—and where on many of the lines there is but little back-loading. Further, though efforts have been made from time to time to obtain a uniform system of accounts in the several States, the annual reports of the Commissioners do not yet comprise fully comparable data of railway expenditure.

The following table shews the total annual expenditure, comprising expenses on (a) maintenance of way, works, and buildings; (b) locomotive power—repairs and renewals; (c) carriages and wagons—repairs and renewals; (d) traffic expenses; (e) compensation; and (f) general and miscellaneous charges; and also the percentage of these expenditures upon the corresponding gross revenues in each State for 1901-2 and for each year 1908-13.

\* Including amounts paid for pensions and gratuities, and also special expenditures and charges for belated repairs and in reduction of deficiencies as follows:—For the year 1901-2, £115,244; and for 1907-8, £150,122. † For the calendar year 1902. ‡ Including the Port Augusta-Oodnadatta line for the six months ended 30th June, 1911. § Including the Port Augusta-Oodnadatta line. || Including the cost of the replacement of rolling stock destroyed by fire (£22,649 in 1909-10 and £12,657 in 1910-11).

(i.) *New South Wales.* In this State the total working expenses in 1912-13 amounted to £4,644,881, an increase of £475,290 over the previous year. This increase was mainly owing to the large additional traffic, heavy repairs, and increased rates of pay to the staff.

(ii.) *Victoria.* In Victoria the increase in working expenses, £166,473, was mainly due to the additional train mileage, to advances in salaries and wages of the staff, and to the increased price of coal, oil, etc.

(iii.) *Queensland.* In this State the working expenses increased from £1,917,266 in 1911-12 to £2,150,991 in 1912-13. The increase is mainly due to the advances in salaries and wages, and to the expenditure which is being incurred by the additional mileage in course of construction.

(iv.) *South Australia.* In South Australia the working expenses in 1912-13 shewed an increase of £108,347, viz., from £1,363,354 to £1,471,701. This was to a large extent due to increased expenditure in the locomotive branch.

(v.) *Western Australia.* The cause of the increased expenditure (£162,623) in 1912-13 as compared with 1911-12, is mainly due to increased rates of pay.

(vi.) *Tasmania.* The working expenses in 1912-13 were £217,357, as compared with £221,172 in the previous year, being a decrease of £3815.

From the preceding table it may also be seen that during the last five financial years there have been for the whole Commonwealth increases in the percentages of working expenses to gross earnings. This increase is partly due to the fact that in four of the States, consequent on the favourable results of previous years, reductions were made in passenger fares and freight rates, while the increase in salaries and wages has also been an important factor, as well as the increased cost of materials.

(vii.) *Working Expenses per Average Mile worked and per Train Mile run.* The following table shews the working expenses per average mile worked and per train mile run in each State for the years 1901-2 and 1908-13:—

## THE GOVERNMENT RAILWAY SYSTEMS OF THE COMMONWEALTH.

EXPLANATION OF MAP.—The continuous lines denote the existing railway lines of Australia, the heavier lines being the main routes.

Of the two transcontinental lines, viz., one joining the railways of South and Western Australia—and thus connecting continuously by railway Queensland, New South Wales, Victoria, South Australia, and Western Australia, and one connecting Oodnadatta in South Australia with Pine Creek in the Northern Territory, the former has been commenced, and is shewn — — — — —; while the latter, the construction of which is to be deferred for the present, is shewn . . . . .

## LIST OF PRINCIPAL SECTIONS OF RAILWAYS:

| Miles.                            | Miles.                               | Miles.                          |
|-----------------------------------|--------------------------------------|---------------------------------|
| Townsville to Winton ... 368      | Sydney to Hay ... 460                | Adelaide to Broken Hill ... 335 |
| Townsville to Selwyn ... 552      | .. Nimmitabel ... 291                | .. Oodnadatta ... 688           |
| Rockhampton to Longreach 428      | .. Melbourne (17 hrs.) 582½          | Perth to Laverton ... 586       |
| Brisbane to Cunnamulla ... 604    | Adelaide to Melbourne (17 hrs.) 482½ | .. Meekatharra ... 640          |
| Brisbane to Sydney (26½ hrs.) 725 | Melbourne to Merbein ... 358         | .. Albany ... 340               |
| Newcastle to Inverell ... 405     | .. Swan Hill ... 215                 | Hobart to Launceston ... 133    |
| Sydney to Bourke ... 508          | .. Murrayville 357                   |                                 |

# GRAPHS SHEWING THE FINANCIAL POSITION OF THE GOVERNMENT RAILWAYS OF THE COMMONWEALTH, 1855 TO 1913.

(See pages—total capital cost, 612; mileage open, 602; gross revenue, 615; working expenses 619; net revenue, 626; average cost per mile, 614; percentage of working expenses to gross revenue, 619; percentage of net revenue to capital cost, 626.)

**EXPLANATION OF GRAPHS.**—In the above diagram the base of each small square represents throughout one year. The significance of the vertical height of each square varies, however, according to the nature of the several curves.

In the heavy curve denoting the total capital cost of the railways of the Commonwealth, the vertical side of each square denotes £2,000,000.

In the three lighter curves, representing (i.) gross revenue, (ii.) working expenses, and (iii.) net revenue, the vertical height of each single square denotes £400,000. For the curve of average cost per mile open, the vertical side of the small square denotes £2,000. The mileage open is shown by a dotted curve, the vertical side of each square representing 200 miles.

For the percentages a new zero is taken at "20" on the scale for the general diagram. The vertical height of each square represents 2 percent, in the curve shewing the percentage of working expenses to gross revenue. For the curve of percentage of net revenue to capital cost, the vertical height of each square represents only 0.2, that is to say, the vertical scale is ten times that of the preceding curve.

GRAPHS SHEWING PERCENTAGES OF WORKING EXPENSES TO GROSS REVENUE FOR  
GOVERNMENT RAILWAYS FOR STATES AND COMMONWEALTH, 1855 TO 1913.

(See page 619.)

EXPLANATION OF GRAPHS.—In the above diagram the base of each small square represents throughout one year. The vertical side of a small square denotes throughout 10 per cent., the heavy zero lines being different for each State and the Commonwealth, with, however, one exception, viz., that the zero line for South Australia and Western Australia is identical.

The curve for Victoria commences in 1859; that for Queensland in 1865; that for Tasmania in 1872; and that for Western Australia in 1879, these being the years in which the Government Railway systems of the several States were inaugurated.

GRAPHS SHEWING PERCENTAGES OF NET REVENUE TO CAPITAL COST OF GOVERNMENT RAILWAYS FOR STATES AND COMMONWEALTH, 1855 to 1913.

(See page 626.)

EXPLANATION OF GRAPHS.—In the above diagram the base of each small square represents throughout one year. The vertical side of a small square denotes 1 per cent., the thick zero lines, however, for each State and for the Commonwealth being different. This was necessary to avoid confusion of the curves.

Where the curve for any State falls below that State's zero line, loss is indicated, the working expenses having exceeded the gross revenue.

The curve for Victoria commences in 1859; that for Queensland in 1865; that for Tasmania in 1872; and that for Western Australia in 1879, these being the years in which the Government railway systems of the several States were inaugurated.

15. **Distribution of Working Expenses.**—The subjoined table shews the distribution of working expenses, among four chief heads of expenditure, for the years 1901-2 and 1908-13:—

**GOVERNMENT RAILWAYS.—DISTRIBUTION OF WORKING EXPENSES,  
1901-2 and 1908-13.**

| Year                         | N.S.W. | Victoria.* | Q'land. | S. Aust. | W. Aust. | Tas. | N. Ter. | C'wealth. |

17. **Traffic Conditions.**—Reference has already been made to the difference in the traffic conditions on many of the lines of the Commonwealth (see paragraphs 12, 13, and 14 hereof). These conditions differ not only in the several States, but also on different lines in the same State, and this is true with regard to both passenger and goods traffic. By far the greater part of the population of Australia is confined to a fringe of country near the coast, more especially in the eastern and southern districts. A large proportion of the railway traffic between the chief centres of population is therefore carried over lines in the neighbourhood of the coast, and is thus, in some cases, open to sea-borne competition. On most of the lines extending into the more remote interior districts traffic is light; the density of population diminishes rapidly as the coastal regions are left behind; there is a corresponding diminution in the volume of traffic, while, in comparison with other more settled countries, there is but little back-loading.

As an indication of the different traffic conditions prevailing in the several States, the following table is given shewing the numbers of passenger journeys and the tons of goods carried (a) per 100 of the mean population; and (b) per average mile worked in each State during the financial year 1912-13:—

#### PASSENGER JOURNEYS AND TONNAGE OF GOODS AND LIVE STOCK, 1912-13.

| Particulars.                         |      | N.S.W. | Vic.   | Q'land. | S.A.* | W.A.  | Tas.  | N.T. | C'wth. |
|--------------------------------------|------|--------|--------|---------|-------|-------|-------|------|--------|
| (a) PER 100 OF MEAN POPULATION.      |      |        |        |         |       |       |       |      |        |
| Passenger journeys                   | No.  | 4,467  | 8,077  | 3,126   | 4,506 | 5,853 | 836   | 35   | 5,278  |
| Goods and live stock                 | Tons | 655    | 373    | 596     | 701   | 936   | 235   | 80   | 569    |
| (b) PER AVERAGE MILE OF LINE WORKED. |      |        |        |         |       |       |       |      |        |

| Goods and live stock                 | Tons | 3,012  | 1,415  | 872     | 1,499 | 1,029 | 915   | 19   | 1,557  |

\* Exclusive of the returns of the Port Augusta to Oodnadatta line.

Particulars of the actual numbers of passengers and tons of goods and live stock carried have already been given (see paragraph 5 hereof).

(i.) *Metropolitan and Country Passenger Traffic.* A further indication of the difference in passenger traffic conditions might be obtained from a comparison of the volume of metropolitan, suburban, and country traffic in each State. Particulars are, however, available only for the States of New South Wales and Victoria. The subjoined table shews the number of metropolitan and country passengers carried in each of the States mentioned and the revenue derived therefrom during the year 1912-13:—

#### METROPOLITAN, SUBURBAN, AND COUNTRY PASSENGER TRAFFIC, 1912-13.

| Particulars. | Number of Passenger Journeys. |           |             | Revenue.      |            |            |
|--------------|-------------------------------|-----------|-------------|---------------|------------|------------|
|              | Metropolitan.                 | Country.  | Total.      | Metropolitan. | Country.   | Total.     |
| N.S.W. ...   | *70,732,975                   | 8,757,037 | 79,490,012  | £819,419      | £1,752,027 | £2,571,446 |
| Victoria ... | †103,003,647                  | 8,510,261 | 111,513,908 | †1,040,774    | 1,387,785  | 2,428,559  |

\* Within 34 miles of Sydney and Newcastle, and including Richmond and Braxnton lines.

† Within 20 miles of Melbourne, but exclusive of St. Kilda-Brighton tramway.

From this table it may be seen that the number of passenger-journeys in country districts in Victoria is slightly less than the corresponding number in New South Wales, while the number of metropolitan passenger-journeys in Victoria is far greater

than in New South Wales, although in the latter State both Sydney and Newcastle are included. In Sydney a larger proportion of the suburban traffic is carried by the tramway systems than in Melbourne.

For several years it has been recognised that the suburban passenger transport, both in Sydney and in Melbourne, was increasing so rapidly that it must eventually become impossible to cope with under the existing systems. A scheme for the electrification of the Melbourne suburban lines was under the consideration of the Victorian Government in 1908, but owing chiefly to a doubt as to its success from a financial standpoint, its adoption was for a time deferred. In November, 1912, however, a Commission was appointed by Parliament to again consider the 1908 scheme, and, acting on its report, the Government decided to at once proceed with the electrification of the suburban lines. Contracts for the construction of power-houses and the necessary equipment are already in hand at an estimated cost of £1,226,000, and it is anticipated that a portion of the suburban railway system will be electrically operated by June, 1915. In Sydney a Metropolitan Railway Construction Branch of the Railway Department has been created to deal specially with this matter. The Minister has approved of the construction of an underground city railway, the route has been decided upon, and the plans are in course of preparation. The preliminary work in the location of a system of electric railways for the eastern, western and northern suburbs is also in hand.

(ii.) *Goods Traffic.* The differing conditions of the traffic in each State might also, to some extent, be analysed by an examination of the tonnage of various classes of commodities carried and of the revenue derived therefrom. Comparative particulars regarding the quantities of some of the leading classes of commodities carried on the Government railways are available for all the States; corresponding information regarding the revenue derived from each class of commodity is not, however, generally available in a comparable form. In this connection it may be stated that the following resolution was passed at the Interstate Conference of Railway Commissioners held in Melbourne in May 1909 (see paragraph 1, page 598 hereof):—"That in view of the variations in the character and classification of the goods traffic in the different States, the sub-divisions of tonnage carried and revenue in each State shall be those which best suit local conditions."

The following table shews the number of tons of various representative commodities carried, and the percentage of each class on the total tonnage carried during the financial year 1912-13:—

#### CLASSIFICATION OF COMMODITIES CARRIED, 1912-13.

**18. Passenger-Mileage and Ton-Mileage.**—The useful comparisons and analyses which can be made with regard to the operations of the Government railways in the Commonwealth are to some extent limited by the absence in the annual reports of the Railway Departments of some of the States, of particulars relating to "passenger-mileage" (*i.e.*, the total distance travelled by passengers) and "ton-mileage" (*i.e.*, the total distance for which goods and live stock are carried), and it is not possible to furnish totals for the Commonwealth in respect of these important particulars. The matter of passenger-mileage and ton-mileage has already been referred to (see page 598). The following resolution in regard thereto was passed at the Interstate Conference of Railway Commissioners held in Melbourne in May, 1909:—"That, in view of the differing conditions in each State, and of the expense involved, it is undesirable to include passenger-mile and ton-mile statistics in the annual reports." The general question as to the desirability of collecting and publishing "passenger-mile" and "ton-mile" statistics by railway companies in the United Kingdom has been made the subject of inquiry by a departmental committee appointed by the President of the Board of Trade. The report of this committee has been published in England as a parliamentary paper.<sup>1</sup>

Information regarding "passenger-miles" and "ton-miles" is available either wholly, or in part, for three of the States only, viz., New South Wales, South Australia, and Tasmania, but is not available at all for either Victoria, Queensland, or Western Australia. Of the three States which give particulars of the nature indicated, New South Wales is the only one which furnishes the information in a classified form according to class of passengers and nature of commodities carried. The other two States supply particulars for all classes of passengers and goods together respectively. Western Australia furnished particulars as to ton-miles for the years 1907-12, but has since discontinued to record them. The mere record of the total number of passenger-miles and ton-miles for all classes of passengers and for all classes of goods respectively, although of considerable value, would appear to be insufficient to enable the whole field of railway operations to be adequately analysed, or the extent to which efficiency has been secured and improvements in working have been effected to be accurately gauged.

(i.) *Passenger-Miles.* Particulars for the whole of the Commonwealth period regarding total "passenger-miles" are available for one State only, namely, Tasmania. For the same period in New South Wales, but exclusive of 1911, 1912 and 1913, particulars are only available for suburban and extended-suburban traffic—*i.e.*, including all stations within 22 miles of Newcastle, within 34 miles of Sydney, and including Richmond and Braxton. For South Australia particulars are available for each year since 1904. No particulars are available for other States. In the tables given below the average number of passengers carried per "train," etc., is obtained by dividing the number of "passenger-miles" by the number of "passenger-train-miles." The averages given for New South Wales prior to 1911 are naturally smaller than those for the other States, since the figures for that State refer to suburban and extended-suburban traffic only.

---

1. See Cd. 4697. This report is also published at length in "The Statist," London, 19th June, 1909, Vol. LXII., No. 1634. In this report it is stated that ton-mile statistics have been used in India for forty years and for a longer period in America. They are now compiled by the railways of nearly all foreign countries; in England, however, they are not generally compiled. Among the more important statistics deduced from ton-miles and passenger-miles the following are mentioned:—(a) The average Train Load of goods and of passengers, obtained by dividing the ton-mileage and the passenger-mileage respectively by the train-mileage. (b) The average Wagon Load and Carriage Load, obtained by dividing the ton-mileage by the wagon-mileage and the passenger-mileage by the carriage-mileage. (c) Ton-miles per Engine Hour. (d) The average Length of Haul for goods and passengers respectively, obtained by dividing the ton-mileage and the passenger-mileage by the tonnage and the total number of passengers conveyed. (e) The average Receipts per Ton per Mile and per Passenger per Mile, obtained by dividing the goods receipts by the ton-mileage and the passenger receipts by the passenger-mileage. (f) The average Density of Traffic per mile of road or per mile of track, obtained by dividing the ton-mileage and passenger-mileage by the length of road or by the length of track.

## SUMMARY OF "PASSENGER MILES," 1901-2 and 1908-13.

| Year ended the 30th June. | Passenger Train Mileage. | Number of Passenger Journeys. | Total Passenger Miles. | Amount Received from Passengers. | Average Number of Passengers carried per Train. | Average Mileage per Passenger-journey. | Average Receipt per Passenger-mile. | Average Fare per Passenger-journey. |

\* Suburban lines only for years 1902-1910; includes distances within 34 miles of Sydney and including Richmond and Braxton. † Not available. ‡ Partly estimated. § Exclusive of the returns of the Port Augusta to Oodnadatta line for the six months ended 30th June, 1911. || Exclusive of the returns of the Port Augusta-Oodnadatta line. ¶ This and subsequent years compiled on new basis, so as to be uniform with other States.

(ii.) *Ton-Miles.* Particulars regarding total "ton-miles" are available for each year since 1901 for the States of New South Wales, South Australia, and Tasmania. Corresponding particulars for Western Australia are available for the years 1907 to 1912; figures for 1913 are not available. The average freight-paying load carried per "train" is obtained by dividing the total "ton-miles" in the fourth column by the goods-train mileage in the second column. In New South Wales the tonnage carried is exclusive of coal, on which only shunting and haulage charges are collected, and the amount of earnings specified excludes terminals. In South Australia and Tasmania they include terminals, while in Western Australia they exclude wharfage and jetty dues, but include all other charges.

## SUMMARY OF "TON MILES," 1901-2 and 1908-13.

\* Exclusive of the returns of the Port Augusta to Oodnadatta line for the six months ended 30th June, 1911. † Exclusive of the returns of the Port Augusta to Oodnadatta line. ‡ Particulars for 1913 and for years prior to 1907 not available. § Exclusive of live stock. || To 31st December for year 1902, to 30th June for succeeding years.

(iii.) *Density of Traffic.* The average densities of passenger traffic and of goods traffic, obtained by dividing the passenger-mileage and the ton-mileage respectively by the average length of line worked during year, are shewn in the following table for the year 1912-13 for those States for which particulars are available :—

#### DENSITY OF TRAFFIC PER AVERAGE MILE OF LINE WORKED, 1912-13.

| Density of—              | N.S.W.  | S. Aust.* | W. Aust. | Tasmania. |
|--------------------------|---------|-----------|----------|-----------|
| Passenger traffic ... .. | 308,002 | 143,492   | †        | 70,092    |
| Good „ ... ..            | 222,608 | 176,642   | 79,938†  | 34,104    |

\* Including the Port Augusta-Oodnadatta line.

† Not available.

‡ For year ended 30th June, 1912.

(iv.) *Classification of Commodity Ton Mileage.* New South Wales is the only State for which particulars, specifying the ton-mileage and the earnings per ton-mile for various classes of commodities, are available. It is hoped that in future years it will be possible to give corresponding particulars for the other States.

The subjoined statement gives particulars for the last financial year. Miscellaneous traffic consists of timber, bark, firewood, bricks, drain-pipes, coal, road-metal in eight-ton lots, agricultural and vegetable seeds in five-ton lots, and traffic of a similar nature. A and B classes consist of lime, vegetables, tobacco leaf, caustic soda and potash, cement, copper ingots, fat and tallow, water and mining plant in six-ton lots, leather in one and three-ton lots, agricultural implements in five-ton lots, and other traffic of a similar nature. The table does not include 264,722 tons of coal on which only shunting and haulage charges were collected, nor does it include £58,411 for haulage, tonnage dues, etc.

#### NEW SOUTH WALES.—SUMMARY OF TON-MILEAGE FOR THE YEAR ENDED 30th JUNE, 1913.

**19. Interest Returned on Capital Expenditure.**—It may be seen from the figures given in the table in paragraph 16 hereof, that the Government railways in Australia have, on the whole, made a substantial profit during each year since the inception of the Commonwealth, but, unfortunately, the community does not get the full benefit of this profit, owing to the high rates of interest at which money for railways was borrowed in the early days. Though the average rate during the year ended the 30th June, 1912, was 4.13 per cent., an average does not accurately express the position. At an early period the need of constructing railways for the sole purpose of opening up undeveloped districts was recognised, and lines were built which could not possibly pay for some years to come; as these railways always preceded population, the money had to be raised at an almost speculative rate of interest, frequently amounting to 6 per cent., while the more recent loans have been effected at less than 4 per cent., hence the railways have been handicapped by a burdensome interest. At the present time, also, spur lines are constructed, which can scarcely be expected to instantly return revenue in excess of the expenditure, and so must, for a time at any rate, be a charge on the more developed branches of the railway system, and tend to increase the ratio of working costs to revenue. It may be noted, however, that although the loans made for expenditure on railway construction and equipment very largely increase the amount of the public debt of the Commonwealth, forming, in fact, more than half the total debt, the money borrowed has not been sunk in undertakings which give no return, but has been expended on works which are increasingly reproductive, yielding in most cases a direct return on the capital expended, and representing a greater value than their original cost. In Europe the national debts of various countries have been incurred principally through the expenses of prolonged wars, and the money has gone beyond recovery, but in Australia the expenditure is represented to a large extent by public works which pay a direct return, which is, on the whole, greater than the amount of interest due upon capital invested. In addition to the purely commercial aspect of the figures relating to the revenue and expenditure of the Commonwealth railways, it is of great importance that the object with which many of the lines were constructed should be kept clearly in view; the anticipated advantage in building these lines has been the ultimate settlement of the country rather than the direct returns from the railways themselves, and the policy of the State Governments has been to use the railway systems of the Commonwealth for the development of the country's resources to the maximum extent consistent with the direct payment by the customers of the railways of the cost of working and interest charges. Further, the money has been spent in developing immense agricultural, pastoral and mineral resources, which add to the wealth of the community, while the benefits conferred in providing a cheap and convenient mode of transit, and in generally furthering the trade and the best interests of the Commonwealth, are incalculable.

(i.) *Profit or Loss after Payment of Working Expenses and Interest.*—The net revenue of the Government railways in each State after payment of working expenses is shewn in paragraph 16 hereof. The following table shews the amount of interest payable on expenditure from loans on the construction and equipment of the railways in each State, the actual profit or loss after deducting working expenses and interest and all other charges from the gross revenue, and the percentage of such profit or loss on the total capital cost of construction and equipment.

In this table the positive sign indicates a profit, the negative a loss. For the Commonwealth as a whole there has been a net profit on the Government railways during each of the last eight years.

The same satisfactory state of affairs applies also to the States of New South Wales, South Australia proper, and Western Australia, and with the exception of the year 1907-8

to Victoria. Tasmania and the Northern Territory both shew a loss for each year of the period 1902 to 1912, as also does Queensland, with the exception of the years 1906-7, 1910-11, and 1911-12.

\* The positive sign indicates a profit, the negative a loss. † Allowing for payment of special expenditure and charges (see paragraph 14 above).

**20. Passenger Fares and Goods Rates.**—Considerable reductions have been made in recent years in passenger fares and in freight rates. These fares and rates are not only changed from time to time to suit the convenience and varying necessities of the railways, but, as traffic is developed and revenue increased, they are also in many cases reduced to an extent consistent with the direct payment by the customers of the railways of the cost of working and interest charges.

(i.) *Passenger Fares.* On the Australian Government railways two classes are provided for passenger traffic. The fares charged may be classified as follows:—(a) Fares between specified stations (including suburban fares). (b) Fares computed according to mileage rates. (c) Return, season, and excursion fares. (d) Special fares for working-men, school pupils, and others. Fares in class (a) are issued at rates lower than the ordinary mileage rates. Fares in class (b) are charged between stations not included in

class (a). Generally, it may be said that mileage-rate fares are computed on the basis of about twopence per mile for first-class and about  $1\frac{1}{2}$  pence per mile for second-class single tickets. In Tasmania, however, the fares are computed on the general basis of  $1\frac{1}{2}$  pence per mile first-class, one penny per mile second-class, with a terminal charge of one penny, with one-sixth added to total. In New South Wales, Victoria, and Queensland the mileage rates are based upon a tapering principle, *i.e.*, a lower charge per mile is made for a long journey than for a short journey. With the exception of New South Wales and Tasmania first-class return fares are generally about  $1\frac{1}{2}$  to  $1\frac{3}{4}$  times the single fare, and the second-class are about 30 to 45 per cent. lower than the first-class fares. In New South Wales passenger fares were reduced on the 28th May, 1911, to the amount of £70,000 per annum, and the issue of return tickets abolished except between stations in the Sydney and Newcastle suburban areas, and between the States and in the tourist districts. In Tasmania the issue of return tickets has been discontinued except in a few special cases. In Western Australia special summer recreation fares have been granted by which women and children can travel distances up to 800 miles and return for fares of 25s. and 12s. 6d. respectively. These concessions enable them to escape the heat of the goldfields and spend the summer at one of the coastal towns. In April, 1913, the New South Wales Government decided to discontinue the issue of return tickets for inter-state railway journeys, and consequently these tickets are no longer available between State and State, except between Victoria and South Australia.

The following table shews the passenger fares for different distances charged in each State, between stations for which specific fares are not fixed :—

\* Inclusive of suburban rates for 34 miles. † Ordinary mileage rates are not published; the amounts given are therefore computed from fares between specified stations. ‡ Exclusive of Tasmania for hauls of 300 miles and upwards.

(ii.) *Parcel Rates.* In all the States parcels may be transmitted by passenger train upon payment of the prescribed rates, which are based upon weight and distance carried. The rates vary slightly in the different States. In New South Wales they range from threepence for a parcel not exceeding 3 lbs. for any distance up to 75 miles, to eleven shillings and threepence for a parcel weighing from 84 lbs. to 112 lbs., for a distance of 500 miles. In Victoria the charge for a parcel weighing from 84 lbs. to 112 lbs. for a distance over 450 miles is twelve shillings. The rate in Queensland for a parcel weighing from 85 to 112 lbs. for 500 miles is twelve shillings and sixpence; in South Australia eleven shillings and threepence; in Western Australia thirteen shillings; and in Tasmania for a distance of 250 miles the rate is five shillings and sixpence.

(iii.) *Goods Rates.* The rates charged for the conveyance of goods and merchandise may generally be divided into three classes, viz.:—(a) Mileage rates, (b) District or “development” rates, and (c) Commodity rates. In each of the States there is a number—ranging from 8 in Victoria to 15 in Tasmania—of different classes of freight. Most of the mileage rates are based upon a tapering principle, *i.e.*, a lower charge per ton-mile is made for a long haul than for a short haul; but for some classes of freight there is a fixed rate per mile irrespective of distance. District rates are charged between specified stations and are somewhat lower than the mileage rates, excepting in Western Australia, where the terms refer to a special toll of 1s. per ton on goods travelling over certain “district” railways as part payment of the extra cost of working lines laid for developmental purposes through sparsely settled districts. In addition to the ordinary classification of freights under class (a), certain commodities, such as wool, grain, agricultural produce, and crude ores, are given special rates, lower than the mileage rates, under class (c).

Space will not permit of anything like a complete analysis of goods rates in the several States being here given. As an indication of the range and amount of such rates the subjoined tables are given. The first table shews for each State the truck-load rates charged for hauls of different distances in respect of agricultural produce not otherwise specified; these special rates are here given for this class of produce, since it is generally forwarded in truck-loads.

#### RATES FOR AGRICULTURAL PRODUCE IN TRUCK-LOADS ON GOVERNMENT RAILWAYS, 1913.

\* Exclusive of Tasmania for hauls of 300 miles and upwards. † Less 20 per cent. for artificial manures.

The classification of commodities varies in the several States. Generally, the highest-class freight includes expensive, bulky, or fragile articles, while the lowest-class comprises many ordinary articles of merchandise, such as are particularly identified or connected with the primary industries of each State.

In New South Wales, for example, the highest-class freight comprises such articles as boots, drapery, drugs, groceries, furniture, liquors, crockery and glassware, cutlery, ironmongery, confectionery, and carpets. In the same State the lowest-class freight includes agricultural produce, ores, manures, coal, coke, shale, firewood, limestone, stone, slates, bricks, screenings, rabbit-proof netting, timber in logs, and posts and rails.

21. **Numbers and Description of Rolling Stock, 1913.**—The following table shews the number of locomotives and rolling stock in use on the Government railways in each State, classified according to gauge:—

## CLASSIFICATION OF LOCOMOTIVES AND ROLLING STOCK, 1912-13.

| STATE.                    | GAUGE.      |              |             |             |             |        |

22. **Number of Railway Employees.**—The following table shews the number of employees in the Railway Departments of each State in the year 1901 and in each year from 1909 to 1913 inclusive, classified according to (a) salaried staff, and (b) wages staff.

From these figures it will be seen that there has been a steady increase in the number of persons engaged in the Railway Departments of the several States. During the period from 1901 to 1913, the total for the Commonwealth has increased from 42,321 to 83,503—an increase of 41,182, or about 97 per cent. The largest numerical increase for the individual States was that of New South Wales, viz., 18,627.

Separate returns for salaried and wages staff are not available for South Australia; the number of salaried staff is therefore included in the wages staff.

**GOVERNMENT RAILWAYS.—NUMBER OF EMPLOYEES IN RAILWAY DEPARTMENTS,  
1901 and 1909-13.**

\* Not available. † The returns up to and including the year 1908-9 include all accidents which have occurred on railway premises as well as those caused through train accidents and movement of rolling stock.

**(c) Graphical Representation of Government Railway Development.**

1. **General.**—Its railways are so important a factor in the development of Australia that it has been deemed desirable to graphically represent the main facts of their progress from their beginning, viz., from 1855 onwards. To this end the graphs shewn on pages 622 to 624 have been prepared. The distribution of the railways is shewn on the map on page 621.

2. **Capital Cost and Mileage Open** (page 622).—The graph shows that the ratio between these elements was, naturally enough, very variable from 1855 to 1870,

consequent upon progressive decrease in cost of construction. It then became subject to a more regular change, implying reduction of average cost.

**3. Cost per Mile Open.**—The fluctuations in cost per mile open are clearly indicated by the graph on page 622. In 1855 the cost per mile open was no less than £28,430; by 1858 it had fallen to £17,752, when it rose again to a maximum of £35,958 in 1862. It then diminished rapidly till 1883—when it reached £10,496 per mile—then slowly till 1887, when it amounted to £10,017 per mile. Again rising, this rate attained to £10,537 in 1892, since when it has, on the whole, been declining, reaching its lowest value, £9486, in 1911.

**4. Gross Revenue.**—This graph (page 622) exhibits considerable irregularities, the most striking of which are the maxima at 1892 and 1902. The fall commencing in 1892 was in consequence partly of the commercial crisis and partly of the then droughty conditions of several of the States, while that of 1902-3 was due to drought. In the latter case the recovery was very rapid.

**5. Working Expenses and Net Revenue.**—The characteristics of these graphs (page 622), are similar to those of "Gross Revenue," and the same remarks apply. It may be noted, however, that the working expenses are increasing at a faster rate than gross and net revenue.

**6. Percentage of Working Expenses to Gross Revenue.**—This is shewn for each State and for the Commonwealth on page 623, and for the Commonwealth only, on a larger scale, on page 622. The curve shews considerable fluctuations, but points also to the fact that, although a slight rise occurred in 1908, there was from 1903 to 1907 a rapid, and therefore very satisfactory, decline in the percentage of working expenses to gross revenue; since 1907, however, there has been a steady increase. The fluctuations of this percentage, for the individual States, call for no special comment.

**7. Percentage of Net Revenue on Capital Cost.**—For the Commonwealth this graph is shewn on a large scale on page 622 and on page 624 both for Commonwealth and States. After exhibiting somewhat remarkable oscillations in the earlier years, and less marked ones between 1885 and 1900, and also a rapid fall to 1903, the curve from that year shews a well marked increase until the year 1908, a slight fall occurring in that year and in 1909. The rise in 1911 is followed by a fall in 1912, and again in 1913. Maxima were reached in 1865, 1877, 1881, 1907, and 1911—viz., 3.44, 3.71, 4.14, 4.37 and 4.43 per cent.

For the individual States the results are in general very satisfactory, although the increases in the percentages for recent years have not been quite maintained in the years 1912 and 1913, with the exception of Tasmania, the figures for which State constituted a maximum in 1913.

The remarkable maximum for Western Australia in 1896 is consequent upon the large use made of the western railways at the time of the development of the Western Australian goldfields.

**8. General Indications of Graphs.**—Reviewing the cost of railways, as a whole, it may be noted that for the periods indicated the average cost per mile open is as follows:—

**GOVERNMENT RAILWAYS.—AVERAGE COST PER MILE OF LINE OPEN,  
COMMONWEALTH, 1855 to 1912.**

| Period ...    | ... | ... | ... | 1855-1872.  | 1873-1882.  | 1883-1892.  | 1893-1902.  | 1903-1912. |
|---------------|-----|-----|-----|-------------|-------------|-------------|-------------|------------|
| Cost per mile | ... | ... | ... | £<br>24,561 | £<br>13,700 | £<br>10,286 | £<br>10,010 | £<br>9,614 |

For the period 1903 to 1907 the fall in percentage of working expenses on gross revenue was from 69.51 to 57.18 per cent., but it then gradually increased to 68.13 per cent. in 1913. The rise of the percentage of net revenue on total capital cost for the years 1903 to 1907 was from 2.48 to 4.37 per cent. For the years 1908 to 1910 fell off, but rose to 4.43 per cent. in 1911, falling to 4.14 per cent. in 1912, and to 3.71 per cent. in 1913.

While the sinister influence of the drought of 1902 is strikingly shewn in the curves (a) by the fall in the gross and net revenue in 1902-3, (b) by the fall in the percentage of net revenue on capital cost, and (c) by the increase of working expenses on gross revenue, the rapidity of recovery is even more striking, and goes to indicate the great elasticity of the economic condition of the Commonwealth. Although during the last two years there has been a decrease in the percentage, the fact that a group of railways, necessarily constructed largely in accordance with a policy of widespread development of Australia's resources rather than as mere commercial enterprises, and costing so large a sum as £171,226,323 for construction and equipment up to the 30th June, 1913, should, nevertheless, yield so large a revenue, bringing in for the year 1912-13 a return, as already pointed out, of no less than 3.71 per cent.

#### (D.)—Private Railways.

1. **Total Mileage Open, 1913.**—As has been stated in a previous part of this Section (see A. 3) a number of private railway lines have from time to time been constructed in the Commonwealth. By far the greater proportion of such lines, however, has been laid down for the purpose of hauling timber, coal, or other minerals, and is not generally used for the conveyance of passengers or for public traffic; in many cases the lines are often practically unballasted and are easily removable, running through bush and forest country in connection with the timber and sugar-milling industries, and for conveying firewood for mining purposes. Many of these lines may perhaps be said to be rather of the nature of tramways than of railways. Private railways referred to herein include (a) lines open to the public for general passenger and goods traffic; and (b) branch lines from Government railways and other lines which are used for special purposes and which are of a permanent description. Other lines are referred to in the part of this Section dealing with Tramways (see § 3, *Tramways*).

The following table gives particulars of private railways in the Commonwealth open for traffic up to the 30th June, 1913. A classification of these lines according to their gauge has already been given (see A. 6).

MILEAGE OF PRIVATE RAILWAYS OPEN, 1913.

| Particulars.             | N.S.W. | Victoria. | Q'land. | S.A. | W.A. | Tas. | C'wealth. |
|--------------------------|--------|-----------|---------|------|------|------|-----------|
| For general traffic ...  | 153½   | 14        | 391     | ...  | 277  | 166  | 1,001½    |
| For special purposes ... | 113½   | 37        | 21      | 34   | 696½ | 56   | 958       |
| Total ...                | 267    | 51        | 412     | 34   | 973½ | 222  | 1,959½    |

2. **Classification of Private Railways.**—The subjoined statement gives particulars regarding private railways, so far as returns are available, in each State for the year 1912-13. In this statement the lines inset are sub-branches from the main branches specified.

## CLASSIFICATION OF PRIVATE RAILWAYS IN AUSTRALIA, 1912.

\* Approximate. † Also branch lines as follows:—Electric railway, 1½ miles long, to reduction works, 2 ft. gauge; surface railways, horse, ½ mile long, 2 ft. gauge. ‡ Extension under construction.

3. **New South Wales.**—In this State the mileage of private railways open to the public for general traffic at the end of 1912 was 153½, and of lines used for special purposes, 113½ miles. Most of these lines were constructed primarily for the purpose of conveying coal from the mines to the Government railway systems. Particulars for the year 1912 of the operations of lines open for general traffic are given, so far as available, in the table on page 647.

(i.) *Private Railways Open for General Traffic.* The most important of the lines open for general traffic are as follows:—(a) *The Deniliquin-Moama Line.* In 1874 permission was granted by the New South Wales Government to a private company to construct a line forty-five miles long from Deniliquin, in the Riverina district, to Moama, connecting with the Victorian Railway system at the Murray Bridge, near Echuca. The line was opened in 1876, the land required being granted by the Government. (b) *The Cockburn-Broken Hill Line.* This line is owned by the Silverton Tramway Company. It was opened in 1888, and connects Broken Hill with the South Australian railway system, having a total length of 36 miles. (c) *East Greta Line.* This line, belonging to the East Greta Coal Mining Company, runs from East Greta Junction, on the Northern line of the Government railways, to Stanford Merthyr, a distance of 8 miles. (d) *The New Redhead Coal Company's Railway.* The lines owned by this company branch from the Northern line of the Government railways, and run from Adamstown to Burwood Extended Colliery, and from Adamstown to Dudley Colliery, a total distance of 8 miles. The lines are worked by the Railway Department, coal waggons being supplied in part by the coal companies using the line. The colliery companies using the line pay a way-leave for right to run their coal over the line, and the Railway Commissioners allow the New Redhead Company a proportion of the revenue from the passenger and goods traffic. (e) *The Seaham Coal Company's Railways.* This line runs from Cockle Creek to West Wallsend and Seaham Collieries, and has a total length of 6 miles. (f) *Hexham-Minni Railway.* This line branches from the Northern line of the Government railways and has a length of 6 miles. Further particulars are not available. (g) *The Commonwealth Oil Corporation's Railway.* This line runs from Newnes Junction on the Great Western line of the Government railways to the company's refinery, a distance of 33 miles. The Shay geared type of locomotive is in use on this line. (h) *The Warwick Farm Line* is a short line, three-quarters of a mile in length, connecting the Government line near Liverpool with the Warwick Farm Racecourse. Government rolling-stock is used.

In addition to the lines referred to above, legislative sanction was obtained in 1890 for the construction of a private line from the flux quarries at Tarrawingee to the Broken Hill line, a distance of 36 miles. The line was purchased by the Government in 1901, and is operated by the Silverton Tramway Company under lease from the Chief Commissioner, who pays the working expenses and receives the ordinary earnings and one-half the net receipts on special and holiday traffic.

4. **Victoria.**—In Victoria the only private railway open for general traffic is the Kerang-Koondrook tramway, opened in 1889. The cost of construction of this line to the end of September, 1913, was £39,182, paid out of a loan advanced by the Victorian Government. The total length is 14½ miles. The line is at present controlled by the Kerang Shire Council, but proposals have recently been made for its transfer to the Railway Department.

A line running from Elsternwick to Oakleigh, a distance of about 5 miles, has been constructed by a private company, but is not in use.

5. **Queensland.**—In this State private railways open for general traffic may be grouped under two heads:—(i.) Lines constructed primarily for mining purposes and (ii.) Shire tramways.

(i.) *Mining Railways.* (a) *The Chillagoe Railway.* The most important of these is the Chillagoe railway, constructed under the Mareeba to Chillagoe Railway Act 1897, and opened in 1901. This line runs from Mareeba, on the Cairns railway, to Mungana,

a distance of 103 miles. (b) *The Stannary Hills Line*. This line branches from the Chillagoe railway at Boonmoo and runs to Rocky Bluff, *via* Stannary Hills, a total distance of 21 miles. The gradients on this line, which has a gauge of 2 feet, range as high as 1 in 27, while the radius of some of the curves is as low as  $1\frac{1}{4}$  chains. An additional length of 8 miles has been surveyed with a view to extending the line. (c) *The Mount Garnet Railway*. This line also branches from the Chillagoe railway at Lappa Junction and runs for a distance of 33 miles, as far as Mount Garnet.

(ii.) *Shire Tramways*. Under Part XV. of the Local Authorities Act of 1902 provision is made whereby not less than one-third of the ratepayers in any district may petition the local authority to apply to the Governor for the constitution of a tramway area. The Governor may define the area and may also approve of the plans and specifications of the proposed tramway. The amount which may be advanced by the Government for the construction or purchase of a tramway may not exceed a sum equal to £3000 for every mile of its length. As regards repayment of loans, no sum need be paid during the first three years, but after the expiration of that period the principal and interest must be repaid by half-yearly instalments on the basis provided for by the 'Local Works Loans Act, 1880 to 1899.' For the purpose of raising the money to pay these instalments the local authority may levy a rate upon all ratable property within the tramway area. The money required for the tramway may be raised by the local authorities by the issue of debentures.

6. **South Australia.**—In this State there are no private railways open for general traffic. The only private line is that owned by the Broken Hill Proprietary Company, running from Iron Knob to the seaboard near the head of Spencer's Gulf, a distance of 34 miles. The line is utilised for the carriage of flux for use in connection with the smelting works at Port Pirie.

7. **Western Australia.**—Owing to the Government's past difficulty in constructing lines urgently required for the development of the country, private enterprise was encouraged to undertake the work of construction on the land-grant principle, and two trunk lines were thus constructed. The greater part of the private lines now open, however, have been constructed in connection with the timber industry. (i.) *The Midland Railway*. This line is 277 miles in length, and runs from the Midland Junction, ten miles from Perth, to Walkaway, where it joins the Government line running to Geraldton. It was constructed under a concession of 12,000 acres of land per mile of line constructed, to be selected along the entire route of the railway. (ii.) *The Great Southern Railway*. This line, which was built by private enterprise under the land-grant system, is 242 miles in length, and was acquired by the Government by purchase on the 1st January, 1897. The total price paid, with all the interests of the private company and of the original concessionaire, was £1,100,000, which was divided by the Government for book-keeping purposes into £300,000 for the land and £800,000 for the railway. (iii.) *Millar's Timber Trading Company's Lines*. These lines have mostly been built under special timber concessions and leases. There were, at latest date available, in all ten lines situate in various parts of the State extending into the bush, whence logs are brought to the mills. The total length of these lines was approximately 306 miles. (iv.) *Other Lines*. There are also a number of other lines in various parts of the State used chiefly in connection with the timber industry. These are specified in the tabular statement on page 644.

8. **Tasmania.**—In this State there are three private lines open for general traffic. They are all situated in the western part of the island.

(i.) *The Emu Bay Railway Company*. The lines owned by this company run from Burnie to Waratah, from Guildford to Zeehan, and from Rayna to Dundas, and have a total length of 104 miles.

(ii.) *The Mount Lyell Mining and Railway Company*. The Mount Lyell railway runs from Regatta Point, Strahan to Queenstown, and the North Mount Lyell line from Kelly Basin to Linda. The former line, 22 miles in length, was constructed in 1895-6,

while the latter line, 30 miles long, was taken over from the North Mount Lyell Copper Company on the amalgamation of the two companies in 1903. The line from Kelly Basin to Linda is now run only intermittently.

(iii.) *The Magnet Silver Mining Company's Railway.* This line runs from Magnet Junction, near Waratah, on the Emu Bay Company's line to Magnet, a distance of 10 miles.

9. *Operations of Private Railways, 1912.*—The tabular statement given below shews particulars, so far as returns are available, for the year 1912 of all private railways open to the public for general traffic in the Commonwealth:—

### PARTICULARS OF PRIVATE RAILWAYS OPEN FOR GENERAL TRAFFIC, 1912.

| Line.                | Miles Open. | Capital Cost. | Gross Revenue. | Expenses. |               | Train Miles. | Passenger Journeys. | Tons of Goods, etc. | No. of Employees. | Rolling Stock. |          |         |
|----------------------|-------------|---------------|----------------|-----------|---------------|--------------|---------------------|---------------------|-------------------|----------------|----------|---------|
|                      |             |               |                | Working.  | Interest etc. |              |                     |                     |                   | Locos.         | Coaches. | Wagons. |
|                      | No.         | £             | £              | £         | £             | No.          | No. '000.           | Tons '000.          | No.               | No.            | No.      | No.     |
| NEW SOUTH WALES.     |             |               |                |           |               |              |                     |                     |                   |                |          |         |
| Deniliquin-Moama     | 45          | 162,672       | 17,877         | 10,148    | 281           | 36,201       | 16                  | 34                  | 47                | 4              | 6        | 63      |
| Silverton Tramway    | 36          | 457,592       | 205,071        | 65,350    | b             | 158,368      | 59                  | 1,070               | 290               | 18             | c        | 680     |

### § 3. Tramways.

1. **General.**—Tramway systems are in operation in all the States of the Commonwealth, and in recent years considerable progress has been made in the adoption of electrical traction, the benefit of which is now enjoyed by a number of the principal towns of the Commonwealth.

There are also in many parts of Australia private tramway lines which are used for special purposes, usually in connection with the timber, mining, or milling industries. Though efforts have been made to collect particulars of these lines, the returns are generally too incomplete for publication.

(i.) *Total Mileage Open and Classification of Lines.* The following table shows the total mileage of tramway lines open for general passenger traffic in each State and in the Commonwealth at the end of the year 1912-13, classified (a) according to the motive power utilised and (b) according to the nature of the authority by which the lines are controlled:—

**TRAMWAYS.—CLASSIFICATIONS OF MILEAGE OPEN FOR PASSENGER TRAFFIC, 1912-13.**

| Nature of Motive Power and Controlling Authority. | N.S. Wales. | Victoria. | Q'land. | South Australia. | Western Australia. | Tas.   | C'wealth. |

| Total ... ..                                      | 212         | 116       | 34      | 75½              | 79                 | 16     | 532½      |

2. **New South Wales.**—In this State the Tramways, with but few comparatively unimportant exceptions, are the property of the Government, and are under the control of the Railway Commissioners.

(i.) *Government Tramways.* In Sydney and suburbs the Government tramways are divided into distinct systems. There were in June, 1913, seven such systems in operation within the metropolitan area, the most important being the city and suburban lines, 104½ miles in length (189½ miles single track); the North Shore line, 18½ miles in length (32 miles single track), the Ashfield to Mortlake line, (8½ miles); and Manly to the Spit (10 miles). All of these systems are now operated by electricity. There are two systems on which the motive power used is steam, namely—(a) from Kogarah to Sans Souci, 5½ miles in length, and (b) from Arncliffe to Bexley, 2½ miles long,

There are also Government steam tramways in operation at Newcastle, Broken Hill, Parramatta, from East to West Maitland, and from Sutherland to Cronulla. The gauge of line on all the Government tramways is 4 feet 8½ inches.

(a) *Sydney Tramways.* In the early sixties a horse tramway, 1½ miles long, was constructed in Sydney. Owing to the rails being laid higher than the road surface, the inconvenience thus caused to other traffic necessitated its removal, and it was not until September, 1879, that the first steam tramway was opened, running from Bridge-street to Hay-street *via* Hunter-street. In the following few years these steam tramways were considerably extended. The electric system was not introduced into the city until the close of the year 1899, though it had at that time been in operation for some years in North Sydney. The tramways in the heart of the city, running along King-street to the suburb of Woollahra, as well as those in North Sydney, were originally worked by underground cables, and have since been converted into electric lines on the overhead trolley system. In December, 1899, the electric tramway, extending from the Circular Quay along George-street to the Redfern Station, and thence to the densely-populated district of Pyrmont, was opened for traffic. This tramway is a double track, and is 3¼ miles in length. Single lines have been constructed along Castlereagh and Pitt streets, with the object of relieving the traffic along George-street. The whole of the steam tramways in Sydney and suburbs, with the exception of the Kogarah-Sans Souci, and the Arncliffe-Bexley, have now been converted into electric lines, and provision for the extra power required for the electrification of the former of these lines has been made at the central power station. A new sub-station has been erected at Narrabeen.

(b) *Other Tramway Systems.* In Newcastle the first section of the tramways, from Perkins-street to Plattsburg, was opened in 1887; the total length open on the 30th June, 1913, was 28 miles. At Broken Hill and Parramatta the first sections of the tramways were opened in 1902. On the 30th June, 1913, the mileage open at Broken Hill amounted to 9, and at Parramatta to 6½ miles. The line from East to West Maitland, 4½ miles long, was opened in February, 1909. There are also three short lengths of tramways in New South Wales run by private companies. Further particulars are given below.

(c) *Particulars of all Government Tramways.* The following table shews the total length, the capital cost, the gross revenue, working expenses, and net earnings, and the percentages of working expenses on gross revenue, and of net earnings on capital cost, for the financial years 1901-2 and 1908-13:—

**NEW SOUTH WALES.—PARTICULARS OF WORKING OF GOVERNMENT TRAMWAYS,  
1901-2 and 1908-13.**

| Year ended the 30th June. | Total Length of Lines Open. | Capital Expended on Lines Open. | Gross Revenue. | Working Expenses. | Net Earnings. | Percentage of Working Expenses on Gross Revenue. | Percentage of Net Earnings on Capital Cost. |
|---------------------------|-----------------------------|---------------------------------|----------------|-------------------|---------------|--|---|
|                           | Miles.                      | £                               | £              | £                 | £             | per cent.  | per cent.                                   |
| 1901-2                    | 104                         | 2,829,363                       | 631,757        | 541,984           | 89,773        | 85.79  | 3.19  |
| 1908-9                    | 151½                        | 4,252,731                       | 1,097,565      | 875,560           | 222,005       | 79.77  | 5.61  |
| 1909-10                   | 165½                        | 4,668,797*                      | 1,185,568      | 983,587           | 201,981       | 82.96  | 4.33  |
| 1910-11                   | 190                         | 5,121,586*                      | 1,365,631      | 1,143,949         | 221,682       | 83.77  | 4.33  |
| 1911-12                   | 195½                        | 5,664,324*                      | 1,581,393      | 1,331,413         | 249,980       | 84.19  | 4.41  |
| 1912-13                   | 208                         | 6,699,305*                      | 1,754,566      | 1,572,190         | 182,376       | 89.61  | 2.94  |

\* £47,455 of this sum has been paid from the Consolidated Revenue, and no interest is payable thereon.

The net result, after providing for all working expenses and £192,284 for interest on the capital invested, was a deficit of £32,456 in 1912-13, as compared with a surplus of £57,696 in the preceding year. During the year 1912-13, 294,455,452 passengers were carried without any accident resulting in loss of life to any of the passengers.

(d) *Particulars of Different Systems of Government Tramways.* In the subjoined statement particulars are given of the working of the electric and steam tramways in Sydney, and of the other Government tramways at Parramatta, Sutherland, Newcastle, Maitland, and Broken Hill.

**NEW SOUTH WALES.—PARTICULARS OF THE WORKING OF THE VARIOUS  
GOVERNMENT TRAMWAYS, 1912-13.**

| Line.                    | Length | Total Cost. | Gross Revenue. | Working Expenses. | Interest. | Profit or Loss.* |

| Total...                 | 208    | 6,699,305   | 1,754,566      | 1,572,190         | 214,832   | —32,456          |

\* The positive sign indicates a profit, the negative a loss.

The total capital cost shewn in the preceding table was made up as follows :—

**CAPITAL COST OF NEW SOUTH WALES GOVERNMENT TRAMWAYS AS AT  
30th JUNE, 1913.**

| Permanent Way. | Rolling Stock. | Power-house, Sub-stations, and Plant. | Machinery. | Workshops. | Furniture. | Total.     |
|----------------|----------------|---------------------------------------|------------|------------|------------|------------|
| £3,513,784     | £1,547,450     | £1,342,108                            | £91,275    | £202,296   | £2,392     | £6,699,305 |

The average cost per mile open was £16,904 for permanent way and £15,324 for all other charges, making a total of £32,228 per mile.

During the year 1912-13, twelve new extensions, amounting in all to a length of 12 miles, were opened for traffic. On the 30th June, 1913, two extensions, having a total length of a mile, were under construction, and up to the same date two additional extensions, amounting to about 3½ miles, had been authorised for construction.

(e) *Sydney Electric Tramways.* The current for the operation of the city and sub-urban tramways is generated at the power-house at Ultimo, which has been erected at a total cost of £989,653, including the cost of the sub-stations and plant. The current generated at the power-house is partly continuous and partly alternating, and is used both for lighting and traction purposes. The standard voltage of the continuous current is 600; the alternating current is transmitted by means of high-tension cables to sub-stations, where it is converted to continuous current at the standard voltage. The total output of the power-house, for both lighting and traction purposes, during the year 1912-13, was 89,113,036 kilowatt-hours, of which the direct-current supply was 11,022,341, and the alternating current 78,090,695 kilowatt-hours. The following table gives particulars of the working of the electric tramways for the financial years 1901-2 and 1909-13 :—

\* Including £50,500 written off for depreciation, etc.

The net revenue on capital invested was 2.96 per cent. in 1912-13 as against 4.89 per cent. in the preceding year.

(ii.) *Private Tramways.* There are two private tramway lines in New South Wales open for general traffic. (a) There is an electric tramway running from Rockdale to Brighton-le-Sands, a distance of one and a-quarter miles with a gauge of 4 ft. 8½ in. This line was originally opened as a steam tramway in 1885, but was subsequently converted into electric. The total cost to the end of 1911 was £13,800. During that year the number of tram-miles run was 37,000. (b) A private steam tramway passes through the township of Parramatta. Commencing at the park gates, it runs as far as the Duck River, a distance of 3½ miles, where it connects with the Parramatta River steamers, conveying passengers and goods to and from Sydney. This line, the gauge of which is 4 ft. 8½ in., was opened for traffic in 1883. In 1912 the number of tram miles run was about 18,000, and the number of passengers conveyed about 96,000.

Particulars regarding private tramways used for special purposes are not available.

(iii.) *Sydney Harbour Ferries.* As the ferry services on the waters of Port Jackson are mainly subsidiary to the suburban railway and tramway systems, it has been thought advisable to include them here rather than under shipping. Returns for the year 1912 were received from four companies, and shew that these companies had 65 boats in commission, which were licensed to carry a total of 43,858 passengers, or an average of 674 per boat and per trip. The total number of passengers carried during the year is stated as 32,777,000, an average of 89,800 per day. In addition to the ordinary passenger traffic there are two lines providing for vehicular traffic, which afford the only rapid means of transit between the city and the northern suburbs. The four companies employed during the year a total of 888 persons. The gross revenue during 1912 amounted to £303,149, and the expenditure to £207,423, thus giving

a net revenue of £95,726. The services are well managed, and the boats constructed during recent years—double-ended screwboats—are claimed to be superior in size and equipment to boats employed on similar service in any part of the world.

3. *Victoria.*—In Melbourne there is a number of tramway systems carried on under the control of various authorities, the most important being the cable system worked by the Melbourne Tramway and Omnibus Company. There are also three lines of electric tramways, one running from St. Kilda to Brighton, a distance of five and one-eighth miles, belonging to the Government, and under the control of the Railway Commissioners; one from Flemington Bridge to the Saltwater River and Keilor Road, a distance of seven and a-quarter miles, run by a private company; and one connecting the southern suburbs of Prahran, Malvern, Caulfield, St. Kilda, Hawthorn and Kew. This system has a track mileage of 38 miles and is controlled by a joint municipal trust. There is also a private cable tramway, two and a-quarter miles in length, between Clifton Hill and Preston. There are also two tramways worked by horses—one, seven miles in length, running from Sandringham to Cheltenham via Beaumaris, and privately owned, the other, one and a-half miles long, from Brunswick to Coburg, and owned by the Coburg municipality, while three similar services are worked by the Melbourne Tramway and Omnibus Company, viz., Victoria Bridge to Kew, Richmond Bridge to Hawthorn, and the Zoological Gardens lines. It is intended to electrify the Brunswick-Coburg line at an early date. There is a short steam tramway, about one mile long, at Sorrento, and there are also systems of electric tramways at Ballarat, Bendigo, and Geelong, constructed and run by private companies. A number of tramways has been constructed for special purposes in various parts of the State under the provisions of the Tramway Act 1890.

(i.) *Melbourne Cable Tramways.* The Melbourne Omnibus Company began its services by the initiation of omnibus services in 1869, and in 1878 the company changed its name to the Melbourne Tramway and Omnibus Company, with a view to the introduction of a tramway system in the city and suburbs of Melbourne. It was not, however, until the year 1883, when the Melbourne Tramway and Omnibus Company's Act was passed, that the necessary authority was given by Parliament for that purpose. Under this Act the company was empowered to construct tramways in the streets of Melbourne and suburbs, with the consent of the municipalities interested, who had the option of electing to construct the tramways themselves. All the municipalities decided to exercise the option conferred upon them, and, according to the provisions of the Act, a Tramways Trust was formed. This body, which is composed of seven members from the Melbourne City Council and one member each from the councils of eleven of the surrounding municipalities, received full power to construct tramways, and to borrow money for that purpose, secured on the municipal properties and revenues and on the tramways themselves. The Trust raised sufficient funds to pay for the construction of the tramway-tracks and the engine-houses from which the cables are worked. It was required by the original Act, as amended in 1892, to complete the tramways by the end of the year 1893, and to grant a thirty-two years' lease of the tramways to the company, dating from the 1st July, 1884—when the liability for interest on the loans commenced—and expiring on the 1st July, 1916. The company is required to find sufficient capital to build the rolling-stock and to equip the lines and engine-houses with all necessary working requisites. The company pays to the Trust annually the interest due upon the loans raised, and also a sufficient sum as a sinking or redemption fund, to repay by its accumulation the principal of the loans raised by the Trust, and at the expiration of the lease must hand back the lines in good working order to the Trust. The expenses of the Trust were paid out of the loan up to the end of the year 1903, but since that date have been paid by the company to an amount not exceeding £1000 per

annum, the municipalities being liable for the remainder. The total amount the Trust was empowered to borrow was £1,650,000, which has been raised in London by means of debentures bearing interest at  $4\frac{1}{2}$  per cent. The premiums received amounted to £55,794, making a total of £1,705,794. This amount had been expended by the end of the year 1893, when further loan expenditure ceased. The first line—that to Richmond—was opened to traffic in November, 1885, and the work being rapidly pushed on, the others were opened at short intervals, and the whole system was completed in 1891. The complete system consists of forty-three and a half miles of double-track cable lines, using constantly over ninety miles of wire rope, and four and a half miles of double-track horse lines. The gauge of track is 4 feet  $8\frac{1}{2}$  inches.

(a) *Particulars of Working.* The subjoined statement shews the tram mileage, the number of passengers carried, and the revenue and expenditure for the years 1901-2 and 1909 to 1913:—

\* Including amounts on account of omnibus lines.

It may be noted that the "Wages" item in the above table does not represent all that is paid in wages by the company, as a considerable portion is merged in the item "Repairs and maintenance." The figures under working expenses classed as "Other" comprise feed, fuel, licenses, rates, insurance, law costs, stationery and office expenses, salaries of staff, and directors' and auditors' fees.

(ii.) *Electric Tramways.* There are in Melbourne three electric tramway systems, namely (a) the St. Kilda-Brighton line, (b) the North Melbourne tramways, and (c) the Prahran-Malvern system.

(a) *The St. Kilda-Brighton Line.* Under the St. Kilda and Brighton Electric Street Railways Act 1904 the Board of Land and Works was authorised to construct a tramway from St. Kilda to Brighton. The amount of interest payable on the cost of the land acquired for the tramway was guaranteed by the municipalities of St. Kilda and Brighton for a period of twenty years, and authority was given by the Act to the municipalities to levy either a general or special rate not exceeding one shilling in the pound for the purpose of paying the guarantee. The profit, if any, during the first twenty years is to be set off in reduction of the guarantee. The line was opened for traffic in May, 1906, and the extension to Brighton Beach was opened in the following year. A proposal has been made to extend the line along the foreshore as far as Mordialloc. The capital cost to the 30th June, 1913, exclusive of rolling-stock, was £65,944, and of rolling-stock was £22,189, making a total of £88,133. The gauge of track is 5 ft. 3 in. The subjoined statement gives particulars of the working of this line for the financial years ended the 30th June, 1909 to 1913:—

## ST. KILDA-BRIGHTON ELECTRIC STREET TRAMWAY, 1908-13.

| Year ended 30th June. | Mileage Open. | Capital Cost. | Car Mileage. | Passengers Carried. | Gross Revenue. | Working Expenses. | Interest. | Net Profit or Loss.* |
|-----------------------|---------------|---------------|--------------|---------------------|----------------|-------------------|-----------|----------------------|
| 1908                  | 5.13          | £ 57,523      | 335,007      | 1,146,484           | £ 10,374       | £ 14,299†         | £ 2,140   | £ —6,065             |
| 1909                  | 5.13          | 58,054        | 338,214      | 1,265,492           | 10,941         | 9,075             | 2,038     | — 172                |
| 1910                  | 5.13          | 58,612        | 340,254      | 1,361,925           | 11,885         | 9,860             | 2,092     | — 67                 |
| 1911                  | 5.13          | 59,007        | 346,849      | 1,410,907           | 12,852         | 9,819             | 2,107     | + 926                |
| 1912                  | 5.13          | 60,590        | 367,306      | 1,674,918           | 15,012         | 13,283            | 2,078     | — 349                |
| 1913                  | 5.13          | 88,133        | 413,939      | 1,916,618           | 16,829         | 15,808            | 3,093     | —2,072               |

\* Profit is indicated by +, Loss by —. † Including an amount of £3311 for replacement of rolling-stock, etc., caused by fire.

The average fare paid per passenger was 2.09 pence in 1912-13 as against 2.13 pence in 1911-12. The gross revenue in 1912-13 was 9.76 pence per passenger car mile and £3088 per mile of track open. In the same year the percentage of working expenses on gross revenue was 93.9 as against 88.5 in the preceding year.

(b) *The North Melbourne Tramways*, extending through the northern suburbs to the Saltwater River and to Keilor Road, were constructed by a private company, and were opened for traffic towards the end of the year 1906. The route mileage for year ended 30th September, 1913, was 11½ miles, the gauge of line being 4 feet 8½ inches. The number of passengers carried during the same period was 2,591,000.

(c) *The Prahran-Malvern Tramway*. This line has been constructed under the control of a trust, which consists of five members appointed from the councils of Prahran, Malvern, St. Kilda, and Caulfield. The municipalities of Hawthorn and Kew have now been included in the scheme and will have equal representation on the trust. The total track mileage to 30th December, 1913, was 15½ miles, the total capital cost being £238,000, but an additional 22 miles has since been opened, the cost of the extension being £171,815. The gauge of the track is 4 ft. 8½ in. The current is supplied by the Melbourne Electric Supply Company Limited at a price varying according to the consumption of current and the price of fuel. Any surplus revenue, after providing for operating expenses, interest, sinking fund and renewal reserve, is to be paid to the municipal councils interested in proportion to the car mileage run in their respective districts. The lines were opened for traffic on 31st May, 1910. During the year ended 30th September, 1913, the current used for traction purposes was 1,913,266 kilowatt-hours, and the number of tram miles run was approximately 995,972, the number of passengers carried 9,110,656, the gross revenue £59,123, and the working expenses (excluding interest and renewals reserve) £39,686. The number of cars in use was 53, and the number of persons employed 260. It is intended to construct an additional 6 miles of line.

(d) *The Ballarat and Bendigo Electric Tramways* are under the control of a private company, and run along the main streets and to and from the outlying suburbs of the two cities. The total length of lines open for traffic is 22 miles, the gauge being 4 ft. 8½ in. During 1912, 5,737,143 passengers were carried, the gross revenue being £51,907, and the working expenses £35,820.

(e) *The Geelong Electric Tramways*. This line, which is privately owned, was opened for traffic in January, 1912, and up to the 31st August, 1913, the cost of construction and equipment was £43,910. The system has a length of 5½ miles of single track, the gauge being 4 ft. 8½ in. The car mileage was for the year ending on that date 184,788 miles, and the number of passengers carried 949,941. For the same period the revenue was £11,980, and the expenditure £9784.

(f) *Particulars of Working of all Electric Tramways.* The following table gives particulars of the working of all electric tramways in Victoria for each year from 1908 to 1913 inclusive:—

**VICTORIA.—PARTICULARS OF WORKING OF ELECTRIC TRAMWAYS, 1908 to 1913.**

| Year. | Mileage Open for Traffic. | Total Cost of Construction and Equipment. | Current Generated for Traction Purposes at Central Stations. | Tram Miles Run.    | Number of Passengers Carried. | Gross Revenue. | Working Expenses. | Number of Cars in Use. | Number of Employees. |

\* Incomplete. † Exclusive of Prahran-Malvern Tramway, which was opened for traffic on 31st May, 1910. ‡ Exclusive of North Melbourne Tramway.

(iii.) *Private Tramways for Special Purposes.* There is in Victoria a number of tramways used for special purposes, chiefly in connection with the timber, mining, and milling industries. These lines have been constructed either under authority of the Department of Public Works, pursuant to Section 36 of the Tramway Act 1890, or under leases or licenses issued by the Department of Lands and Survey, pursuant to Sections 144 and 145 of the Land Act 1901. Particulars of these lines are too incomplete for publication.

4. *Queensland.*—In this State there is a system of electric tramways running through the streets of the city and suburbs of Brisbane and controlled by a private company which has its head office in London. The total length of the Brisbane system was thirty four and one-third miles at the end of the year 1913. There is also a number of tramways, having a total length of about 640 miles, run in connection with sugar mills. Particulars of Shire tramways have been given in the part of this section dealing with private railways (see p. 646).

(i.) *Brisbane Electric Tramways.* These tramways are run on the overhead trolley system, the voltage of the line current being 550. The total cost of construction and equipment to the end of the year 1909 was approximately £1,250,000, the gauge of line being 4 ft. 8½ in. The following table gives particulars of these tramways for the calendar years 1901 and 1908-12.

\* Not available.

(ii.) *Sugar-Mill Tramways.* There is a number of tramways in various parts of Queensland used in connection with the sugar-milling industry, chiefly for the purpose of hauling cane to the mills. Some of these lines are of a permanent nature, running through sugar-cane plantations, while others are portable lines running to various farms.

5. **South Australia.**—Up to the year 1906 there was a number of horse tramways in the principal streets of Adelaide and suburbs run by various private companies. Power to acquire part of these lines, with a view to their electrification, was given to the Adelaide Corporation by the Municipal Tramways Trust Act 1906. In accordance with the provisions of the Act, a Trust consisting of eight members, of whom two were nominated by the Governor, two elected by the City Corporation, and two each by the Suburban Corporations and the District Councils, was formed in 1907, and a length of forty-nine route miles of horse traction tramways was purchased from the private companies at a cost of £283,357. On the 9th March, 1909, the electric car system was inaugurated on the Kensington route. At the end of July, 1913, a length of 49½ route miles had been electrified and opened for traffic, the corresponding length of track opened being 88 miles. The power-house is located at Port Adelaide, nine miles from the city. It is equipped with three 1500-kilowatt turbo-alternators generating current at 11,000 volts, which are stepped down and passed through rotary converters to direct current at 600 volts. The cost of construction and equipment on the 31st July, 1913, was £1,350,710. The following table gives particulars of the tramways for the year ended 31st July, 1913 :—

**SOUTH AUSTRALIA.—ADELAIDE ELECTRIC TRAMWAYS.—PARTICULARS OF WORKING, 1912-13.**

\* Inclusive of price of current.

There are also in South Australia nineteen and three-quarter miles of Government horse tramways in country districts, worked in connection with the railway system, and six and one-quarter miles of private tramways used for passenger service. The subjoined statement gives various particulars of these lines :—

6. **Western Australia.**—In this State there are a number of horse tramways, amounting in all to a length of  $26\frac{1}{2}$  miles, which are the property of the Government. Of these the most important is the line between Roeburne and Cossack, constructed on a 2 ft. gauge and under the control of the Colonial Secretary's Department. The length of this line is  $12\frac{1}{2}$  miles. The remaining  $14\frac{1}{2}$  miles belonging to the Government are made up of ten short lengths, varying from two and a half chains to four and a quarter miles, worked in connection with the jetties at various ports for the purpose of providing the necessary communication between such jetties and the goods sheds or warehouses. Most of these short lines are leased at annual rentals, and are under the supervision of the Harbour Master. Their maintenance and improvement is in the hands of the Public Works Department. In addition to these Government lines there are electric tramway systems at Perth and Kalgoorlie, carried on by private companies, and at Fremantle and Leonora, under municipal control.

(i.) *Government Tramways.* Particulars as to the working of the Government horse-tramways or as to the rents received therefrom are not generally available. The returns of the Roeburne-Cossack line for the year ended 30th June, 1913, shew that the capital cost of the line to that date was £49,319, the gross revenue for the year being £3353, and the working expenses £2498.

(ii.) *Electric Tramways.* There are now five towns in Western Australia which enjoy the benefits of electric tramway systems, namely, Perth, Fremantle, Kalgoorlie, Boulder City, and Leonora.

(a) *The Perth Electric Tramways* were opened for traffic by a private company in 1899, and the system has since been extended to many of the outlying suburbs. This tramway system was taken over by the Government on 1st July, 1913, and is now running in conjunction with the Government railways. On the 31st December, 1912, there were  $22\frac{1}{2}$  miles of line open, the total cost of construction and equipment to that date being £486,291. During the year 10,242,934 passengers were carried, the gross revenue being £101,046 and the working expenses £50,576. Fifty-one motors were in use, and the number of employees was 242. The gauge of line is 3 ft. 6 in.

(b) *The Kalgoorlie and Boulder City Tramways* are also run by a private company, the first line being opened in 1902. At the beginning of 1904 legislative authority was given for the construction of lines in Boulder City and suburbs, and in November, 1904, the last section of the Boulder system was completed. At the end of the year 1912 the total mileage of the whole system—in Kalgoorlie and Boulder City—amounted to 19 miles, the total cost of construction and equipment being £449,128. During the year, 2,489,833 passengers were carried, the gross revenue being £37,811 and the working expenses £26,497. The gauge of this line is 3 ft. 6 in.

(c) *The Fremantle Tramways* were opened in November, 1905, under the control of the municipality. On the 31st August, 1913, there were  $8\frac{3}{4}$  miles of line open for traffic, the cost of construction and equipment at that date being £101,554. This line has a gauge of 3 ft. 6 in. During the year 4,115,000 passengers were carried, the gross revenue being £32,000 and the working expenses £25,300.

(d) *The Leonora-Gwalia Tramway*, three miles in length, formerly a steam tramway, was opened for traffic by electrification on 5th October, 1908. This tramway is under municipal control, and has a gauge of 3 ft. 6 in. The cost of construction is approximately £5500, and during the year ended 31st October, 1913, 99,925 passengers were carried.

(e) *Particulars of Working of all Electric Tramways.* The subjoined table shews, so far as returns are available, particulars of the working of all electric tramway systems in the State for the years 1901 and 1908-12.

\* For the years 1908 to 1912 inclusive, miles of route are given; for 1901 the figures represent miles of single track. † Not available. ‡ Exclusive of Leonora Tramway.

7. **Tasmania.**—In Hobart there is a system of electric tramways, amounting in all to a length of nine miles, owned by a private company. Under the authority of the Launceston Tramway Act of 1906 the Launceston City Council entered into an agreement with a private company for the construction of a system of electric tramways in the city and suburbs of Launceston. The agreement provided that the company was to run the tramways for a period of twenty-five years, when the Council could purchase the lines and stock at cost price; the electric power required was to be supplied by the Council. This agreement, however, lapsed, and the Council has constructed the tramways, and is running them as a municipal undertaking. The system, which was opened on the 16th August, 1911, has a route mileage of about 7½ miles, the gauge of track being 3 ft. 6 in. The total cost of construction and equipment to the end of July, 1913, amounted to £70,871. Fourteen cars with motors were in use; and the number of employees totalled 80. The number of passengers carried during the year 1912-13 was 2,170,000 and the car mileage was 327,565 miles. The gross revenue for the same period was £17,155, and the working expenses £13,332.

(i.) *Hobart Electric Tramways.* These tramways were opened for traffic in 1893, the total cost of construction and equipment to the 31st December, 1912, being £92,121. The line has a 3 ft. 6 in. gauge. The following table gives particulars of the working of this system for the years 1901 and 1908-12:—

8. **Electrical Traction in Commonwealth, 1912-13.**—The subjoined table gives particulars of electric tramways for each State and the Commonwealth. The returns for the Hobart tramways in Tasmania, for the Ballarat and Bendigo tramways in Victoria, for the Rockdale-Brighton-le-Sands in New South Wales, for the Perth and Kalgoorlie tramways in Western Australia, and for the Brisbane tramways, are for the calendar year 1912; and for other tramways the returns are, generally, for the financial year 1912-13:—

## SECTION XVIII.

## POSTS, TELEGRAPHS, AND TELEPHONES.

## § 1. Posts.

**1. The Commonwealth Postal Department.**—Under the provisions of section 51 of the Commonwealth Constitution Act the Commonwealth Parliament was empowered to make laws with respect to the control of the postal, telegraphic, and telephonic services in Australia, and by proclamation, made under section 69 of the same Act, the six separate State Post and Telegraph Departments were amalgamated and taken over by the Federal Executive on the 1st March, 1901. On the 1st December following, the Commonwealth Post and Telegraph Act 1901 came into operation, and the provisions of the various State Acts referring to the postal and telegraphic services thereby ceased to apply; it was, however, specially provided by the Act of 1901 that, until such provisions should be revoked by the Governor-General, all regulations in force, and all rates and charges levied under any State Act, should continue in force and be applied in the same manner as if such State Act were not affected by the Commonwealth Act. The administration of the Act of 1901 was placed in the hands of a Postmaster-General, a responsible Minister with Cabinet rank, and of a Secretary having chief control of the Department throughout the Commonwealth under the Postmaster-General, whilst a principal officer in each State was provided for under the style of Deputy Postmaster-General. The rates and charges levied in each State for the transmission of letters, telegrams, and postal articles at the date of Federation remained in force until the Post and Telegraph Rates Act came into operation on the 1st November, 1902. This Act secured uniformity throughout the Commonwealth in the rates charged for the conveyance of newspapers by post, and for the transmission of telegrams, but did not alter the charges made in the individual States for the transmission of letters, cards, parcels, and packets. Uniform postage rates now exist in all the States under the Postal Rates Act of 1910, which came into operation by proclamation on the 1st May, 1911. (See paragraph 6 hereof.)

In previous issues of the Year Book will be found a brief description of the postal services in the earlier period of Australian history. (See Year Book No. 5, page 754.)

**2. Development of Postal Services.**—In 1841 the number of post offices open in Australia was 102, situated mainly in New South Wales and Tasmania. At the end of ten years 101 post offices were open in New South Wales, 44 in Victoria, 72 in South Australia, and 51 in Tasmania. From the year 1851 onwards a remarkable increase in the number of post offices in Australia took place, until, in 1891, the number open on the mainland and Tasmania totalled 4463, of which 1384 were situated in New South Wales, 1729 in Victoria, 307 in Queensland, 629 in South Australia, 86 in Western Australia, and 328 in Tasmania.

On the 31st December, 1912, the postal business had increased to such an extent that 5772 post offices were open for business, of which number 2000 were situated in New South Wales, 1730 in Victoria, 593 in Queensland, 668 in South Australia, 390 in Western Australia, and 391 in Tasmania.

3. **State, Interstate and Oversea Postages for whole Commonwealth.**—In the following table the matter dealt with is divided into (i.) matter posted in the Commonwealth for delivery within the Commonwealth, (ii.) matter received from places outside the Commonwealth, (iii.) matter despatched to places outside the Commonwealth, and (iv.) total postal matter dealt with by the Commonwealth Postal Department in 1901 and from 1908 to 1912, but excluding Interstate Excess.

**STATE, INTERSTATE, AND OVERSEA POSTAGES FOR WHOLE COMMONWEALTH,  
1901 and 1908-12.**

| Commonwealth...       | 24,146 | 9,363 | 3,357 | 89 |

\* Including packets. † Included with newspapers.

5. **Postal Facilities.**—The subjoined statement shews the number of post and receiving offices, the area in square miles and the number of inhabitants to each post office (including receiving offices) in each State and in the Commonwealth at the end of the year 1912. It will be observed that the most sparsely populated States have the greatest number of offices in comparison with their population, but in order to judge the relative extension of postal facilities the area of country to each office must also be taken into account. The returns given for South Australia in this and all succeeding tables include those for the Northern Territory. Similarly, the returns for the Federal Territory are included in those for New South Wales.

**SQUARE MILES OF TERRITORY AND NUMBER OF INHABITANTS TO EACH POST  
AND RECEIVING OFFICE, 1912.**

| State.  | *<br>N.S.W. | Vic.  | Q'land. | †<br>S.A. | W.A.  | Tas. | C'with. |

† Including Northern Territory.

6. **Rates of Postage.**—Prior to the operation of the Postal Rates Act of 1910, the charges made for the postage of newspapers and parcels, and of interstate and foreign letters, were the same in all the States of the Commonwealth. The rates for the transmission of inland letters, however, were not uniform, the Post and Telegraph Act 1901 having specially provided that the rates and charges levied in any State should continue in force. The last-mentioned regulation, however, was repealed by the Postal Rates Act of 1910, which came into force by proclamation on 1st May, 1911.

The following rates on letters, newspapers, and certain other postal articles posted in the Commonwealth for delivery therein came into force on the 1st May, 1911, the date of proclamation of the operation of the Postal Rates Act of 1910 :—

**POSTAL RATES OF CERTAIN ARTICLES POSTED IN THE COMMONWEALTH FOR  
DELIVERY THEREIN ON AND AFTER 1st MAY, 1911.**

| Postal Articles.   | Rates of Postage.  |
|--|--|
| LETTERS ... ..   | 1d. per $\frac{1}{2}$ ounce.   |
| LETTER-CARDS ... ..  | { Single, 1d. each.<br>Reply, 1d. each half.   |
| POST CARDS ... ..  | { Single, 1d. each.<br>Reply, 1d. each half.   |
| PRINTED PAPERS AS PRESCRIBED ... ..  | $\frac{1}{2}$ d. per 2 ounces or part of 2 ounces.   |
| BOOKS PRINTED OUTSIDE AUSTRALIA ... ..   | $\frac{1}{2}$ d. per 4 ounces or part of 4 ounces.   |
| BOOKS PRINTED IN AUSTRALIA ... ..  | $\frac{1}{2}$ d. per 8 ounces or part of 8 ounces.   |
| MAGAZINES.—That is to say—   |  |
| (a) magazines, reviews, serials, and other similar<br>publications printed and published in Aus-<br>tralia in numbers at intervals not exceed-<br>ing three months ... ..  | $\frac{1}{2}$ d. per 8 ounces or part of 8 ounces.   |
| (b) magazines, reviews, serials, and other similar<br>publications (including newspapers) printed<br>and published outside Australia in numbers<br>at intervals not exceeding three months ... ..                                      | $\frac{1}{2}$ d. per 4 ounces or part of 4 ounces.   |
| HANSARD.—That is, reports of Parliamentary<br>Debates printed and published by the authority<br>of the Commonwealth or of a State ... ..   | $\frac{1}{2}$ d. per 12 ounces or part of 12 ounces.   |
| COMMERCIAL PAPERS, PATTERNS, SAMPLES,<br>AND MERCHANDISE AS PRESCRIBED ... ..  | 1d. per 2 ounces or part of 2 ounces.  |
| NEWSPAPERS (without condition as to the number<br>contained in each addressed wrapper) posted by<br>registered newspaper proprietors, or by news-<br>vendors, or returned by an agent or newsvendor<br>to the publishing office ... .. | 1d. per 20 ounces on the aggregate<br>weight of newspapers so posted by<br>any one person at any one time. |
| ALL OTHER NEWSPAPERS ... ..  | For each newspaper, $\frac{1}{2}$ d. per 10<br>ounces or part of 10 ounces.                                |

Whilst the bookkeeping sections of the Constitution Act (see Section XIX., § 1, hereinafter) were in force, each State had necessarily to use its own postage stamps, and stamps sold in one State were only allowed to be used on letters posted in that State. The necessity for this arrangement disappeared with the change in the keeping of the Commonwealth accounts, and since the 14th October, 1910, stamps of any State can be affixed to letters, irrespective of the State in which they are posted. Stamps with a uniform design containing characteristic features of Australia are now used throughout the Commonwealth.

(i.) *Letters.* Under the Postal Rates Act of 1910, the charge (1d. for every  $\frac{1}{2}$ -oz.) for letters posted for delivery within the Commonwealth is now uniform throughout all States. Previous to the 1st May, 1911, various local and interstate rates were in operation within the States. The postage to the United Kingdom was reduced in January, 1891, from sixpence per half-ounce *via* the Red Sea, and fourpence *via* the Cape of Good Hope, to the uniform rate of twopence halfpenny. In 1891 the States were represented at the Congress of the Universal Postal Union held in Vienna, and on the 4th July a convention was signed on their behalf, by which they joined the Union from the 1st October of that year. On that date the rate of postage to all British possessions and to foreign countries included in the Union was reduced to twopence halfpenny. The present charge for postage of interstate letters and of letters to the United Kingdom and to British possessions is now uniformly one penny per half-ounce throughout the Commonwealth; the rate on letters to foreign countries (with the exception of New Hebrides, Banks and Torres Islands, where the rate is a penny per half-ounce) is twopence halfpenny for each half-ounce.

(ii.) *Newspapers.* The different rates charged for the carriage of newspapers in the various States, prior to Federation, continued after the control of the Postal Departments had been taken over by the Commonwealth, until the 1st November, 1902, when a uniform rate was imposed by the Post and Telegraph Rates Act 1902. At present the rates on all newspapers posted for delivery in the Commonwealth (without condition as to the number contained in each addressed wrapper posted) by registered newspaper proprietors, or by newsvendors, or returned by newsvendor or agent to the publishing office, is one penny per twenty ounces on the aggregate weight. On all other registered newspapers posted within the Commonwealth for delivery therein the charge is a halfpenny per ten ounces for each newspaper. At the end of the year 1911 there were in all 1784 publications registered in the Commonwealth under section 29 of the Post and Telegraph Act 1901 for transmission by post as newspapers. The charge on postage of registered newspapers for transmission to the United Kingdom is one penny for each newspaper not exceeding eight ounces in weight by the ordinary route, and one penny for each newspaper not exceeding sixteen ounces in weight by the All-Sea route. To other parts of the world the rate is one penny up to four ounces, and a halfpenny for every additional two ounces. Newspapers which are not registered are charged at the same rates as other printed papers.

(iii.) *Parcels.* Parcels may not exceed 11 lbs. in weight, 3 ft. 6 in. in length, or 6 ft. in length and girth combined. The rate for the inland postage of parcels is sixpence up to 1 lb., and then threepence for every additional pound. For interstate transmission the rate is eightpence up to 1 lb., and then sixpence per lb., and for transmission to the United Kingdom the rate is one shilling up to 1 lb., and sixpence for every additional pound.

(iv.) *Packets.* The regulations for the conveyance of packets vary in the several States. The ordinary rate is one penny for each two ounces. Packets must not as a rule exceed 2 ft. in length, 1 ft. in breadth or depth; or, if in a roll, 2 ft. 6 in. in length. Special rates are allowed for the conveyance of commercial papers, patterns, samples, etc.

7. **Registered Letters.**—Under section 38 of the Post and Telegraph Act 1901 provision is made for the registration of any letter, packet, or newspaper upon payment of the prescribed fee, and any person who sends a registered article by post may obtain an acknowledgment of its due receipt by the person to whom it is addressed by paying the prescribed fee (see hereunder) in advance at the time of registration in addition to the registration fee.

(i.) *Registration Fees.* The fee payable upon registration of an article is threepence, and the fee payable in order to obtain an acknowledgment of the delivery of the registered article is twopence halfpenny in addition. Registered letters must, as a rule, be handed in at least half-an-hour before the closing of the mails.

(ii.) *Number of Registered Articles Posted.* The subjoined table shows the number of registered articles posted in each State during the year 1912, classified according to the places to which they were despatched for delivery:—

#### NUMBER OF REGISTERED ARTICLES POSTED DURING 1912.

(,000 OMITTED.)

| State.                | Posted in each State for Delivery within that State. | Posted in each State for Delivery in other States. | Posted in each State for Delivery in Places outside the C'wealth. | Total. |
|-----------------------|--|--|---|--------|
| New South Wales ...   | 1,166  | 140  | 110   | 1,416  |

| Commonwealth ...      | 3,289  | 412  | 308   | 4,009  |

8. **Ocean Mail Services.**—Regular steamship communication between Australia and Europe was established in 1852 by a service run by the Peninsular and Oriental Company between Singapore and Sydney, *via* King George's Sound, Adelaide, and Melbourne. This service was inaugurated in September, 1852, by the arrival at Melbourne of the "Chusan," and was continued until 1854, when it was stopped in consequence of the Crimean War; in 1856 a line of steamers was again started, and the service was carried on by the Peninsular and Oriental Company, in conjunction with the Royal Mail Company, for some years.

(i.) *Mail Route via San Francisco.* The service *via* the Red Sea did not at that time give much satisfaction to the public, and was looked upon with a certain amount of disfavour in New South Wales and New Zealand. The effect was to stimulate the colonists to agitate for an improved service, and proposals were made for the establishment of a line of mail packets from Sydney to Panama *via* Wellington, by rail across the isthmus, and thence to Great Britain. The result was that in 1866 the line was started, and continued in operation until the end of 1868, when it was terminated through the failure of the company by which it had been carried out. The completion of the railway across the American continent in 1869, with its western terminus at San Francisco, opened up a new and agreeable route, and in that year a monthly service was inaugurated by the Union Steamship Company, in conjunction with the Pacific Steamship Company, from Sydney to San Francisco *via* Auckland. This service was subsidised to the extent of £37,000 per annum, of which New South Wales paid £25,750 and New Zealand £11,250, and was continued until November, 1890, when a new contract was entered into and the amount of the subsidy largely reduced, the amount of the contribution being based upon the weight of mail matter carried. Various extensions of

the contract were made, but the last agreement made between the New Zealand Government and the Oceanic Steamship Company of San Francisco expired on the 10th November, 1906, and has not since been renewed. From that date mails were carried at Postal Union rates until the 12th April, 1907, when the service was discontinued. At present mails to and from Europe *via* San Francisco are carried by the Union Steamship Company, which receives a subsidy from the New Zealand Government, and by the Oceanic Company. Each of these companies carries Australian mails at poundage rates, with a four-weekly service.

(ii.) *Route via Suez Canal.* The establishment of a mail route *via* America had the effect of stimulating the steamship owners who were engaged in the service *via* Suez, and from that time there was a marked improvement in the steamers, as well as in the punctuality and speed with which the mails were delivered. The Peninsular and Oriental Company, and, at a little later date, the Orient-Pacific Company, have carried mails to and from Australia almost since the inception of ocean steam services. Postal matter was carried by contract until 1905, when the contract between the Peninsular and Oriental Company and the Commonwealth Government ceased, although that between the company and the Imperial Post Office is still in force. Mails are still carried from Australia by the Peninsular and Oriental Company, but are carried at Postal Union rates and not under contract with the Commonwealth. On the 25th April, 1905, the Orient-Pacific Company concluded a new contract with the Commonwealth Government for a fortnightly service between England and Australia. The subsidy was at the rate of £124,880 per annum. This contract has now been replaced by the new mail contract referred to in the next sub-section hereof. Fremantle has, since the year 1900, been the first and last port of call for the mail steamers to Europe, in lieu of Albany, the original port of call. The Peninsular and Oriental and Orient-Pacific Companies' steamers sail alternately every week both from London and Australia, conveying the outward and homeward mails.

(a) *The New Mail Contract.* On the 1st January, 1906, tenders were invited by the Commonwealth Postmaster-General for a fortnightly mail service between Adelaide and Brindisi, to alternate with a similar service to be provided by the Imperial Government, and a contract was entered into with Sir James Laing and Company Limited, providing for a service at an annual subsidy of £125,000. This contract, however, fell through, and new tenders were accordingly called for. On the 15th November, 1907, an agreement was entered into with the Orient Steam Navigation Company Limited providing for a fortnightly service for a period of ten years, commencing in February, 1910. The mail service is to be carried out by existing vessels belonging to the company and by five new mail ships, which have been specially built, and which are each over 12,000 tons gross registered tonnage and of not less than seventeen knots speed. Two more new vessels were to be added within eighteen months and six years respectively from February, 1910, and under this provision the *Orama* entered into running during November, 1911. The vessels are to call at Fremantle, Adelaide, Melbourne, Sydney, and Brisbane, and at least six of them at Hobart during the months of February to May inclusive. The voyage from Taranto to Adelaide is to be completed within twenty-six days fourteen hours, and from Adelaide to Taranto within twenty-seven days two hours, but the latter period may be exceeded by thirty-six hours during the prevalence of the south-west monsoon. The amount of the subsidy is fixed at £170,000 per annum; but, if the earnings of the company be decreased, or the expenses increased, by reason of any Commonwealth shipping legislation passed subsequently to the date of the agreement, to the extent of not less than £5000 a year, the contractors have the right to terminate the agreement unless the subsidy is increased. Insulated space of not less than 2000 tons of forty cubic feet is to be provided in each of the new vessels, and the freights are not to exceed one halfpenny per lb. for butter and sixty shillings per ton for fruit. White labour only is to be employed, and no discrimination is to be made between unionists and non-unionists. If before or during the sixth year of the period of the contract an accelerated service is provided by any competing line of mail ships, the:

contractors must, if so required by the Postmaster-General, provide a service equal to the competing service, at an increased subsidy, to be determined by agreement or arbitration. The Commonwealth flag must be flown on the mail ships, which the Commonwealth has the right to purchase at a valuation at any time. Within six months of the Postmaster-General establishing a permanent wireless telegraphy station at Rottneet Island, or at any point on the coast between Fremantle and Brisbane, the company must fit the mail ships with wireless telegraphy installations. The new service was inaugurated on the 11th February, 1910.

(b) *French and German Subsidised Mail Services.* Vessels belonging to the Messageries Maritimes and the Norddeutscher Lloyd, which are under contract respectively with the French and German Governments to convey mails monthly between Marseilles and New Caledonia and between Bremen and Sydney, *via* Genoa, also carry mails for the Commonwealth Government from Australia to Europe at Postal Union rates. The Messageries Maritimes service commenced in November, 1882; the amount of the annual subsidy granted by the French Government is £120,000. The first contract for the establishment and maintenance of a mail steamship line between Germany and Australia was made between the Imperial German Government and the Norddeutscher Lloyd in 1885, and the service was inaugurated in July, 1886, with the steamer *Salier*.

(iii.) *Route via Vancouver and Canadian Pacific Railway.* During the year 1893 a direct monthly service was started between Sydney and Vancouver, in British Columbia, *via* Wellington, in New Zealand, and thence to Liverpool *via* the Canadian-Pacific Railway, the New South Wales Government paying an annual subsidy of £10,000 for the maintenance of this service for a period of three years. In 1896 the agreement was renewed for a further period of three years, and in 1899, was again renewed for four years, subject to the same terms and conditions, except that the route was *via* Brisbane instead of Wellington. The contract was further extended, at an increased subsidy, from time to time until the 31st July, 1911, at a subsidy of £26,626 per annum. This subsidised service has now been discontinued. Mails for Canada are forwarded *via* New Zealand through Sydney at poundage rates.

(iv.) *Other Ocean Mail Services.* In addition to the mails *via* the Suez Canal, a number of other services, both regular and irregular, are maintained between the Commonwealth and various parts of the world, and also between the principal ports in the various States and a number of small ports in the less settled parts of the Commonwealth which are inaccessible by rail. The following statement gives a summary, in so far as returns are available, of all mail services maintained between the Commonwealth and other countries and between ports in the Commonwealth. The amounts of subsidies specified are the amounts payable per annum unless otherwise stated.

#### SUMMARY OF MAIL SERVICES, COMMONWEALTH OF AUSTRALIA, 30th JUNE, 1913.

| Description of Service.  | Frequency of Service. | Ports between which Service is maintained.                         | Particulars regarding Subsidies.  |

| (e) Royal Dutch Packet S. N. Co.                              | Monthly                   | Melbourne to Papua via Sydney and Queensland ports   | Poundage rates.                                     |
| (f) German S.S. Co. ...                                       | Every 4 months            | " "  | Subsidised by German Gov.                           |
| 16. <i>Noumea</i> —   |                           |  |   |
| (a) Messageries Maritimes ...                                 | Fortnightly               | Sydney and Noumea and to Vila (New Hebrides) once a month                                  | Postal Union rates.                                 |
| (b) Other steamers ...  | About fortnightly         | Sydney and Noumea  | Poundage rates.                                     |
| 17. <i>Fiji</i> —   |                           |  |   |
| (a) Union S.S. Co. ...  | Monthly                   | Sydney and Suva  | " "   |
| (b) " " ...   | "                         | Sydney, Auckland; Suva, Tonga, and Samoa   | " "   |
| 18. <i>Fiji and Noumea</i> —                                  |                           |  |   |
| Burns, Philp and Co. ...                                      | "                         | Sydney and Suva  | " "   |
| 19. <i>Ocean and Pleasant Islands</i> —                       |                           |  |   |
| Various steamships ...  | "                         | Sydney, Ocean and Pleasant Islands   | " "   |

9. **Amount of Mail Subsidies Paid.**—The following table shews the amounts of subsidies for ocean and coastal mail services as existing on 31st December, 1913, which are paid by the Commonwealth Postal Department.

**MAIL SUBSIDIES.—OCEAN AND COASTAL SUBSIDIES, 1913.**

| Service... ..         | Orient Pacific. | Queensl'd Ports. | South Australian Ports. | Western Australian Ports. | Tasmanian Ports. |
|-----------------------|-----------------|------------------|-------------------------|---------------------------|------------------|
| Annual Subsidy ... .. | £ 170,000       | £ 24,450         | £ 5,512                 | £ 8,750                   | £ 14,125         |

During the year 1912 the amount paid by the Commonwealth for conveyance of mails at poundage rates by non-contract vessels was £28,906; by road services, £353,714; and by railway services, £331,691.

10. **Average and Fastest Time of Mails to and from London.**—Great progress has been made in regard to the means of postal communication with the United Kingdom and the continents of Europe and America. In 1857 there was an unsatisfactory ocean mail service, which nominally brought monthly mails, with news nearly sixty days old; at the present time, though but fifty years have elapsed, there are four lines of modern ocean steamships, which bring the mails in about twenty-nine days to Adelaide, in addition to services by way of New Zealand, *via* San Francisco and Vancouver. After leaving Fremantle, where the Western Australian mails are landed, the outward mail steamers *via* the Suez Canal all call at Adelaide, where the remaining mails are landed and conveyed to their ultimate destination by rail. The subjoined table shews the average and the fastest times occupied in the conveyance of mails from London to Adelaide and *vice versa* during the year 1912:—

**AVERAGE AND FASTEST TIME OCCUPIED IN CONVEYANCE OF MAILS VIA SUEZ CANAL BETWEEN LONDON AND ADELAIDE, AND VICE VERSA, DURING 1912.**

| Service.  | London to Adelaide. |        |               |        | Adelaide to London. |        |               |        |
|---|---------------------|--------|---------------|--------|---------------------|--------|---------------|--------|
|   | Average Time.       |        | Fastest Time. |        | Average Time.       |        | Fastest Time. |        |
|   | Days.               | Hours. | Days.         | Hours. | Days.               | Hours. | Days.         | Hours. |
| Peninsular and Oriental S.N. Co.,<br><i>via</i> Brindisi ... .. | 28                  | 6      | 27            | 23     | 29                  | 16     | 29            | 7      |
| Orient Pacific S. N. Co., <i>via</i><br>Naples ... ..           | 28                  | 10     | 27            | 11     | 30                  | 0      | 28            | 17½    |

The journey by rail from Adelaide, where the mails for the eastern States are landed, to Melbourne takes 17½ hours; from Adelaide to Sydney, 42 hours, including a stop of about seven hours at Melbourne; while the through journey from Adelaide to Brisbane takes just over three days. The journey from Melbourne to Hobart occupies about 29 hours, *via* Launceston, and about 32 hours direct.

The average time occupied in the conveyance of mails from London to Sydney *via* Vancouver is a little over 37 days, and from Sydney to London by the same route nearly 35. A table shewing the average and fastest times of this service was given in previous issues (see Year Book No. 5, p. 766), but the discontinuance of the contract with the company operating between Australia and Vancouver renders the table no longer desirable.

11. **Money Orders and Postal Notes.**—The issue of money orders and postal notes in the Commonwealth is regulated by sections 74 to 79 of the Post and Telegraph Act 1901. A money order, which may be issued for payment either within the Commonwealth or abroad, may not be granted for a larger sum than £20, nor a postal note, which is payable only within the Commonwealth, for a larger sum than twenty shillings. Money orders are sent direct from the Commonwealth to the United Kingdom, and to most of the British colonies and possessions; to the German Empire and German colonies; to Italy; and to the United States of America. Money orders, payable in Japan and China, are sent *via* Hong Kong; orders payable in all other countries are sent through the General Post Office in London, where new orders are issued and forwarded to the addresses of the payees, less threepence for every £5, or part thereof. In order that the full amount of the original order may be forwarded to the payee, this extra commission must be paid by the remitter.

(i.) *Value of Orders Issued and Paid and of Notes Sold.*—The following table shows the total value of money orders issued and paid, and of postal notes sold in each State and in the Commonwealth during the year 1912, together with the total amount of commission on money orders and poundage on postal notes received by the Postal Department:—

**VALUE OF MONEY ORDERS ISSUED AND PAID AND OF POSTAL NOTES SOLD, TOGETHER WITH THE TOTAL AMOUNTS OF COMMISSION AND POUNDAGE RECEIVED IN EACH STATE DURING 1912.**

| State.                | Value of Money Orders Issued. | Value of Money Orders Paid. | Net Money Order Commission Received. | Value of Postal Notes Sold. | Poundage Received on Postal Notes |
|-----------------------|-------------------------------|-----------------------------|--------------------------------------|-----------------------------|-----------------------------------|
|                       | £                             | £                           | £                                    | £                           | £                                 |
| New South Wales ...   | 3,259,012                     | 3,190,503                   | 26,654                               | 1,304,166                   | 24,906                            |
| Victoria ...          | 1,261,829                     | 1,506,660                   | 11,297                               | 990,599                     | 19,337                            |
| Queensland ...        | 1,037,951                     | 841,776                     | 10,594                               | 338,817                     | 6,613                             |
| South Australia ...   | 442,506                       | 393,594                     | 4,462                                | 229,148                     | 4,493                             |
| Western Australia ... | 1,108,436                     | 692,214                     | 11,131                               | 274,883                     | 4,882                             |
| Tasmania ...          | 307,332                       | 261,680                     | 2,786                                | 120,893                     | 2,406                             |
| Commonwealth ...      | 7,417,066                     | 6,886,427                   | 66,924                               | 3,258,506                   | 62,637                            |

(ii.) *Rates of Commission on Money Orders.* The rates of commission chargeable for the issue of money orders are as follows:—

**RATES OF COMMISSION, MONEY ORDERS, 1913.**

| If Payable in—               | For sums—  |   |   |  |   |   |   |   |  |

| U. Kingdom & other countries | Sixpence for any amount up to £2 and 3d. for each additional £1 or fraction thereof. |   |   |  |   |   |   |   |  |

Remittances may also be made by telegraph to and from money order offices in the Commonwealth which are also telegraph or telephone offices, and to New Zealand.

The charge for a telegraph money order is the cost of the telegram of advice in addition to the ordinary commission. The remitter must also send a telegram to the payee advising the transmission of the money, which telegram must be produced by the payee when applying for payment.

(iii.) *Rates of Poundage on Postal Notes.* The values of the notes issued have been so arranged that any sum of shillings and sixpences up to £1 can be remitted by not more than two of these notes. Broken amounts not exceeding fivepence (but not fractions of a penny) may be added by affixing postage stamps. The poundage or commission charged on notes of different denominations is as follows:—

**POUNDAGE RATES, POSTAL NOTES, 1913.**

| Denomination of Note | 6d. to 1s. 6d.   | 2s. to 4s. 6d. | 5s.               | 7s. 6d. | 10s. to 20s. |
|----------------------|------------------|----------------|-------------------|---------|--------------|
| Poundage charged     | $\frac{1}{2}$ d. | 1d.            | $1\frac{1}{2}$ d. | 2d.     | 3d.          |

**12. Number and Value of Money Orders and Postal Notes Issued and Paid.**—The following table shews the total number and face value of money orders and postal notes issued and paid in the Commonwealth during 1901 and from 1908 to 1912:—

**NUMBER AND VALUE OF MONEY ORDERS AND POSTAL NOTES ISSUED AND PAID, 1901 and 1908-12.**

| Year.    | Money Orders. |           |             |           | Postal Notes. |           |             |           |
|----------|---------------|-----------|-------------|-----------|---------------|-----------|-------------|-----------|

**15. The Value Payable Post.** This is a system under which the Postal Department undertakes to deliver registered articles sent by parcel post within the Commonwealth, and to recover from the addressee on delivery a specified sum of money fixed by the sender, and to remit the sum to the sender by money order, for which the usual commission is charged. The object of the system is to meet the requirements of persons who wish to pay at the time of receipt for articles sent to them, and also to meet the requirements of traders and others who do not wish their goods to be delivered except on payment. In addition to the ordinary postage, commission on the value of the articles transmitted at the rate of twopence on sums not exceeding ten shillings, and one penny

for each additional five shillings or part thereof, must be prepaid by postage stamps affixed to the articles, distinct from the postage, and marked "commission." The registration fee (threepence) and the proper postage must also be prepaid. If the addressee refuse delivery, the parcel is returned to the sender free of charge. Any article that can be sent by parcel post may be transmitted as a value-payable parcel. Letters may also be sent as value-payable parcels, if prepaid at the letter rate of postage and handed to the parcels clerk in the same manner as in the case of parcels. The subjoined statement gives particulars of the number and value of parcels sent through the Value Payable Post in each State during the years 1908 to 1912. From these figures it will be seen that the business in Queensland is greatly in excess of the combined transactions of all the other States, owing to the fact that the system has been established in that State for some years, but was only extended to the whole Commonwealth with the advent of Federal control of the post office. Western Australia is the only other State to make use of this system to any extent, the business transacted by that State and Queensland amounting to 84 per cent. of the total for the Commonwealth.

**16. Transactions of the Dead Letter Office.**—Under sections 45 to 53 of the Post and Telegraph Act 1901 the Postmaster-General may cause all unclaimed and undelivered postal articles originally posted within the Commonwealth which have been returned from the place to which they were forwarded to be treated as unclaimed

articles and opened. Every unclaimed letter and postal article must be kept for the prescribed period at the office to which it has been transmitted for delivery, and must then be sent to the General Post Office. Letters and packets originally posted elsewhere than in the Commonwealth are returned to the proper authorities in the country in which they were so posted, or, if originally posted in another State, are returned to the General Post Office of that State; but unclaimed or undelivered newspapers may be forthwith sold, destroyed, or used for any public purpose. Opened postal articles not containing anything of value are returned to the writer or sender if his name and address can be ascertained, but may otherwise be destroyed forthwith. As regards opened letters and packets containing valuable or saleable enclosures, a list and memorandum of the contents are kept, and a notice is sent to the person to whom the letter or packet is addressed if he be known, or otherwise to the writer or sender thereof if he be known. Upon application within three months of the date of such notice the letter or packet may be claimed by the addressee, or, failing him, by the writer or sender. If unclaimed within three months, the letter and contents may be destroyed or sold, and the proceeds paid into the consolidated revenue fund. The following table shews the total number of letters, postcards, and packets dealt with by the Dead Letter Offices in the Commonwealth during the year 1912, together with the number of inland, interstate, and international letters either returned to writers, delivered, etc., destroyed, or returned as unclaimed:—

19. **Gross Revenue of Postal Department.**—The following table shews the gross revenue of the Postal Department for the years ended 30th June, 1901 and 1909 to 1913 inclusive, under three heads, viz., the Postal, the Telegraph, and the Telephone branches. In the Postal branch is included the revenue derived from money-order commissions, poundage on postal notes, private boxes and bags, and miscellaneous sources. The introduction of penny postage throughout the Commonwealth is responsible for an estimated loss to the Department of approximately £441,000 for the year 1912-13.

## GROSS REVENUE OF POSTAL DEPARTMENT, 1901 and 1909-13.

| Year ended 30th June. | Postal Branch. | Telegraph Branch. | Telephone Branch. | Total.    |

\* Particulars of apportionment to each State not yet available. † Not allocated to States.

21. **First Complete Balance Sheet of the Postmaster-General's Department.**—The first complete balance sheet and profit and loss account of the Postmaster-General's Department, and what is claimed to be the first complete balance sheet of any Postal Department in the English speaking world, was presented in November, 1913, for the year ending 30th June, 1913. Summarised, the financial results of the working of the Department are shewn to be as follows :—Total earnings, £4,243,292; total working expenses, £4,263,373, or a deficit of £20,081. To this deficit must be added the interest ( $3\frac{1}{2}$  per cent.) on capital, viz., £376,409, and pensions and retiring allowances, £10,612, making a total deficit of £407,102. The Postal branch is the only one to shew a profit, viz., £23,152, losses occurring in the other branches as follows :—Telephone, £221,757; telegraph, £164,108; wireless telegraphy, £11,599. These figures do not agree with those given in the two preceding paragraphs under the heads of "revenue" and "expenditure," but it must be borne in mind that "earnings" and "working expenses" refer to the actual amount earned in the service of the public, and the cost incurred in such earnings, and are not to be confused with "revenue" and "expenditure," the latter terms including many items (e.g., interest on transferred properties, pensions, etc.) which cannot strictly be regarded as "earnings" or "working expenses."

22. **Royal Commission on Postal Services.**—In 1908 a Royal Commission was appointed to report on the Postal, Telegraphic, and Telephonic Services of the Commonwealth. An account of the work done by the Commission will be found in previous issues of the Year Book. (See Year Book No. 6, p. 766.)

## § 2. Telegraphs.

**1. First Lines Constructed.**—The electric telegraph was first introduced into Australia for use by the public in the year 1854, when a line from Melbourne to Williamstown was opened. The first line in South Australia, from Adelaide to Port Adelaide, was opened in 1856, while the first line in New South Wales was brought into operation in 1858, when the line from Sydney to Liverpool, twenty-two miles in length, was opened. In Tasmania the first telegraphic line was completed in 1857, while in the following year communication was established between Sydney, Melbourne, and Adelaide. The first line to be constructed in Queensland was that between Brisbane and Rockhampton, a distance of 396 miles, which was opened in 1864. In Western Australia the first telegraph constructed was from Perth to Fremantle, a distance of twelve miles, which was brought into use in 1869, and in the same year the cable joining Tasmania with the continent of Australia was completed.

**2. Development of Services.**—During the period from 1871 to 1881 great progress was made throughout Australia in the way of telegraphic construction, over 14,000 miles of line, exclusive of railway telegraph lines, being opened for use during the period mentioned, making the total length of the line open at the end of the year 1881, 25,470 miles. At the present time the systems of telegraph lines throughout Australia are well developed. The longest line extends from Thursday Island, in Torres Strait, by submarine cable to Paterson, on the mainland of Cape York Peninsula; from Paterson the line runs in a southerly direction as far as Brisbane, where it joins the main interstate line to Sydney, Melbourne, and Adelaide; from Adelaide it runs to Port Augusta, then on to Port Lincoln, on Eyre's Peninsula, and thence to Eucla, on the Western Australia boundary; from Eucla the line extends along the coast of the Great Australian Bight to Albany, and thence it runs adjacent to the west coast of Western Australia as far as Onslow, *via* Perth, Geraldton, and Carnarvon. From Onslow connection extends to Broome, in Roebuck Bay, from which place communication is made to Singapore by the Eastern Extension Company's cable. From Roebuck Bay the line crosses the Kimberley district in an easterly direction, and then runs north as far as the terminus at Wyndham. In Queensland a line runs to Burketown, near the coast of the Gulf of Carpentaria, *via* Normanton; another line extends to Cloncurry and Urundangi, in the extreme west of the State. Branch lines extend to all important coastal and inland towns, while considerable networks of lines converge from the country districts towards the centres of population. From Adelaide the transcontinental line runs in a northerly direction to Darwin, from which place communication is provided with Europe by submarine cable by way of Batavia, Singapore, and Madras. In Western Australia a line runs from Eucla to the Coolgardie goldfields *via* Balladonia and Dundas, and from Coolgardie communication is provided with Perth and with Sir Samuel, in the East Murchison district.

**3. Number of Telegraph Offices and Length of Lines and Wire Open.**—The following table shews the number of telegraph offices and the length of telegraphic lines and of telegraph wire, exclusive of railway telegraphs, available for use in the Commonwealth at the end of the year 1901, and from 1908 to 1912 inclusive:—

**NUMBER OF TELEGRAPH OFFICES, LENGTH OF LINE AND WIRE, AVAILABLE FOR USE, 1901 and 1908-12.**

| Particulars.   |     |        | 1901.   | 1908.  | 1909.  | 1910.  | 1911.  | 1912.   |
|----------------|-----|--------|---------|--------|--------|--------|--------|---------|

\* Including interstate cablegrams.

**6. Rates for Transmission of Telegrams.**—The present rates for the transmission of telegrams within the Commonwealth were fixed by section 7 of the Post and Telegraph Rates Act 1902, and came into force on the 1st November, 1902. Under this Act charges are made for telegrams according to whether they are “ordinary” or “press” telegrams. “Press” telegrams are defined to mean those the text of which consists of political, commercial, etc., information, and of news intended for publication in a newspaper. The telegram must be sent by an authorised correspondent, and must be addressed to a registered newspaper or recognised news agency. The subjoined tables shew the scales of charges :—

## SCALE OF CHARGES FOR ORDINARY TELEGRAMS, 1913.

| Particulars.                     | Town and Suburban,<br>within Prescribed<br>Limits, or within 15<br>Miles from the<br>Sending Station. | Other Places<br>within the<br>State, except<br>Town and<br>Suburban. | Interstate. |
|----------------------------------|---|--|-------------|
|                                  | s. d.   | s. d.  | s. d.       |
| Including address and signature— |   |  |             |
| Not exceeding 16 words ... ..    | 0 6   | 0 9  | 1 0         |
| Each additional word ... ..      | 0 1   | 0 1  | 0 1         |

Double the foregoing rates are imposed for the transmission of telegrams on Sunday, Christmas Day, and Good Friday, and between the hours of 8 p.m. and 9 a.m., and for telegrams sent on "urgent" forms.

## SCALE OF CHARGES FOR PRESS TELEGRAMS, 1913.

| Particulars.                     | Within<br>any State. | Interstate. | Relating to Parlia-<br>mentary, Executive,<br>Departmental, and<br>other Common-<br>wealth Proceedings<br>as may be<br>prescribed. |
|----------------------------------|----------------------|-------------|--|
|                                  | s. d.                | s. d.       | s. d.  |
| Not exceeding 25 words ... ..    | 0 6                  | 1 0         | ...  |
| From 26 to 50 words ... ..       | 0 9                  | 1 6         | ...  |
| From 51 to 100 words ... ..      | 1 6                  | 3 0         | ...  |
| Every additional 50 words ... .. | 0 6                  | 1 0         | ...  |
| Within the Commonwealth.         |                      |             |  |
| Not exceeding 25 words ... ..    | ...                  | ...         | 1 0  |
| From 26 to 100 words ... ..      | ...                  | ...         | 1 6  |
| Every additional 50 words ... .. | ...                  | ...         | 0 6  |

**7. Letter-telegrams.**—Approval has been given by the Postal Department for the establishment of a system of letter telegrams, in which a minimum charge of 1s. up to 40 words, and  $\frac{1}{2}$ d. per additional word, has been paid. These will be accepted on the condition that they be handed in at offices (at present confined to the cities and larger towns) between the hours of 7 p.m. and midnight. The letter-telegrams will be forwarded during the night by telegraph to the office of destination and will be delivered as ordinary letters by the first letter delivery, or will be despatched by mail to the address in the ordinary way.

**8. Wireless Telegraphy.**—Under the Wireless Telegraphy Act 1905 the Postmaster-General is given the exclusive privilege of establishing and using stations and appliances for receiving and transmitting messages by wireless telegraphy within Australia. While he is empowered to grant licenses to establish and use stations and appliances for wireless telegraphy, the only licenses so far issued have been for experimental work. The Act does not apply to ships belonging to the King's Navy. Viewing the insular position of Australia, it was evident that, for an effective system of radio-telegraphic communication to be given, not only must the service offered be continuous, but the distances separating the stations must to a great extent be governed by the normal working range of the vessels with which communication would have to be established. With this object in view, the Commonwealth Government have constructed and erected

nineteen stations at or near the following localities :—Port Moresby, Thursday Island, Cooktown, Townsville, Rockhampton, Brisbane, Sydney, Flinders Island, Melbourne, Hobart, Mount Gambier, Adelaide, Esperance, Perth, Geraldton, Broome, Roeburne, Wyndham, and Darwin. To these must be added the station installed at Marquarie Island, used chiefly for meteorological purposes. It is intended eventually to increase the number of stations to thirty-two. To complete the external scheme of radio-telegraphic communication, and so form the Australian unit of the Imperial scheme, high-power stations were essential. The stations at Sydney and Perth are of this nature, the former city being capable of communication with New Zealand and the radio-telegraphic stations in the Pacific, and the latter with Cocos Island. A third high-power station will, in the near future, be erected at Darwin, and will operate with Singapore and the Islands of the Pacific.

All the other stations are of a lower power, and constitute the internal scheme of inter and ship-to-shore communication. The working range by day—and under unfavourable conditions—of the low-power stations is 400 miles; that of the high-power stations being 1250 miles, though the proposed installation at Darwin will have a day range of over 2000 miles. Under more favourable conditions, however, messages can be transmitted over much greater distances, extending in the case of low-power stations to over 1500 miles.

The ordinary ship-to-shore communication rates for ships registered by the Commonwealth are 5d. per word, allocated as follows :—3d. for land station and 2d. for ship station charge, while for vessels registered by other administrations the rates are 10d. per word, allocated as follows :—6d. for land station, and 4d. for the ship station charge. In all cases must be added the inland forwarding charge of 1d. per word. Between Port Moresby and Thursday Island the rate is 2d. per word (plus the inland forwarding rate), which rate is also charged between the mainland and Flinders Island or Macquarie Island, no forwarding charge being made at these two stations.

In December, 1909, a conference of representatives of the Commonwealth, New Zealand, the High Commissioner for the Western Pacific, Fiji, the Admiralty, and the Pacific Cable Board was convened at Melbourne to report upon the establishment of wireless telegraphy in the Pacific. The chief recommendations of this Conference were :—(a) That high-power stations be established at Sydney, Doubtless Bay (New Zealand), Suva (Fiji), and Ocean Island, and (b) that medium-power stations be established at Tulagi (Solomon Islands), and Vila (New Hebrides). The total cost of construction of the scheme covered by these recommendations was £42,000, while the total annual cost was estimated at £13,820 for a continuous service, and £9970 for a restricted service. It was proposed to apportion the cost between Great Britain, New Zealand, Fiji, and Australia. These recommendations were adopted by the Commonwealth Government, but the British Government would not agree to the erection of high-power stations at Suva and Ocean Island. Up to the present no further concerted action has taken place, but radio-telegraphic stations have been erected at Suva, Vila, and Tulagi, under the control of the High Commissioner of the Pacific, while the New Zealand Government has erected high-power stations at Awanui (Auckland), and Awarua (Bluff), and low power stations at Auckland, Chatham Island and Wellington, and is also proceeding with the construction and erection of stations at Gisborne, New Plymouth, and Christchurch.

### § 3. Submarine Cables.

1. **First Cable Communication with the Old World.**—In previous issues of the Year Book (No. 6, p. 770) will be found a detailed account dealing with the connection of Australia with the old world by means of submarine cables.

2. **The Tasmania - Victoria Cables.**—A submarine cable joining Tasmania to the continent of Australia was opened for use in 1869, the total length being 170 miles. The line was owned by the Eastern Extension Telegraph Company, and was subsidised by the Tasmanian Government until the year 1909. On the 28th February, 1908, the Postmaster-General entered into an agreement with Messrs. Siemens Brothers and Company Ltd., of London, for the manufacture and laying of two submarine cables between Tasmania and Victoria. The new cables were taken over on the 24th March, 1909, and opened to the public on the 1st May, 1909, the day following the expiration of the agreement with the Eastern Extension Company. Their aggregate length is approximately 350 nautical miles of main cable, and 20 nautical miles each of intermediate and shore-end cable, making a total of 390 nautical miles. The contract price was £52,447.

3. **The Eastern Extension Company's Cables.**—In addition to the first Victoria-Tasmania cable and the original cable from Darwin (see Year Book No. 6, p. 770), the Eastern Extension Company has constructed several other cables connecting with various places in the Commonwealth. (a) In 1879 the original cable *via* Banjoewangie was duplicated, the States of New South Wales, Victoria, South Australia, Western Australia and Tasmania having agreed to pay the above company a subsidy of £32,400 per annum for a period of twenty years, the amount to be divided between the States on a population basis. (b) In 1881 a cable was constructed connecting Broome, in Roebuck Bay, W.A., with Banjoewangie; from Broome there is direct telegraphic communication with Perth, from which place communication is made with the Eastern States by the interstate line *via* Albany, Eucla, and Port Augusta. (c) In July, 1899, the company offered to lay a cable direct to Great Britain *via* the Cape of Good Hope, and also offered reductions in the rates charged, if the States would agree to certain conditions giving the company the right of direct dealing with the public. The States of South Australia, Western Australia and Tasmania accepted the terms offered, and New South Wales entered into the agreement in January, 1901. The cable was opened *via* Fremantle and Durban in October, 1901. (d) Another submarine cable from Fremantle to Adelaide forms an alternative line of communication between the eastern States and Western Australia. (e) There is an alternative route, partly belonging to the Eastern Extension Company and connecting the Port Darwin-Singapore cable with London, *via* Hong Kong, Shanghai, Possiet Bay (Pacific Russia), Libau (Russian Baltic), and Newbiggin (England). (f) In 1909 a cable was laid from Java to Cocos Island, thus affording another route from Australia to South Africa, whilst in April, 1911, a radio-telegraphic station was opened at Cocos Island, thus strengthening the line of communication between Australia and the East.

4. **The Pacific Cable.**—In July, 1898, a conference of representatives of Great Britain, Canada, New South Wales, Victoria, Queensland, South Australia and New Zealand was held for the purpose of considering a project for a cable to be laid across the Pacific Ocean, touching only British territory on its way from Australia to Canada, thus providing an "All Red" route, as it is termed, for a cable system between England and Australia. In the following year it was agreed at a meeting held by representatives of the countries interested that the cable should be laid and that Great Britain and Canada should each pay five-eightieths of the cost, and the States of New South Wales, Victoria, Queensland, and the Dominion of New Zealand should each pay one-ninth. The construction and management of the cable were placed under the control of a Board composed of seven members—two each from Great Britain, Canada, and Australia, and one from New Zealand—called the Pacific Cable Board. The Australian shore-end of the cable was landed at Southport, Queensland, in March, 1902, and the cable was completed on the 31st October, 1902, and opened for traffic on the 7th December of the same year. There are cable-stations at Norfolk Island, Fiji, and Fanning Island, and a branch cable runs from Norfolk Island

to New Zealand. In 1910 the Board leased a wire from Bamfield, British Columbia, to Montreal, thus extending the Pacific cable system from Queensland to Montreal. The traffic is then carried across the Atlantic to the United Kingdom by the cables of the Anglo-American and Commercial Companies. The following table shews particulars of the revenue, expenditure, total loss, and the proportion of the loss payable by the Commonwealth for each financial year since the opening of the cable :—

# REVENUE, EXPENDITURE, AND LOSS ON WORKING OF PACIFIC CABLE, 1903 to 1913..

| Year ended the 31st March. | Revenue. | Expenditure (including Annuities and Renewal Fund). | Loss.  | Commonwealth Proportion of Loss.. |
|----------------------------|----------|---|--------|-----------------------------------|
|                            | £        | £   | £      | £                                 |
| 1903 ...                   | ...      | ...   | 90,518 | 30,514                            |
| 1904 ...                   | 80,118   | 167,869   | 87,751 | 29,250                            |
| 1905 ...                   | 87,446   | 163,296   | 75,850 | 25,283                            |
| 1906 ...                   | 91,952   | 164,508   | 72,556 | 24,185                            |
| 1907 ...                   | 113,516  | 167,439   | 53,923 | 18,307                            |
| 1908 ...                   | 110,160  | 172,523   | 62,363 | 20,787                            |
| 1909 ...                   | 113,093  | 173,981   | 60,888 | 20,295                            |
| 1910 ...                   | 111,724  | 171,312   | 59,588 | 19,862                            |
| 1911 ...                   | 138,678  | 186,888   | 48,210 | 16,071                            |
| 1912 ...                   | 159,150  | 199,649   | 40,499 | 13,500                            |
| 1913 ...                   | 167,901  | 200,171   | 32,270 | 10,757                            |

\* To 30th June in each year.

**5. New Zealand Cables.**—A submarine cable joining New Zealand to the Australian Continent was laid in 1876. The line is 1191 miles in length. The Australian shore-end of the cable is at Botany Bay, while the New Zealand terminus is at Wakapuaka, near Nelson, in the Middle Island, from which place another cable, 109 miles in length, is laid to Wanganui, in the North Island. For a period of ten years after its opening the cable was subsidised by the New South Wales and New Zealand Governments, the total contributions amounting to £10,000 a year. The branch from Norfolk Island to New Zealand of the Pacific cable was opened on the 23rd April, 1902. The length of this cable is 597 miles, the New Zealand terminus being at Doubtless Bay in the north of the North Island. During 1911 a scheme to lay a second cable between New Zealand and Australia (Auckland to Sydney) was adopted by the various Governments concerned, and the laying of the new cable was completed on the 24th December, 1912, the cable being opened for traffic on the 31st December, 1912.

**6. The New Caledonian Cable.**—In April, 1892, a French company, known as the Compagnie Française des Câbles Télégraphiques, entered into an agreement with the French, the New South Wales, and the Queensland Governments to lay down a submarine cable between New Caledonia and Queensland in return for guarantees by the French Government to the extent of £8000, and by the Governments of New South Wales and Queensland to the amount of £2000 each annually for a period of thirty years. The cable was opened for use in October, 1893, the Australian shore-end being at Bundaberg. The guarantees of the Governments of New South Wales and Queensland have now been transferred to the Commonwealth Government.

**7. Number of Cablegrams Received and Despatched.**—The subjoined table shews the number of cablegrams received and despatched in the Commonwealth from 1910 to 1912 :—

## CABLEGRAMS RECEIVED AND DESPATCHED, COMMONWEALTH, 1910-12.

| Particulars. | Cablegrams Received. |         |         | Cablegrams Despatched. |         |         | Total Cablegrams Received and Despatched. |         |         |
|--------------|----------------------|---------|---------|------------------------|---------|---------|---|---------|---------|
|              | 1910.                | 1911.   | 1912.   | 1910.                  | 1911.   | 1912.   | 1910.                                     | 1911.   | 1912.   |
| Number...    | 241,723              | 256,912 | 288,678 | 154,666                | 271,540 | 297,806 | 496,389                                   | 528,452 | 586,484 |

The following table shews the total number of cablegrams received and despatched in each State during the year 1912. The figures given are exclusive of interstate cablegrams, which are classed as interstate telegrams (see § 2 hereof) :—

## NUMBER OF CABLEGRAMS RECEIVED AND DESPATCHED IN EACH STATE, 1912.

| Particulars.        | N.S.W.  | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.*  | C'wealth. |
|---------------------|---------|-----------|---------|----------|----------|--------|-----------|
| Number received ... | 146,586 | 86,709    | 11,916  | 19,843   | 14,630   | 5,994  | 288,678   |
| „ despatched...     | 146,049 | 92,750    | 14,457  | 18,375   | 19,440   | 6,735  | 297,806   |
| Total ...           | 292,635 | 182,459   | 26,373  | 38,218   | 34,070   | 12,729 | 586,484   |

\* Exclusive of interstate cablegrams, which are included with interstate telegrams (see § 2 ante).

8. Lengths of Cable Routes.—The following table gives the lengths of various cable routes :—

## LENGTHS OF CABLE ROUTES.

| Via Roebuck Bay.                |        | Via Darwin.                |        | Via South Africa.        |        |
|---------------------------------|--------|----------------------------|--------|--------------------------|--------|
|                                 | Miles. |                            | Miles. |                          | Miles. |
| Perth to Roebuck Bay ...        | 1,485  | Adelaide to Darwin ...     | 2,134  | Perth to Mauritius ...   | 4,417  |
| Roebuck Bay to Banjoewangie ... | 970    | Darwin to Banjoewangie ... | 1,150  | Mauritius to Durban ...  | 1,786  |
| Banjoewangie to London ...      | 9,841  | Banjoewangie to London ... | 9,841  | Durban to Cape Town ...  | 800    |

|                                 |        |                            |        | Madeira to Penzance ...  | 1,341  |
|                                 |        |                            |        | Penzance to London ...   | 260    |
| Total ...                       | 12,296 | Total ...                  | 13,125 | Total ...                | 14,319 |

| Via Vancouver.                               |        | Via Russia.                      |        |
|--|--------|----------------------------------|--------|
|  | Miles. |                                  | Miles. |
| Southport (Queensland) to Norfolk Island ... | 963    | Sydney to Darwin ...             | 2,992  |
| Norfolk Island to Suva (Fiji) ...            | 1,129  | Darwin to Hong Kong ...          | 4,337  |
| Suva to Fanning Island ...                   | 2,351  | Hong Kong to Possiet Bay ...     | 2,647  |
| Fanning Island to Bamfield (Canada) ...      | 3,980  | Possiet Bay to Libau ...         | 6,399  |
| Across Canada ...                            | 3,450  | Libau to Newbiggin (England) ... | 1,657  |
| Canada to Ireland ...                        | 2,450  |                                  |        |
| Total ...                                    | 14,323 | Total ...                        | 17,932 |

9. Cable Rates.—In 1872 the cable rate to England was nine guineas for twenty words, but when word rates were brought into general use in 1875, the rate between Great Britain and Australia was fixed at ten shillings and sixpence, subsequently altered to ten shillings and eightpence. In 1886 the Eastern Extension Telegraph Company reduced the rate to nine shillings and fourpence a word for ordinary messages, to seven shillings and a penny for Government messages, and to two shillings and eightpence a word for press messages. At a conference of the postal and telegraphic authorities held

in March, 1891, the proposal to reduce the rates to four shillings a word for ordinary messages, three shillings and eightpence for Government, and one shilling and tenpence for press messages was agreed to, the States of New South Wales, Victoria, South Australia, Western Australia, and Tasmania undertaking to make good half the loss which the Eastern Company might suffer through such reductions. The States guaranteed to the company one-half of the amount of receipts short of the sum of £237,736—the amount received by the company in 1889 in respect of cable charges—the other half to be borne by the company. The Government of South Australia was also guaranteed by the other contracting States against any loss to the revenue which the lower cable rates might cause in the working of the overland lines. Queensland subsequently joined the other States in these guarantees. In 1893, however, owing to the heavy losses incurred, the rates for ordinary messages were increased to four shillings and ninepence per word, and at the same time New Zealand joined the guarantees to the company and to South Australia.

(i.) *Present Rates to Great Britain.* On the acceptance by three of the States of the terms offered by the Eastern Extension Telegraph Company for the construction of a cable *via* South Africa the rate for ordinary messages was reduced in May, 1900, to four shillings a word. It was further reduced to three shillings and sixpence in January, 1901, and to three shillings in January, 1902, at which amount the standard rate by all routes for cablegrams to Great Britain has since remained. The scale of reductions is governed by a revenue standard, and when the latter averages £330,000 per annum a further reduction to two shillings and sixpence will be made. In September, 1912, the “through” charge for press cables was reduced from ninepence to sevenpence-halfpenny per word.

(ii.) *Deferred Cablegrams.* With a view to affording additional cable facilities and to keeping the Pacific cable fully occupied during the whole twenty-four hours, proposals were made by the Postmaster-General's Department for the adoption of a system of deferred cablegrams, *i.e.*, for cablegrams to be delivered after a lapse of twenty-four hours at reduced rates of one shilling and sixpence per word for cablegrams in code, and one shilling per word for cablegrams in plain language. A meeting of representatives of the Administrations and companies concerned was held in London in November, 1910, and the new rates came into force on the 1st January, 1912. Messages can only be transmitted after non-urgent private cablegrams and press cablegrams. Those which have not reached their destination within a period of twenty-four hours from the time of handing in are transmitted in turn with cablegrams charged full rate. They may be sent *via* the Pacific or Eastern routes to all countries to which the ordinary rate exceeds tenpence per word. On the 15th December, 1911, a system of deferred press cablegrams between Vancouver and Australia was instituted. The rate charged is one penny three-farthings per word, and the conditions of despatch are the same as those for private deferred cablegrams.

(iii.) *Week-End Cable Letters.* Since the 3rd January, 1913, week-end cable letters may be exchanged between the United Kingdom and Australia *via* Pacific and Eastern Extension Company's lines on the following conditions, *viz.*:—Week-end cable letters lodged or received at Pacific Cable offices at Sydney or Southport and Eastern Extension Cable Company's offices at Adelaide or Perth up to midnight on Saturday for the United Kingdom will be transmitted between midnight on Saturday and Monday morning, other traffic being given preference. Week-end cable letters may also be lodged at any post office for transmission to those cable offices by post or, if so desired, by telegraph, provided in the latter case that a special rate as shewn hereunder be paid, in addition to cable charge. On arrival in the United Kingdom such cable letters will be delivered by post unless the senders desire them to be delivered by telegraph, in which case local rates as shewn hereunder must be paid in addition to cable charge. Week-end cable letters shall be written in plain language and shall be subject to the same rules and regulations as deferred ordinary telegrams, except that those which are to be delivered

by post may not be addressed to a code address. Week-end cable letters received in Australia will be posted at the cable office so as to reach the addressee not earlier than 8 a.m. on Tuesday, unless arrangements have been made by the senders for them to be telegraphed to addressee for delivery on Tuesday morning. The charge for week-end cable letters was originally ninepence per word, subject to a minimum charge of eighteen shillings per telegram when inland wires are not used in Australia or United Kingdom. The present minimum charge is fifteen shillings for twenty words. The additional charge for telegraphing such week-end cable letters shall be the Commonwealth inland rates in Australia and one halfpenny per word in the United Kingdom. Week-end cable letters shall be free of postage in the same way as ordinary telegrams, provided they are enclosed in envelopes plainly endorsed "Week-end cable letters."

(iv.) *Rates to New Zealand.* As a result of the completion of the New Zealand branch of the Pacific cable in 1902, the rates charged for cablegrams between Australia and New Zealand, except to and from Tasmania, were uniformly reduced to fourpence-halfpenny per word. Between New Zealand and Tasmania the charge was fixed at fivepence-halfpenny a word, but it has since been reduced to fourpence-halfpenny. The charge for ordinary cablegrams from New Zealand to Great Britain was reduced from the 1st June, 1902, from five shillings and twopence to three shillings and fourpence a word, and has since been further reduced to three shillings a word.

**10. Subsidised Press Cable Service.**—In October, 1909, a Select Committee of the Commonwealth Senate was appointed to report upon the question of the supply, conditions of sale, and distribution, which control the Press Cable Service within and from outside the Commonwealth. A majority report of this Committee was issued in December, 1909, and recommended (a) the completion of an "All Red" cable route *via* Canada, (b) the conditional subsidisation of a press cable association, (c) the utilisation of the High Commissioner's office for the dissemination in Australia of Empire news, and (d) the amendment of the Copyright Act in regard to cables.

In accordance with the recommendations of this Committee the Commonwealth has granted a subsidy of £6000, extending over a period of three years, to the Independent Press Cable Service, on the conditions that at least 6000 cable words are supplied each week, to be sent *via* Pacific, and that any newspaper proprietary in the Commonwealth is permitted to become a subscriber at rates approved by the Government.

**11. Cable Subsidies paid by each State.**—The agreement between the State Governments and the Eastern Extension Telegraph Company expired on the 30th April, 1900. Since the year 1895 the amounts guaranteed—£237,736 to the company and £37,552 to South Australia—have been met by the receipts, and the contracting States have, therefore, not been called upon to contribute.

(i.) *Total Subsidies Paid.* The following table shews the total amounts paid by way of cable subsidies for the years 1907-8 to 1912-13:—

**TOTAL AMOUNT OF CABLE SUBSIDIES PAID, 1907-13.**

| Year.         | 1907-8.  | 1908-9. | 1909-10. | 1910-11. | 1911-12. | 1912-13. |
|---------------|----------|---------|----------|----------|----------|----------|
| Amount ... .. | £ 28,937 | 28,495  | 23,862   | 20,093   | 17,522   | 14,779   |

(ii.) *Subsidies Paid by each State.* The total amount of cable subsidies paid prior to the year 1908-9 included the subsidy paid in respect of the Tasmania-Victorian cable service.

As the agreement in connection with the Tasmanian cable expired in 1909, and as new cables have been laid by the Commonwealth Government (see page 685 *ante*), the guarantees were, in the course of the year 1910, reduced to those in connection with the New Caledonia and Pacific cables. The amount of cable subsidies paid by the Commonwealth in 1912-13 was £4022 in respect of the New Caledonian cable guarantee, and £10,757 in respect of the loss on the Pacific cable.

## § 4. Telephones.

1. **Development of Telephone Services.**—The Postal Department has established telephone services in all the capital towns and in many of the important centres of population throughout the Commonwealth. Particulars as to the revenue from telephone services in each State for the years 1901 and 1909-13 are given on page 679 *ante*, while particulars of the expenditure on telephone works in each State for the year 1911-12 are given in a table on page 680.

(i.) *Number of Telephone Exchanges, etc., in Commonwealth.* The following table shews the number of telephone exchanges, the number of telephone connections, and the length of telephone wire, exclusive of telegraph and railway telephone wire, in the Commonwealth at the end of the year 1901 and from 1908 to 1912 inclusive:—

### NUMBER OF TELEPHONE EXCHANGES AND CONNECTIONS AND LENGTH OF WIRE, 1901 and 1908-12.

| Particulars.                | 1901.  | 1908.   | 1909.   | *1910.  | *1911.  | 1912.   |
|-----------------------------|--------|---------|---------|---------|---------|---------|
| Telephone Exchanges ... No. | 119    | 285     | 328     | 678     | 927     | 1032    |
| „ Connections ... „         | 24,583 | 54,512  | 62,091  | 74,975  | 85,458  | 95,965  |
| Length of Wire ... miles    | 47,276 | 145,572 | 166,489 | 220,174 | 282,498 | 334,223 |

\* Including all places at which two or more subscribers are connected and which are now classified as "telephone exchanges." Prior to 1910 the classification in the several States was not uniform.

(ii.) *Number of Telephone Exchanges, etc., in each State.* The following table gives corresponding particulars for each State at the end of 1912:—

### TELEPHONE EXCHANGES, CONNECTIONS, AND LENGTH OF WIRE IN EACH STATE, 1912.

| Particulars.         | N.S.W.  | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.  | C'wth.  |
|----------------------|---------|-----------|---------|----------|----------|-------|---------|
| Tel. Exchanges* No.  | 385     | 264       | 162     | 93       | 65       | 63    | 1,032   |
| „ Connections „      | 39,718  | 27,652    | 11,306  | 7,041    | 7,354    | 2,894 | 95,965  |
| Length of Wire miles | 108,870 | 150,104   | 28,251  | 21,927   | 21,571   | 3,500 | 334,223 |

\* See note to previous table.

2. **Telephone Rates.**—The charges mentioned in the table hereunder are payable for the different classes of telephone services specified therein:—

### TELEPHONES.—RENTAL CHARGES, 1912-13.

| In Telephone Networks having a Population of— | Radius of Network with Main Exchange as Centre. | Minimum Annual Charge—    |  |   |
|---|---|---------------------------|--|---|
|   |   | For an Exclusive Service. | For each Subscriber or Instrument on a Two-party Line. | For each Subscriber or Instrument on a Three or more party Service. |
|   | Miles.  | £ s. d.                   | £ s. d.  | £ s. d.   |
| From 1 to 10,000 ...                          | 5   | 3 0 0                     | 2 10 0   | 2 0 0   |
| „ 10,001 to 100,000 ...                       | 10  | 3 10 0                    | 2 15 0   | 2 5 0   |
| „ 100,001 upwards ...                         | 10  | 4 0 0                     | 3 0 0  | 2 10 0  |

It is provided that for all effective calls originated the subscriber will be charged the following rates:—(a) For calls not exceeding 2000 half-yearly, two calls for one penny; and (b) for calls above 2000 half-yearly, three calls for one penny.

Another regulation permits persons occupying offices in the same building, or occupying the same private residence, to subscribe jointly under one exchange number (in addition to rental as for one person at the respective rates prescribed) on payment of

£1 per annum for each additional subscriber. This fee covers the insertion of the additional subscriber's name in the telephone list. If additional instruments are required the subscribers must pay the rates prescribed for party lines.

3. *Miscellaneous Particulars.*—The following table gives various interesting particulars of the operation of the telephone services in each State for the year 1912 :—

**PARTICULARS OF OPERATION OF TELEPHONE SERVICES, 1912.**

| Particulars.                           |       |     |     | N.S.W.    | Vic.    | Qld.    | S.A.    | W.A.    | Tas.    | C'with.   |

\* See note to first table on previous page. † Comprises slot machines within telephone networks. The information furnished under this heading for 1909 (see Year Book No. 4, page 793) included public telephone stations, i.e., trunk line offices. The latter have now been omitted, as it is thought that they do not rightly come under the heading of "public telephones." ‡ For the year ended 30th June, 1912. § Not available. || Exclusive of New South Wales.

In 1912 the mileage of telephone cables (aerial and underground) was 1607½, the length of telephone conduits in duct miles 1072.41, whilst the mileage of telephone tunnels was 12.3. The total mileage of telephone trunk lines for the Commonwealth for the same period was 45,448, of which number 12,717 were composed of single wire circuits, 13,551 metallic circuits, and 19,180 superimposed circuits.

4. *Financial Position of Telephone Branch.*—In 1909 an investigation into the financial position of the telephone branch of the Postmaster-General's Department was commenced, and in December of that year a report was issued dealing with the telephone accounts of the system in the State of Victoria. This report shews that during each of the years 1901 to 1908 there was a profit on the working of the system, amounting in all to £150,580; in the financial year 1908-9 there was a loss of £7789, giving a net profit up to the 30th June, 1909, of £142,791.

## SECTION XIX.

## COMMONWEALTH FINANCE.

## § 1. General.

**1. Financial Provisions of the Constitution.**—The main provisions of the Constitution as originally drafted relating to the initiation and development of the financial system of the Commonwealth are those contained in Chapter IV., "Finance and Trade," being sections 81 to 105 of the Constitution Act. Two other sections which have a most important bearing on questions of Commonwealth finance are sections 69 and 51.

**2. Departments Transferred or Transferable under Constitution.**—In section 69 it is provided that the Departments of Customs and Excise in each State should become transferred to the Commonwealth on its establishment, and that on a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth the following departments should become transferred:—

- (i.) Posts, telegraphs, and telephones.
- (ii.) Naval and military defence.
- (iii.) Lighthouses, lightships, beacons and buoys.
- (iv.) Quarantine.

Under proclamation dated 12th February, 1901, and published in the Commonwealth *Gazette* of the 14th of that month, the Departments of Posts, Telegraphs, and Telephones in each State became transferred to the Commonwealth as from the 1st March, 1901, while under a similar proclamation dated 19th February, 1901, and gazetted on the 20th, the Departments of Naval and Military Defence in each State also became transferred to the Commonwealth as from 1st March, 1901. In the case of Quarantine, an Act (No. 3 of 1908) has been passed and control has been tentatively assumed by the Commonwealth.

The requisite proclamation of transfer has not yet been made in the case of departments dealing with "Lighthouses, lightships, beacons, and buoys," although legislation relative thereto has been passed by the Federal Parliament (Act No. 14, 1911). It is probable that the proclamation will be made at an early date.

**3. Departments Transferable by Means of Commonwealth Legislation.**—In addition to the departments here mentioned which pass to the Commonwealth either automatically or by proclamation, there are several others whose duties the Commonwealth is empowered to undertake after the passing by the Commonwealth of the legislation necessary to authorise the assumption of such duties. These are referred to in section 51 of the Constitution, which contains a statement of all matters respecting which power is (subject to the Constitution) conferred on Parliament "to make laws for the peace, order and good government of the Commonwealth." The matters contained in this section include those already mentioned as being covered by section 69. The principal matters involving for the due performance of the duties connected therewith the creation or transfer of departments of the Public Service are:—

- (i.) Trade and commerce.
- (ii.) Taxation.
- (iii.) Bounties on production or export of goods.

- (iv.) Postal, telegraphic, telephonic, and other like services.
- (v.) Naval and military defence.
- (vi.) Lighthouses, lightships, beacons, and buoys.
- (vii.) Astronomical and meteorological.
- (viii.) Quarantine.
- (ix.) Census and statistics.
- (x.) Bankruptcy and insolvency.
- (xi.) Copyrights, patents, and trade marks.
- (xii.) Naturalisation and aliens.
- (xiii.) Marriage.
- (xiv.) Divorce and matrimonial causes.
- (xv.) Invalid and old-age pensions.
- (xvi.) Immigration and emigration.
- (xvii.) Conciliation and arbitration.

4. **Commonwealth Departments.**—As a result of legislation passed from time to time in accordance with section 51, various departments and sub-departments have been transferred from the States to the Commonwealth, whilst other departments necessary for the due performance of the Commonwealth functions have been brought into existence. In the former class are such departments as those of Patents, Trade Marks, Copyrights, Designs, Naturalisation and Meteorology, while in the latter are the Ministerial Departments of External Affairs, Home Affairs, Treasury, Trade and Customs, Defence, Attorney-General and Postmaster-General, as well as such general departments as Public Service Commissioner's Office, Treasury, Audit Department, Crown Law Department, Bureau of Census and Statistics, Federal Land Tax Office, and Prime Minister's Office. It may, therefore, be said that, so far as its financial aspect is concerned, the effect of Federation up to the present time has been the transfer from States to Commonwealth of the revenue obtainable from the great revenue-producing Departments of Customs and Excise, and of the expenditure connected with various departments whose number is gradually increasing, and that, in addition, the various functions of the Commonwealth have necessitated further new expenditure.

5. **Financial Relations between Commonwealth and States.**—For the first ten years after Federation the financial relations between the Commonwealth and State Governments were regulated by section 87 of the Constitution, known generally as the "Braddon Clause." This provided that the Commonwealth should, until 31st December, 1910—and thereafter as long as Parliament should decide—retain for its own use an amount not exceeding one-fourth of the net revenue from Customs and Excise duties, the balance being returned to the States. The framers of the Constitution only contemplated a moderate Federal expenditure, and doubtless considered that one-fourth of the Customs and Excise revenue would be sufficient, as, indeed, it was in the earlier years. It began to be realised, however, later on, that if the Commonwealth was to undertake large national duties such as Defence, a largely increased expenditure must be faced. Consequently, on the expiry of the "Braddon Clause" in 1910, it was replaced by an agreement much more favourable to the Commonwealth. This agreement, known as the "Commonwealth Surplus Revenue Act 1910," was passed by the Fisher Administration for a period of at least ten years. It provided that the Commonwealth was to retain the whole of the Customs and Excise revenue, and to make to the Government of each State (by monthly instalments) an annual payment, equal to 25s. per head of the population of the State.

6. **Special Assistance.**—By the same Act provision was made that, during the period of ten years succeeding 1st July, 1910, a special payment should be made to Western Australia of an annual sum, starting at £250,000 for the first year, and progressively diminishing by £10,000 each subsequent year. One half of the amount was to be debited to all the States (including Western Australia) in proportion to population.

Assistance has also been granted to Tasmania, partly by means of the "Tasmania Grant Act of 1912," and partly by means of a special sum allocated by the Budget of 1913. According to the "Grant Act" a sum of £500,000 was set aside to be paid to

Tasmania by ten annual instalments, starting at £95,000, and progressively diminishing by £10,000 until £5000 is reached. In the Budget of 1913 a sum of £400,000 was allotted to Tasmania, to be paid in nine annual instalments, starting at £5000 and progressively increasing by £10,000 until the last payment, which will, however, be £80,000 instead of £85,000. As the result of these two grants Tasmania will have a first instalment of £95,000, then eight instalments of £90,000 each, and a final one of £85,000.

These concessions to Western Australia and Tasmania have been granted in consideration of the sacrifices made by these States, when yielding control of their Customs revenue to the Commonwealth. The whole question of the financial relations between the Commonwealth and States since Federation has been fully treated in the chapters on Commonwealth Finance, in all previous issues of the Year Book.

## § 2. Consolidated Revenue Fund.

### (A) Nature of Fund.

The provisions made for the formation of a Commonwealth Consolidated Revenue Fund, and the means to be adopted for operating on that fund, are contained in sections 81, 82, and 83 of the Constitution. In section 81 it is provided that "All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution." A strictly literal interpretation of this section would appear to require all loan and trust moneys received by the Commonwealth Executive to be paid to Consolidated Revenue. It is, however, held by Quick and Garran, in their "Annotated Constitution," that the "generic word *moneys* must be controlled by the preceding specific word *revenues*, and limited to moneys in the nature of revenue." This is the view of the matter which has been adopted by the Commonwealth Treasury in the preparation of its accounts. At present certain moneys received by the Commonwealth, which are not of the nature of revenue, are paid to Trust Account. As regards expenditure from the Consolidated Revenue Fund, section 82 provides that the costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund should form the first charge thereon, while section 83 stipulates that "no money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law." Such appropriations are either special, and as such are provided for by means of a permanent Act, or are annual, and provided for in an annual Appropriation Act.

### (B) Revenue.

1. **Total Collections.**—The consolidated revenue of the Commonwealth, which in 1901-2, the first complete financial year under the new régime, amounted to £11,296,985, had, in 1912-13, reached a total of £21,907,084, an increase in ten years of £10,610,099.

Particulars concerning the total amount of revenue collected by the Commonwealth Government from 1st July, 1908, to 30th June, 1913, are contained in the following table:—

**CONSOLIDATED REVENUE OF THE COMMONWEALTH, 1908-9 to 1912-13.**

|              | 1908-9.    | 1909-10.   | 1910-11.   | 1911-12.   | 1912-13.   |
|--------------|------------|------------|------------|------------|------------|
|              | £          | £          | £          | £          | £          |
| Commonwealth | 14,350,793 | 15,540,669 | 18,806,237 | 20,548,520 | 21,907,084 |

For 1908-9 the revenue was lower than that for the preceding year, but the total for the Commonwealth shews a substantial excess over any year prior to 1907-8. Since 1908-9 the revenue has increased steadily every year.

2. **Collections per Head.**—In the table given hereunder particulars are furnished of the amount of revenue per head of population collected in respect of the Commonwealth for the last five years :—

## COMMONWEALTH REVENUE PER HEAD OF POPULATION, 1908-9 to 1912-13.

|                  | 1908-9. |    |    | 1909-10. |    |    | 1910-11. |    |    | 1911-12. |    |    | 1912-13. |    |    |
|------------------|---------|----|----|----------|----|----|----------|----|----|----------|----|----|----------|----|----|
| Commonwealth ... | £       | s. | d. | £        | s. | d. | £        | s. | d. | £        | s. | d. | £        | s. | d. |
|                  | 3       | 7  | 9  | 3        | 11 | 11 | 4        | 5  | 0  | 4        | 9  | 11 | 4        | 12 | 7  |

3. **Sources of Revenue.**—The following table furnishes particulars concerning the Commonwealth revenue derived from each source during the years 1908-9 to 1912-13:—

## SOURCES OF COMMONWEALTH REVENUE, 1908-9 to 1912-13.

| Sources of Revenue.                                    | 1908-9.    | 1909-10.   | 1910-11.   | 1911-12.   | 1912-13.   |
|--|------------|------------|------------|------------|------------|
|  | £          | £          | £          | £          | £          |
| Customs ... ..   | 8,626,521  | 9,505,855  | 10,507,080 | 12,071,434 | 13,055,925 |

| Quarantine ... ..                                      | ...        | 4,724      | 7,068      | 9,875      | 13,162     |
| Coinage ... ..   | ...        | 69,646     | 198,893    | 156,489    | 122,647    |
| New revenue ... ..                                     | 35,978     | 63,076     | ...        | ...        | ...        |
| Public Service Pension Funds, Repayments and Transfers | 34,821     | 35,036     | 61,405     | 39,027     | 42,006     |
| Land Tax ... ..  | ...        | ...        | 1,370,344  | 1,366,457  | 1,564,794  |
| Northern Territory ... ..                              | ...        | ...        | 10,521     | 31,225     | 40,084     |
| Credit Balance Northern Territory Funds                | ...        | ...        | 151,513    | ...        | 24,456     |
| Miscellaneous ... ..                                   | ...        | ...        | 35,954     | 220,039    | 257,403    |
| Total ... ..   | 14,350,793 | 15,540,660 | 18,806,237 | 20,548,520 | 21,907,064 |

The only feature of this table calling for remark is the rapid annual rise of the Customs revenue since 1908-9. The Excise and Postal revenues have only shewn a comparatively small upward tendency during the period under review.

4. **Customs Revenue for Past Five Years.**—Particulars for the Commonwealth as a whole, for the five years 1908-9 to 1912-13, are furnished in the following table:—

## COMMONWEALTH CUSTOMS REVENUE, 1908-9 to 1912-13.

| Classes.               | 1908-9.   | 1909-10.  | 1910-11.   | 1911-12.   | 1912-13.   |
|------------------------|-----------|-----------|------------|------------|------------|
|                        | £         | £         | £          | £          | £          |
| Stimulants ... ..      | 2,252,380 | 2,330,215 | 2,564,101  | 2,706,058  | 2,777,492  |
| Narcotics ... ..       | 961,411   | 994,077   | 1,089,932  | 1,150,990  | 1,206,782  |
| Sugar ... ..           | 140,343   | 506,385   | 170,822    | 275,077    | 691,568    |
| Agricultural products  | 886,612   | 855,313   | 869,708    | 996,953    | 1,072,203  |
| Apparel and textiles   | 1,630,490 | 1,872,832 | 2,068,922  | 2,385,786  | 2,367,945  |
| Metals and machinery   | 932,944   | 997,973   | 1,264,986  | 1,554,983  | 1,639,749  |
| Oils, paints, etc.     | 206,688   | 199,377   | 239,229    | 285,737    | 313,348    |
| Earthenware, etc.      | 230,795   | 247,491   | 334,834    | 375,403    | 490,983    |
| Drugs and chemicals    | 71,589    | 76,898    | 92,857     | 104,341    | 109,619    |
| Wood, wicker, and cane | 336,361   | 324,197   | 463,289    | 501,278    | 535,576    |
| Jewellery, etc.        | 198,196   | 222,749   | 263,818    | 309,309    | 281,631    |
| Leather, etc.          | 208,120   | 253,376   | 303,988    | 386,524    | 435,801    |
| Paper and stationery   | 164,677   | 167,531   | 204,009    | 230,212    | 237,943    |
| Vehicles ... ..        | 95,888    | 122,212   | 170,940    | 279,828    | 328,001    |
| Musical instruments    | 72,128    | 82,949    | 109,423    | 176,009    | 165,839    |
| Miscellaneous articles | 205,697   | 220,580   | 258,953    | 313,505    | 361,350    |
| Other receipts ... ..  | 32,202    | 31,700    | 37,269     | 39,141     | 40,095     |
| Total Customs ... ..   | 8,626,521 | 9,505,855 | 10,507,080 | 12,071,434 | 13,055,925 |

It will be seen that throughout the period here dealt with, the Customs revenue from stimulants and narcotics has represented, approximately, one third of the total Customs revenue. The other principal articles from which Customs revenue was derived were "apparel and textiles," and "metals and machinery." The most marked increase in the amount of duty collected is in the class of "metals and machinery," the revenue under this head for 1912-13 exceeding that for 1908-9 by £706,805. The absolute increase in "apparel and textiles" is about the same, but the proportionate increase not so great.

5. **Excise Collections, 1908-9 to 1912-13.**—Particulars concerning the amount of Excise collected under each head during each of the years ending 30th June, 1909 to 1913, are given hereunder:—

**COMMONWEALTH EXCISE REVENUE, 1908-9 to 1912-13.**

| Particulars.            | 1908-9.          | 1909-10.         | 1910-11          | 1911-12.         | 1912-13.         |
|-------------------------|------------------|------------------|------------------|------------------|------------------|
|                         | £                | £                | £                | £                | £                |
| Beer ... ..             | 551,859          | 584,503          | 617,178          | 694,001          | 718,869          |
| Spirits ... ..          | 243,736          | 267,877          | 331,024          | 376,440          | 411,192          |
| Starch ... ..           | 23,558           | 3,897            | 507              | ...              | ...              |
| Sugar ... ..            | 750,776          | 548,716          | 794,645          | 748,670          | 518,508          |
| Tobacco ... ..          | 638,017          | 673,437          | 720,305          | 810,242          | 840,012          |
| Licenses ... ..         | 9,667            | 8,880            | 9,705            | 9,349            | 8,528            |
| Agricultural machinery  | Dr. 67           | ...              | ...              | ...              | ...              |
| <b>Total Excise ...</b> | <b>2,217,546</b> | <b>2,087,310</b> | <b>2,473,364</b> | <b>2,638,702</b> | <b>2,497,109</b> |

Comparing the Excise collections for 1912-13 with those for 1908-9 it will be seen that the increase in the revenue from tobacco was about 30 per cent., that from beer about 30 per cent., and that from spirits about 70 per cent., while sugar decreased 30 per cent., and decreases were also experienced in starch and licenses.

6. **Commonwealth Taxation.**—Under section 51, sub-section (ii.) of the Constitution, power is given to the Commonwealth Parliament to make laws with respect to taxation, but so as not to discriminate between States or parts of States. Section 90 of the Constitution makes the power of the Commonwealth Parliament to impose Customs and Excise duties an exclusive one, but it would appear that as regards all other forms of taxation the States and Commonwealth possess concurrent powers. The question of the imposition by the Commonwealth Parliament of direct taxes such as land and income taxes is one which has been the subject of considerable discussion, and the opinion has been expressed that the intention of the framers of the Constitution was that of restricting the powers of taxation of the Commonwealth to the imposition of Customs and Excise duties except in cases of great national peril. Whatever the intention of the framers may have been in this matter, the Constitution itself contains no such provision, and the Commonwealth Parliament is given an absolutely free hand in the imposition of taxation. Up to the end of the financial year 1909-10 the only taxes so levied were those of Customs and Excise, referred to in detail in the foregoing paragraphs. During the 1910 session of the Federal Parliament, however, an Act—assented to on 17th November, 1910—was passed, giving to the Commonwealth the power of levying a tax upon the unimproved value of all lands within the Commonwealth which were owned by taxpayers, and not specially exempted. Detailed reference to this Act will be found in Commonwealth Year Books Nos. 5 and 6.

7. **Commonwealth Land Tax.**—Particulars as to the Land Tax assessment for each State for the year ending 30th June, 1912, will be found in the following table :—

**PARTICULARS OF LAND TAX ASSESSMENT FOR EACH STATE OF THE COMMONWEALTH FOR YEAR ENDING 30th JUNE, 1912.**

| State.             | Unimproved Value as ascertained by Department. | Tax Assessed. |          |           |

| Miscellaneous ...           | 96,412           | 164,045          | 149,784          | 141,709          | 138,724          |
| <b>Total ...</b>            | <b>3,409,426</b> | <b>3,731,741</b> | <b>3,906,015</b> | <b>3,916,254</b> | <b>4,226,313</b> |

**9. Revenue from Patents.**—Under the Commonwealth Patents Act 1903, which was assented to on 22nd October, 1903, and came into force on 1st June, 1904, the complete control of the Patents administration of Australia passed from the several State Governments to that of the Commonwealth, which, under section 19 (a) of the Act mentioned, was authorised to collect for each State the fees to which it was entitled under the State Act in respect of proceedings then pending.

The revenue collected since the financial year 1908-9 is shewn in the following table:—

**COMMONWEALTH PATENTS REVENUE, 1908-9 to 1912-13.**

|             | 1908-9. | 1909-10. | 1910-11. | 1911-12. | 1912-13. |
|-------------|---------|----------|----------|----------|----------|
|             | £       | £        | £        | £        | £        |
| Revenue ... | 15,367  | 16,644   | 21,295   | 19,081   | 18,355   |

**10. Revenue from Trade Marks, etc.**—Under the several Acts of the Commonwealth Legislature relating to trade marks, copyrights, and designs, the Commonwealth Government has assumed the exclusive administration of such matters, and now collects all revenue accruing therefrom. The following table gives particulars of the amounts since this item first appeared in the Commonwealth accounts:—

**COMMONWEALTH TRADE MARKS, COPYRIGHTS AND DESIGNS REVENUE, 1908-9 to 1912-13.**

|             | 1908-9. | 1909-10. | 1910-11. | 1911-12. | 1912-13. |
|-------------|---------|----------|----------|----------|----------|
|             | £       | £        | £        | £        | £        |
| Revenue ... | 6,110   | 4,790    | 5,265    | 5,639    | 5,637    |

**11. Defence Revenue.**—The revenue appearing under the head of "Defence" comprises the receipts derived from the sale of stores and clothing, from fines, etc., and for 1912-13 amounted to £39,193.

**12. Coinage.**—The revenue for the Commonwealth under this head is derived from the profit on coin issued, and is made up of £116,831 from silver coin and £5816 from bronze coin.

**(C) Expenditure.**

**1. Nature of Commonwealth Expenditure.**—The disbursements by the Commonwealth Government of the revenue collected by it fell naturally, under the "book-keeping" system, into three classes, viz.:—

- (a) Expenditure on transferred services.
- (b) Expenditure on new services.
- (c) Payment to States of surplus revenue.

Of these three, only the first two were actual expenditure, the last being merely a transfer, the actual expenditure being incurred by the States. In accordance with the provisions of the Constitution the expenditure on transferred services was, under the "book-keeping" system, debited to the several States in respect of which such expenditure was incurred, while the expenditure on new services was distributed *per capita*. Surplus Commonwealth revenue was paid to the States monthly. During the earlier years of Federation, viz., until the end of the year 1903-4, new works, etc., for transferred departments were treated as transferred expenditure, and were charged to the States on whose behalf the expenditure had been incurred. In subsequent years all such expenditure was regarded as expenditure on new services, and was distributed amongst the States *per capita*. Under the new system of keeping the accounts there is no further debiting of expenditure to the several States.

**2. Total Expenditure.**—The total expenditure by the Commonwealth Government during the period 1908-9 to 1912-13 is shewn in the following table :—

**COMMONWEALTH EXPENDITURE, 1908-9 to 1912-13.**

|                  | 1908-9.   | 1909-10.  | 1910-11.   | 1911-12.   | 1912-13.   |
|------------------|-----------|-----------|------------|------------|------------|
|                  | £         | £         | £          | £          | £          |
| Commonwealth ... | 6,420,398 | 7,499,516 | 13,158,529 | 14,724,097 | 15,787,154 |

The expenditure for 1912-13 was higher than that for any preceding year, and was considerably higher than the expenditure for 1908-9.

**3. Expenditure per Head.**—Particulars concerning the Commonwealth expenditure per head are furnished hereunder :—

**COMMONWEALTH EXPENDITURE PER HEAD, 1908-9 to 1912-13.**

|                  | 1908-9. | 1909-10. | 1910-11. | 1911-12. | 1912-13. |
|------------------|---------|----------|----------|----------|----------|
|                  | £ s. d. | £ s. d.  | £ s. d.  | £ s. d.  | £ s. d.  |
| Commonwealth ... | 1 10 4  | 1 14 8   | 2 19 6   | 3 4 6    | 3 6 8    |

**4. New Works, etc.**—As previously mentioned, the Commonwealth expenditure on new works, etc., for transferred departments was, prior to 1904-5, included under the head of "transferred" expenditure, but in that and subsequent years up to 1909-10 has been treated as "other" expenditure, and debited to the States *per capita*. Particulars of the expenditure on new works, etc., during the last five years are given in the following table :—

**COMMONWEALTH EXPENDITURE ON NEW WORKS, etc., 1908-9 to 1912-13.**

| Departments.           | 1908-9. | 1909-10. | 1910-11.  | 1911-12.  | 1912-13*. |
|------------------------|---------|----------|-----------|-----------|-----------|
|                        | £       | £        | £         | £         | £         |
| Trade and Customs ...  | 20,019  | 5,124    | ...       | ...       | ...       |
| Defence ...            | 101,020 | 337,961  | ...       | ...       | ...       |
| Postal ...             | 541,809 | 555,557  | ...       | ...       | ...       |
| Sundry departments ... | 4,339   | 2,526    | 2,452,960 | 3,566,367 | 2,653,282 |
| Total ...              | 667,187 | 901,168  | 2,452,960 | 3,566,367 | 2,653,282 |

\* In addition, the following amounts were spent from Trust Funds :—£475,342 for Fleet construction, and £413,097 for Telegraphs and Telephones.

It will be seen that the Commonwealth expenditure under this head has increased considerably in recent years, the total for 1912-13 being about four times as great as that for 1908-9. The main cause of the great increase in recent years is the large expenditure on fleet construction.

5. **Cost of Departments, etc.**—Arranged in such a manner as to shew under each Department the expenditure on behalf of that Department, the cost of the several branches of the Commonwealth service for the years 1908-9 to 1912-13 was as follows:—

**COST OF COMMONWEALTH DEPARTMENTS, etc., 1908-9 to 1912-13.**

| Departments, etc.         | 1908-9.          | 1909-10.         | 1910-11.          | 1911-12.          | 1912-13.          |
|---------------------------|------------------|------------------|-------------------|-------------------|-------------------|
|                           | £                | £                | £                 | £                 | £                 |
| Governor-General ...      | 22,554           | 21,908           | 20,884            | 23,842            | 21,648            |
| Parliament ...            | 163,991          | 230,233          | 211,558           | 189,550           | 281,261           |
| Prime Minister ...        | ...              | ...              | ...               | 14,863            | 57,559            |
| External Affairs ...      | 53,513           | 80,469           | 454,128           | 494,010           | 539,792           |
| Attorney-General ...      | 32,027           | 32,349           | 35,329            | 62,899            | 66,517            |
| Home Affairs ...          | 110,291          | 88,112           | 179,097           | 155,628           | 129,972           |
| Treasury ...              | 34,473           | 74,108           | 1,960,318         | 2,308,506         | 2,910,224         |
| Trade and Customs ...     | 837,741          | 777,788          | 1,051,497         | 1,024,389         | 875,784           |
| Defence ...               | 1,050,590        | 1,534,881        | 1,395,798         | 2,128,649         | 2,612,687         |
| Postmaster-General ...    | 3,625,402        | 3,786,755        | 3,559,785         | 4,330,896         | 4,781,524         |
| All other Expenditure ... | 489,516          | 882,913          | 4,290,135         | 3,900,865         | 3,510,256         |
| <b>Total ...</b>          | <b>6,420,398</b> | <b>7,499,516</b> | <b>13,158,529</b> | <b>14,724,097</b> | <b>15,787,154</b> |

The largeness of the expenditure under the head of Parliament in the years 1909-10 and 1912-13 was in great measure due to the fact that the general elections were held in those years, while the expenditure in connection with the sugar bounties is mainly responsible for the variations which have taken place in the cost of the Department of Trade and Customs. The amount paid in Old-Age and Invalid Pensions is included in Treasury expenditure for the first time in 1910-11. It may be noted that the great increase in the item "all other expenditure," for the year 1910-11 and subsequent years, is owing to the inclusion for the first time of the expenditure on "new works," which had formerly been debited to the departments in which it had been incurred. More detailed reference to the items included under the above general heads is furnished in the succeeding paragraphs.

6. **Governor-General.**—In section 3 of the Constitution it is enacted that, until the Commonwealth Parliament otherwise provides, there shall be payable out of the Consolidated Revenue Fund for the salary of the Governor-General an annual sum of ten thousand pounds, and a proviso is made that the salary of the Governor-General shall not be altered during his continuance in office. The total expenditure in connection with the Governor-General and his establishment for the five years 1908-9 to 1912-13 is as follows:—

**EXPENDITURE, GOVERNOR-GENERAL AND ESTABLISHMENTS, 1908-9 to 1912-13.**

| Details.                             | 1908-9.       | 1909-10.      | 1910-11.      | 1911-12.      | 1912-13.      |

| Administration of Electoral Act ... ..                   | 27,223         | 33,602         | 17,437         | 39,863         | 54,441         |
| Miscellaneous ... ..                                     | ...            | 139            | 379            | 2,238          | 558            |
| <b>Total ... ..</b>                                      | <b>163,991</b> | <b>220,233</b> | <b>211,558</b> | <b>189,550</b> | <b>281,261</b> |

In section 66 of the Constitution provision is made that there shall be payable out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of Ministers of State, an annual sum which, until Parliament otherwise provides, shall not exceed £12,000. This provision is still in force. Allowances to senators and members of the House of Representatives are also provided for in the Constitution, section 48 of which specifies that until Parliament otherwise provides each such allowance shall consist of £400 a year, reckoned from the day on which the member takes his seat. During the second session of the Commonwealth Parliament in 1907 the question of allowances to members was under consideration, and an Act was passed raising the annual allowance from £400 to £600, such increase to date from 1st July, 1907.

**8. Prime Minister's Department.**—This is a new department created during the financial year 1911-12. In addition to the Prime Minister's Office it includes the Audit Office taken from the Treasury, the Executive Council taken from the External Affairs Department, and the Public Service Commissioner's Office taken from the Home Affairs Department. The expenditure on the Prime Minister's Department for the financial year ended 30th June, 1913, included the following items:—Prime Minister's Office, £21,685; Audit Office, £10,663; Public Service Commissioner's Office, £20,683; Executive Council, £128; Rent, Repairs, and Miscellaneous, £4400; total, £57,559. The Public Service Commissioner's Office is included for the first time, and is the principal factor in the largely increased expenditure on the department.

**9. External Affairs.**—Under the control of the Department of External Affairs is placed the expenditure in connection with the London Office, Papua and the Northern Territory. The expenditure in connection with the Northern Territory is exclusive of the Customs and Postal expenditure. Particulars for the five years 1908-9 to 1912-13 are as follows:—

## EXPENDITURE, EXTERNAL AFFAIRS DEPARTMENT, 1908-9 to 1912-13.

| Details                     | 1908-9. | 1909-10. | 1910-11. | 1911-12. | 1912-13. |

| Miscellaneous ... ..        | 14,923  | 31,790   | 61,626   | 61,282   | 65,293   |
| Total ... ..                | 53,513  | 80,469   | 454,128  | 494,010  | 539,722  |

10. **Northern Territory.**—The Department of External Affairs assumed control of the administration of the Northern Territory from 1st January, 1911, and separate accounts were issued for the first time in the Treasurer's statement for the financial year ending 30th June, 1911. The chief sources of revenue for the year ending 30th June, 1913, were the Customs and Excise, amounting to £12,337, and Railways £13,747. The Postal revenue amounted to £4074, whilst the total revenue was £80,951, inclusive of £24,456 credit balance of Northern Territory funds. The chief items of expenditure were as follows:—Postal Department, £16,761; goldfields and mining, £14,964; railways, £17,963; and police, £10,609. The total expenditure was £242,048. In addition to this expenditure the Commonwealth is liable for interest on loans and redemption, which for this financial year totalled £227,561. The deficiency for the year was £388,658.

11. **Papua.**—The sums shewn in the above table as expenditure in connection with Papua represent the Commonwealth grants towards the cost of administering that territory, as well as certain additional amounts. The ordinary revenue and expenditure of Papua are kept distinct from those of the Commonwealth. Apart from the Commonwealth contribution, the principal source of revenue is the Custom House. Details for the five years 1908-9 to 1912-13 are as follows:—

## PAPUAN REVENUE, 1908-9 to 1912-13.

| Details.                  | 1908-9. | 1909-10. | 1910-11. | 1911-12. | 1912-13. |

|                           | £       | £        | £        | £        | £        |
| Customs dues ... ..       | 20,758  | 24,901   | 32,554   | 37,751   | 33,453   |
| Other collections ... ..  | 6,948   | 11,017   | 13,418   | 13,284   | 18,882   |
| Commonwealth grant ... .. | 23,000  | 26,000   | 30,000   | 30,000   | 48,000*  |
| Total ... ..              | 50,706  | 61,918   | 75,972   | 81,035   | 100,335  |

\* Including £18,000 for special purposes.

One of the largest items of Papuan expenditure is the maintenance, etc., of vessels and boats, including the steam yacht "Merrie England," the total outlay under this head for 1912-13 being no less than £8365. The expenditure on public justice for 1912-13 totalled £24,779, comprising "magistrates, etc.," £13,235; "armed native constabulary," £8033, and "gaols," £3511. The total expenditure for each of the five years 1908-9 to 1912-13 was as follows:—

## PAPUAN EXPENDITURE, 1908-9 to 1912-13.

| Particulars.          | 1908-9. | 1909-10. | 1910-11. | 1911-12. | 1912-13. |
|-----------------------|---------|----------|----------|----------|----------|
|                       | £       | £        | £        | £        | £        |
| Total expenditure ... | 51,036  | 64,874   | 70,699   | 85,636   | 89,170   |

12. **Attorney-General's Department.**—The extra expenditure connected with this Department from 1907-8 was brought about in large measure by the extension of the Federal High Court, the total cost of which, including the Court of Conciliation and Arbitration, for the year 1912-13, amounted to £28,024. The expenditure on Patents, Trade Marks, Copyrights, and Designs was included for the first time in 1911-12. Details for the five years 1908-9 to 1912-13 are furnished hereunder:—

## EXPENDITURE, ATTORNEY-GENERAL'S DEPARTMENT, 1908-9 to 1912-13.

| Total ...                                 | 32,027  | 32,349   | 35,329   | 62,899   | 66,517   |

13. **Home Affairs Department.**—The creation of new departments such as the Bureau of Census and Statistics, and the Meteorological Bureau, and the extension of the field of operations of the Public Works branch, all of which are grouped for general administrative purposes under the Department of Home Affairs, have led to a considerable increase in the expenditure. The heaviness of the expenditure of this department for 1908-9 was, in a large measure, due to the cost incurred by the Commonwealth in connection with the reception of the American fleet; whilst that of 1910-11 was mainly due to the appropriation for the census. Particulars for the five years 1908-9 to 1912-13 are as follows:—

## EXPENDITURE, HOME AFFAIRS DEPARTMENT, 1908-9 to 1912-13.

| Details.                             | 1908-9. | 1909-10. | 1910-11. | 1911-12. | 1912-13. |
|--------------------------------------|---------|----------|----------|----------|----------|
|                                      | £       | £        | £        | £        | £        |

\* Now included in Prime Minister's Department.

14. **Treasurer's Department.**—The sub-departments under the control of the Commonwealth Treasurer are the Treasury, the Old Age Pensions Department, and

the Land Tax Office. The Audit Office was transferred to the Prime Minister's Department in 1911-12. During the financial year 1908-9 the expenditure under this department was swelled by a donation of £10,000 to the Sicily Earthquake Relief Fund, and in 1909-10 by the increased expenditure on salaries, etc., in the Old Age Pensions Department. The statements in previous Year Books, up to No. 5 inclusive, have been rearranged so as to include expenditure on Invalid and Old Age Pensions from 1908-9; consequently, from that year onward until 1910-11 the amounts given below differ from those on page 700 by the item "Invalid and Old Age Pensions." Details of the expenditure of this department for each of the five years 1908-9 to 1912-13 are furnished hereunder:—

#### EXPENDITURE, TREASURER'S DEPARTMENT, 1908-9 to 1912-13.

| Miscellaneous ... ..                              | 1,183   | 13,820   | 21,873    | 43,884    | 69,318    |
| Total ... ..                                      | 497,001 | 915,289  | 1,960,318 | 2,308,506 | 2,910,224 |

15. **Trade and Customs.**—Under this head have been included the expenditure of all the sub-departments under the control of the Minister of Trade and Customs, as well as the amounts payable as sugar and other bounties and the expenses in connection therewith. The Administration of Patents, Trade Marks, and Copyright is now entrusted to the Attorney General's Department. The large divergencies in the total expenditure which these figures exhibit for recent years have been mainly due to variations in the amount payable in respect of sugar bounties. Particulars for the five years 1908-9 to 1912-13 are given in the following table:—

#### EXPENDITURE, TRADE AND CUSTOMS DEPARTMENT, 1908-9 to 1912-13.

16. **Defence.**—The Commonwealth expenditure in connection with Defence, which in 1901-2 amounted to £861,218, had by 1908-9 grown to £1,050,590. A slight fall was experienced in 1910-11 owing to the loss of the item "new works." The largeness of the expenditure for recent years has been in the main the consequence of the new defence system. Particulars for the five years 1908-9 to 1912-13 are as follows:—

**EXPENDITURE, DEFENCE, 1908-9 to 1912-13.**

18. **Interest on Transferred Properties.**—At the time of Federation, when the Commonwealth undertook control of a great many departments which had previously been worked by the States, a great deal of property was handed over to the Commonwealth Government. This consisted mainly of Post Offices, Customs Houses, Defence works, and other buildings necessary to the effective working of the transferred departments. In the early days of the "Braddon Clause," when the Commonwealth Government was spending less than its statutory proportion of the Customs revenue, the question of suitable compensation to the States did not become acute; but, when the "Braddon Clause" was replaced by another arrangement between Commonwealth and States, much less favourable to the latter, the matter was put upon a more definite footing. In the Commonwealth accounts for 1911-12 and 1912-13, definite amounts (independent entirely of the subsidy) have been paid to the States under the heading "Interest on Transferred Properties." These amounts have been substantially based upon a valuation, made by the Home Affairs Department, with the following result:—

## VALUATION OF TRANSFERRED PROPERTIES.

| STATES.                  |     |            | DEPARTMENTS.              |     |            |

| Balance due to 30th June, 1913                | 653,744             | 284,693  | 69,374             | 1,232         | 1,009,043 |
| Paid during year 1911-12 ...                  | 368,645             | 162,131  | 39,515             | 704           | 570,995   |
| Paid during year 1912-13 ...                  | 285,099             | 122,562  | 29,859             | 528           | 438,048   |

Interest has been paid as from 1st July, 1910. In the year 1911-12, interest at the rate of 8 per cent. for two years was paid. In the year 1912-13, interest at the rate of  $3\frac{1}{2}$  per cent. was paid, together with two yearly payments at the rate of  $\frac{1}{2}$  per cent., thus completing payment for the full period at the rate of  $3\frac{1}{2}$  per cent.

19. **Miscellaneous.**—In addition to the foregoing there are certain items which do not come under any of the heads enumerated. For 1912-13 the total expenditure under this heading was £3,510,256, made up of £2,653,282 for new works, and a payment of £856,974 into the trust fund for the purpose of old-age pensions. The entire expenditure for new works now appears as a separate item instead of being debited to the different departments.

### (D) Subsidy Paid to States.

1. **Net Revenue.**—As mentioned in sub-section 1 of this section, the Constitution provided under sections 87, 93 and 95 for the payment to the States of all surplus revenue of the Commonwealth, such payment to amount in the aggregate during the continuation of the Braddon clause to not less than three-fourths of the net revenue from Customs and Excise. The expression "net revenue" used in section 87 has been taken to mean the gross revenue less drawbacks and refunds, and less also cost of collection. This view, adopted by the Commonwealth Government, was that indicated by Quick and Garran in their "Annotated Constitution of the Australian Commonwealth," in which they say: "The net revenue from duties of Customs and Excise is the total receipts from these sources after deducting the cost of collection. No attempt was made in the Constitution to define the deductions which may be made in order to arrive at the net revenue; this is a matter of book-keeping, which is left wholly to the Executive Government." In actual practice the statutory three-fourths of net Customs and Excise revenue was ascertained by the Commonwealth Treasury by deducting from the total Customs and Excise revenue (less drawbacks and refunds) the "transferred" expenditure of the Department of Trade and Customs and the expenditure on new works for that department, and taking three-fourths of the result.

2. **Payments to the Several States.**—In the following table are furnished particulars relative to the amounts actually paid to the several States on account of each of the financial years 1908-9 to 1912-13:—

#### COMMONWEALTH SUBSIDY PAID TO STATES, 1908-9 to 1912-13.

| State.                | 1908-9.   | 1909-10.  | 1910-11.  | 1911-12.  | 1912-13.   |
|-----------------------|-----------|-----------|-----------|-----------|------------|
|                       | £         | £         | £         | £         | £          |
| New South Wales ...   | 3,326,276 | 3,480,314 | 1,954,986 | 2,046,993 | 2,178,683  |
| Victoria ...          | 1,987,435 | 2,109,379 | 1,617,572 | 1,667,657 | 1,692,121  |
| Queensland ...        | 1,027,047 | 1,099,383 | 691,625   | 761,302   | 780,051    |
| South Australia ...   | 716,957   | 842,508   | 514,622   | 511,719   | 527,151    |
| Western Australia ... | 627,933   | 707,672   | 591,243   | 599,991   | 605,215    |
| Tasmania ...          | 244,747   | 253,180   | 233,143   | 236,761   | *241,709   |
| Total ...             | 7,930,395 | 8,492,436 | 5,603,191 | 5,824,423 | *6,024,930 |

\* Not including special grant of £95,000 to Tasmania.

For 1908-9 the surplus revenue paid to the States was lower in all cases than that for 1907-8. This was due in part to the fact that the 1907-8 payments were somewhat abnormal, and in part to the retention by the Commonwealth in 1908-9 of all revenue in excess of the statutory three-fourths of net Customs and Excise Revenue. In 1909-10 the surplus revenue returned to the States was higher in every case than in 1908-9. In 1910-11, owing to the new system of allotting the Commonwealth subsidy, the amounts received by each State were the smallest for the period under review, but they all rose, with the exception of South Australia, in 1911-12, and again, without exception, in 1912-13. The amount allotted to Tasmania is exclusive of the first instalment of the special payment to which reference has already been made (see page 693).

**3. Commonwealth Subsidy per head of Population.**—The following table furnishes particulars concerning the amount of surplus Commonwealth revenue per head of population which the several States received during the financial years 1905-6 to 1909-10, and is of interest in connection with the new financial agreement, under which the Commonwealth pays 25s. per head of population, to all the States, for a period of ten years, subject to a special arrangement in favour of Western Australia. (See page 693.)

**COMMONWEALTH SUBSIDY PER HEAD OF POPULATION PAID TO STATES,  
1905-6 to 1909-10.**

| State.                | 1905-6. | 1906-7. | 1907-8. | 1908-9. | 1909-10. |
|-----------------------|---------|---------|---------|---------|----------|

| Commonwealth ...      | 1 16 8  | 1 18 4  | 2 2 7   | 1 17 6  | 1 19 3   |

**4. Proportion Actually Paid.**—For the period of nine and a-half years from the 1st. January, 1901, to 30th June, 1910, the percentage of net revenue from Customs and Excise duties paid to the several States was as follows:—New South Wales, 84 per cent.; Victoria, 80 per cent.; Queensland, 74 per cent.; South Australia, 84 per cent.; Western Australia, 86 per cent.; Tasmania, 78 per cent.

### § 3. Trust Fund.

**1. Trust Accounts.**—The Trust Fund credit balance on 30th June, 1913, amounted to £13,838,381, as compared with £14,255,098 for the corresponding date in the year ending 30th June, 1912. These enormous amounts are due mainly to the Australian Notes Account referred to in detail in paragraph 3. Details concerning the various trust accounts contributing to this amount are as follows:—

## COMMONWEALTH TRUST FUND, 30th JUNE, 1913.

|                                   |                                   | Total ... ..                      | 13,838,381                        |

2. **Distribution.**—The amounts to credit of Trust Fund in the several States on 30th June, 1913, were as follows:—New South Wales, £671,479; Victoria, £12,213,206; Queensland, £250,731; South Australia, £269,264; Western Australia, £256,148; and Tasmania, £177,553.

3. **Australian Notes Account.**—After the passage of the Australian Notes Act, Australian notes began to appear in circulation in December, 1910. For the first half of the calendar year 1911, they circulated side by side with bank notes and Queensland Treasury notes. After 30th June, 1911, the penal clauses of the Notes Act came into operation and the banks and the Queensland Government began to withdraw their notes from active circulation. By the end of the year the process was virtually complete. On 30th June, 1913, the notes issued and unredeemed amounted to £9,163,518. Against this there was a reserve in gold coin of £3,732,557 and other assets, of which the most important were investments in Government Stock and fixed deposits, totalling £5,720,000, and returning an annual income of £216,600.

The position, according to a Treasury return issued at the end of February, 1914, was as follows:—

## COMMONWEALTH NOTES ISSUED AND UNREDEEMED AT 25th FEBRUARY, 1914.

|             | £         | s. | d. |
|-------------|-----------|----|----|
| 10s. ... .. | 22,874    | 10 | 0  |
| £1 ... ..   | 3,068,570 | 0  | 0  |
| £5 ... ..   | 3,430,365 | 0  | 0  |
| £10 ... ..  | 1,702,210 | 0  | 0  |
| £20 ... ..  | 365,440   | 0  | 0  |
| £50 ... ..  | 852,200   | 0  | 0  |
| £100 ... .. | 465,600   | 0  | 0  |
|             | 9,907,259 | 10 | 0  |

The amount of the gold reserve was £4,440,290, representing 44.82 per cent. of the liability. Out of this amount of Commonwealth notes the banks hold about £5,000,000, the balance being in active circulation.

The subject is also dealt with at some length in Section XXI., Sub-section 2, Banking.

4. **Advances by Commonwealth Government to States.**—Reference has been made in the previous paragraph to the investments of the gold reserve from the Australian Notes Account. A large proportion has been advanced to the respective State Governments for short periods, sometimes as low as one year. This is a novel and interesting departure in Australian Public Finance, and in view of the new financial relations thus brought about between the Commonwealth and State Governments, the following table is appended, giving full particulars of the investments of £5,720,000, to which reference has already been made:—

**AUSTRALIAN NOTES ACCOUNT.—PARTICULARS OF INVESTMENT AS AT  
30th JUNE, 1913.**

| Particulars.                       | Amount.          | Rate of Interest. | Date of Maturity. | Annual Amount of Interest. |
|------------------------------------|------------------|-------------------|-------------------|----------------------------|
| <b>STATE GOVERNMENT SECURITIES</b> | £                | %                 |                   | £                          |
| New South Wales Funded Stock       | 1,000,000        | 3½                | 10/3/19           | 37,500                     |
| Victorian Government Debentures    | 980,000          | 3½                | 1/5/21            | 35,000                     |
| Western Australian Stock           | 650,000          | 3½                | 1/9/26            | 24,375                     |
| "    "    Treasury Bills           | 100,000          | 4                 | 15/4/14           | 4,000                      |
| Tasmanian Inscribed Stock          | 200,000          | 3½                | 1/4/21            | } 18,750                   |
| "    "    "    "                   | 300,000          | 3½                | 1/10/21           |                            |
| <b>FIXED DEPOSITS—</b>             |                  |                   |                   |                            |
| New South Wales Government         | 800,000          | 4                 | 13/6/14           | 32,000                     |
| "    "    "    "                   | 200,000          | 4                 | 21/6/14           | 8,000                      |
| "    "    "    "                   | 100,000          | 3½                | 17/9/13           | 3,500                      |
| "    "    "    "                   | 100,000          | 3½                | 17/10/13          | 3,500                      |
| "    "    "    "                   | 100,000          | 3½                | 17/11/13          | 3,750                      |
| "    "    "    "                   | 100,000          | 3½                | 17/12/13          | 3,750                      |
| Queensland Government              | 840,000          | 4                 | 5/3/14            | 33,600                     |
| Commonwealth Bank                  | 50,000           | 3½                | 30/6/14           | 1,750                      |
| "    "    "    "                   | 50,000           | 3½                | 31/7/14           | 1,750                      |
| "    "    "    "                   | 50,000           | 3½                | 31/8/14           | 1,750                      |
| "    "    "    "                   | 50,000           | 3½                | 30/9/14           | 1,750                      |
| Brisbane Bank                      | 25,000           | 4                 | 20/1/14           | 1,000                      |
| Launceston Bank                    | 25,000           | 3½                | 16/8/13           | 875                        |
| <b>Total</b>                       | <b>5,720,000</b> | <b>—</b>          | <b>—</b>          | <b>216,600</b>             |

In addition to the amounts which appear in this table the Commonwealth Government has made further advances to the States from other Trust Funds. The total amount advanced to the States at 30th June, 1913, was £6,780,000, returning interest to the extent of £259,625.

#### § 4. Commonwealth Public Debt.

Although the Federal Government has never gone to the public as a borrower there still exists a Commonwealth debt. The first portions were contracted at the beginning of 1911, when the Federal Government assumed responsibility for the outstanding liabilities of the Northern Territory and the Port Augusta-Oodnadatta Railway. Another item was added to the list later on in the year by the passage of two Acts (Nos. 20 and 24 of 1911), relating to the issue of Inscribed Stock, the former being permissive, and the latter specifying the fixed sum of £2,460,476. This amount was to be raised for the following purposes:—

- (1) Construction of Kalgoorlie-Port Augusta Railway.
- (2) Acquisition of land in Federal Territory.
- (3) Purchase of site for High Commissioner's Office in London.
- (4) Redemption of certain Treasury Bills issued by the South Australian Government on behalf of the Northern Territory.
- (5) Repayment to South Australia of amount paid out of revenue towards construction of Oodnadatta Railway.

On 18th April, 1912, an order was passed in pursuance of these Acts, creating Inscribed Stock to the value of £700,000. The money was taken from the Trust Fund, and the stock sold to the Commonwealth Treasurer at par. Interest is at the rate of  $3\frac{1}{2}$  per cent. per annum, with a provision for a sinking fund of  $\frac{1}{2}$  per cent. The money was spent as follows:—£400,000 in London; £226,000 in reduction of Northern Territory Debt; £34,476 to the Government of South Australia on account of the Oodnadatta Railway. There was a balance of £39,524 unexpended on 30th June, 1912. The loan is repayable at par, at any time between 1st April, 1962, and 1st April, 1972, at the option of the Commonwealth Treasurer. The amount of stock sold under this Act was subsequently increased, and at 30th June, 1913, stood at £2,000,000. The unexpended balance on 30th June, 1913, was £151,498.

The following is a statement of the Public Debt of the Commonwealth at 30th June, 1913:—

**COMMONWEALTH PUBLIC DEBT, 30th JUNE, 1913.**

|   |     |     |     |     |            |
|---|-----|-----|-----|-----|------------|
| Inscribed Stock                                   | ... | ... | ... | ... | £2,000,000 |
| Balance of Loans, Northern Territory              | ... | ... | ... | ... | 3,359,891  |
| Balance of Loans, Port Augusta-Oodnadatta Railway |     |     |     |     | 2,071,058  |
| Total   |     |     |     |     | £7,430,949 |

Of this amount, £3,646,548 is repayable in London, and £3,784,401 in Australia. The average rate of interest is £3 14s. 10d. per annum.

## SECTION XX.

## STATE FINANCE.

## § 1. General.

**1. Functions of State Governments.**—In any comparison of the finances of the several States due recognition must be made of the actual functions assumed by the respective Governments, and also of the local conditions and requirements in each case. Direct comparisons of public expenditure are thus rendered difficult, owing to the fact that functions which in one State are assumed by the Central Government are in another State relegated to local governing bodies, and further by the fact that costly developmental work may, under certain conditions, be not only economically justifiable, but may be an essential of progress, whilst parsimonious expenditure may be a serious economic blunder. A large expenditure may, therefore, be an indication either of gross extravagance and bad economy on the one hand or healthy and vigorous progress and good economy on the other.

Similarly, as regards revenue, imposts which in some States are levied by the Central Government are in others considered as matters to be dealt with locally. Under these circumstances care is needed in instituting comparisons between the several States, and the particulars contained in this section should be read in connection with those contained in the section dealing with Local Government. It should also be noted that in many ways the budgets of the Australian Governments differ materially from those of most European countries, owing to the inclusion therein of the revenue and expenditure of departments concerned in rendering public services, such for instance as railways, tramways, water supply, etc., which, in the other countries referred to, are often left to private enterprise.

**2. Accounts of State Governments.**—The various financial transactions of the States are in each case concerned with one or other of three Funds—the “Consolidated Revenue Fund,” the “Trust Funds,” and the “Loan Funds.” All revenue collected by the State is placed to the credit of its Consolidated Revenue Fund, from which payments are made under the authority of an Annual Appropriation Act passed by the Legislature, or by a permanent appropriation under a special Act. The hypothecation of the revenue from a specific tax to the payment for some special service is not practised in Australia, all statutory appropriations ranking on an equality as charges on the Consolidated Revenue Fund. The Trust Funds comprise all moneys held in trust by the Government, and include such items as savings bank funds, sinking funds, insurance companies’ deposits, etc. The Loan Funds are credited with all loan moneys raised by the State, and debited with the expenditure therefrom for public works or other purposes.

**3. Inter-relation of Commonwealth and State Finance.**—The principal alteration in State finance, brought about by Federation, has been that the States have transferred to the Commonwealth the large revenue received by the Customs and Postal Departments, and have been relieved of the expenditure connected with these and the Defence Departments, while, on the other hand, a new item of State revenue has been introduced, viz., the payment to the States of a Commonwealth subsidy. Provision for the taking over by the Commonwealth of certain of the public debts of the States is made

in section 105 of the Constitution, and a proposed law extending this provision to the whole of the State indebtedness, which passed both Houses of the Federal Legislature by the statutory majority, was submitted to a referendum at the election in April, 1910, and received the requisite endorsement by the electorate. (See also Section XXXIV., *Miscellaneous*, re resolution at Premiers' Conference, 1914.)

## § 2. State Consolidated Revenue Funds.

### (A) Receipts.

1. **Sources of Revenue.**—The principal sources of State revenue are:—

- (a) Taxation.
- (b) The public works and services controlled by the State Governments.
- (c) Sale of and rental from Crown lands.
- (d) The Commonwealth subsidy.
- (e) Miscellaneous sources, comprising fines, fees, interest, etc.

Of these sources, that yielding the largest revenue for the States as a whole is the group of public works and services, the principal contributor being the Government railways and tramways. Next in magnitude comes the payment of the subsidy by the Commonwealth, followed in order by Taxation and Land Revenue.

2. **Amount Collected.**—The following table furnishes particulars of the total amount of consolidated revenue received by the several States during the ten years 1903-4 to 1912-13:—

STATE REVENUES, 1903-4 to 1912-13.

| Year.      | N.S.W.     | Victoria.  | Q'land.   | S. Aust.  | W. Aust.  | Tas.      | All States. |
|------------|------------|------------|-----------|-----------|-----------|-----------|-------------|
|            | £          | £          | £         | £         | £         | £         | £           |
| 1903-4 ... | 11,248,328 | 7,319,949  | 3,595,440 | 2,568,100 | 3,550,016 | 857,668   | 29,139,501  |
| 1904-5 ... | 11,836,918 | 7,515,742  | 3,595,399 | 2,798,849 | 3,615,340 | 852,681   | 29,714,929  |
| 1905-6 ... | 12,283,082 | 7,811,475  | 3,853,523 | 2,866,308 | 3,558,939 | 900,657   | 31,273,984  |
| 1906-7 ... | 13,392,435 | 8,345,534  | 4,307,912 | 3,252,705 | 3,401,354 | 970,843   | 33,670,783  |
| 1907-8 ... | 13,960,768 | 8,314,480  | 4,488,398 | 3,722,090 | 3,376,641 | 1,005,274 | 34,867,646  |
| 1908-9 ... | 13,646,126 | 8,247,684  | 4,769,172 | 3,591,260 | 3,268,993 | 934,405   | 34,457,640  |
| 1909-10    | 14,540,073 | 8,597,992  | 5,119,254 | 4,032,891 | 3,657,670 | 1,008,932 | 36,956,812  |
| 1910-11    | 13,839,139 | 9,204,503  | 5,320,008 | 4,181,472 | 3,850,439 | 970,092   | 37,365,653  |
| 1911-12    | 15,776,816 | 10,009,796 | 5,989,347 | 4,450,739 | 3,966,673 | 1,084,663 | 41,278,034  |
| 1912-13    | 16,057,298 | 10,287,285 | 6,378,213 | 4,506,698 | 4,596,659 | 1,206,292 | 43,032,445  |

The figures given in this table relate in each instance to the financial year ended 30th June, except in the case of Tasmania, where the figures shewn for 1903-4 relate to the year ended 31st December, 1903.

During the nine years from 30th June, 1903-4, to 30th June, 1912-13, the aggregate revenues of the States increased by no less a sum than £13,892,944, or a little less than 48 per cent. Increases were in evidence in all the States, the largest increase being that of £4,808,970 in New South Wales.

It will be noticed that in all the States, except Queensland, the revenue for 1908-9 was lower than that of the preceding year, largely owing to the fact that the revenue for 1907-8 was swelled by the payment of Customs duties in anticipation of, or in consequence of, the new tariff imposed on 8th August, 1907.

3. **Revenue per Head.**—Details concerning the revenue per head of population, collected in the several States of the Commonwealth during the ten years 1903-4 to 1912-13, are furnished in the table given hereunder. It will be seen that throughout the period Western Australia has collected by far the largest amount per head, and that Tasmania has collected the least.

## STATE REVENUE PER HEAD OF POPULATION, 1903-4 to 1912-13.

| Year.       | N.S.W.  | Victoria. | Q'land. | S. Aust. | W. Aust. | Tasmania. | C'wealth. |

| 1908-9 ...  | 8 12 4  | 6 11 11   | 8 11 3  | 9 4 5    | 12 11 9  | 4 17 6    | 8 2 10    |
| 1909-10 ... | 9 0 2   | 6 14 8    | 8 17 2  | 10 3 6   | 13 15 4  | 5 4 6     | 8 10 11   |
| 1910-11 ... | 8 8 5   | 7 1 5     | 8 17 8  | 10 3 11  | 13 18 2  | 5 0 1     | 8 8 11    |
| 1911-12 ... | 9 8 5   | 7 6 11    | 9 12 6  | 10 12 10 | 13 9 8   | 5 12 1    | 9 0 8     |
| 1912-13 ... | 9 0 6   | 7 9 0     | 10 0 5  | 10 9 6   | 15 0 3   | 6 2 4     | 9 1 10    |

In all the States, except Western Australia, the four years up to 1909-10 witnessed a marked increase in the State revenue collections per head, the most noticeable advances being £2 7s. 2d. in the case of South Australia and £1 12s. 2d. in that of Queensland. The Western Australian decline was continuous until 1908-9, though recovering in 1909-10, and for 1912-13 the revenue per head in that State exceeded the Commonwealth average by nearly 65 per cent.

4. Details for 1912-13.—Classifying the revenue of the several States in the manner indicated in § 2 (A) 1 above, particulars for the year 1912-13 are as follows:—

## DETAILS OF STATE REVENUE, 1912-13.

| Particulars.                | N.S.W.     | Victoria.  | Q'land.   | S.A.      | W.A.      | Tas.        | All States. |
|-----------------------------|------------|------------|-----------|-----------|-----------|-------------|-------------|
|                             | £          | £          | £         | £         | £         | £           | £           |
| Taxation ...                | 1,405,360  | 1,577,878  | 806,677   | 536,401   | 393,615   | 345,282     | 5,065,213   |
| Public Works & Services ... | 10,116,827 | 5,799,119  | 3,451,027 | 2,773,235 | 2,909,593 | 377,109     | 25,436,910  |
| Land ...                    | 1,835,948  | 383,131    | 910,202   | 360,262   | 382,117   | 95,367      | 3,967,027   |
| Commonwealth subsidy ...    | 2,178,683  | 1,691,833  | 775,948   | 527,151   | 605,145   | (a) 336,709 | 6,115,469   |
| Miscellaneous ...           | 520,480    | 835,324    | 434,359   | 309,649   | 306,189   | 51,825      | 2,457,826   |
| Total ...                   | 16,057,298 | 10,287,285 | 6,378,213 | 4,506,698 | 4,596,659 | 1,206,292   | 43,032,445  |

(a) Including special grant £95,000.

It will be noted that the amounts returned under the heading "Commonwealth subsidy" do not quite agree with those given in the chapter on Commonwealth Finance, page 707. This arises from the fact that the State figures shew the amount for which credit was taken by the State during the financial year 1912-13, whilst the Commonwealth figures shew the amounts paid to State Treasurers on account of that financial year.

5. Revenue per Head, 1912-13.—Particulars concerning the revenue per head of population in each State derived from the several sources enumerated in the preceding paragraph are given hereunder:—

## STATE REVENUE PER HEAD, 1912-13.

| Particulars.                | N.S.W.  | Victoria. | Qld.    | S. Aust. | W. Aust. | Tas.    | C'wealth. |
|-----------------------------|---------|-----------|---------|----------|----------|---------|-----------|
|                             | £ s. d. | £ s. d.   | £ s. d. | £ s. d.  | £ s. d.  | £ s. d. | £ s. d.   |
| Taxation ...                | 0 15 10 | 1 2 10    | 1 5 4   | 1 4 11   | 1 5 8    | 1 15 0  | 1 1 5     |
| Public Works & Services ... | 5 13 8  | 4 4 0     | 5 8 5   | 6 9 0    | 9 10 1   | 1 18 3  | 5 7 5     |
| Land ...                    | 1 0 8   | 0 5 7     | 1 8 7   | 0 16 9   | 1 5 0    | 0 9 8   | 0 16 9    |
| Commonwealth Subsidy ...    | 1 4 6   | 1 4 6     | 1 4 5   | 1 4 6    | 1 19 6   | 1 14 2  | 1 5 10    |
| Miscellaneous ...           | 0 5 10  | 0 12 1    | 0 13 8  | 0 14 4   | 1 0 0    | 0 5 3   | 0 10 5    |
| Total ...                   | 9 0 6   | 7 9 0     | 10 0 5  | 10 9 6   | 15 0 3   | 6 2 4   | 9 1 10    |

The magnitude of the revenue per head from public works and services in the case of Western Australia is mainly due to the fact that the number of miles of railway in that State is large compared with the population, and that the revenue-earning power of the railways is also high.

**6. Relative Importance of Sources of Revenue.**—The following table furnishes an indication of the relative importance of the different sources of revenue in the several States, the figures given being the percentage which each item of revenue bore to the total for the State for the year 1912-13:—

PERCENTAGE OF TOTAL STATE REVENUE, 1912-13.

| Particulars.                  | N.S.W. | Vic.   | Q'land. | S. Aust. | W. Aust. | Tas.   | C'wlth. |
|-------------------------------|--------|--------|---------|----------|----------|--------|---------|
|                               | %      | %      | %       | %        | %        | %      | %       |
| Taxation ... ..               | 8.75   | 15.34  | 12.65   | 11.90    | 8.57     | 28.62  | 11.77   |
| Public Works and Services ... | 63.00  | 56.37  | 54.11   | 61.54    | 63.30    | 31.26  | 59.09   |
| Land ... ..                   | 11.43  | 3.73   | 14.27   | 7.99     | 8.31     | 7.91   | 9.22    |
| Commonwealth Subsidy ...      | 13.57  | 16.44  | 12.16   | 11.69    | 13.16    | 27.91  | 14.21   |
| Miscellaneous ... ..          | 3.25   | 8.12   | 6.81    | 6.88     | 6.66     | 4.30   | 5.71    |
| Total ... ..                  | 100.00 | 100.00 | 100.00  | 100.00   | 100.00   | 100.00 | 100.00  |

One of the most noticeable features of the figures here given is the comparatively low percentage for "public works and services" and the high percentage for "taxation" in the case of Tasmania. In New South Wales and Queensland land revenue is an important item, while in Queensland the revenue from "public works and services" falls considerably below the Commonwealth average.

**7. State Taxation.**—(a) *Details, 1912-13.* Prior to the inauguration of Federation the principal source of revenue from taxation was the imposition of duties of Customs and Excise. At the present time the most productive forms of State taxation are the income tax, which is now imposed in all the States (Western Australia, the last of the States to adopt this method of taxation, having passed the necessary legislation during the Parliamentary session of 1907), and probate and succession duties. For 1912-13 stamp duties occupied third place. In addition to these a State land tax is now collected in all the States except Queensland, and license fees of various kinds are collected in all the States, while a dividend tax is collected in Western Australia. The total revenue from taxation collected by the States during the year 1912-13 was £5,065,213, details of which are set forth in the table given hereunder:—

STATE REVENUE FROM TAXATION, 1912-13.

| Taxation.                     | N.S.W.    | Victoria. | Q'land. | S. Aust. | W.A.    | Tas.    | All States |
|-------------------------------|-----------|-----------|---------|----------|---------|---------|------------|
|                               | £         | £         | £       | £        | £       | £       | £          |
| Probate and succession duties | 365,250   | 443,682   | 108,367 | 58,811   | 47,929  | 25,980  | 1,050,019  |
| Other stamp duties ... ..     | 233,940   | 252,407   | 186,083 | 101,498  | 70,652  | 75,171  | 919,751    |
| Land tax ... ..               | 5,738     | 308,275   | ...     | 141,807  | 46,519  | 79,276  | 581,615    |
| Income tax ... ..             | 662,625   | 542,236   | 421,507 | 210,034  | 72,775  | 148,413 | 2,156,054  |
| Dividend tax ... ..           | ...       | ...       | ...     | ...      | 98,464  | ...     | ...        |
| Licenses ... ..               | 137,807   | 21,751    | 68,175  | 24,251   | 45,934  | 13,917  | 311,835    |
| Other taxation ... ..         | ...       | 9,527     | 22,545  | ...      | 11,342  | 2,525   | 45,939     |
| Total ... ..                  | 1,405,360 | 1,577,878 | 806,677 | 536,401  | 393,615 | 345,282 | 5,065,213  |

The most productive form of taxation in the several States during the year 1912-13 was income tax, except in Queensland, where it was exceeded by the kindred dividend tax.

(b) *Summary, 1903-4 to 1912-13.* The total amount raised by means of taxation by the several State Governments during the ten years 1903-4 to 1912-13 is given in the following table:—

#### STATE REVENUE FROM TAXATION, 1903-4 to 1912-13.

| Year.   | New South Wales. | Victoria. | Queensland. | S. Australia. | W. Aust. | Tasmania. | All States. |
|---------|------------------|-----------|-------------|---------------|----------|-----------|-------------|
|         | £                | £         | £           | £             | £        | £         | £           |
| 1903-4  | 1,100,193        | 938,147   | 475,184     | 353,432       | 235,114  | 150,091   | 3,252,161   |
| 1904-5  | 1,114,408        | 897,870   | 454,574     | 442,030       | 221,738  | 216,953   | 3,347,573   |
| 1905-6  | 1,297,776        | 990,735   | 494,165     | 369,756       | 260,609  | 248,799   | 3,661,840   |
| 1906-7  | 1,381,805        | 1,110,411 | 540,737     | 411,867       | 266,152  | 276,450   | 3,986,922   |
| 1907-8  | 1,077,534        | 977,620   | 525,540     | 477,637       | 277,463  | 265,656   | 3,601,450   |
| 1908-9  | 907,249          | 1,072,228 | 535,194     | 450,250       | 296,599  | 250,835   | 3,512,355   |
| 1909-10 | 1,223,521        | 1,088,353 | 584,997     | 481,003       | 336,396  | 303,390   | 4,017,660   |
| 1910-11 | 1,027,519        | 1,344,573 | 667,196     | 545,986       | 325,246  | 284,965   | 4,195,485   |
| 1911-12 | 1,885,653        | 1,501,696 | 787,577     | 551,994       | 352,314  | 340,434   | 5,419,668   |
| 1912-13 | 1,405,360        | 1,577,878 | 806,677     | 536,401       | 393,615  | 345,282   | 5,065,213   |

During the period between 30th June, 1903-4, and 30th June, 1912-13, the aggregate State revenue from taxation increased by about 56 per cent., the increase varying considerably in the several States. Thus, while New South Wales shewed an increase of only 28 per cent., and South Australia an increase of about 50 per cent., the Queensland revenue advanced by 70 per cent., and that of Tasmania by about 130 per cent. The total decrease in State taxation for the year amounted to £354,455.

The revenue from State taxation per head of population, collected in the several States during each of the years 1903-4 to 1912-13, was as follows:—

#### STATE TAXATION PER HEAD, 1903-4 to 1912-13.

| Year.   | New South Wales. | Victoria. | Queensland. | S. Australia. | W. Aust. | Tasmania. | C'wealth. |
|---------|------------------|-----------|-------------|---------------|----------|-----------|-----------|
|         | £ s. d.          | £ s. d.   | £ s. d.     | £ s. d.       | £ s. d.  | £ s. d.   | £ s. d.   |
| 1903-4  | 0 15 5           | 0 15 7    | 0 18 4      | 0 19 7        | 1 0 10   | 0 16 5    | 0 16 7    |
| 1904-5  | 0 15 4           | 0 14 11   | 0 17 4      | 1 4 4         | 0 18 6   | 1 3 5     | 0 16 10   |
| 1905-6  | 0 17 5           | 0 16 4    | 0 18 7      | 1 0 2         | 1 0 10   | 1 6 8     | 0 18 2    |
| 1906-7  | 0 18 2           | 0 18 2    | 1 0 1       | 1 2 3         | 1 0 10   | 1 9 10    | 0 19 6    |
| 1907-8  | 0 13 9           | 0 15 10   | 0 19 3      | 1 5 3         | 1 1 10   | 1 8 0     | 0 17 3    |
| 1908-9  | 0 11 6           | 0 17 2    | 0 19 2      | 1 3 1         | 1 2 10   | 1 6 2     | 0 16 7    |
| 1909-10 | 0 15 2           | 0 17 0    | 1 0 3       | 1 4 3         | 1 5 4    | 1 11 5    | 0 18 7    |
| 1910-11 | 0 12 6           | 1 0 8     | 1 2 3       | 1 6 8         | 1 3 6    | 1 9 5     | 0 19 0    |
| 1911-12 | 1 2 6            | 1 2 1     | 1 5 4       | 1 6 2         | 1 3 11   | 1 15 2    | 1 3 9     |
| 1912-13 | 0 15 10          | 1 2 10    | 1 5 4       | 1 4 9         | 1 5 8    | 1 15 0    | 1 1 5     |

Taking the States as a whole the State taxation increased by four shillings and tenpence per head during the period from 1903-4 to 1912-13, the most marked increase being that of eighteen shillings and sevenpence per head in the case of Tasmania. State taxation per head is at present highest in Tasmania and lowest in New South Wales.

**8. Commonwealth and State Taxation.**—For the purpose of obtaining an accurate view of the extent of taxation imposed on the people of the Commonwealth by the central governing authorities it is necessary to add together the Commonwealth and State collections. This has been done in the table given hereunder, which contains particulars

concerning the total taxation for each of the years 1908-9 to 1912-13, as well as the amount per head of population:—

### COMMONWEALTH AND STATE TAXATION, 1908-9 to 1912-13.

| Particulars.              | 1908-9.    | 1909-10.   | 1910-11.   | 1911-12.   | 1912-13.   |
|---------------------------|------------|------------|------------|------------|------------|
|                           | £          | £          | £          | £          | £          |
| Commonwealth taxation ... | 10,844,067 | 11,593,164 | 14,350,788 | 16,076,598 | 17,117,828 |
| State taxation ...        | 3,512,355  | 4,017,660  | 4,195,485  | 5,419,668  | 5,065,213  |
| Total ...                 | 14,356,422 | 15,610,824 | 18,546,273 | 21,496,261 | 22,183,041 |
| Taxation per head ...     | £3 7 2     | £3 11 2    | £4 3 10    | £4 14 1    | £4 13 9    |

Whilst the Commonwealth taxation increased during the period by £6,273,761, the State taxation advanced by £1,552,858, the aggregate increase being £7,826,619. The amount has, however, fluctuated somewhat during the period, and has ranged between a minimum of £3 7s. 2d. per head in 1908-9 and a maximum of £4 14s. 1d. per head in 1911-12. The large increase in Commonwealth taxation in recent years is mainly due to the appearance of the Federal Land Tax.

**9. Public Works and Services.**—A very large proportion of the revenue of all the States of the Commonwealth is made up of the receipts from the various public works and services under the control of the several Governments. The principal of these are railways and tramways, harbour works, and water supply and sewerage, while in addition, State batteries for the treatment of auriferous ores exist in Western Australia, and various minor revenue-producing services are rendered by the Governments of all the States. For the year 1912-13 the aggregate revenue from this source totalled £25,426,910, or nearly 60 per cent. of the revenue from all sources. Details of revenue from public works and services for the year 1912-13 are as follows:—

### STAT REVENUE FROM PUBLIC WORKS AND SERVICES, 1912-13.

| Particulars.                  | N.S.W.     | Victoria.  | Q'land.   | S. Aust.   | W. Aust.  | Tas.    | All States. |
|-------------------------------|------------|------------|-----------|------------|-----------|---------|-------------|
|                               | £          | £          | £         | £          | £         | £       | £           |

(a) Water supply only.

**10. Land Revenue.**—The revenue derived by the States from the sale and rental of Crown lands has, with few exceptions, been treated from the earliest times as forming part of their respective Consolidated Revenue Funds, and has been applied to meet ordinary current expenses. Where the rentals received are for lands held for pastoral or for residential purposes, such application of the revenue appears perfectly justifiable. On the other hand, where the rentals are those of mineral and timber lands, and in all cases of sales of lands, such a proceeding is essentially a disposal of capital in order to defray current expenses. As a matter of financial procedure such a course is open to criticism. In the following table particulars of revenue derived from sales and rental of Crown lands are given for the year 1912-13:—

## STATE LAND REVENUE, 1912-13.

| Particulars. | N.S.W.    | Victoria. | Q'land. | S. Aust. | W. Aust. | Tasmania. | All States. |
|--------------|-----------|-----------|---------|----------|----------|-----------|-------------|
|              | £         | £         | £       | £        | £        | £         | £           |
| Sales ...    | 999,363   | 233,232   | 260,785 | 222,343  | 238,744  | 62,568    | 2,017,035   |
| Rentals ...  | 836,585   | 149,899   | 649,417 | 137,919  | 143,373  | 32,799    | 1,949,992   |
| Total ...    | 1,835,948 | 383,131   | 910,202 | 360,262  | 382,117  | 95,367    | 3,967,027   |

11. **Commonwealth Subsidy.**—The payments to the States of Commonwealth subsidy represent in each instance a considerable proportion of the State's revenue, and for the year 1912-13 aggregated £6,115,469. This represents a great decline from the amounts received up to 1910, owing to the new system of allotting the subsidy. The percentage which the subsidy received by each State for 1912-13 was of the total revenue of that State is shewn in the following table:—

## COMMONWEALTH SUBSIDY PAID TO STATES DURING 1912-13.

| Particulars.                         | N.S.W.     | Victoria.  | Q'land.   | S. Aust.  | W. Aust.  | Tas.        | All States. |
|--------------------------------------|------------|------------|-----------|-----------|-----------|-------------|-------------|
|                                      | £          | £          | £         | £         | £         | £           | £           |
| Commonwealth subsidy ...             | 2,178,683  | 1,691,833  | 775,948   | 527,151   | 605,145   | (a) 336,709 | 6,115,469   |
| Total revenue ...                    | 16,057,298 | 10,287,285 | 6,378,213 | 4,506,698 | 4,596,659 | 1,206,292   | 43,032,445  |
| Percentage of subsidy on revenue ... | % 13.57    | % 16.44    | % 12.16   | % 11.69   | % 13.16   | % 27.91     | % 14.21     |

(a) Includes special grant of £95,000.

The amount of subsidy here shewn is that for which the several States took credit during the year 1912-13. (See also page 714.)

12. **Miscellaneous Items of Revenue.**—In addition to the foregoing sources of revenue there are in each State several miscellaneous ones, including such items as interest, fines, fees, etc., which for the year 1912-13 aggregated £1,201,278.

## (B) Disbursements.

1. **Heads of Expenditure.**—The principal heads of State expenditure from Consolidated Revenue Funds are:—

- (a) Interest and sinking funds in connection with public debt.
- (b) Working expenses of railways and tramways.
- (c) Justice.
- (d) Police.
- (e) Penal establishments.
- (f) Education.
- (g) Medical and charitable expenditure.
- (h) All other expenditure.

Of these items that of working expenses of railways and tramways was the most important, and for the year 1912-13 represented about 35 per cent. of the aggregate expenditure from the Consolidated Revenue Fund. Next in order for that year was the item of interest and sinking fund in connection with the public debt, then education, medical and charitable expenditure, police, other public works, and lands and surveys in the order named.

**2. Total Expenditure.**—The total expenditure from Consolidated Revenue Funds in the several States during each of the years 1903-4 to 1912-13 is furnished in the table given hereunder :—

**STATE EXPENDITURE, CONSOLIDATED REVENUE FUNDS, 1903-4 to 1912-13.**

| Year.       | N.S. Wales. | Victoria.  | Q'land.   | S. Aust.  | W. Aust.  | Tas.      | All States. |
|-------------|-------------|------------|-----------|-----------|-----------|-----------|-------------|
|             | £           | £          | £         | £         | £         | £         | £           |
| 1903-4 ...  | 11,319,888  | 7,339,608  | 3,607,864 | 2,707,254 | 3,698,312 | 879,356   | 29,552,282  |
| 1904-5 ...  | 11,195,075  | 7,343,742  | 3,581,403 | 2,860,894 | 3,745,224 | 840,184   | 29,566,522  |
| 1905-6 ...  | 11,386,864  | 7,261,475  | 3,725,712 | 3,004,974 | 3,632,318 | 853,147   | 29,864,490  |
| 1906-7 ...  | 11,876,657  | 7,679,143  | 3,911,797 | 3,394,999 | 3,490,182 | 913,762   | 31,266,540  |
| 1907-8 ...  | 12,095,593  | 7,862,246  | 4,373,097 | 3,862,336 | 3,379,006 | 929,885   | 32,502,163  |
| 1908-9 ...  | 12,893,662  | 8,240,177  | 4,759,231 | 3,760,005 | 3,370,530 | 960,237   | 33,983,842  |
| 1909-10 ... | 13,038,150  | 8,579,980  | 5,113,578 | 4,196,493 | 3,447,732 | 997,321   | 35,373,254  |
| 1910-11 ... | 13,807,538  | 9,194,157  | 5,314,737 | 4,181,472 | 3,734,448 | 1,016,963 | 37,249,315  |
| 1911-12 ... | 15,277,001  | 9,999,342  | 5,965,692 | 4,450,739 | 4,101,082 | 1,064,725 | 40,858,581  |
| 1912-13 ... | 16,798,500  | 10,258,081 | 6,372,097 | 4,506,698 | 4,787,063 | 1,095,883 | 43,818,322  |

As in the case of the table previously given for revenue, the above figures relate to the year ended 30th June, except in the case of 1903-4, which contains Tasmanian figures for the year ended 1903.

**3. Expenditure per Head.**—Owing to the varying conditions of the several States and the extent to which the different functions of Government are distributed therein between central and local governing authorities, the expenditure per head from Consolidated Revenue Funds differs materially in the several States, being highest in the case of Western Australia and lowest in that of Tasmania. The expenditure per head of population for each State for the years 1903-4 to 1912-13 is as follows :—

**STATE EXPENDITURE PER HEAD, 1903-4 to 1912-13.**

| Year.       | N.S.W.  | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.    | C'wealth. |
|-------------|---------|-----------|---------|----------|----------|---------|-----------|
|             | £ s. d. | £ s. d.   | £ s. d. | £ s. d.  | £ s. d.  | £ s. d. | £ s. d.   |
| 1903-4 ...  | 7 18 10 | 6 1 10    | 6 19 4  | 7 9 11   | 16 9 1   | 4 16 2  | 7 10 11   |
| 1904-5 ...  | 7 13 10 | 6 1 10    | 6 16 5  | 7 17 4   | 15 12 10 | 4 10 9  | 7 8 9     |
| 1905-6 ...  | 7 13 1  | 6 0 0     | 7 0 2   | 8 3 11   | 14 10 5  | 4 11 6  | 7 8 1     |
| 1906-7 ...  | 7 16 1  | 6 5 11    | 7 5 2   | 9 3 4    | 13 13 7  | 4 18 6  | 7 12 10   |
| 1907-8 ...  | 7 14 11 | 6 7 6     | 8 0 3   | 10 4 8   | 13 5 6   | 4 18 1  | 7 16 2    |
| 1908-9 ...  | 8 2 10  | 6 11 9    | 8 10 10 | 9 13 1   | 12 19 7  | 5 0 2   | 8 0 7     |
| 1909-10 ... | 8 1 7   | 6 14 4    | 8 17 0  | 10 11 9  | 12 19 6  | 5 3 3   | 8 3 7     |
| 1910-11 ... | 8 8 0   | 7 1 3     | 8 17 5  | 10 3 11  | 13 9 9   | 5 4 11  | 8 8 4     |
| 1911-12 ... | 9 2 5   | 7 6 9     | 9 11 9  | 10 12 10 | 13 18 10 | 5 10 1  | 8 18 10   |
| 1912-13 ... | 9 9 0   | 7 8 8     | 10 0 3  | 10 9 6   | 15 12 9  | 5 11 2  | 9 5 2     |

In all the States except South Australia increases in the expenditure per head took place during the year 1912-13, ranging from 33s. 11d. per head in the case of Western Australia to 1s. 1d. per head in that of Tasmania.

**4. Details of Expenditure for 1912-13.**—The following table furnishes for the year 1912-13 particulars as to the expenditure of the several States under each of the principal heads :—

## DETAILS OF STATE EXPENDITURE, 1912-13.

| Particulars.                         | N.S.W.     | Vic.       | Q'land.   | S. Aust.  | W. Aust.  | Tas.      | All States. |
|--------------------------------------|------------|------------|-----------|-----------|-----------|-----------|-------------|
|                                      | £          | £          | £         | £         | £         | £         | £           |
| Public debt (int., sink'g fund, &c.) | 3,988,336  | 2,415,324  | 1,844,066 | 1,314,091 | 1,207,967 | 447,581   | 11,217,395  |
| Rlways. & tramways (work'g exps.)    | 6,390,420  | 3,459,832  | 2,143,991 | 1,479,301 | 1,518,293 | 217,355   | 15,214,192  |

| Medical and charitable ... ..        | 643,126    | 528,346    | 346,627   | 159,519   | 216,700   | 67,725    | 1,962,046   |
| All other expenditure ... ..         | 3,301,312  | 2,143,267  | 1,154,883 | 1,094,362 | 1,322,967 | 202,101   | 9,218,192   |
| Total ... ..                         | 16,798,500 | 10,258,081 | 6,372,097 | 4,506,693 | 4,787,063 | 1,095,883 | 43,818,322  |

5. **Expenditure per Head, 1912-13.**—The expenditure per head of population of the several States for the year 1912-13, under each of the principal items, is given hereunder :—

## STATE EXPENDITURE PER HEAD, 1912-13.

| Particulars.   | N.S.W.  | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.    | C'wealth. |
|--|---------|-----------|---------|----------|----------|---------|-----------|
|  | £ s. d. | £ s. d.   | £ s. d. | £ s. d.  | £ s. d.  | £ s. d. | £ s. d.   |
| Public debt, (interest, sink-<br>ing fund, &c.) ... .. | 2 4 10  | 1 15 0    | 2 18 2  | 3 1 2    | 3 18 11  | 2 5 6   | 2 7 5     |
| Railways and tramways<br>(working expenses) ... ..     | 3 11 11 | 2 10 2    | 3 7 6   | 3 8 9    | 4 19 3   | 1 2 0   | 3 4 3     |
| Justice ... ..   | 0 3 9   | 0 2 11    | 0 2 8   | 0 1 9    | 0 4 0    | 0 1 2   | 0 3 1     |
| Police ... ..  | 0 6 2   | 0 5 3     | 0 8 8   | 0 5 4    | 0 8 4    | 0 4 5   | 0 6 3     |
| Penal establishments ... ..                            | 0 1 0   | 0 0 9     | 0 0 10  | 0 0 10   | 0 1 5    | 0 0 7   | 0 0 11    |
| Education ... ..                                       | 0 16 10 | 0 15 11   | 0 15 3  | 0 13 3   | 1 0 3    | 0 10 2  | 0 16 0    |
| Medical and charitable ... ..                          | 0 7 3   | 0 7 8     | 0 10 11 | 0 7 5    | 0 14 2   | 0 6 10  | 0 8 3     |
| All other expenditure ... ..                           | 1 17 3  | 1 11 0    | 1 16 3  | 2 11 0   | 4 6 5    | 1 0 6   | 1 19 0    |
| Total ... ..   | 9 9 0   | 7 8 8     | 10 0 3  | 10 9 6   | 15 12 9  | 5 11 2  | 9 5 2     |

In four of the States, viz., Western Australia, South Australia, Queensland, and New South Wales, the average State expenditure per head exceeded that for the Commonwealth as a whole, falling short of it in the other two States.

6. **Relative Importance.**—The relative importance of the items of expenditure enumerated above varies considerably in the several States. This will readily be seen from the following table, giving for each State the percentage of the expenditure under the various items, on the total expenditure for the State :—

## PERCENTAGE OF TOTAL STATE EXPENDITURE, 1912-13.

| Particulars.  | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.   | C'wealth. |
|---|--------|-----------|---------|----------|----------|--------|-----------|
|   | %      | %         | %       | %        | %        | %      | %         |
| Public debt (interest, sink-<br>ing fund, &c.) ... .. | 23.74  | 23.55     | 28.91   | 29.16    | 25.23    | 40.85  | 25.60     |
| Railways and tramways<br>(working expenses) ... ..    | 38.04  | 33.73     | 33.73   | 32.83    | 31.72    | 19.83  | 34.72     |
| Justice ... ..  | 2.01   | 1.97      | 1.34    | 0.86     | 1.28     | 1.08   | 1.68      |
| Police ... ..   | 3.29   | 3.48      | 4.36    | 2.59     | 2.66     | 3.94   | 3.37      |
| Penal establishments ... ..                           | 0.53   | 0.52      | 0.44    | 0.42     | 0.47     | 0.52   | 0.50      |
| Education ... ..                                      | 8.91   | 10.71     | 7.65    | 6.32     | 6.48     | 9.16   | 8.62      |
| Medical and charitable ... ..                         | 3.83   | 5.15      | 5.44    | 3.54     | 4.53     | 6.18   | 4.48      |
| All other expenditure ... ..                          | 19.65  | 20.89     | 18.13   | 24.28    | 27.63    | 18.44  | 21.03     |
| Total ... ..  | 100.00 | 100.00    | 100.00  | 100.00   | 100.00   | 100.00 | 100.00    |

Taken together, the interest and sinking fund on the public debt, and the working expenses of the railways and tramways, represented for the year 1912-13 about 60 per cent. of the aggregate State expenditure.

## (c) Balances.

1. **Position on 30th June, 1913.**—On various occasions in each of the States the revenue collected for a financial year has failed to provide the funds requisite for defraying the expenditure incurred during that year, the consequence being a deficit which is usually liquidated either by cash obtained from trust funds, or by the issue of Treasury bills. In some of the States a number of such deficits has occurred, interspersed with occasional surpluses, the result being an accumulating overdraft, which in certain instances assumed very large proportions. Thus, during the period of financial stress resultant upon the crisis of 1893 and the drought conditions of succeeding years, the accumulated overdrafts of several of the States grew very rapidly. The very favourable financial conditions of recent years have enabled the various Treasurers to considerably reduce such liabilities from time to time, and at 30th June, 1913, the position of the balances of the several Consolidated Revenue Funds was as set forth in the table hereunder:—

## STATE CONSOLIDATED REVENUE FUND BALANCES, 30th JUNE, 1913.

| State.                   | Cash Credit Balances. | Debit Balance.  |  | Net Result.   |
|--------------------------|-----------------------|-----------------|--|---------------|
|                          |                       | Cash Overdraft. | Overdraft liquidated by Treasury Bills |               |
|                          | £                     | £               | £                                      | £             |

## (D) Principal State Taxes.

## (a) Probate and Succession Duties.

1. **General.**—Probate duties have been levied for a considerable time in all the States of the Commonwealth. From the provisions of the several State Acts governing the payment of duty, it will be seen that both the ordinary rates and those which apply to special beneficiaries differ widely in several cases. In the following table the amount under which the estates of deceased persons were sworn, is shewn for the years 1908 to 1912:—

## VALUE OF ESTATES OF DECEASED PERSONS, 1907-8 to 1911-12.

| State.                   | 1908.      | 1909.      | 1910.      | 1911.      | 1912.         |
|--------------------------|------------|------------|------------|------------|---------------|
|                          | £          | £          | £          | £          | £             |
| New South Wales ... ..   | 7,838,572  | 11,142,068 | 8,834,934  | 13,138,068 | 13,389,806    |
| Victoria ... ..          | 7,128,085  | 6,480,376  | 7,430,949  | 8,469,163  | 8,533,502     |
| Queensland ... ..        | 1,376,255  | 1,508,883  | 1,652,691  | 2,409,495  | 2,730,039     |
| South Australia ... ..   | 2,105,351  | 1,939,509  | 2,422,519  | 2,855,089  | (a) 2,383,238 |
| Western Australia ... .. | 955,995    | 939,318    | 868,638    | 844,151    | (a) 841,800   |
| Tasmania ... ..          | 1,023,629  | 722,011    | 797,439    | 596,870    | 983,618       |
| Total ... ..             | 20,427,887 | 22,732,165 | 22,007,170 | 28,312,836 | 28,862,003    |

(a) Gross values.

The duty collected in the several States for the financial years 1908-9 to 1912-13 is as follows:—

**AMOUNT OF PROBATE AND SUCCESSION DUTIES COLLECTED, 1908-9 to 1912-13.**

| State.                | 1908-9.        | 1909-10.         | 1910-11.         | 1911-12.         | 1912-13.         |
|-----------------------|----------------|------------------|------------------|------------------|------------------|
|                       | £              | £                | £                | £                | £                |

| <b>Total ...</b>      | <b>912,228</b> | <b>1,255,902</b> | <b>1,022,772</b> | <b>1,594,952</b> | <b>1,050,019</b> |

For particulars relating to the legislation of the different States on probate and succession duties see Year Book No. 6, pp. 815-818.

**(b) Stamp Duties.**

1. **Legislation in the Several States.**—The principal Acts at present in force in the several States relating to stamp duties are as follows:—

- (a) *New South Wales.* Stamp Duties Act 1898, with amendments in 1900, 1904, and 1907.
- (b) *Victoria.* Stamps Act 1890, with amendments in 1892, 1900, 1904, and 1908.
- (c) *Queensland.* Stamp Act 1894, with amendment in 1904.
- (d) *South Australia.* Stamp Act 1886, with amendment in 1902.
- (e) *Western Australia.* Stamp Act 1882, with amendments in 1905 and 1906.
- (f) *Tasmania.* Stamp Duties Act 1882, with amendments in 1886, 1888, 1892, 1900 and 1904.

These Acts provide for the payment of duty on bank notes, bills of exchange, and promissory notes, deeds, leases, policies, receipts, transfers, and so forth, all of which with the exception of bank notes are required to be stamped either by an impressed or adhesive stamp, as the case may be.

The revenue derived by the several States of the Commonwealth from the imposition of stamp duties for the years 1908-9 to 1912-13 is shewn in the accompanying table:—

**STAMP REVENUE (EXCLUSIVE OF PROBATE AND SUCCESSION DUTIES),  
1908-9 to 1912-13.**

| State.                | 1908-9.        | 1909-10.       | 1910-11.       | 1911-12.       | 1912-13.       |
|-----------------------|----------------|----------------|----------------|----------------|----------------|
|                       | £              | £              | £              | £              | £              |
| New South Wales ...   | 205,022        | 222,720        | 268,091        | 255,085        | 233,940        |
| Victoria ...          | 237,681        | 250,358        | 275,314        | 285,212        | 252,407        |
| Queensland ...        | 132,073        | 145,556        | 174,051        | 187,533        | 186,083        |
| South Australia ...   | 89,160         | 97,877         | 109,274        | 106,910        | 101,498        |
| Western Australia ... | 58,065         | 62,714         | 79,404         | 74,828         | 70,652         |
| Tasmania ...          | 53,713         | 54,741         | 61,118         | 64,236         | 75,171         |
| <b>Total ...</b>      | <b>775,714</b> | <b>833,966</b> | <b>967,252</b> | <b>973,804</b> | <b>919,751</b> |

2. **Bank Notes.**—Promissory notes issued by any bank are not required to bear a duty stamp either impressed or adhesive, and may be re-issued as often as thought fit. An annual composition was, however, paid in lieu of stamp duty up to 1910. This composition was payable quarterly, and was the same in all States, being at the rate of £2 per annum

on every £100 or part thereof of the average annual amount of bank notes in circulation. On 2nd June, 1893, the Treasury Notes Act of Queensland was assented to, by which the issue of Treasury notes payable on demand was authorised. These notes were used exclusively by the banks in that State, but their issue has been prohibited by the Federal Bank Note Tax Act, and they have now almost passed out of circulation. (See Section xxi., Private Finance.)

The issue of bank notes by the banks has been seriously restricted by this Act, which passed the Federal Parliament in the session of 1910, and was assented to on 10th October, 1910. Further reference is made to the Act in the section dealing with Private Finance. It is enough to say here that it imposes a tax of 10 per cent. per annum on all bank notes issued or re-issued by any bank in the Commonwealth after the commencement of the Act and not redeemed.

**3. Bills of Exchange and Promissory Notes.—(i.) Rates.** In all the States except New South Wales, when a bill of exchange or promissory note is payable on demand, the rate charged is one penny. When the bill was not payable on demand the duty levied in New South Wales, until the Amendment Act of 1907 came into force on 1st January, 1908, was sixpence for every £25 or part thereof, but under this Act no duty is now payable on bills of exchange or promissory notes in that State. The rate in Victoria for all bills of exchange was sixpence for every £25\* up to £100, and one shilling for every £50 over £100, but under the Act of 1908 these rates only apply to those bills both drawn in and payable in Victoria, all others being free from duty. One shilling is charged in Queensland for every £50. For every £25 the duty in South Australia is sixpence if the bill is negotiable in the Commonwealth, but when a bill is drawn in South Australia and payable in any place beyond the Commonwealth, one shilling is charged for every £100, in which case an adhesive stamp only is to be used. In Western Australia, when the amount of the bill does not exceed £25 the duty payable is sixpence; when it exceeds £25 the duty is increased by sixpence for every £25 up to £100, and when it exceeds £100, one shilling for every £50 is charged. An amount of threepence is levied in Tasmania for a bill not exceeding £5; sixpence for one exceeding £5 and under £25; and an additional sixpence for every succeeding £25.

**(ii.) Exemptions.** The chief classes of bills which are exempt from taxation are Government debentures, Treasury notes, drafts on account of Public Service, drafts by banker on banker, letters of credit in the State, etc.

**4. Bills of Lading.—Rates.** The charge made for a bill of lading or copy thereof is sixpence in four of the States, viz., New South Wales, Victoria, South Australia, and Tasmania. In Queensland the rate is one shilling, and for a receipt of a bill of lading sixpence, whilst in Western Australia the duty is threepence if the goods do not exceed half a ton in weight or measurement, and sixpence if the goods exceed that quantity. The Acts provide that no bill of lading is to be stamped after its execution.

**5. Receipts.—(i.) Rates.** The duty payable on receipts given on payment of the amount of £2 or upwards in the States of Victoria, South Australia and Western Australia is one penny. Under the provisions of the Stamp Duties Act of 1898 the rate in New South Wales was twopence for £2 or over, but this was repealed by the Stamp Duties Amendment Act of 1907, and no duty is now payable on receipts in that State.† Acknowledgments for payment of £1 or upwards were taxed one penny in Queensland under the 1894 Act, but by Amendment Acts of 1901, 1903 and 1904, the first two of which have since been repealed, it was provided that amounts of £1 and less than £2 were to be taxed one penny; £2 and less than £50, twopence; £50 and less than £100, threepence; and £100 or over, sixpence for every £100 or part thereof. By the 1904 Amendment Act of Tasmania, receipts for sums amounting to £2 and not over £5 are subject to a duty of one penny, and when the amount exceeds £5, one penny is charged for every additional £10 or part thereof, provided that the maximum duty on any receipt is fourpence.

\* "Or fractional part thereof" is to be understood after all amounts mentioned.

† Since the above was written the duty has been re-instated.

(ii.) *Exemptions.* The exemptions from payment of duty on receipts vary considerably in the several States, and amongst others may be mentioned the following:—On His Majesty's Service, banker's receipt for bill of exchange or promissory note, current accounts, savings bank accounts, municipal rates, money orders and postal notes, wages received by labourers, workmen, etc.

(c) **Land Tax.**

1. **General.**—Queensland is the only State in the Commonwealth in which a State land tax is not levied, although it was as recently as 1907 that the first tax on land was imposed in Western Australia. In all of the other States the tax dates back to a much earlier period.

The following table shews the amount collected by means of such taxes during the financial years 1908-9 to 1912-13 in the States in which a land tax was imposed:—

**LAND TAX COLLECTIONS, 1908-9 to 1912-13.**

| State.                   | 1908-9. | 1909-10. | 1910-11. | 1911-12. | 1912-13. |
|--------------------------|---------|----------|----------|----------|----------|
|                          | £       | £        | £        | £        | £        |
| New South Wales ... ..   | 80,794  | 9,066    | 7,438    | 6,479    | 5,738    |
| Victoria ... ..          | 85,559  | 114,357  | 210,640  | 293,823  | 308,275  |
| South Australia ... ..   | 92,158  | 94,126   | 135,614  | 118,725  | 141,807  |
| Western Australia ... .. | 33,120  | 34,344   | 37,871   | 45,166   | 46,519   |
| Tasmania ... ..          | 59,651  | 79,021   | 64,932   | 81,234   | 79,276   |
| Total ... ..             | 351,282 | 330,914  | 456,495  | 545,427  | 581,615  |

For details relating to State Land Tax legislation see Year Book No. 6, pp. 821-823.

(d) **Income Tax.**

1. **General.**—A duty on the income of persons, whether it be derived from personal exertion or from the produce of property, is now imposed in all the States of the Commonwealth. As might be expected in dealing with the different States, the rates, exemptions, etc., are widely divergent, but the general principle of the several Acts is strikingly consistent. The Dividend Duties Acts of Queensland and Western Australia—the former of which is now repealed—supplied to a certain extent the place of an income tax in those States in former years, but, with the increasing demands upon the State Treasury, the levying of a direct income tax has been resorted to.

In the following table particulars are furnished concerning the total amount collected in the several States during the years 1908-9 to 1912-13. In the case of Queensland and Western Australia the amount of dividend duty collected is included, this tax being closely allied to the income tax.

**INCOME AND DIVIDEND TAXES, 1908-9 to 1912-13.**

(STATES.)

| State                    | 1908-9.   | 1909-10.  | 1910-11.  | 1911-12.  | 1912-13.  |
|--------------------------|-----------|-----------|-----------|-----------|-----------|
|                          | £         | £         | £         | £         | £         |
| New South Wales ... ..   | 202,369   | 219,977   | 269,142   | 644,571   | 662,625   |

| Queensland ... ..        | 273,091   | 304,693   | 348,513   | 372,497   | 421,507   |
| South Australia ... ..   | 160,777   | 180,923   | 168,707   | 207,416   | 210,034   |
| Western Australia ... .. | 134,164   | 132,180   | 134,075   | 154,442   | 171,239   |
| Tasmania ... ..          | 94,015    | 110,258   | 115,836   | 143,875   | 148,413   |
| Total ... ..             | 1,168,880 | 1,286,616 | 1,432,271 | 1,966,049 | 2,156,054 |

For details relating to Income Tax legislation in the various States see Year Book No. 6, pp. 823-829.

### § 3. Trust Funds.

1. **Nature.**—In addition to the moneys received by the several State Governments as revenue, and paid to the credit of their respective Consolidated Revenue Funds, considerable sums are held by the Governments in trust for various purposes. One of the chief sources of these trust funds is the State Savings Bank, which exists in each State, either as a Government department or under the control of a Board acting under Government supervision or Government guarantee. In most of the States also, sinking funds for the redemption of public debt are provided, and the moneys accruing thereto are paid to the credit of the appropriate trust funds. A similar course is followed in the case of municipal sinking funds placed in the hands of the Government. In all the States except New South Wales, life assurance companies carrying on business are required to deposit a substantial sum in cash or approved securities with the Government, and these deposits go to further swell the trust funds. Various other deposit accounts, superannuation funds, suspense accounts, etc., find a place in these funds. The trust funds have at various times enabled the several State Treasurers to tide over awkward financial positions, but the propriety of allowing deficits to be frequently liquidated in this manner is worthy of very serious consideration.

2. **Extent of Funds.**—The amount of such funds held by the several State Governments on 30th June, 1913, was as follows:—

TRUST FUNDS ON 30th JUNE, 1913.

| Particulars.          | N.S.W.    | Victoria. | Q'land.   | S. Aust. | W. Aust.  | Tas.    | All States. |
|-----------------------|-----------|-----------|-----------|----------|-----------|---------|-------------|
|                       | £         | £         | £         | £        | £         | £       | £           |
| Amount of trust funds | 6,134,067 | 8,223,116 | 6,365,891 | 730,516  | 9,853,769 | 715,839 | 32,023,198  |

### § 4. Loan Funds.

1. **Nature.**—As early in the history of Australia as 1842 it was deemed expedient to supplement the revenue collections by means of borrowed moneys, the earliest of the loans so raised being obtained by New South Wales for the purpose of assisting immigration, at rates of interest varying from 2½d. to 5½d. per £100 per diem, or approximately from 4½ per cent. to 8 per cent. per annum. The principal reason for Australian public borrowing, however, has been the fact that the Governments of the several States have, in addition to ordinary administrative duties, undertaken the performance of many functions which, in other countries, are usually entrusted to local authorities, or left to the initiative of private enterprise. Principal amongst these have been the construction of railways and the control of the railway systems of the several States, while the assumption by the State Governments of responsibilities in connection with improvements to harbours and rivers, and the erection of lighthouses, as well as the construction of works for the purposes of water supply and sewerage, have materially swelled the amounts which it has been considered expedient to obtain by means of loans. The Australian loan expenditure and public debt thus differ very materially from those of most European countries, where such expenditure is very largely incurred for purposes of defence, or absorbed in the prosecution of war. The debt of Australia, on the other hand, consists in the main of moneys raised and expended with the object of assisting the development of the resources of the Commonwealth, and is, to a very large extent, represented by tangible assets such as railways, tramways, waterworks, etc.

**2. Loan Expenditure, 1912-13.**—During the year ended 30th June, 1913, the actual expenditure of the Australian States from loan funds amounted to £18,429,274, New South Wales with a total of £7,703,594 being the principal contributor to this amount, while Western Australia, whose expenditure amounted to £3,423,020, ranked second. The chief item of expenditure for the year was that of railways and tramways, which represented a total of £11,189,503, water supply and sewerage works contributing the amount of £2,630,408; the expenditure on harbours, rivers, etc., and roads and bridges totalling £1,203,549, and land purchases for settlement, loans to local bodies, etc., £2,113,231, were the most important of the remaining items. Details for the year for each State are given in the following table:—

**STATE LOAN EXPENDITURE, 1912-13.**

| Heads of Expenditure.               | N.S.W.           | Vic.             | Q'land.          | S. Aust.         | W. Aust.         | Tas.           | All States.       |

**3. Aggregate Loan Expenditure.**—The total loan expenditure of the Australian States from the initiation of the borrowing system to the 30th June, 1913, has amounted to no less a sum than £293,741,002. The manner in which this sum has been spent in the several States is furnished in the following table:—

**AGGREGATE STATE LOAN EXPENDITURE TO 30th JUNE, 1913.**

| Heads of Expenditure.             | N.S.W.             | Vic.              | Q'land.           | S. Aust.          | W. Aust.          | Tas.              | All States.        |

(a) Exclusive of £1,866,168 for "Loans in aid of Revenue."

It must be noted that the figures furnished in this table represent the amounts actually spent, and consequently differ somewhat from those given later in the statements relating to the public debt, which represent amount of loans still unpaid at a given date. The loan expenditure statement includes all such expenditure, whether the loans by means of which the necessary funds were raised have been repaid or are still in existence. On the other hand, in the public debt statement loans repaid are excluded,

but in the case of loans still outstanding each is shewn according to the amount repayable at maturity, not according to the amount originally available for expenditure.

4. **Relative Importance of Loan Items.**—The relative importance of the different items of loan expenditure given in the foregoing table varies considerably in the several States, but in each instance the expenditure on railways and tramways predominates, the percentage of this item on total expenditure ranging between the limits of 40 per cent. in the case of Tasmania and 69 per cent. in that of Queensland. The following table gives for each State the percentage of each item on the total loan expenditure of that State to 30th June, 1913:—

**PERCENTAGE OF EACH ITEM ON TOTAL LOAN EXPENDITURE OF THE STATES  
TO 30th JUNE, 1913.**

| Heads of Expenditure.          | N.S.W. | Vic.   | Q'land. | S. Aust. | W. Aust. | Tas.    | All States. |

| 1906-7 ...  | 1,058,553 | 595,658   | 683,570   | 499,132   | 900,964   | 156,945   | 3,894,822   |
| 1907-8 ...  | 1,965,329 | 783,538   | 1,033,676 | 495,928   | 733,745   | 224,954   | 5,237,170   |
| 1908-9 ...  | 2,906,507 | 1,098,360 | 1,247,821 | 832,114   | 1,012,452 | 334,200   | 7,431,454   |
| 1909-10 ... | 3,246,640 | 1,209,505 | 1,486,216 | 978,082   | 1,028,995 | 435,104   | 8,384,542   |
| 1910-11 ... | 3,921,758 | 2,657,271 | 1,995,301 | 1,567,210 | 1,484,367 | 300,216   | 11,926,123  |
| 1911-12 ... | 5,491,103 | 2,974,149 | 3,324,248 | 1,756,050 | 2,344,070 | 435,557   | 16,325,177  |
| 1912-13 ... | 7,703,594 | 2,202,697 | 2,448,066 | 2,247,337 | 3,423,020 | 404,560   | 18,429,274  |

Throughout the ten years under review the loan expenditure of New South Wales exceeded that of any other of the States, and for the year 1903-4 represented about half of the aggregate of Australia. The large loan expenditure of New South

Wales in 1908-9, 1909-10 and 1910-11 was incurred chiefly in connection with railway construction and the resumption of the fore-shores and adjoining properties of Darling Harbour. In Victoria the large expenditure of 1905-6 resulted in large measure from the purchase of lands for closer settlement, while the construction of railways and water supply and sewerage works was mainly responsible for the high amounts of 1908-9 and 1909-10. In 1910-11 the large amount was mainly accounted for by heavy expenditure on railways and land purchased for settlement. In the case of the large loan expenditure of Queensland in 1906-7, 1908-9, 1909-10 and 1910-11, railway construction was the principal contributing item. In Western Australia the heavy loan expenditure of 1908-9 was principally in connection with railway construction and water supply.

**6. Loan Expenditure per Head.**—The loan expenditure per head of population varies materially in the different States and in different years, reaching its highest point for the ten years under review in Western Australia in 1912-13 with £11 3s. 7d. per head, and its lowest in Victoria in 1904-5 with 6s. 2d. per head. Particulars concerning the loan expenditure per head for the ten years 1903-4 to 1912-13 are given hereunder:—

## § 5. Public Debt.

**1. The Initiation of Public Borrowing.**—The earliest of the loans raised in Australia for Government purposes was that obtained by New South Wales in 1842. This and nine other loans raised prior to 1855 were all procured locally. In the last-mentioned year Australia's first appearance on the London market occurred, the occasion being the placing of the first instalment of the New South Wales 5 per cent. loan for £683,300. Victoria first appeared as a borrower in 1854, and made its first appearance on the London market in 1859. In the remaining States the first public loans were raised in the following years:—Queensland 1861, South Australia 1854, Western Australia 1845, and Tasmania 1867.

**2. Nature of Securities.**—All the earlier loans raised by the Australian States were obtained by the issue of debentures, some of which were repayable at fixed dates, and others by annual or other periodical drawings. In more recent years, however, the issue of debentures has given place to a great extent to that of inscribed stock, the inscription in the case of local issues being carried out by the State Treasuries, and in the cases of loans floated in London being mainly performed by the Bank of England and the London and Westminster Bank. The issue of debentures has not, however, been entirely discontinued, for within the last seven years debentures to a large amount have been placed on the market by the Government of New South Wales. In other States also, recent issues of debentures have taken place, the occasions usually being those in which the term of the loan is less than that ordinarily attaching to issues of

inscribed stock. Another form of security is that variously known as the Treasury bill or Treasury bond. This is usually merely a short term debenture having a currency in most instances of from three to five years. The bonds are issued in certain cases to liquidate deficiencies in revenue, and in others to obtain moneys for the purpose of carrying on public works at a time when it is deemed inexpedient to place a permanent loan on the market. The amount of the public debt of the several States held in each of these forms of security is furnished in the table hereunder :—

**PUBLIC DEBT OF THE AUSTRALIAN STATES, 30th JUNE, 1913.**

| State.                | Debentures. | Inscribed Stock. | Treasury Bills.                |                    | Total Amount Outstanding. |
|-----------------------|-------------|------------------|--------------------------------|--------------------|---------------------------|
|                       |             |                  | For Public Works and Services. | In aid of Revenue. |                           |
|                       | £           | £                | £                              | £                  | £                         |
| New South Wales ...   | 6,636,450   | 98,784,297       | 750,000                        | ...                | 106,170,747               |
| Victoria ...          | 12,611,607  | 43,331,257       | 6,733,860                      | ...                | (a) 62,776,724            |
| Queensland ...        | 14,803,889  | 37,713,794       | ...                            | 1,087,050          | 53,604,733                |
| South Australia ...   | 2,654,666   | 24,104,212       | 3,389,005                      | ...                | 30,147,883                |
| Western Australia ... | 381,000     | 28,422,366       | 1,473,070                      | ...                | 30,276,436                |
| Tasmania ...          | 1,957,383   | 9,463,970        | ...                            | 74,610             | 11,495,963                |
| Total ...             | 39,044,995  | 241,819,896      | 12,345,935                     | 1,161,660          | (a) 294,472,486           |

(a) Includes an advance of £100,000 from Queensland Government to Victorian Government.

The manner in which the amount of public debt of the Australian States held under these various forms of security has grown during the past nine years will be seen from the following table :—

**PUBLIC DEBT OF THE AUSTRALIAN STATES, 1903-4 to 1912-13.**

| Date.               | Debentures. | Inscribed Stock. | Treasury Bills.                |                    | Total Amount Outstanding. |
|---------------------|-------------|------------------|--------------------------------|--------------------|---------------------------|
|                     |             |                  | For Public Works and Services. | In aid of Revenue. |                           |
|                     | £           | £                | £                              | £                  | £                         |
| 30th June, 1904 ... | 37,741,025  | 172,796,361      | 12,493,650                     | 4,716,576          | 227,747,612               |
| " 1905 ...          | 39,158,744  | 175,047,336      | 12,045,100                     | 4,487,491          | 230,738,671               |
| " 1906 ...          | 39,587,224  | 181,279,045      | 12,194,464                     | 5,367,087          | 238,427,820               |

| " 1908 ...          | 37,665,279  | 190,377,823      | 12,131,871                     | 3,660,516          | 243,835,489               |
| " 1909 ...          | 31,218,229  | 203,640,152      | 13,620,561                     | 3,294,591          | 251,773,533               |
| " 1910 ...          | 29,765,929  | 213,599,894      | 12,393,503                     | 1,864,337          | 257,623,663               |
| " 1911 ...          | 31,148,162  | 222,343,184      | 8,939,771                      | 3,946,166          | (a) 267,127,283           |
| " 1912 ...          | 31,576,656  | 230,170,271      | 13,962,002                     | 1,265,166          | (b) 277,124,095           |
| " 1913 ...          | 39,044,995  | 241,819,896      | 12,345,935                     | 1,161,660          | (c) 294,472,486           |

(a) Includes an advance of £750,000 from South Australian Government to Victorian Government. (b) Includes £150,000, balance of £750,000 referred to in Note (a). (c) Includes £100,000 advance from Queensland to Victorian Government.

During the period between 30th June, 1904, and 30th June, 1913, the public debt of the States increased by £66,724,874, or at the rate of about £7,400,000 per annum. The amount of debentures comprised in the total debt increased by £1,303,970 during the period, while the amount held as inscribed stock increased by £69,023,535 and that held as Treasury bills decreased by £3,702,631.

**3. Increase in Indebtedness of the Several States.**—The table given hereunder furnishes particulars of the increase which has taken place during the past nine years in the public debts of the several States :—

## PUBLIC DEBT OF AUSTRALIAN STATES, 30th JUNE, 1904 to 1913.

| Date.               | N.S.W.      | Victoria.  | Q'land.    | S. Aust.   | W. Aust.   | Tasmania.  | All States. |
|---------------------|-------------|------------|------------|------------|------------|------------|-------------|
|                     | £           | £          | £          | £          | £          | £          | £           |
| 30th June, 1904 ... | 80,033,581  | 51,819,962 | 41,773,297 | 28,593,645 | 16,090,288 | 9,436,839  | 227,747,612 |
| " 1905 ...          | 82,321,998  | 51,763,767 | 41,764,467 | 28,773,695 | 16,642,773 | 9,471,971  | 230,738,671 |
| " 1906 ...          | 85,641,734  | 53,079,800 | 41,764,467 | 30,082,635 | 18,058,553 | 9,800,631  | 238,427,820 |

| " 1908 ...          | 87,635,826  | 53,305,487 | 42,264,467 | 29,985,858 | 20,493,618 | 10,150,233 | 243,835,459 |
| " 1909 ...          | 90,307,419  | 54,667,197 | 44,276,067 | 30,436,183 | 21,951,753 | 10,134,914 | 251,773,533 |
| " 1910 ...          | 92,525,035  | 55,576,725 | 44,276,067 | 31,387,870 | 23,287,453 | 10,570,453 | 257,623,663 |
| " 1911 ...          | 95,523,926  | 57,983,764 | 44,613,197 | 34,224,653 | 23,703,953 | 11,077,790 | 267,127,283 |
| " 1912 ...          | 100,052,635 | 60,737,216 | 47,069,186 | 31,680,124 | 26,283,523 | 11,302,411 | 277,124,095 |
| " 1913 ...          | 106,170,747 | 62,776,724 | 53,604,733 | 30,147,883 | 30,276,436 | 11,495,963 | 294,472,486 |

The States in which the greatest increase in indebtedness was experienced during the period are New South Wales and Western Australia, the former advancing by £26,137,166, the latter by £14,186,148. On the other hand the public debt of Tasmania increased by only about £2,000,000.

4. **Indebtedness per Head.**—The indebtedness per head of population varies considerably in the several States, being highest in the case of Western Australia, and lowest in that of Victoria. Details for the period from 30th June, 1904, to 30th June, 1913, are as follows:—

## PUBLIC DEBT OF AUSTRALIAN STATES PER HEAD, 30th JUNE, 1904 to 1913.

| Date.               | N.S.W.  | Victoria. | Q'land.  | S. Aust. | W. Aust. | Tasmania. | All States. |

5. **Flotation of Loans.**—The early loans of the Australian States, usually for comparatively small amounts, were raised locally, but, with the increasing demand for loan funds and the more favourable terms offering in the London than in the local money market, the practice of placing Australian public loans in London came into vogue, and for many years local flotations, except for short terms or small amounts, were comparatively infrequent. In more recent years, however, the accumulating stocks of money in Australia seeking investment have led to the placing of various redemption and other loans locally, with very satisfactory results. In the following table are given particulars of loans of the several States outstanding on 30th June, 1913, which had been floated in London and Australia respectively:—

## PUBLIC DEBT OF AUSTRALIAN STATES, 30th JUNE, 1913.

| State.              | Floated in London. |                           | Floated in Australia. |                           | Total Public Debt. |
|---------------------|--------------------|---------------------------|-----------------------|---------------------------|--------------------|
|                     | Amount.            | Percentage on Total Debt. | Amount.               | Percentage on Total Debt. |                    |
|                     | £                  | %                         | £                     | %                         | £                  |

| " 1908 ...          | 183,321,256        | 75.18                     | 60,514,233            | 24.82                     | 243,835,489        |
| " 1909 ...          | 189,410,036        | 75.23                     | 62,363,497            | 24.77                     | 251,773,533        |
| " 1910 ...          | 191,972,479        | 74.52                     | 65,651,184            | 25.48                     | 257,623,663        |
| " 1911 ...          | 189,067,671        | 70.78                     | 78,059,612            | 29.22                     | 267,127,283        |
| " 1912 ...          | 192,190,771        | 69.35                     | 84,933,324            | 30.65                     | 277,124,095        |
| " 1913 ...          | 204,395,129        | 69.41                     | 90,077,357            | 30.59                     | 294,472,486        |

It will be seen that in the course of nine years the London indebtedness of the States has increased by £16,229,634, while the local indebtedness has increased by no less than £50,495,240. In other words, whilst on 30th June, 1904, the Australian portion of the debt represented only about 17 per cent. of the total, the proportion had on 30th June, 1913, grown to 31 per cent.

6. **Rates of Interest.**—As mentioned above, the highest rate of interest paid in connection with the earliest Australian public loans was fivepence farthing per £100 per diem or, approximately, 8 per cent. per annum. At the present time the principal rates of interest payable on Australian public securities are 4 per cent.,  $3\frac{1}{2}$  per cent.,  $3\frac{1}{4}$  per cent., and 3 per cent. The average rate payable on the aggregate indebtedness of the Australian States is about  $3\frac{1}{2}$  per cent. For the separate States the average rate payable varies considerably, being lowest in the case of Western Australia and highest in that of Queensland and Tasmania; the difference between these two average rates is  $\frac{1}{4}$  per cent. In the table given hereunder particulars are furnished of the rates of interest payable on the public debt of the several States of the Commonwealth on 30th June, 1913:—

## RATES OF INTEREST PAYABLE ON PUBLIC DEBT OF STATES, 30th JUNE, 1913.

| <b>Total public debt ... ..</b>      | <b>251,773,533</b>  | <b>257,623,663</b>  | <b>267,127,283</b>  | <b>277,124,095</b>  | <b>294,472,486</b>  |
| <b>Average rate % payable ... ..</b> | <b>£3 11 6</b>      | <b>£3 11 5</b>      | <b>£3 11 4</b>      | <b>£3 11 4</b>      | <b>£3 11 11</b>     |

During the four years between 30th June, 1909, and 30th June, 1913, the Australian State Government 4 per cent. securities increased by £7,108,880, and the 3 per cent. securities decreased by £912,090, while the  $3\frac{1}{2}$  per cents. advanced by £14,138,289, and the  $3\frac{3}{4}$  per cents. by £22,637,004. During the same period the total amount at all other rates than the four here mentioned declined by about 54 per cent.

**7. Interest Payable per Head.**—The relative burden of the debts of the several States in respect of interest payments will be seen from the following table, which gives for the 30th June, 1913, the amount of interest payable annually on the debt of each State as outstanding at that date, and also the corresponding amount per head of population :—

**ANNUAL INTEREST PAYABLE ON PUBLIC DEBT OUTSTANDING AT 30th  
JUNE, 1913.**

**8. Dates of Maturity.**—An important point in which the securities of the Australian Governments, whether in the form of inscribed stock, debentures, or Treasury bills, differ from such a well-known form of security as British consols, consists in the fact that whereas the latter are interminable, the Australian Government securities have in almost all cases a fixed date for repayment, the exceptions being the State of New South Wales, which includes in its public debt an amount representing interminable securities totalling on 30th June, 1913, £532,890; also £7,395,208 redeemable by Government on giving 12 months' notice; the State of Victoria, which includes £4,723,324 and £328,362 due in 1931, payable at the option of the Government at any time after 29th September, 1917; also £100,000 for which date not fixed; and the State of South Australia, which includes £5,089,034 similarly repayable. The terms of the loans raised by the issue of debentures and inscribed stock have varied considerably in the different States, ranging between fifteen and fifty years, while loans obtained by means of Treasury

bills have usually been for such short terms as from six months to five years. In the case of the majority of the loans the arrival of the date of maturity means that arrangements for renewal are necessary in respect of the greater portion of the loan, as it is only in exceptional cases that due provision for redemption has been made. The condition of the money market at the date of maturity has an important bearing on the success or otherwise with which the renewal arrangements can be effected, and consequently, in order to obviate the necessity for making an application to the market at an unfavourable time, several of the States have now adopted the practice of specifying a period of from ten to twenty years prior to the date of maturity within which the Government, on giving twelve, or in some cases six, months' notice, has the option of redeeming the loan. By such means advantage may be taken by the Government during the period of opportunities that may offer for favourable renewals. Particulars concerning the due dates of the loans of the several States outstanding on 30th June, 1913, are given in the following table:—

**DUE DATES OF THE PUBLIC DEBTS OF THE SEVERAL STATES OF THE  
COMMONWEALTH OUTSTANDING ON 30th JUNE, 1913.**

| Due Dates.          | N.S.W.             | Victoria.         | Q'land.           | S. Aust.          | W. Aust.          | Tasmania.         | Total.             |
|---------------------|--------------------|-------------------|-------------------|-------------------|-------------------|-------------------|--------------------|
|                     | £                  | £                 | £                 | £                 | £                 | £                 | £                  |
| Overdue ...         | 11,920             | 1,000             | 2,600             |                   |                   |                   | 15,520             |

| <b>Total</b> ...    | <b>106,170,747</b> | <b>62,776,724</b> | <b>53,604,723</b> | <b>30,147,883</b> | <b>30,276,436</b> | <b>11,495,963</b> | <b>294,472,466</b> |

In the above table those loans in the case of which the Government has the option of redemption during a specified period, have been in each instance classified according to the latest date of maturity.

**9. Sinking Funds.**—The practice of providing for the ultimate extinction of the public debt by means of the creation of sinking funds, receiving definite annual contributions from Consolidated Revenue, and accumulating at compound interest, has only been consistently adopted in the case of Western Australia. This State has established, in connection with each of its loans, sinking funds varying from 1 per cent. to 3 per cent. per annum of the nominal amount of the loan. These funds are placed in the hands of trustees in London, by whom they are invested in the securities of the British, Indian, and Colonial Governments, and applied from time to time in the redemption of loans falling due. In the remaining States the sinking fund provision made is varied, consisting in certain instances of the revenues from specified sources, in others of the Consolidated Revenue Fund surplus, and in others again of fixed annual amounts. In the following table are given particulars of the sinking funds of each State, and the net indebtedness of each after allowance for sinking fund has been made, the details given being those for 30th June, 1913:—

STATES SINKING FUNDS AND NET INDEBTEDNESS, 30th JUNE, 1913.

| State.                | Gross Indebtedness. | Sinking Fund. | Net Indebtedness. | Net Indebtedness per head. |
|-----------------------|---------------------|---------------|-------------------|----------------------------|

**10. London Prices of Australian Stocks.**—In examining the prices quoted for Australian State Government securities, particularly if the examination is made with the object of comparing the prices at a given time of different stocks, or the prices at different times of the same stock, several points in connection with the securities need to be kept in view; the principal of these are—(a) the rate of interest payable, (b) the date of maturity, and (c) the date at which interest is payable.

In the following table particulars are given of the London prices of some of the principal  $3\frac{1}{2}$  per cent. stocks of the several States during 1913. The quotations given are the middle prices, taken from the *Economist*, and are for the last Friday in each quarter:—

LONDON QUOTATIONS FOR AUSTRALIAN  $3\frac{1}{2}$  PER CENT. STOCKS DURING 1913.

| State.              | Rate of Interest Payable. | Year of Maturity. | Months in which Interest is Payable. | London Prices (cum dividend) on— |                  |                  |                 |

| Queensland ...      | $3\frac{1}{2}$            | 1924-30           | Jan.—July                            | 94                               | 90               | 93               | ...             |
| South Australia ... | $3\frac{1}{2}$            | 1939              | Jan.—July                            | 91                               | 89               | 89               | 88              |
| Western Australia   | $3\frac{1}{2}$            | 1915-35           | May—Nov.                             | 90                               | 88               | 90               | 89              |
| Tasmania ...        | $3\frac{1}{2}$            | 1920-40           | Jan.—July                            | 89                               | 88               | 89               | 87              |

Throughout the year the prices of Australian  $3\frac{1}{2}$  per cent. stocks on the London market were, on the average, slightly less than those for the corresponding periods of the preceding year.

## SECTION XXI.

## PRIVATE FINANCE.

## § 1. Currency.

1. **The Three Australian Mints.**—Soon after the discovery of gold in Australia steps were taken for the establishment of a branch of the Royal Mint in Sydney. The formal opening took place on the 14th May, 1855, the mint being located in the southern part of the building once known as the "rum hospital," where it has remained up to the present. It is now proposed, however, to erect more suitable buildings for its accommodation in some other part of the city. The Melbourne branch of the Royal Mint was opened on the 12th June, 1872, and the Perth branch on the 20th June, 1899. The States of New South Wales, Victoria, and Western Australia provide an annual endowment, in return for which the mint receipts are paid into the respective State Treasuries, and it may be said that, apart from expenditure on buildings, new machinery, etc., the amounts paid into the Treasuries fairly balance the mint annuities.

2. **Receipts and Issues in 1912.**—(i.) *Assay of Deposits Received.* The number of deposits received during 1912 at the Sydney Mint was 1160, of a gross weight of 637,392 ozs.; at the Melbourne Mint, 2838, of a gross weight of 657,292 ozs.; and at the Perth Mint, 4779, of a gross weight of 1,479,079 ozs. The average composition of these deposits in Sydney was, gold 869.6, silver 88.0, base 42.4 in every 1000 parts; Melbourne, gold 915.2, silver 44.0, base 40.8 in every 1000 parts; and Perth, gold 815.0, silver 122.5, base 62.5 in every 1000 parts. As many parcels have, however, undergone some sort of refining process before being received at the mint, the average assay for gold shews higher in these figures than for gold as it naturally occurs.

(ii.) *Receipts.* Practically all the gold coined at the Australian mints is the produce of either the Commonwealth or of the Dominion of New Zealand. The following table shews the origin of the gold received at the three mints during 1912:—

ORIGIN OF GOLD RECEIVED AT MINTS DURING 1912.

| Origin of Gold.  | Sydney Mint. | Melbourne Mint. | Perth Mint. |
|--|--------------|-----------------|-------------|
|  | ozs.         | ozs.            | ozs.        |
| New South Wales ... ..   | 119,262.51   | 4,394.90        | ...         |
| Victoria ... ..  | ...          | 510,438.04      | ...         |
| Queensland... ..   | 318,283.63   | 5,415.75        | ...         |
| South Australia ... ..   | ...          | 10,165.79       | ...         |
| Western Australia ... ..                                       | 106.40       | 6,905.53        | 1,478,532   |
| Tasmania ... ..  | 1,729.99     | 24,886.70       | ...         |
| Northern Territory ... ..                                      | 1,239.10     | ...             | 145         |
| New Zealand ... ..   | 192,980.07   | 85,222.51       | ...         |
| Other countries, origin not stated, and light gold coin ... .. | 3,790.64     | 9,863.35        | 402         |
| Total ... ..   | 637,392.34   | 657,292.57      | 1,479,079   |

It will be seen that practically all gold produced in New South Wales and Queensland, and about seven-tenths of that produced in New Zealand, found its way to the Sydney Mint, while the Melbourne Mint received all Victorian and South Australian gold, together with nearly all of the Tasmanian and about three-tenths of the New Zealand production, and the Perth Mint coined practically all Western Australian gold with the exception of a small portion sent to Sydney and Melbourne.

(iii.) *Issues.* The Australian mints, besides issuing gold coin in the shape of sovereigns and half-sovereigns, also issue gold bullion, partly for the use of local manufacturers (jewellers and dentists), and partly for export, India taking annually a considerable quantity of gold cast into 10-oz. bars. The issues during 1912 are shewn in the table below:—

#### ISSUES OF GOLD FROM MINTS DURING 1912.

| Mint.         | Coin.       |                  |           | Bullion. | Total.     |
|---------------|-------------|------------------|-----------|----------|------------|
|               | Sovereigns. | Half-sovereigns. | Total.    |          |            |
|               | £           | £                | £         | £        | £          |
| Sydney ...    | 2,227,000   | 139,000          | 2,366,000 | 38,136   | 2,404,136  |
| Melbourne ... | 2,469,257   | ...              | 2,469,257 | 86,307   | 2,555,564  |
| Perth ...     | 4,278,144   | ...              | 4,278,144 | 842,318  | 5,120,462  |
| Total ...     | 8,974,401   | 139,000          | 9,113,401 | 966,761  | 10,080,162 |

In addition to the issue of gold the Mints are also charged with the issue of silver and bronze coin struck in London. There was, however, no issue of either Imperial silver or bronze coin in 1912.

(iv.) *Withdrawals of Worn Coin.* The mints receive light and worn coin for recoinage, gold being coined locally, while silver is forwarded to London. The value of gold coin so received in 1912 amounted to £23,137, viz.:—Sydney, £11,044; Melbourne, £12,090; and Perth, £3. The value of worn silver coins received during 1912 was £37,199, viz.:—Sydney, £22,956; Melbourne, £5605; and Perth, £8638.

**3. Total Receipts and Issues.** (i.) *Receipts.* The total quantities of gold received at the three mints since their establishment are stated in the gross as follows:—Sydney, 35,728,342.24 ozs.; Melbourne, 35,019,732.75 ozs.; and Perth, 17,750,658 ozs. As the mints pay for standard gold (22 carats) at the rate of £3 17s. 10½d. per oz., which corresponds to a value of £4 4s. 11½d. per oz. fine (24 carats), it is possible to arrive at the number of fine ounces received from the amounts paid for the gold received. These amounts were:—Sydney, £131,767,636; Melbourne, £137,877,194; Perth, £62,510,926; corresponding to—Sydney, 31,020,738 ozs. fine; Melbourne, 32,459,050 ozs. fine; and Perth, 14,716,323 ozs. fine. Silver found in assaying is paid for if it exceeds 8 per cent.; in Sydney it has been paid for at the rate of one shilling and sixpence per oz. fine since 12th May, 1902; in Melbourne the price is fixed monthly by the Deputy-master of the Mint; and in the Perth accounts it has been taken at one shilling per oz.

(ii.) *Issues.* The total values of gold coin and bullion issued by the three mints were as shewn in the table on page 737. It may be said that rather more than one-half of the total gold production of Australasia has passed through the three Australian mints, the production of the Commonwealth States to the end of 1912 being valued at £546,076,909, and that of New Zealand at £80,599,044, or a total of £626,675,953.

**TOTAL ISSUES OF GOLD FROM MINTS TO END OF 1912.**

| Mint.         | Coin.       |                  |             | Bullion.   | Total.      |
|---------------|-------------|------------------|-------------|------------|-------------|
|               | Sovereigns. | Half-sovereigns. | Total.      |            |             |
|               | £           | £                | £           | £          | £           |
| Sydney ...    | 121,357,500 | 3,950,000        | 125,307,500 | 6,481,672  | 131,789,172 |
| Melbourne ... | 126,632,340 | 883,948          | 127,516,288 | 10,363,162 | 137,879,450 |
| Perth ...     | 56,357,166  | 189,235          | 56,546,401  | 5,951,302  | 62,497,703  |
| Total ...     | 304,347,006 | 5,023,183        | 309,370,189 | 22,796,136 | 332,166,325 |

The total issues of silver coins to the end of 1912 were £2,415,200, viz.:—Crowns, £3500; double florins, £4585; half-crowns, £722,600; florins, £528,215; shillings, £606,200; sixpences, £253,220; and threepences, £296,880.

Bronze coins to the value of £180,150 have been issued, viz.:—Pence, £126,640; half-pence, £53,310; and farthings, £200.

(iii.) *Withdrawals of Worn Coin.* Complete figures as to the withdrawal of gold coin can be given for the Sydney Mint, where they amounted to £1,081,210; at the Melbourne Mint the coins withdrawn since 1890 were worth £509,802. In the case of Perth the withdrawal of worn gold coin since the opening of the Mint amounted to £422.

Withdrawals of worn silver coin amounted to £326,490 in Sydney, to £367,729 in Melbourne, and to £20,888 in Perth.

4. **Standard Weight and Fineness of Coinage.**—The coinage of the Commonwealth is the same as that of the United Kingdom, and the same provisions as to legal tender hold good, viz., while gold coins are legal tender to any amount, silver coins are only so for an amount not exceeding forty shillings, and bronze coins up to one shilling. As will be seen from the table below, the standard weights of the sovereign and half-sovereign are respectively 123.27447 grains and 61.63723 grains, but these coins will pass current if they do not fall below 122.5 grains and 61.125 grains respectively.

**STANDARD WEIGHT AND FINENESS OF COMMONWEALTH COINAGE.**

| Denomination.      | Standard Weight. | Standard Fineness.  |
|--------------------|------------------|---|
| <b>GOLD—</b>       | Grains.          |   |
| Sovereign ...      | 123.27447        | } Eleven-twelfths fine gold, viz.:—<br>Gold ... 0.91667 } 1.00000<br>Alloy ... 0.08333 }      |
| Half-sovereign ... | 61.63723         |   |
| <b>SILVER—</b>     |                  |   |
| Crown ...          | 436.36363        | } Thirty-seven-fortieths fine silver, viz.:—<br>Silver ... 0.925 } 1.000<br>Alloy ... 0.075 } |
| Double florin ...  | 349.09090        |   |
| Half-crown ...     | 218.18181        |   |
| Florin ...         | 174.54545        |   |
| Shilling ...       | 87.27272         |   |
| Sixpence ...       | 43.63636         |   |
| Threepence ...     | 21.81818         |   |
| <b>BRONZE—</b>     |                  |   |
| Penny ...          | 145.83333        | } Mixed metal, viz.:—<br>Copper ... 0.95 } 1.00<br>Tin ... 0.04<br>Zinc ... 0.01 }            |
| Half-penny ...     | 87.50000         |   |
| Farthing ...       | 43.75000         |   |

5. **Prices of Silver and Australian Coinage.**—(i.) *Prices of Silver.* The value of silver has greatly decreased since its demonetisation and restricted coinage in almost the whole of Europe. Its average price in the London market in recent years is shewn in the subjoined table:—

**AVERAGE PRICE OF SILVER IN LONDON MARKET, 1874 to 1912.**

| Year.    | Price per<br>Standard Oz. | Year.    | Price per<br>Standard Oz. | Year.    | Price per<br>Standard Oz. |
|----------|---------------------------|----------|---------------------------|----------|---------------------------|

(ii.) *Profits on Coinage of Silver.* As sixty-six shillings are coined out of one pound troy of standard silver, the silver required to produce £3 6s. of coin was only worth £1 8s. 1d. during 1912; the difference of £1 17s. 11d. represents, therefore, the gross profit or seigniorage made on the coinage of every £3 6s. This gross profit is equivalent to over 35 per cent., but from it the expenses of coining (including interest on cost of machinery) and of withdrawals of worn coin must be deducted. Still, given a large annual demand for new silver coin, even the net profit amounts to a considerable sum. Negotiations, therefore, took place for a number of years between the Imperial authorities and the Governments of New South Wales and Victoria, which in 1898 resulted in permission being granted to the two Governments named to coin silver and bronze coin at the Sydney and Melbourne Mints for circulation in Australia. No steps were, however, taken in the matter, and as section 51 of the Commonwealth Constitution makes legislation concerning "currency, coinage, and legal tender" a federal matter, the question remained in abeyance until the latter part of 1908, when the Commonwealth Treasurer announced his intention of initiating the coinage of silver in the near future.

(iii.) *Coinage Bill.* In 1909 a coinage bill was introduced in the Commonwealth Parliament, which provided that the future Australian coinage should consist of the following coins:—In gold, £5, £2, £1, and 10s.; in silver, 2s., 1s., 6d., and 3d.; and in bronze, 1d. and  $\frac{1}{2}$ d. Gold was to be legal tender up to any amount, silver up to 40s., and bronze up to 1s. Ultimately the coinage was to be undertaken in Australia, but for the time an agreement was made with the authorities of the Royal Mint in London, under the terms of which the coinage was to be done in London on account of the Commonwealth Government. Orders were given for the immediate coinage of £200,000

worth of silver, viz., one million florins, one million shillings, one million sixpences, and two million threepences. The coins bear on the obverse H.M. the King's head, with the Latin inscription which appears on the British coins, and on the reverse the Australian coat-of-arms, with the denomination and the date. The Imperial authorities undertook to withdraw £100,000 worth of the present silver-coinage per annum at its face value. The first consignment of the new coinage arrived in Australia early in 1910, and in a short time all the silver coins contracted for were supplied to the Royal mints, Australia. Copper coins of the value of £10,000, viz., 1,560,000 pennies and 1,680,000 half-pennies, of a design similar to that of the silver coins, were ordered. It is not, however, intended to withdraw any of the present copper coins, but merely to make good the "leakage," which is considerable. Possibly the time is not far distant when the copper coinage will be replaced by a nickel coinage.

The issue of Australian coin in 1912 was as follows:—Sydney, £69,600 silver, and £12,510 bronze; Melbourne, £52,200 silver; and Perth, £18,400 silver, and £1,020 bronze.

6. For information concerning the imports into the Commonwealth and exports from the Commonwealth of coin and bullion during the year 1912, the enquirer is referred to the tables on pages 541 and 542.

## § 2. Banking.

1. **Banking Facilities.**—(i.) *Head Offices of Banks.* Of the twenty-four banks trading in the Commonwealth, four have their head offices in London, viz., the Bank of Australasia; the Union Bank of Australia Limited; the English, Scottish and Australian Bank Limited; and the London Bank of Australia Limited. The head offices of the following five banks are in Sydney—The Commonwealth Bank of Australia, The Bank of New South Wales, the Commercial Banking Company of Sydney Limited, the Australian Joint Stock Bank Limited (now the Australian Bank of Commerce Limited), and the City Bank of Sydney. Five banks have their head offices in Melbourne, viz., the National Bank of Australasia Limited, the Commercial Bank of Australia Limited, the Bank of Victoria Limited, the Colonial Bank of Australasia Limited, and the Royal Bank of Australia Limited. Brisbane is the headquarters of three banks, viz., the Queensland National Bank Limited, the Royal Bank of Queensland Limited, and the Bank of North Queensland Limited. Only one bank has at present its head office in Adelaide, viz., the Bank of Adelaide; and one in Perth, viz., the Western Australian Bank. Of the two Tasmanian banks the Commercial Bank of Tasmania Limited has its head office in Hobart, and the National Bank of Tasmania Limited in Launceston. The Bank of New Zealand has its headquarters in Wellington. Of the two remaining banks—the Comptoir National d'Escompte has its head office in Paris, and the Ballarat Banking Company in Ballarat. It is proposed, in the few instances where the banks are referred to by name, to arrange them in the order just given, except that the Commonwealth Bank comes first.

2. **Banking Legislation.**—Under Section 51 of the Commonwealth Constitution Act the Commonwealth Parliament has power to legislate with respect to "Banking, other than State banking, also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money." Until quite recently the only Commonwealth banking legislation passed was Act No. 27 of 1909, "An Act relating to Bills of Exchange, Cheques, and Promissory Notes," which came into force on the 1st of February, 1910. In the session of 1910, however, two Acts relating to banking were passed by the Federal Parliament. The first was the Australian Notes Act No. 11 of 1910, assented to on the 16th September, 1910, and proclaimed 1st November, 1910; and the second the Bank Notes Tax Act No. 14 1910, assented to on 10th October, 1910, and proclaimed 1st July, 1911. Under the first of these Acts the Commonwealth Treasurer is empowered to issue notes which shall be legal tender throughout the Commonwealth, and redeemable at the seat of Federal Government.

The notes are issued in denominations of 10s., £1, £5, £10, £20, £50, and £100. The Act directs the Treasurer to hold the following reserve of gold coin:—

- (a) An amount not less than one-fourth of the amount of Australian notes issued up to seven million pounds;
- (b) An amount equal to the amount of Australian notes issued in excess of seven million pounds.

For the purpose of estimating the reserve, notes which have been redeemed are not included amongst those issued.

The portion of the Act relating to the reserve has been amended by Act No. 21 of 1911, which was assented to on 22nd December, 1911. According to this amending Act the clause relating to the reserve now reads as follows:—"The Treasurer shall hold in gold coin a reserve of not less than one-fourth of the amount of Australian notes issued." It was intended that this amendment should come into force on 1st July, 1912, but the Federal Treasurer afterwards announced that its operation would be deferred until after the Commonwealth elections of 1913. These elections resulted in the return to power of another administration, and the new Treasurer, Sir John Forrest, has announced his intention of maintaining the reserve at the rate provided for in the original Act during his tenure of office.

The Australian Notes Act prohibits the circulation of notes issued by a State six months after the commencement of the Act, and such notes will then cease to be legal tender. In addition the Bank Notes Act imposes a tax of 10 per cent. per annum in respect of all bank notes issued or re-issued by any bank in the Commonwealth after the commencement of this Act and not redeemed.

The Notes Act and the Bank Notes Act were supplemented in the following year by the passing of No. 18 of 1911, "An Act to provide for a Commonwealth Bank," which passed both Houses and was assented to on 22nd December, 1911. The bank thus authorised has no power to issue notes, but in every other respect it has the functions of an ordinary bank of issue. It is managed by a governor and a deputy-governor, who are appointed by the Governor-General and will hold office during good behaviour for a period of seven years, after which they will be eligible for reappointment. A novel feature is the establishment of a department dealing with savings bank business only. No further reference need be made here to this department, which is dealt with in detail in § 5. The framers of the Act have largely followed the lines laid down by the respective State Savings Bank Acts, particularly the Western Australian Act No. 9 of 1906. The capital of the bank is one million pounds, to be raised by the issue and sale of debentures. These debentures are for ten pounds or some multiple of ten pounds and redeemable at par, the Commonwealth guaranteeing interest and principal. All expenses incidental to the establishment of the bank are met by an advance from the Consolidated Revenue Fund, such advance to be ultimately repaid with interest at the rate of three-and-a-half per cent.

The first step in the organisation of the Bank was the appointment as Governor, from 1st June, 1912, of Mr. Denison Miller, of the Bank of New South Wales. Mr. James Kell, of the Bank of Australasia, was subsequently appointed Deputy-Governor, and the Bank was formally opened on 20th January, 1913, for the transaction of all general banking business. The result of the first day's operations was the deposit of £2,341,720, the bulk of which consisted of funds belonging to various departments of the Commonwealth Government. The opening of branches simultaneously at Sydney, Melbourne, Brisbane, Adelaide, Perth, Hobart, Townsville, Canberra, and London, marked the accomplishment of the provisions of the Commonwealth Bank Act of 1911. The Savings Bank Department, which came into existence six months previously, is dealt with in detail in the section on Savings Banks.

Under the existing laws, banks are required to furnish quarterly statements of their average assets and liabilities, but these statements are not equally complete in all the States. Until the close of 1907 these quarterly statements, together with

the periodical balance-sheets of the banks (generally half-yearly, but in a few cases yearly), were the only information available in regard to banking business. During the year 1908 the Commonwealth Statistician, under the provisions of the Census and Statistics Act, asked the banks for quarterly returns giving slightly more detailed information than had previously been obtained. As, however, a few of the banks have found it impossible up to the present to give all the particulars required, while promising to do so in future, the returns for the years subsequent to 1907 have been practically left in the same condition as those for 1907 and previous years.

The Acts under which the various banks are incorporated are not all of the same nature, but it may be stated that while most of the older banks were incorporated by special Acts, *e.g.*, the Bank of New South Wales, by Act of Council 1817; the Bank of Australasia, by Royal Charter; the Bank of Adelaide, by Act of the South Australian Parliament; and the Bank of New Zealand, by Act of the General Assembly of New Zealand, the newer banks are generally registered under a "Companies Act," or some equivalent Act. This is also the case with those banks which, after the crisis of 1893, were reconstructed.

**3. Capital Resources of Banks.**—The paid-up capital of the cheque-paying banks, together with their reserve funds, the rate per cent., and the amount of their last dividends, is shewn in the table hereunder. The information relates to the balance-sheet last preceding the 30th June, 1913. In regard to the reserve funds it must be stated that in the case of some of the banks these are invested in Government securities, while in other cases they are used in the ordinary business of the banks, and in a few instances they are partly invested and partly used in business.

#### CAPITAL RESOURCES OF CHEQUE-PAYING BANKS, 1912-1913.

| Bank.  | Paid-up Capital.       | Rate per cent. per annum of last Dividend and Bonus. | Amount of last ½-yrly. Dividend & Bonus. | Amount of Reserved Profits. |

1. £171,930 preferential, £376,463 ordinary. 2. £305,780 preferential, £1,192,440 ordinary. 3. £2,117,350 preferential, £95,644 ordinary. 4. £418,760 preferential, £1,061,250 ordinary. 5. Arrears of call, £1,657. 6. £500,000 preference shares issued to the Crown under the "Bank of New Zealand Act 1903," £500,000 ordinary shares, and £1,000,000 guaranteed stock. 7. For 12 months.

4. **Liabilities and Assets of Banks.**—(i.) *Liabilities of Banks for Quarter ended 30th June, 1913.* As already stated, the banks transacting business in any State are obliged, under the existing State laws, to furnish a quarterly statement of their assets and liabilities, which contains the averages of the weekly statements prepared by the bank for that purpose, and they have, during the years 1908-13, furnished quarterly statements to the Commonwealth Statistician. As all other financial returns in this work embrace, so far as possible, a period ended 30th June, 1913, it seems advisable to give the banking figures for the quarter ended on that date, and, where they are shewn for a series of years, similarly to use the figures for the June quarter of each year. The liabilities are those to the general public, and are exclusive of the banks' liabilities to their shareholders, which are shewn in the preceding table:—

**AVERAGE LIABILITIES OF BANKS IN EACH STATE OF THE COMMONWEALTH AND THE NORTHERN TERRITORY FOR THE QUARTER ENDED 30th JUNE, 1913.**

| State.           | Notes in Circulation, not bearing interest. | Bills in Circulation, not bearing interest. | Balances Due to other Banks. | Deposits.             |                   |             | Total Liabilities. |

(a) Including Government and Municipal securities, and Australian notes.

The figures do not call for much comment. As the table shews, the increase in the total amount of assets is partly due to an increase in the amount of specie held by the banks against liabilities at call, and partly to advances.

**5. Percentage of Coin, Bullion, and Australian Notes to Liabilities at Call.—**

(i.) *Commonwealth.* Although it is not strictly correct to assume that the division of deposits into those bearing interest and not bearing interest would in every case coincide with a division into fixed deposits and current accounts, the division, in default of a better one, must be adopted, and in the following table "liabilities at call" are therefore understood to include the note circulation of the banks and the deposits not bearing interest. From 1912 onwards, however, the former item will tend to become negligible.

**PERCENTAGE OF COIN, BULLION AND AUSTRALIAN NOTES TO LIABILITIES AT CALL, COMMONWEALTH BANKS, 1904 to 1913.**

| Year. |     |     |     | Liabilities at Call. | Coin, Bullion, and Australian Notes. | Percentage to Liabilities at Call. |
|-------|-----|-----|-----|----------------------|--------------------------------------|------------------------------------|

| 1904  | ... | ... | ... | 38,763,523           | 19,358,469                           | 49.94                              |
| 1905  | ... | ... | ... | 39,884,489           | 21,490,355                           | 53.88                              |
| 1906  | ... | ... | ... | 44,280,372           | 22,681,442                           | 51.22                              |
| 1907  | ... | ... | ... | 50,344,415           | 23,711,428                           | 47.10                              |
| 1908  | ... | ... | ... | 49,551,675           | 24,931,560                           | 50.31                              |
| 1909  | ... | ... | ... | 50,323,261           | 26,297,843                           | 52.26                              |
| 1910  | ... | ... | ... | 58,982,344           | 30,149,628                           | 51.12                              |
| 1911  | ... | ... | ... | 65,945,355           | 33,470,770                           | 50.76                              |
| 1912  | ... | ... | ... | 65,945,825           | 34,120,831                           | 51.74                              |
| 1913  | ... | ... | ... | 62,381,748           | 36,105,775                           | 57.88                              |

It would appear from the figures just given that the banks generally consider it advisable to hold about half the amount of liabilities at call in coin and bullion. The drop to 47.10 per cent. in 1907 was due to the very large increase in the amount of deposits during the year, and to the fact that the increase in the coin and bullion held, considerable though it was, did not keep pace therewith. The large rise in 1913 was due to a decrease in the deposits, coupled with a simultaneous advance in coin, bullion, and Australian notes.

(ii.) *Queensland Treasury Notes.* No bank-notes are issued by any of the banks in Queensland, where a Treasury note has taken the place of bank-notes since 1893. These Treasury notes are disregarded in the quarterly statements of the banks; according to Treasury returns the amount outstanding on 30th June, 1913, was £40,314, partly in circulation, and the balance held by the banks. Under the Australian Notes Act, the issue of notes by a State is now prohibited.

(iii.) *States.* The proportion of coin, bullion and Australian notes to liabilities at call varies considerably in the different States, and is generally highest in Western Australia, and lowest in Queensland and Tasmania. A table is appended shewing the percentages for each State for the quarter ended 30th June in each of the years 1904 to 1913:—

**PERCENTAGE OF COIN, BULLION AND AUSTRALIAN NOTES TO LIABILITIES AT CALL, COMMONWEALTH BANKS, 1904 to 1913.**

| Year. | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.  | N. Ter. | All States. |
|-------|--------|-----------|---------|----------|----------|-------|---------|-------------|
|       | %      | %         | %       | %        | %        | %     | %       | %           |
| 1904  | 48.67  | 52.92     | 39.66   | 51.45    | 58.70    | 46.41 | ...     | 49.94       |
| 1905  | 50.51  | 58.01     | 45.78   | 55.66    | 67.35    | 44.25 | ...     | 53.88       |
| 1906  | 48.49  | 53.55     | 40.43   | 51.25    | 73.98    | 42.39 | ...     | 51.22       |
| 1907  | 44.81  | 49.17     | 37.20   | 46.73    | 71.14    | 39.84 | ...     | 47.10       |
| 1908  | 47.70  | 54.68     | 41.09   | 45.63    | 76.09    | 40.06 | ...     | 50.31       |
| 1909  | 50.38  | 56.57     | 39.68   | 46.90    | 83.29    | 41.48 | ...     | 52.26       |
| 1910  | 51.33  | 51.66     | 39.78   | 48.27    | 81.09    | 37.77 | ...     | 51.12       |
| 1911  | 52.28  | 45.05     | 43.60   | 51.64    | 86.55    | 35.13 | 16.27   | 50.76       |
| 1912  | 50.79  | 50.42     | 47.53   | 56.98    | 72.82    | 44.63 | 32.95   | 51.74       |
| 1913  | 51.93  | 59.87     | 54.18   | 70.75    | 94.23    | 47.23 | 20.98   | 57.88       |

**6. Deposits and Advances.**—(i.) *Total Deposits.* The total amount of deposits held by the banks shews a steady advance during the period under review, although the total for 1904, when the country was slowly recovering from the effects of the drought, was slightly below that for 1902:—

## TOTAL DEPOSITS IN COMMONWEALTH BANKS, 1904 to 1913.

| Year. | N.S.W.     | Victoria.  | Q'land.    | S. Aust.   | W. Aust.  | Tasmania. | N. Ter. | All States. |

| 1913  | 57,282,179 | 47,690,128 | 21,504,588 | 11,714,785 | 6,350,055 | 5,188,274 | 97,559  | 149,827,568 |

(ii.) *Deposits per Head of Population.* To shew the extent to which the population makes use of the banking facilities afforded to it, a table is given hereunder shewing the amount of total deposits per head of mean population for each of the years 1904 to 1913. The figures must not be taken as representative of the savings of the people, as a large proportion of the deposits is non-interest-bearing and therefore presumably used in the business of the banks' customers, together with a small part of the interest-bearing deposits.

## DEPOSITS PER HEAD OF POPULATION IN COMMONWEALTH BANKS, 1904 to 1913.

(iii.) *Total Advances.* In the quarterly statements furnished by the banks the column headed "all other debts due to the banks," which usually average about 75 per cent. of the total assets, is made up of such miscellaneous items as bills discounted, promissory notes discounted, overdrafts on personal security, overdrafts secured by deposit of deeds or by mortgage, etc. The quarterly returns furnished to the Commonwealth Statistician in 1908 and 1909 provided for a division of the amounts contained under this heading into a number of sub-headings, but all the banks were not in a position to make the necessary division, so that under present circumstances it is impossible to separate these items, and the total amounts contained in the column must, therefore, be treated as advances. The following table shews the totals for each State during the years 1904 to 1913. It will be noted that between the consecutive years 1908-9 and 1912-13 there was a marked decrease in the advances. In each case this was roughly concurrent with a slackening in the increase of deposits, and was due partly to this slackening, and partly to international causes.

## ADVANCES BY COMMONWEALTH BANKS, 1904 to 1913.

| Year. | N.S.W.     | Victoria.  | Q'land.    | S. Aust.  | W. Aust.  | Tasmania. | Northern Territory. | All States. |
|-------|------------|------------|------------|-----------|-----------|-----------|---------------------|-------------|
|       | £          | £          | £          | £         | £         | £         | £                   | £           |
| 1904  | 33,237,755 | 29,426,052 | 13,974,233 | 4,401,991 | 3,955,108 | 2,710,083 | ...                 | 87,705,222  |
| 1905  | 31,965,017 | 28,593,201 | 13,590,333 | 4,793,936 | 4,172,983 | 2,650,789 | ...                 | 85,766,259  |
| 1906  | 32,057,192 | 29,699,683 | 13,850,921 | 5,053,184 | 4,635,624 | 2,592,517 | ...                 | 87,889,121  |
| 1907  | 34,460,963 | 31,894,070 | 15,076,455 | 5,545,346 | 5,140,911 | 2,872,660 | ...                 | 94,990,435  |
| 1908  | 37,948,889 | 33,254,780 | 15,245,537 | 5,805,575 | 5,581,001 | 3,008,237 | ...                 | 100,844,019 |
| 1909  | 34,853,220 | 31,455,141 | 14,499,669 | 5,699,546 | 5,384,518 | 2,715,648 | ...                 | 94,607,742  |
| 1910  | 34,809,345 | 33,064,881 | 14,167,480 | 6,426,809 | 5,889,061 | 2,732,645 | ...                 | 97,080,221  |
| 1911  | 39,001,933 | 35,792,928 | 15,639,657 | 8,018,597 | 7,327,529 | 2,796,045 | 2,085               | 108,578,774 |
| 1912  | 43,575,784 | 37,843,367 | 17,765,880 | 8,565,340 | 8,360,993 | 2,857,565 | 3,755               | 118,972,677 |
| 1913  | 41,740,849 | 35,914,898 | 16,748,341 | 7,893,585 | 8,124,242 | 3,056,852 | 2,279               | 113,481,046 |

(iv.) *Proportion of Advances to Deposits.* The percentage borne by advances to total deposits shews to what extent the needs of one State have to be supplied by the resources of another State, and where the percentage for the Commonwealth as a whole exceeds 100, as it did in 1901, 1902, and 1903, the banks must have supplied the deficiency from their own resources, or from deposits obtained outside the Commonwealth. The following figures shew, however, that the banking business of the Commonwealth has been practically self-contained during the period under review:—

**PERCENTAGE OF ADVANCES TO TOTAL DEPOSITS, COMMONWEALTH BANKS,  
1904 TO 1913.**

| Year. | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas.  | N. Ter. | All States. |
|-------|--------|-----------|---------|----------|----------|-------|---------|-------------|
|       | %      | %         | %       | %        | %        | %     | %       | %           |
| 1904  | 100.54 | 94.35     | 110.68  | 69.05    | 83.69    | 75.85 | ...     | 95.80       |
| 1905  | 88.86  | 84.99     | 104.64  | 69.56    | 83.47    | 72.64 | ...     | 87.99       |
| 1906  | 81.99  | 80.78     | 101.36  | 67.25    | 82.11    | 67.75 | ...     | 82.51       |
| 1907  | 82.11  | 83.07     | 101.51  | 67.24    | 93.47    | 76.86 | ...     | 84.29       |
| 1908  | 87.00  | 88.59     | 99.46   | 67.16    | 114.00   | 81.93 | ...     | 88.70       |
| 1909  | 78.10  | 81.47     | 89.84   | 58.59    | 107.95   | 74.08 | ...     | 80.34       |
| 1910  | 69.59  | 79.08     | 81.33   | 59.60    | 96.07    | 72.99 | ...     | 74.74       |
| 1911  | 70.63  | 77.20     | 79.66   | 72.06    | 100.65   | 74.37 | 3.51    | 75.69       |
| 1912  | 74.83  | 78.10     | 87.47   | 73.84    | 121.16   | 67.46 | 5.06    | 79.42       |
| 1913  | 72.87  | 75.31     | 77.88   | 67.38    | 127.94   | 58.92 | 2.34    | 75.74       |

**7. Clearing Houses.**—The Sydney Banks' Exchange Settlement and the Melbourne Clearing House, at which two institutions settlements are effected daily between the banks doing business in New South Wales and Victoria respectively, publish figures of the weekly clearances effected. From these figures it appears that in 1913 the total clearances in Sydney amounted to £348,741,000, and in Melbourne to £297,256,000. These figures represent an increase for Sydney of £18,120,000 on those for 1912, and a decrease for Melbourne of £6,207,000. Owing to the different distribution of the banking business in the two cities these figures do not, however, afford a fair comparison of the volume of banking business transacted in Sydney and Melbourne.

### § 3. Companies.

**1. General.**—Returns in regard to registered companies are defective, and, with few exceptions, are not available for Tasmania. They embrace (a) Returns relating to Trustees, Executors and Agency Companies; (b) Returns relating to Registered Building and Investment Societies; and (c) Returns relating to Registered Co-operative Societies.

**2. Trustees, Executors and Agency Companies.**—Returns are available of seven Victorian, two New South Wales, one Queensland, one South Australian, one Western Australian, and two Tasmanian companies. The paid-up capital of these fourteen companies amounted to £470,147; reserve funds and undivided profits to £383,311; other liabilities, £84,777; total liabilities, £938,235. Among the assets are included:—Deposits with Governments, £181,437; other investments in public securities, fixed deposits, etc., £204,839; loans on mortgage, £143,688; property owned, £274,959; other assets, £163,312. The net profits for the year were £80,207, and the amount of dividends and bonuses £46,647. Returns as to the amount at credit of estates represented by assets are available for only seven companies, viz.:—Two Victorian, two New South Wales, one Queensland, one South Australian, and one Western Australian, the total shewn being £31,953,690.

Probably nearly £23,000,000 would have to be added to this amount for the remaining seven companies, so that the total amount would not be far short of £55,000,000. None of these companies receive deposits, and advances are only made under exceptional circumstances, and to a very limited extent, the total so shewn in the last balance-sheets being but £98,734.

3. **Registered Building and Investment Societies.**—Returns have been received of a total of 193 societies, viz., 105 in New South Wales, 32 in Victoria, 14 in Queensland, 27 in South Australia, 11 in Western Australia, and 4 in Tasmania. The balance-sheets cover various periods ended during the second half of 1912 and the first half of 1913, so that the returns may be assumed to roughly correspond to the financial year 1912-13. The liabilities of the societies are stated as follows:—

**LIABILITIES OF REGISTERED BUILDING AND INVESTMENT SOCIETIES, 1912-13.**

| State.            | Paid-up Capital or Subscriptions. | Reserve Funds. | Deposits. | Bank Over-drafts and other Liabilities. | Total Liabilities. |
|-------------------|-----------------------------------|----------------|-----------|---|--------------------|
|                   | £                                 | £              | £         | £                                       | £                  |
| New South Wales   | 852,519                           | (a)            | 504,650   | 54,746                                  | 1,411,915          |
| Victoria          | 1,275,496                         | 261,368        | 829,792   | 363,765                                 | 2,730,421          |
| Queensland        | 431,653                           | 30,775         | 112,064   | 47,749                                  | 622,241            |
| South Australia   | 390,996                           | 6,915          | 6,180     | 12,770                                  | 416,861            |
| Western Australia | 110,026                           | ...            | 14,468    | 14,298                                  | 138,792            |
| Tasmania          | 102,356                           | 40,778         | 164,778   | 11,801                                  | 319,713            |
| Total             | 3,163,046                         | 339,836        | 1,631,932 | 505,129                                 | 5,639,943          |

(a) Included in paid-up capital or subscriptions.

The assets of the companies for the same period were as follows:—

**ASSETS OF REGISTERED BUILDING AND INVESTMENT SOCIETIES, 1912-13.**

| State.            | Advances on Mortgage. | Landed and House Property, Furniture, etc. | Cash in Hand and on Deposit and other Assets. | Total Assets. |
|-------------------|-----------------------|--|---|---------------|
|                   | £                     | £  | £   | £             |
| New South Wales   | 1,299,146             | (a)  | 284,045                                       | 1,583,191     |
| Victoria          | 2,084,354             | 623,567                                    | 58,065  | 2,765,986     |
| Queensland        | 598,383               | 13,537                                     | 18,728  | 630,648       |
| South Australia   | 407,061               | 4,046                                      | 21,467  | 432,574       |
| Western Australia | 133,850               | 25   | 4,917   | 138,792       |
| Tasmania          | 294,522               | 7,990                                      | 17,201  | 319,713       |
| Total             | 4,817,316             | 649,165                                    | 404,423                                       | 5,870,904     |

(a) Included with other assets.

Statistical information, so far as is available, is furnished in the following table:—

**REGISTERED BUILDING AND INVESTMENT SOCIETIES, 1912-13.**

| Particulars.                   | N.S.W.  | Vic.    | Q'land. | S.A.    | W.A.   | Tas.   | C'wlth.    |

| Number of shareholders         | (a)     | 8,518   | 4,635   | 11,113  | 2,820  | 1,698  | (c)23,784  |
| Number of shares               | (a)     | (a)     | 764,318 | 25,329  | 8,153  | 10,148 | (d)807,948 |
| Number of borrowers            | (a)     | 10,538  | 3,811   | 2,372   | 962    | 1,535  | (c)19,218  |
| Income for year from interest  | 103,646 | 150,379 | 38,093  | 18,053  | (b)    | 16,124 | 326,235    |
| Working expenses for year      | 72,649  | 71,281  | 6,830   | 7,022   | 2,564  | 3,427  | 163,773    |
| Amount of deposits during year | 164,469 | 547,344 | 47,142  | 6,270   | 29,775 | 42,112 | 537,112    |
| Repayment of loans during year | 96,771  | 565,716 | 83,508  | 89,340  | 44,589 | 66,346 | 946,272    |
| Loans granted during year      | 195,023 | 591,253 | 70,849  | 144,582 | 45,891 | 70,089 | 1,117,687  |

(a) Not available.

(b) Included in repayment of loans.

(c) Exclusive of New South Wales.

(d) Exclusive of New South Wales and Victoria.

4. **Registered Co-operative Societies.**—Returns are available of 97 societies, of which 40 were in New South Wales, 36 in Victoria, 5 in Queensland, 7 in South Australia, and 9 in Western Australia. As in the case of Building and Investment Societies, so in the case of Co-operative Societies do the balance-sheets cover various periods ended during the financial year 1912-13. The liabilities of the 97 societies are shewn in the following table:—

**LIABILITIES OF REGISTERED CO-OPERATIVE SOCIETIES, 1912-13.**

| State.                | Paid-up Capital. | Reserve Funds. | Bank Over-drafts and Sundry Creditors. | Other Liabilities, Profit and Loss Account, &c | Total Liabilities. |

(a) Exclusive of Tasmania.

## § 4. Savings Banks.

1. **General.**—The total number of savings banks, with their branches and agencies, in the Commonwealth, approximates to that of ordinary banks, and at the middle of 1913, numbered 2133, distributed as follows:—New South Wales, 640; Victoria, 433; Queensland, 452; South Australia, 283 (exclusive of 281 school penny savings banks); Western Australia, 180 (exclusive of 274 school penny savings banks); and Tasmania, 145. These figures are exclusive of the newly-established Commonwealth Savings Bank, except in the State of Tasmania.

In the following tables the figures for Victoria, Queensland, South Australia and Western Australia refer to financial years ended 30th June, and those of New South Wales to calendar years ended 31st December next preceding. In the case of Tasmania figures for the two joint-stock savings banks are made up to the last day of February in each year. In the case of the Commonwealth Bank, figures are made up to the 30th June, 1913.

2. **Depositors.**—The total number of depositors, *i.e.*, of persons having accounts open, not of those making deposits, in each of the last ten years is shewn in the following table:—

NUMBER OF DEPOSITORS IN SAVINGS BANKS, 1903-4 to 1912-13.

| Year.      | N.S.W.  | Victoria. | Q'land. | S. Aust.<br>(a) | W. Aust.<br>(a) | Tasmania. | All States. |
|------------|---------|-----------|---------|-----------------|-----------------|-----------|-------------|
| 1903-4     | 331,956 | 432,867   | 80,959  | 141,572         | 54,873          | 47,904    | 1,090,131   |
| 1904-5     | 355,824 | 447,382   | 84,165  | 146,366         | 59,764          | 49,438    | 1,142,939   |
| 1905-6     | 364,039 | 466,752   | 88,026  | 152,487         | 63,573          | 50,731    | 1,185,608   |
| 1906-7     | 392,050 | 491,318   | 92,912  | 161,855         | 66,737          | 53,817    | 1,258,689   |
| 1907-8     | 421,928 | 511,581   | 100,324 | 174,289         | 72,178          | 55,620    | 1,335,920   |
| 1908-9     | 436,029 | 532,425   | 106,627 | 187,482         | 77,748          | 58,145    | 1,398,456   |
| 1909-10    | 460,251 | 560,515   | 114,720 | 201,275         | 86,166          | 60,646    | 1,483,573   |
| 1910-11    | 498,658 | 595,424   | 127,219 | 216,480         | 99,017          | 63,314    | 1,600,112   |
| 1911-12    | 544,023 | 641,736   | 139,091 | 232,971         | 111,078         | 67,105    | 1,736,004   |
| 1912-13(b) | 619,224 | 703,084   | 168,438 | 251,963         | 121,201         | 70,402    | 1,934,312   |

(a) Inclusive of depositors in penny savings banks since 1907-8. (b) Inclusive of Commonwealth Savings Bank.

The subjoined table shews the above figures in relation to the population of the States; it must, of course, be borne in mind that savings bank accounts are not restricted to the adult population, but that it is, on the contrary, a very usual practice to open accounts in the names of children. Even so, the proportion is a large one, amounting in the case of the Commonwealth to more than two-fifths, and rising in Victoria to one-half, and in South Australia to more than four-sevenths.

DEPOSITORS IN SAVINGS BANKS PER 1000 OF POPULATION, 1903-4 to 1912-13.

| Year.      | N.S.W. | Victoria. | Q'land. | S. Aust. | W. Aust. | Tas. | All States. |
|------------|--------|-----------|---------|----------|----------|------|-------------|
| 1903-4     | 233    | 359       | 156     | 392      | 244      | 262  | 278         |
| 1904-5     | 244    | 371       | 160     | 403      | 250      | 267  | 288         |
| 1905-6     | 245    | 386       | 166     | 416      | 254      | 272  | 294         |
| 1906-7     | 258    | 403       | 172     | 437      | 262      | 290  | 308         |
| 1907-8     | 270    | 415       | 184     | 462      | 284      | 293  | 321         |
| 1908-9     | 275    | 426       | 191     | 481      | 299      | 303  | 330         |
| 1909-10    | 285    | 439       | 199     | 508      | 324      | 314  | 343         |
| 1910-11    | 303    | 458       | 212     | 528      | 358      | 327  | 362         |
| 1911-12    | 325    | 471       | 224     | 553      | 378      | 347  | 380         |
| 1912-13(a) | 342    | 506       | 257     | 581      | 386      | 362  | 403         |

(a) Inclusive of Commonwealth Savings Bank.

3. **Deposits.**—The total amount of deposits in the savings banks of the six States reaches the large sum of seventy-five million pounds, and would no doubt be even larger if the banks did not restrict interest-bearing deposits to certain limits. It must be remembered that though not granting him facilities to draw cheques, the Australian savings banks practically afford the small tradesman all the advantages of a current account, in addition to which they also allow him interest on his minimum monthly balance, instead of charging him a small fee for keeping his account, as the ordinary banks do. The rates of interest allowed, and the limits of interest-bearing deposits, are as follows:—New South Wales, Government Savings Bank, 3 per cent. up to £500; Savings Bank of New South Wales, 4 per cent. up to £200; Victoria, 3½ per cent. on first £100, and 3 per cent. on excess from £101 to £350; Queensland, 3 per cent. up to £500; South Australia, 2½ per cent. on accounts closed during the year, and 3½ per cent. up to £250 on accounts remaining open; Western Australia, 3 per cent. up to £1000; Hobart Trustees' Savings Bank, 4 per cent. up to £50, 3½ per cent. on the excess from £50 to £150; Launceston Trustees' Savings Bank, 3½ per cent. up to £150, and Commonwealth Savings Bank, 3 per cent. up to £300. The savings banks of five of the States—New South Wales (Government Savings Bank), Victoria, Queensland, South Australia, and Western Australia—have, for the further benefit of depositors, entered into a reciprocity arrangement, under which money deposited in one State may be drawn out in another State, and even by telegraph.

The table below shews the total amounts at credit of depositors in each of the last ten years:—

#### DEPOSITS IN SAVINGS BANKS, 1903-4 to 1912-13.

| Year.          | N.S.W.     | Victoria.  | Q'land.   | S. Aust.  | W. Aust.  | Tasmania. | All States. |
|----------------|------------|------------|-----------|-----------|-----------|-----------|-------------|
|                | £          | £          | £         | £         | £         | £         | £           |
| 1903-4 ...     | 12,344,623 | 10,582,808 | 3,741,967 | 4,217,836 | 2,079,763 | 1,249,760 | 34,216,757  |
| 1904-5 ...     | 12,982,648 | 10,896,741 | 3,875,197 | 4,398,041 | 2,207,296 | 1,263,542 | 35,623,465  |

| 1908-9 ...     | 18,805,082 | 14,101,710 | 5,158,219 | 6,347,271 | 3,059,738 | 1,605,919 | 49,077,939  |
| 1909-10 ...    | 20,150,574 | 15,417,888 | 5,622,986 | 6,791,320 | 3,481,764 | 1,652,966 | 53,117,498  |
| 1910-11 ...    | 22,453,924 | 17,274,423 | 6,376,969 | 7,435,772 | 4,092,504 | 1,760,090 | 59,393,682  |
| 1911-12 ...    | 25,361,338 | 19,662,465 | 7,342,811 | 8,248,396 | 4,408,320 | 1,933,448 | 66,956,778  |
| 1912-13(a) ... | 28,862,592 | 22,232,196 | 8,668,284 | 8,766,182 | 4,682,738 | 2,036,211 | 75,248,203  |

(a) Inclusive of Commonwealth Savings Bank.

A comparison between the tables shewing the number of depositors and the amount of deposits reveals the fact that the average amounts to the credit of each depositor are considerably larger in some States than in others; in other words, that in one State a comparatively larger proportion of the population makes use of the savings banks, and that the natural result is a smaller amount to the credit of the individual depositor. Within the same State there is little variation in the figures from year to year.

#### AVERAGE AMOUNT PER DEPOSITOR IN SAVINGS BANKS, 1903-4 to 1912-13.

| Year.          | N.S.W.   | Victoria. | Q'land.  | S. Aust. | W. Aust. | Tasmania. | All States. |

| 1912-13(a) ... | 46 12 2  | 31 12 5   | 51 9 3   | 34 15 10 | 38 12 9  | 28 18 4   | 38 18 0     |

(a) Inclusive of Commonwealth Savings Bank.

The average amount deposited per head of population shows a satisfactory increase during the period under review. In 1903-4 it ranged from £11 13s. 6d. in South Australia to £6 16s. 8d. in Tasmania, while in 1912-13 the amount in South Australia had risen to £20 4s. 3d., and in Tasmania to £10 9s. 4d. The following table gives the figures for each year:—

**SAVINGS BANKS DEPOSITS PER HEAD OF POPULATION, 1903-4 to 1912-13.**

4. **Annual Business.**—The annual volume of business transacted by the Australian savings banks is very large when compared with the total amount of deposits. This is mainly due to the fact already pointed out of many accounts being used as convenient current accounts. Thus, during the last year of the period under review, the total amount deposited and withdrawn (exclusive of interest added) amounted to about 180 per cent. of the total amount of deposits at the end of the previous year, while the amount at credit of depositors (inclusive of interest added) increased by less than 13 per cent. during the same year. The following table shews the business transacted during the year 1912-13:—

**SAVINGS' BANKS TRANSACTIONS DURING THE YEAR 1912-13.**

| State.          | Total Deposits at End of Year 1911-12 | Amounts Deposited during Year 1912-13. | Interest Added during Year 1912-13. | Total       | Amounts Withdrawn during Year 1912-13. | Total Deposits at End of Year 1912-13. |
|-----------------|---------------------------------------|--|-------------------------------------|-------------|--|--|

**§ 5. Commonwealth Savings Bank.**

A most important recent event has been the opening of the Savings Bank department of the Commonwealth Bank. This started operations in Victoria on 15th July, 1912, in Queensland on 16th September, 1912, in the Northern Territory on 21st October, 1912, and in the States of New South Wales, South Australia, and Western Australia on 13th January, 1913. Business is being carried out on the usual Savings Bank lines,

interest at the rate of 3 per cent. per annum being allowed on deposits up to £300. Extensive use is being made of the country post-offices as local agencies, the several States having received notice that their Savings Banks would have to be removed from the post-offices by the end of 1912. Victoria and Queensland withdrew at a very early stage.

At the conference of State Premiers, held at Melbourne on 19th January, 1912, and following days, the Commonwealth Prime Minister submitted certain proposals as the basis upon which the States might become partners in the Commonwealth Bank. One of the proposals was that the Commonwealth should take over the Savings Banks of each State, whether Government or trustee. After this had happened the State Government was to have first call on any loan which the Commonwealth Bank should repay to the State Bank in redemption of loans existing when it was taken over; and also first call on three-fourths of the amount of deposits in the State available for investment. The Premiers, feeling unwilling to agree to this, submitted a counter proposal [the Victorian Treasurer dissenting], that the Commonwealth Bank should refrain from embarking on Savings Bank business, and that the States, in consideration thereof, should lend to the Bank an amount equal to one-fourth of the excess of deposits over withdrawals. This arrangement was to come into force on 1st June, 1913, and last for five years. The Prime Minister, in reply, intimated that his original proposals were still open for acceptance. On 23rd January the Premiers' Conference passed the following resolution [the representatives from Victoria and Queensland dissenting]: "that this conference expresses its readiness to accept the proposals submitted by the Prime Minister, subject to a satisfactory arrangement being arrived at for giving the States an equitable share in the management of the Commonwealth Bank." The matter then remained for some months in abeyance.

Almost from the time of the opening of the Savings Banks department the Governor of the Bank made proposals to the various State Governments which might form a basis for the transfer of the various State Savings Banks to the Commonwealth. The Government of Tasmania ultimately accepted the offer, and the State Savings Bank of Tasmania was formally transferred to the Commonwealth as from the 1st January, 1913, and opened for business under the new régime on 3rd January. The remaining States' Governments have announced their intention of retaining their Savings Banks as separate institutions, and their example has been followed by the Savings Bank of New South Wales, and the two trustee Savings Banks of Tasmania. It will be of interest to give a summary of the agreement between the Commonwealth Bank and the State Savings Bank of Tasmania. The following is condensed from a statement by the Governor of the Commonwealth Bank:—

"The Commonwealth Bank is to take over all the liabilities to depositors, etc., amounting to £788,031, leaving the profit and loss balance, amounting to £5659, in the hands of the State. The assets, amounting to £793,690, are dealt with as follows: the securities to be retained by the State Government, and debentures to be issued to the Commonwealth Bank, Savings Bank Department, in lieu of same. Three per cent. stock totalling £19,000, and 3½ per cent. stock totalling £420,961, to be exchanged for 3½ per cent. debentures at 95, and 3¾ per cent. stock amounting to £204,000, and 4 per cent. stock amounting to £146,700 to be exchanged for 4 per cent. debentures. The total debentures, amounting to £784,133, will mature in 20 yearly instalments of £39,207 per annum, the first payment to be made on 30th June, 1932. The Government will provide a sinking fund of 1 per cent., to be a charge on the consolidated revenue of the State, and to be deposited in the Commonwealth Bank in reduction of debentures in even thousands, in the proportion of 3½ per cent. and 4 per cent. debentures issued. The remaining items on the balance sheet, amounting to £31,229, will be handed over to the Commonwealth Bank as cash.

"The State is to have first call for State requirements on 75 per cent. of the increased deposits at current rates, and should the State at any time not require the amount, the Governor of the Commonwealth Bank will be at liberty to invest the same, either in the business of the Bank, or in the Commonwealth or in municipal securities. The whole of the staff at present exclusively engaged in savings bank business will be retained."

The following table shews for each State the number of depositors, and the amount at credit on 30th June, 1913, of the Commonwealth Savings Bank :—

**COMMONWEALTH SAVINGS BANK AS AT 30th JUNE, 1913.**

## § 6. Life Assurance.

1. **General.**—Under section 51 of the Commonwealth Constitution Act, the Commonwealth Parliament is empowered to legislate in regard to "insurance, other than State insurance; also State insurance extending beyond the limits of the State concerned." With the exception of Act No. 12 of 1905, "an Act relating to assurance on the lives of children by life assurance companies or societies," no legislation relating to life insurance has been passed by the Commonwealth Parliament, and life insurance companies carry on their business under State laws where such laws are in existence, or otherwise under the provisions of various companies or special Acts. A Royal Commission consisting of the Honourable J. H. Hood, one of the judges of the Supreme Court of Victoria, and G. H. Knibbs, Esquire, Commonwealth Statistician, was, however, appointed in 1908, "to inquire into and report upon the law relating to and the methods of operating, Fire, Life, Industrial, and other Insurance in Australia." The Commission was originally required to report the result of its inquiry before the 30th June, 1909. A progress report was issued before that date, and the time for the final report extended to the 30th June, 1910. The report relating to Life Assurance was published on 15th March, 1910, and that relating to Fire Insurance on 15th October, 1910. On the conclusions contained in these reports future Commonwealth legislation will probably be based. In fact, a bill embodying some of the conclusions was introduced into the Federal Parliament on December 20th, 1912, but, owing to lack of time, did not reach its second reading. An additional report on Social Insurance was prepared by the Commonwealth Statistician and issued on 9th September, 1910.

Returns for the year 1912 have been directly collected from life assurance societies by the Commonwealth Statistician, with results which are in the main satisfactory. Figures for 1912 refer to business in the Commonwealth only, and do not include New Zealand business.

**2. Companies Transacting Business in the Commonwealth.**—The total number of companies at present established in the Commonwealth is sixteen, of which the following six have their head offices in New South Wales:—The Australian Mutual Provident Society, the Mutual Life and Citizens' Assurance Company Limited, the City Mutual Life Assurance Society Limited, the Australian Metropolitan Life Assurance Company Limited, the People's Prudential Assurance Company Limited, and the Life Insurance Company. The Standard Life Association Limited is now omitted, since a controlling interest in it has been purchased by the Colonial Mutual Life Assurance Society, and almost all its policy-holders have transferred themselves to the latter corporation. The Mutual Life and Citizens' Assurance Company Limited was formed in 1908 by the amalgamation of the Mutual Life Association of Australasia and the Citizens' Life Assurance Company Limited. During 1910 it increased in size by amalgamating with the Australian Widows' Fund Life Assurance Society Limited, which is therefore no longer included in the list of independent corporations. Five companies have their head offices in Victoria, viz.—The Australian Alliance Assurance Company, the National Mutual Life Association of Australasia Limited, the Victoria Life and General Insurance Company, the Colonial Mutual Life Assurance Society Limited, and the Australasian Temperance and General Mutual Life Assurance Society Limited. The head office of the Provident Life Assurance Company is in New Zealand, and that of the Liverpool and London and Globe Insurance Company in England. The remaining three societies belong to the United States, viz.—The Equitable Life Insurance Society of the United States, the Mutual Life Insurance Company of New York, and the New York Life Insurance Company.

Most of the Australian companies are purely mutual; the Victoria Life and General (which takes no new life business), the Mutual Life and Citizens', the Metropolitan, the Prudential, and the Life Insurance Company, are the only companies which are partly proprietary, the shareholders' capital amounting to £40,000, £74,751 £11,740, £9978 and £44,000 respectively. Of foreign companies transacting business in the Commonwealth, the Liverpool and London and Globe, the Provident, and the Equitable are partly proprietary, the shareholders' capital amounting to £265,525, £15,000 and £20,550 respectively.

**3. Ordinary and Industrial Business.**—Of the societies enumerated in the preceding paragraph the following six in 1912 transacted both ordinary and industrial business:—The Australian Mutual Provident Society, the Mutual Life and Citizens' Assurance Company Limited, the Australasian Temperance and General Mutual Life Assurance Society Limited, the Australian Metropolitan Life Assurance Company Limited, the Colonial Mutual Life Assurance Society, and the Life Insurance Company.

The People's Prudential Assurance Company Limited and the Provident Life Assurance Company formerly restricted their operations to industrial business, but have now established an ordinary department.

The remaining eight societies transacted ordinary life assurance business only, with the exception of those companies which have fire and accident branches, etc.

It has been attempted in this section to keep returns relating to ordinary and to industrial business apart, so far as it is possible to do so, and figures relating to companies whose head offices are in New Zealand or in Europe or America refer to the Australian business only of those companies.

4. **Ordinary Business: Australian Business in Force, 1912.**—The subjoined table shews the ordinary life business in force at the latest dates available in the fifteen societies conducting operations in the Commonwealth:—

**ORDINARY LIFE ASSURANCE.—AUSTRALIAN BUSINESS IN FORCE, 1912.**

| Society.   | Policies in force, exclusive of Annuities. | Amount Assured, exclusive of Bonus Addition, etc. | Annual Premium Income, exclusive of Annuities. |

(a) Decrease.

**7. Liabilities and Assets of Insurance Societies, 1912.**—The liabilities of the Australasian societies consist mainly of their assurance funds; as already mentioned, only six of the societies are partly proprietary, viz., the Mutual Life and Citizens', with a paid-up capital of £74,751; the Metropolitan, with a paid-up capital of £11,740; the Prudential, with a paid-up capital of £9978; the Victoria Life and General, with a paid-up capital of £40,000; the Provident, with a paid-up capital of £15,000; and the Life Insurance Company, with £44,000. With the exception of the Victoria Life and General and the Life Insurance Company, this paid-up capital belongs in every case to the industrial branch of the respective societies. The capital of the Provident (£15,000) is held in New Zealand, that of the Liverpool and London and Globe (£265,525) in England, and that of the Equitable Life (£20,550) in the United States. None of these three amounts appears, therefore, in the two subjoined tables, where the capital of the Australian societies is included with the assurance funds. The assets consist mainly of loans on mortgage and policies, Government, municipal, and similar securities, shares, freehold property, etc. As in some cases the Australian liabilities exceed the Australian assets, it

may be pointed out that this table should be taken in connection with the table on page 758, which sets out the total liabilities and assets. Loans on personal security are granted by only very few of the Australian societies.

(i.) *Ordinary Business.* The following table shews the liabilities and assets of the societies transacting ordinary life business:—

**ORDINARY LIFE ASSURANCE.—AUSTRALIAN LIABILITIES AND ASSETS, 1912.**

(a) Including industrial business. As the business of these two societies is mainly ordinary life business they have been included in this table. (b) Not available. (c) Several life offices have a considerable portion of their assets invested outside the Commonwealth (see table on page 758)

(ii.) *Industrial Business.* As stated in the footnote to the preceding table, the Australian Mutual Provident Society and the Australasian Temperance and General Mutual Life Assurance Society, which transact a certain amount of industrial business, but whose business is mainly ordinary life business, have been included with those societies doing only ordinary life business. On the other hand, the People's Prudential Assurance Company, in whose case industrial business greatly predominates over ordinary life business, has been included in the following table. Incomplete as the table is, it shews that the funds appropriated to industrial business are very insignificant in comparison with those pertaining to ordinary life business. Taking the table in conjunction with the statements of revenue and expenditure, the question may well be asked whether in the case of some of the societies industrial business is worth catering for at all.

(a) Including ordinary business. (b) Particulars not available.

(iii.) *Total Liabilities and Assets.* It has been thought advisable to confine the figures relating to life assurance to business in the Commonwealth. Several of the companies whose head offices are in Australia transact, however, a large amount of business elsewhere, viz., in New Zealand, in South Africa, and in the United Kingdom, while in the case of the foreign companies, the Australian business is insignificant compared with that done elsewhere. Particulars as to this foreign business of both Australian and foreign companies will be found in "Finance Bulletin, No. 7," and a short table only is inserted here, shewing the total liabilities and assets (which balance in every case) of the various companies, so that the deficiencies in the Australian assets shewn in the previous tables for those companies doing business elsewhere may not be misunderstood:—

#### TOTAL LIABILITIES AND ASSETS OF INSURANCE COMPANIES, 1912.

(a) Including industrial business.

(b) Including ordinary business.

### § 7. Fire Insurance.

1. **General.**—Returns as to fire insurance are very defective, and only for Sydney and Melbourne and the country districts of Victoria have some figures been given which are worth reproducing. The Royal Commission mentioned above under "Life Assurance" has reported upon fire insurance matters, and Commonwealth legislation may, therefore, be expected at an early date. Legislation concerning fire insurance was in fact contained in the bill to which reference has already been made. [§ 5, paragraph 1.]

2. **Sydney.**—Under the Fire Brigades Act 1902 the cost of the Metropolitan Fire Brigade is defrayed by equal payments on the part of the Colonial Treasurer, the municipal councils within the area under the jurisdiction of the Fire Brigades Board, and the insurance companies represented in Sydney. The companies divide their share proportionately to the amount held at risk. Under this arrangement the amount payable by the companies for the year 1909 was £19,100, divided amongst sixty-five companies, of which not more than six had their head office in Sydney. The amounts thus held at risk at the close of the last four years for which returns are available were, in 1905, £78,108,749; in 1906, £81,364,129; in 1907, £86,563,304; and in 1908, £89,071,992. A new Act, which came into force on the 1st January, 1910, was passed in 1909. This Act substituted a Board of Fire Commissioners for New South Wales for the original Metropolitan Fire Brigades Board, and divides the whole State into eight fire districts for the greater facilitation of working.

3. **Melbourne.**—In Melbourne the Metropolitan Fire Brigades Board assesses the amount payable by the insurance companies on the amount of premiums returned. These premiums for the last four years averaged about £370,000 per annum, while

the contributions paid by the companies averaged about £19,000, or about £5 for every £100 of premiums. It may be said, therefore, that the companies have to devote about 5 per cent. of their premium income from metropolitan insurances to the maintenance of the fire brigade.

The annual value of ratable property is nearly £5,920,000, and the amounts contributed by the municipalities—as in the case of the insurance companies, one-third of the amount required by the Fire Brigades Board, the remaining one-third being contributed by the State Treasurer—are equal to about  $\frac{1}{3}$ d. per £1 of ratable value. In addition to this contribution, insurance companies doing business in Victoria have to take out an annual license at a cost of  $1\frac{1}{2}$  per cent. of the gross premium income, which is probably equal to about  $1\frac{1}{3}$  per cent. on net income.

**4. Country Districts of Victoria.**—The country districts are divided into nine areas for fire insurance purposes, and the contributions to be paid vary in these areas according to the actual requirements of the Country Fire Brigades Board. The annual values of ratable property for the last four years were slightly over £1,500,000. The premium income of the insurance companies from country business in protected areas during the year 1912 was about £182,000, and the contributions of the companies £4700, equal to about  $2\frac{1}{2}$  per cent. of the premium income.

**5. Brisbane.**—A similar arrangement holds good in Brisbane, under which the cost of the Fire Brigade Board, amounting to about £6000 per annum, is paid in equal shares by the Government, the Brisbane City Council, and the insurance companies.

**6. Adelaide.**—The Fire Brigades Board of South Australia is incorporated under "The Fire Brigades Act 1904"; "The Fire Brigades Act Amendment Act 1905"; and "The Fire Brigades Act Further Amendment Act 1910." The cost is distributed as follows:—Three-ninths to the Government; four-ninths to the insurance companies; and two-ninths to the municipalities and districts which come under the operations of the board. The insurance companies are assessed in proportion to that portion of their premium incomes derived from the insurance of property (re-insurance within the State excepted) situated within the limits of the municipalities and districts coming under the operations of the board. The respective contributions for 1912 were as follows:—The Government, £7104; the companies, £9472; the municipalities, £4736.

**7. Perth.**—A District Fire Brigades Bill was reported on by a committee of the Legislative Assembly during 1909, and it was recommended that all brigades should in future be controlled by one board, and that the expense should be met by contributions at the following rate:—By Government, two-eighths; by the municipalities, three-eighths; and by the insurance companies, three-eighths. These provisions were incorporated in an Act, "The District Fire Brigades Act 1909," which was assented to on 21st December, 1909, and came into force on the 1st day of January, 1910. This Act, however, does not apply to Perth or the other districts in which the Fire Brigades Act 1898 is still operative. According to the provisions of the latter Act the expenditure is allocated as follows:—One-ninth to the Government; four-ninths to the insurance companies; and four-ninths to the municipalities. It is provided that the Governor may, at any time, on the petition of the council of any municipality, declare by proclamation that the provisions of the Act of 1898 shall cease to be in force in that municipal district.

**8. Australian Fire Insurance Business.**—Returns are available shewing the revenue and expenditure, assets and liabilities, and investments of eighteen insurance companies having their head offices either in the Commonwealth or in New Zealand. These companies are:—(a) with head office in Sydney—the Australian Mutual Fire Insurance Company, the City Mutual Fire Insurance Company, the Mercantile Mutual Fire Insurance Company, the Queensland Insurance Company Limited, the United Insurance

Company, and the Insurance Office of Australia Limited; (b) with head office in Melbourne—the Australian Alliance Assurance Company, the Colonial Mutual Fire Insurance Company, the Commonwealth Insurance Company Limited, the Victoria Insurance Company, and the Victoria General Insurance and Guarantee Company Limited; (c) with head office in Hobart—the Derwent and Tamar Fire and Marine Assurance Company Limited; (d) with head office in Launceston—the Mutual Fire Insurance Company of Tasmania; (e) with head office in Auckland—the New Zealand Insurance Company, and the South British Fire and Marine Insurance Company of New Zealand; (f) with head office in Dunedin—the National Fire and Marine Insurance Company of New Zealand, and the Standard Fire and Marine Insurance Company of New Zealand; (g) with head office in Wellington—the New Zealand State Fire Insurance office; and (h) with head office in Christchurch—the Farmers' Co-operative Insurance Association of New Zealand. As their names imply, the majority of these companies transact marine insurance, and in some cases, guarantee and other business, in addition to the fire insurance business, and the returns relating to the latter cannot be separated from the former.

The accounts cover two periods of one year, the second year ending at various dates from 30th June, 1912, to 31st March, 1913. The figures for the first year are put in brackets.

The premiums, less reinsurances and returns, amounted to £2,282,506 (£2,088,120); losses were £1,184,977 (£1,029,801). Expenses and commission came to £774,752 (£725,806), and there was, therefore, a profit on trade operations of £322,777 (£332,513). As, however, interest, rent, fees, etc., amounted to £183,746 (£176,172), the total profit was £506,523 (£508,685). Dividends and bonuses came to £254,071 (£241,777). The ratio to premium income of losses was, therefore, 51.92 per cent. (49.32 per cent.), and of expenses and commissions, 33.94 per cent. (34.76 per cent.). The resulting ratio of trade surplus to premium income was 14.14 per cent. (15.92 per cent.).

The paid-up capital of the sixteen companies was £1,816,137 (£1,575,036); reserve and reinsurance funds, £2,396,917 (£2,375,255); undivided profits, £188,554 (£201,718). The total paid-up capital and reserves were, therefore, £4,401,608 (£4,152,009). In addition to these liabilities there were others, viz.:—Unsettled losses, £223,542 (£225,402); sundry creditors, £221,706 (£230,141); dividend to pay, £165,578 (£135,920); and, in the case of one company, a life assurance fund, £128,507 (£141,591); thus bringing the total liabilities to shareholders and to the general public up to £5,140,941 (£4,885,063).

The corresponding amount of assets is made up of investments, £4,531,063 (£4,324,017), viz.:—Loans on mortgage, £1,262,617 (£1,272,841); Government securities, debentures, shares, etc., £1,196,887 (£1,140,732); landed and other property, including furniture, £941,000 (£891,968); fixed deposits, £1,024,510 (£916,178); in the case of one company doing a mixed business—loans on its own life policies, etc., £9274 (£11,654); other investments, £96,775 (£90,644). The balance of assets consisted of cash in bank, on hand, and bills receivable, £230,950 (£217,876); and sundry debtors, etc., £378,928 (£343,170).

The financial position of the companies is undoubtedly a strong one, owing to the steady accumulation of reserves, and the high ratio borne by capital and reserves to premium income must be a cause of satisfaction to policyholders.

## § 8. Marine Insurance.

No returns are available in regard to Marine Insurance. It may, however, be stated, that the Commonwealth Parliament in 1909 passed an Act (No. 11 of 1909, "An Act relating to Marine Insurance") which was assented to on the 11th November, 1909. This

Act materially alters some of the conditions under which marine policies have heretofore been issued.

### § 9. Friendly Societies.

1. **General.**—Friendly societies are an important factor in the social life of the community, as probably nearly one-third of the total population of the Commonwealth comes either directly or indirectly under their influence. Their total membership is about 450,000, but as certain benefits, such as medical attendance and free medicine and in many cases funeral expenses, are granted to members' families as well as to members themselves, this figure must, even when due allowance is made for young and unmarried members, be multiplied by four at the least to arrive at the total number of persons more or less connected with these societies. Legislation has conferred certain privileges on friendly societies, but, on the other hand, it insists on their registration, and it is the duty of the Registrars in the various States, prior to registering a new society, to see that its rules are conformable to the law, and that the scale of contributions is sufficiently high to enable the promised benefits to be conferred on members. Societies are obliged to forward annual returns as to their membership and their finances to the Registrar, and elaborate reports are published in most of the States dealing with the returns thus received.

In the following tables the figures refer to the year 1912, except those for South Australia, which refer to the quinquennium 1905-9.

2. **Number of Societies, Lodges, and Members.**—The total number of societies registered in New South Wales is 62; in Victoria, 47; in Queensland, 20; in South Australia, 16; in Western Australia, 16; and in Tasmania, 11. No total is given of these figures for the Commonwealth, as the societies shewn in one State are in most cases represented in all the other States. The number of different lodges, the total number of benefit members at the end of the year, and their average number during the year are shewn in the following table:—

**FRIENDLY SOCIETIES.—LODGES AND MEMBERS, 31st DECEMBER, 1912. (a)**

| State.            |     |     |     | Number of Lodges. | Benefit Members at End of Year. | Average No. of Benefit Members during Year. |
|-------------------|-----|-----|-----|-------------------|---------------------------------|---|
| New South Wales   | ... | ... | ... | 1,853             | 160,179                         | 153,408                                     |
| Victoria          | ... | ... | ... | 1,505             | 153,921                         | 151,262                                     |
| Queensland        | ... | ... | ... | 519               | 47,204                          | 46,208                                      |
| South Australia   | ... | ... | ... | 529               | 58,292                          | (b)   |
| Western Australia | ... | ... | ... | 289               | 18,901                          | 18,269                                      |
| Tasmania          | ... | ... | ... | 196               | 22,480                          | (b)   |
| Commonwealth      |     |     |     | 4,891             | 460,977                         | (b)   |

(a) See, however, paragraph 1, above. (b) Not available.

3. **Sickness and Death.**—Sick pay is generally granted for a number of months at full rates, then for a period at half rates, and in some societies is finally reduced to quarter rates. The following table shews the total number of members who received sick pay during the year, the number of weeks for which they received pay in the

aggregate; and the average per member sick, and further the number of benefit members who died during the year, together with the proportion of deaths per thousand average members :—

**FRIENDLY SOCIETIES.—SICKNESS AND DEATH, 1912. (a)**

| State.              | Number of Members who received Sick Pay. | Total Number of weeks Sick Pay granted. | Average No. of weeks per Member sick. | Deaths of Benefit Members and Wives. | Proportion of Deaths to 1000 average Benefit Members. |
|---------------------|--|---|---------------------------------------|--------------------------------------|---|
| New South Wales     | 35,800                                   | 212,844                                 | 5.95                                  | 1,189                                | 7.75  |
| Victoria ...        | 28,112                                   | 223,475                                 | 7.95                                  | 1,744                                | 11.54   |
| Queensland ...      | 7,895                                    | 47,417                                  | 6.01                                  | 327                                  | 7.09  |
| South Australia ... | 8,971                                    | 86,768                                  | 9.67                                  | 497                                  | (b)   |
| Western Australia   | 2,688                                    | 15,202                                  | 5.65                                  | 133                                  | 7.28  |
| Tasmania ...        | 4,279                                    | 24,253                                  | 5.67                                  | 192                                  | (b)   |
| Commonwealth        | 87,745                                   | 609,959                                 | 6.95                                  | 4,082                                | (b)   |

(a) See, however, paragraph 1. (b) Not available.

4. **Revenue and Expenditure.**—The financial returns are not prepared in the same way in each State, but an attempt has been made in the subjoined table to group the revenue under the main headings :—

**FRIENDLY SOCIETIES.—REVENUES, 1912. (a)**

| State.              | Entrance Fees, Members' Contributions, and Levies. | Interest, Dividends, and Rents. | All other Income. | Total Revenue. |
|---------------------|--|---------------------------------|-------------------|----------------|
|                     | £  | £                               | £                 | £              |
| New South Wales ... | 456,000  | 69,599                          | 32,493            | 558,092        |
| Victoria ...        | 437,607  | 93,675                          | 49,089            | 580,371        |
| Queensland ...      | 155,471  | 25,549                          | ...               | 181,020        |
| South Australia ... | (b) 130,096  | 31,167                          | (c) 65,293        | 226,556        |
| Western Australia   | 52,778   | 10,134                          | 32,647            | 95,559         |
| Tasmania ...        | 62,080   | 7,414                           | 6,339             | 75,833         |
| Commonwealth ...    | 1,294,032  | 237,538                         | 185,861           | 1,717,431      |

(a) See, however, paragraph 1. (b) Excluding levies. (c) Including levies.

The returns relating to expenditure are more complete than those relating to revenue, and can be shewn in full for every State. The figures shew that the excess of revenue, amounting in the aggregate to £325,182, was divided amongst the six States as follows :—New South Wales, £90,896; Victoria, £115,068; Queensland, £52,108; South Australia, £37,588; Western Australia, £18,878; and Tasmania, £10,644. The revenue exceeded the expenditure by about fifteen shillings per average benefit member, a margin which cannot be called very large.

FRIENDLY SOCIETIES.—EXPENDITURE 1912. (a)

| State.              | Sick Pay. | Medical Attendance and Medicine. | Sums Paid at Death of Members & Members' Wives. | Administration. | All other Expenditure. | Total Expenditure. |
|---------------------|-----------|----------------------------------|---|-----------------|------------------------|--------------------|
|                     | £         | £                                | £   | £               | £                      | £                  |
| New South Wales     | 166,270   | 157,821                          | 33,982  | 66,469          | 42,654                 | 467,196            |
| Victoria ...        | 152,085   | 153,004                          | 30,919  | 74,266          | 55,029                 | 465,303            |
| Queensland ...      | 35,548    | 52,648                           | 13,643  | 27,073          | (b)                    | 128,912            |
| South Australia ... | 50,979    | 28,305                           | 22,998  | 24,526          | 62,160                 | 188,968            |
| Western Australia   | 12,414    | 17,963                           | 2,330   | 14,138          | 29,836                 | 76,681             |
| Tasmania ...        | 19,732    | 18,362                           | 11,728  | 11,328          | 4,039                  | 65,189             |
| Commonwealth        | 437,028   | 428,103                          | 115,600   | 217,800         | 193,718                | 1,392,249          |

(a) See, however, paragraph 1. (b) Included in "Administration."

It appears from the above figures that sick pay averaged about fourteen shillings per week, but, as the returns include pay at half and quarter rates, and as the proportion of these to full rates is not stated, the average given must be taken for what it is worth. Medical attendance and medicine came to about one pound per average benefit member, or to nearly £5 per member who received sick pay during the year.

5. **Funds.**—The two foregoing tables shew that the surplus of revenue over expenditure amounted to £325,182 for the year, and a small surplus must, of course, result annually in every society which levies adequate contributions to enable it to meet all possible claims. These accumulations of profits are generally invested, and the subjoined table shews for all of the six States the division into invested and uninvested funds :—

FRIENDLY SOCIETIES.—FUNDS, 31st DECEMBER, 1912. (a)

| State.                | Invested Funds. | Uninvested Funds. | Total Funds. |
|-----------------------|-----------------|-------------------|--------------|
|                       | £               | £                 | £            |
| New South Wales ...   | 1,521,998       | 75,246            | 1,597,244    |
| Victoria ...          | 2,277,014       | 84,450            | 2,361,464    |
| Queensland ...        | 602,792         | 27,298            | 630,090      |
| South Australia ...   | 887,318         | 35,287            | 922,605      |
| Western Australia ... | 182,132         | 11,259            | 193,391      |
| Tasmania ...          | 202,662         | 13,672            | 216,334      |
| Commonwealth ...      | 5,673,916       | 247,212           | 5,921,128    |

(a) See, however, paragraph 1.

The total funds amounted, therefore, to £12 16s. 11d. per member at the close of the year under review.

§ 10. Probates.

1. **Number of Probates and Letters of Administration and Value of Estates.**—The value of the estates left by deceased persons gives a fair view of the distribution of property among the general population. There occurred in 1912 the deaths of 35,965 adult persons, while the total number of probates and letters of administration granted

during the same period was 11,251. It would therefore appear that about five in every sixteen adults who died during the year were possessed of sufficient property to necessitate the taking out of probate. The details for each State are shown in the table hereunder:—

### PROBATES AND LETTERS OF ADMINISTRATION, 1912.

| State.              | Number of Estates. |                            |        | Value of Estates. |                            |              |
|---------------------|--------------------|----------------------------|--------|-------------------|----------------------------|--------------|
|                     | Probates.          | Letters of Administration. | Total. | Probate.          | Letters of Administration. | Total.       |
| New South Wales     | 3,648              | (a)                        | 3,648  | £ 13,389,806      | £ (a)                      | £ 13,389,806 |
| Victoria ...        | 3,143              | 1,442                      | 4,585  | 8,533,502         | (a)                        | 8,533,502    |
| Queensland ...      | 518                | 237                        | 755    | 2,447,217         | 282,822                    | 2,730,039    |
| South Australia ... | 985                | 261                        | 1,246  | 1,883,717         | 109,389                    | 1,993,106    |
| Western Australia   | 303                | 249                        | 552    | 522,185           | 83,437                     | 605,622      |
| Tasmania ...        | 361                | 104                        | 465    | 912,160           | 71,458                     | 983,618      |
| Commonwealth        | 8,958              | 2,293                      | 11,251 | 27,688,587        | 547,106                    | 28,235,693   |

(a) Included with Probates.

Intestate estates to the value of £160,632 were placed under the control of the Curator during the year, and £20,855 unclaimed money paid into Consolidated Revenue. The details for each State are shewn hereunder:—

### INTESTATE ESTATES, 1912.

| Particulars.  | N.S.W. | Vic.   | Q'land. | S. Aust. | W. Aust. | Tas.  | C'with. |
|---|--------|--------|---------|----------|----------|-------|---------|
| Intestate estates placed under control of Curator during 1912           |        |        |         |          |          |       |         |
| Number ...  | 724    | 334    | 659     | 145      | 312      | 116   | 2,290   |
| Value ... £   | 55,833 | 27,960 | 35,956  | 18,483   | 19,387   | 3,013 | 160,632 |
| Unclaimed money paid into Consolidated Revenue by Curator during 1912 £ | 7,922  | 6,865  | 3,866   | 1,108    | 1,094    | ...   | 20,855  |

This would make the average value of each estate £2510, and the average value of property left by each adult who died in 1912, £785.

## SECTION XXII.

## PUBLIC INSTRUCTION.

## § 1. Evolution of Educational Systems in Australia.

1. **Educational Systems of the States.**—(i.) *Place of New South Wales in Australian Education.* The first settlement in Australia being in New South Wales, it is but natural that Australian education should have had its beginning in that State. In the evolution of educational method and system in Australia, New South Wales also has played a leading part, and has had practically a dominating influence. For that reason an account of the evolution of education in this State contains, as it were, the key to the understanding of the Australian attitude to this question. The subject is dealt with in some detail in No. I. and No. II. issues of the Commonwealth Official Year Book, but it is not proposed to repeat it in the present volume. (See also 2 hereunder.)

(ii.) *Educational Systems of Commonwealth States.*—A more or less detailed account of the origin and development of the primary educational systems of the other States also appears in No. I. and No. II. issues of the Year Book. Later details are given hereunder.

2. **Recent Development in State Educational Systems.**—(i.) *New South Wales.* Amongst the more important developments in this State may be mentioned the new scheme of secondary education, which came into operation in 1911, and which provides for courses of study extending over four years, for new conditions of entrance, and for the abolition of fees in the Public High Schools. The courses of study are designed to furnish a preparation for various types of vocation, and have been arranged in four groups:—(1) General course leading to the professional studies of higher institutions; (2) a commercial course; (3) a technical course, and (4) a domestic course.

The regulations provide for certificates marking three definite stages in the course—(a) the “qualifying” certificate, shewing that the holder has completed the primary course; (b) the “intermediate” certificate, marking the end of the first two years of High School course; and (c) the “leaving” certificate, indicating the successful graduation through the whole course and the passing of the prescribed final examination. Arrangements have been made with the University authorities for the acceptance of the leaving certificate in lieu of the matriculation examination.

The passing of the University (Amendment) Act of 1912 constitutes an epoch-making event in the history of educational development in New South Wales. It is claimed that the enactment of this measure completes the chain of co-ordination in the State educational system. Under a liberal provision of scholarships and bursaries it is now possible for the poorest child, without expense to his parents, to pass through the various stages from kindergarten to any of the faculties at the University. More extended reference to the University Act will be found in § 5 (i.) hereinafter.

(ii.) *Victoria.* Under the Amending Education Act of 1910 it is provided that every child must attend school for the full period of eight years between 6 and 14, unless he be given a certificate of education at 13. The schools are open on an average 225 days in each year, and require attendance on all these days, unless reasonable excuse is forthcoming. Provision is made for the mentally deficient. After completion of the elementary school course, the pupil may go on to the evening continuation schools, higher elementary schools, district high schools, or the trade schools. A Council of Public Education has been appointed to advise on educational matters generally, and

particularly in regard to co-ordination. Amongst the new features recently introduced are the recasting of the scheme of study for primary schools and the inauguration of a uniform school year. Acting on the advice of the Council of Education, the Melbourne University has established a Schools Board. The function of this body is to consider all questions relating to school studies and the inspection and examination of schools. In addition to University representation, there are also on the Board representatives of the Department of Education, the registered secondary schools, and the business interests of the community. Being clothed with such wide powers, this Board must of necessity be the chief guiding factor in the development of education in Victoria.

(iii.) *Queensland.* The Amending Act of 1910 introduced several new features into the educational system of Queensland, chief amongst them being—(a) employment of proceeds of sales of land and other school property for school purposes, instead of being paid into Consolidated Revenue; (b) abolition of local contributions; (c) provision of scheme of school certificates to assist in co-ordination of various branches of the system; (d) establishment of compulsory continuation classes; (e) compulsory medical and dental examination; (f) raising the compulsory age to 14 years instead of 12 years; (g) provision for compulsory attendance on every day on which the school is open. The last mentioned provision has already produced good results in regard to improved attendance.

(iv.) *South Australia.* One of the chief events in educational development in South Australia in 1911 was the provision of evening continuation schools, intended to help those who cannot afford to attend the higher day schools. It is proposed also to fall into line with the other States in the matter of medical supervision of school children, and provision has been made for the appointment of a medical officer, a dental officer, and two trained nurses. The changes introduced at the Teachers' Training College have proved very satisfactory, and the academic teaching at the University is now supplemented by systematic pedagogic instruction for all classes of teachers. In their reports for the year 1912, the inspectors state that the improved quality of the work in many of the smaller country schools is due to the training which the State provides for teachers prior to their appointment.

(v.) *Western Australia.* During 1912 the curriculum of the primary schools was remodelled in order to bring it into line with the most up-to-date principles. The work was lightened in directions where experience shewed there was overloading, and efforts were particularly directed towards the removal of the abstract and to the development of the imaginative and constructive throughout all grades. The scheme of bringing about a closer correlation between primary and secondary education was further advanced during the year. The Modern School, opened in 1911, was strengthened, and it is proposed to establish High Schools at the larger country centres. In the smaller towns facilities are to be given to children who propose to remain in the upper classes. School-leaving Certificates will confer the right of admission to the Arts and Science courses at the University, and special provision will be made for pupils desirous of qualifying for commercial or agricultural pursuits.

(vi.) *Tasmania.* The most important features in the development of education in Tasmania during 1912 were the establishment of subsidised schools, the taking of preliminary steps towards the establishment of State High Schools, and the adoption of more effective measures to secure regular attendance.

(vii.) *Present Position of State Education in Australia.* Throughout Australia primary education is compulsory and free, while there exists in most of the States a liberal provision of scholarships and bursaries to the Higher State Schools, to the Secondary Schools, and to the Universities.<sup>1</sup> Provided that the requisite standard is reached, it is, of course, permissible for children to receive home tuition, or to attend so-called private

1. Universities have been in existence for some time in New South Wales, Victoria, South Australia, and Tasmania. The University of Queensland was opened in March, 1911, and a University was opened in 1913 in Western Australia.

schools. Considerable interest is taken in educational matters by the people of the Commonwealth, and within the last few years several of the States have sent qualified representatives to inspect and report on the methods adopted in the chief countries of Europe and America. The reports of these Commissioners, especially those of New South Wales, have been widely studied, and various improvements have been made in accordance with their recommendations. The orientation, lighting, and ventilation of school buildings are being modernised. In all of the States periodical medical inspection of the children is in force. (A detailed statement of the work being done in this direction will be found in the chapter dealing with Public Hygiene.) Methods of training teachers are now better developed, and although the "pupil teacher" system and its effects have not been wholly eliminated, it appears to be gradually vanishing. (The methods adopted in the various States for the selection and training of teachers are described in some detail in § 2, par. 10, hereinafter.) There has been a wider employment of kindergarten principles in the early stages, and the more or less purely abstract teaching of the older days has been largely replaced by concrete methods. Such subjects as nature study, manual training, music, and drawing have received a general impetus. Greater attention has been given to the scientific classification of pupils. Moreover, as will be seen from the above and from § 2, par. 6, the State Education Departments are increasing their activities in the direction of secondary education. Lastly, the system of inspection has been considerably remodelled. Under the old system, the inspector was little more than an examining officer, but, under the present régime, the primary duty of these officers consists in guiding and directing the teaching in accordance with approved methods.

(viii.) *Co-ordination of Educational Activities.* As pointed out already, the educational system of New South Wales may now be considered as a more or less homogeneous entity, the various stages succeeding one another by logical gradation from kindergarten to university. In the other States development is proceeding on somewhat similar lines, although in varying degree.

## § 2. State Schools.

1. *Introductory.*—The State Schools, or, as they are sometimes termed, the "public" schools, of the Commonwealth comprise all schools directly under State control, in contradistinction to the so-called "private" schools, the bulk of which, though privately managed, nevertheless cater for all classes of the community.

2. *Enrolment and Attendance.*—The following table shews the number of State Schools, together with the teachers employed and the enrolment and "average attendance" in each State during the year 1912:—

### STATE SCHOOLS, TEACHERS, AND SCHOLARS, 1912.

(COMMONWEALTH.)

| State or Territory.       | Schools. | Teachers.* | Scholars Enrolled. | Average Attendance. |
|---------------------------|----------|------------|--------------------|---------------------|
| New South Wales† ... ..   | 3,234    | 6,454      | 235,803            | 171,028             |
| Victoria ... ..           | 2,178    | 5,567      | 209,209            | 154,410             |
| Queensland ... ..         | 1,278    | 2,992      | 95,641             | 77,385              |
| South Australia ... ..    | 768      | 1,473      | 58,273             | 40,838              |
| Western Australia ... ..  | 536      | 1,189      | 38,184             | 32,959              |
| Tasmania ... ..           | 396      | 840        | 25,368             | 19,561              |
| Northern Territory ... .. | 3        | 3          | 98                 | 71                  |
| Commonwealth ... ..       | 8,393    | 18,518     | 662,576            | 496,252             |

\* Exclusive of sewing mistresses. † Including Federal Territory.

Unfortunately, the schemes of enrolment and of the computation of "average attendance" are not identical in each State, so that the comparisons are imperfect. The average attendance at High Schools in South Australia is not recorded, and the necessary figures were obtained by an estimate based on enrolment. In the case of Victoria, returns were not available in regard to attendance at District High Schools and Higher Elementary Schools, and these totals were similarly estimated. That the educational statistics of each State of the Commonwealth should be made up in the same way is much to be desired.

The enrolment and average attendance at the State Schools in the Commonwealth are given below for the years 1891, 1901, and for each year of the period 1908 to 1912:—

### ENROLMENT AND ATTENDANCE AT STATE SCHOOLS, 1891 to 1912.

(COMMONWEALTH.)

| Year. | Total<br>Population. <sup>1</sup> | Enrolment. | Average<br>Attendance. | Year. | Total<br>Population. <sup>1</sup> | Enrolment. | Average<br>Attendance. |
|-------|-----------------------------------|------------|------------------------|-------|-----------------------------------|------------|------------------------|
| 1891  | 3,240                             | 561,153    | 350,773                | 1910  | 4,425                             | 627,910    | 455,870                |
| 1901  | 3,824                             | 638,478    | 450,246                | 1911  | 4,569                             | 638,850    | 463,799                |
| 1908  | 4,232                             | 618,836    | 446,146                | 1912  | 4,733                             | 652,576    | 496,252                |
| 1909  | 4,323                             | 624,236    | 458,260                |       |                                   |            |                        |

1. In thousands.

It will be seen from the above table that, despite the increase of population, the official figures of enrolment and average attendance at the State Schools of the Commonwealth shew unsatisfactory results, although an upward tendency is evident in the figures for 1911 and 1912. An examination of the graphs on pages 204 to 206, shewing birth-rate, will make it apparent that this is at least in part due to the diminished birth-rate of past years.

*Schools in the Federal Capital Area.* During the year 1912, twelve State Schools were in operation in the Federal Territory (Yass-Canberra). The pupils enrolled numbered 297 and the average attendance 186. Cost of upkeep in 1912 amounted to £2473.

**3. Centralisation of Schools.**—The question of centralisation of schools adopted so successfully in America has received some attention in the Commonwealth, and particularly in New South Wales. It is recognised that a single adequately-staffed and well-equipped central institution can give more efficient teaching than a congeries of small scattered schools in the hands of less-highly trained teachers, and the small schools in some districts were therefore closed and the children conveyed to the central institution. The principle was first adopted in New South Wales in 1904, when the conveyance of pupils was authorised in the case of twelve schools. In 1912 subsidy was paid for conveyance to eighty schools.

**4. Education in Sparsely-settled Districts.**—It has always been the aim of the State to carry the benefits of education into the remotest and most sparsely-settled districts. This is effected in various ways. (i.) By the establishment of Provisional Schools, i.e., small schools in which the attendance does not amount to more than about a dozen pupils, these institutions merging into the ordinary public school list when the attendance exceeds the minimum. (ii.) When there are not enough children to form a provisional school, what are known as Half-time Schools are formed, the teacher visiting them on alternate days. In still more sparsely-peopled districts an itinerant teacher goes from house to house within a certain radius. Thus in Queensland during 1912 the seventeen itinerant teachers covered 490,000 square miles of country and travelled 55,320 miles. In this State also the Education Department has established what are known as Saturday Schools, in which small groups of children in outlying districts are visited by the nearest

teacher on Saturdays and receive the benefit of several hours' instruction. These schools, of which there are now ten, have been warmly welcomed in the districts in which they are established, inasmuch as under this system the children "outback" receive a greater amount of instruction than is possible under the system of itinerant teachers. During 1912 the Education Department in Western Australia disbursed over £2000 in "driving grants," i.e., sums of money granted to parents whose homes are over three miles from the nearest school, and who arrange to have their children driven in. In New South Wales and Western Australia parents in the thinly-peopled areas are also allowed to club together and build a school, which receives aid from the Government in the form of a yearly subsidy and grant of school material. (iii.) An experiment on the part of New South Wales, the result of which was awaited with some interest, was the establishment in 1908 of a "travelling" school. A van was provided in which the teacher travelled, carrying with him a tent for himself and one to be used as a school, together with such books and apparatus as are required in a primary school. So far very satisfactory results have been attained. (iv.) There are also railway camp schools in operation on the sites of extensive railway works. Regulations were framed in Tasmania during 1912, providing for the subsidising of private teachers at a rate not exceeding £5 per pupil in districts too remote or sparsely settled to warrant the establishment of an ordinary provisional school. The schools of this nature established in 1912 numbered 13, with an enrolment of 138 scholars. During the year the department also paid for the conveyance of 363 children to schools by boat, vehicle, or train.

5. **Evening Schools.**—Evening Public Schools have been in existence for many years in some of the States, but their progress has been uncertain. In New South Wales there were, during 1912, three Evening Primary Schools, but seven others were absorbed by the Evening Continuation Schools; Victoria had six schools, with enrolment of 547, and an average attendance of 192; and Western Australia has continuation classes in the chief centres. Up to the end of 1910 the evening schools in New South Wales aimed chiefly at giving primary instruction, but in October of that year Evening Continuation Schools of two types were established—(i.) Artisan Schools for boys learning trades; and (ii.) Commercial Schools for boys starting in business. In December, 1912, there were thirty-one schools in operation in the metropolitan district, and seventeen in the country districts. The total weekly attendance for the year was 1852. Evening Continuation Schools have been established under regulation in South Australia, and are intended principally to help the working boy to improve his general education and to add to the store of knowledge most useful in his present work.

6. **Higher State Schools.**—(i.) In *New South Wales* public schools, which provide advanced courses of instruction for two years for pupils who have completed the primary course, are classed as *Superior Schools*. These were reorganised in 1912, and divided into Superior Commercial Schools, Superior Junior Technical Schools, and Superior Domestic Schools for Girls. At the beginning of 1913 there were twenty-six schools in the Commercial group, four in the Junior Technical, and ten in the Domestic group, with an enrolment of 78,457, and average attendance of 58,964. Provision has also been made for the more advanced education of children in country centres by the establishment of twenty-seven District Schools. These schools are specially staffed, and undertake the work of preparing students for admission to the training colleges. There are also twelve *High Schools* in the State. These had an enrolment in 1912 of 1772 boys and 1230 girls, with an average attendance of 1425 boys and 962 girls. In connection with the development of secondary education in New South Wales, a liberal scheme of scholarships has been provided, 300 bursaries and 514 scholarships having been allotted as a result of the examination for the qualifying certificate. Fifty intermediate scholarships and twenty-four University bursaries were awarded, together with twenty-two technical scholarships, and three scholarships at the Hawkesbury Agricultural College were granted to pupils of the Hurlstone Agricultural High School.

The Sydney Grammar School (not a "State" School in the ordinary acceptance of the term), which receives a State endowment of £1500 a year, had, in 1912, a quarterly enrolment of 561 pupils, and an average attendance of 522.

(ii.) In *Victoria*, action was taken in January, 1912, to give effect to the provisions of the Education Act of 1910, with regard to the decentralization of the system of secondary education. Eighteen Higher Elementary Schools are established, while the number of District High Schools was increased to nineteen. With the exception of the Melbourne High School the whole of the institutions are in country centres. The enrolment at the Higher Elementary Schools in 1912 was 1130, of whom 548 were girls, and at the District High Schools 2384, of whom 1138 were girls.

Scholarships granted by the Department are as follows:—(a) Forty ordinary, tenable for four years at a District High School or approved Secondary non-State School; (b) Forty agricultural, mining, and veterinary, tenable for four years at a High School or Secondary School, with a view to proceeding to a diploma at the University; (c) Forty junior teacher course, tenable for two years, enabling holder to obtain free tuition at a State High School in the course prescribed for junior teachers. Various scholarships are also granted by the councils of State Agricultural High Schools. There are also twenty ordinary and twenty agricultural, mining, and veterinary exhibitions open for competition.

(iii.) Prior to the year 1912, *Queensland* did not possess any distinctly secondary schools under State control, but in February of that year High Schools were opened at Warwick, Gympie, Bundaberg, Mount Morgan, Mackay, and Charters Towers. Tuition at these schools is free, but students must pass a qualifying entrance examination. In smaller centres it is intended to provide secondary tuition at existing State Schools where the attendance warrants it, and this has been arranged for at Herberton, Childers, and Gatton. The enrolment at High Schools in 1912 was 754, and the daily attendance 566. There are, moreover, ten Grammar Schools—six for boys and four for girls, each of which is subsidised by the State to the extent of £750 per annum, and in addition receives a payment of £250 per annum for providing district scholarships, as well as £12 12s. per annum on account of each open scholarship owner in attendance. These scholarships, fifty in number, are granted to State School pupils. In order to conserve the interests of children of poor parents, it is proposed to make the scholarships available at any State High School, Technical School, Grammar School, or approved Secondary School, and to grant allowances up to £30 per annum to students who must live away from home, and £12 to those who live at home. The enrolment at the Grammar Schools in 1912 was 1280, and the average attendance 1141. Since the year 1909 these schools have been regularly examined by the Inspector-General of the Education Department.

(iv.) *South Australia*. Including the Adelaide High School, there were altogether nineteen District High Schools open in South Australia in 1912, with an enrolment of 2775 students, and a teaching staff of 78. In addition to giving secondary education, these institutions form a valuable source from which the Department can draw a supply of young teachers. Under existing regulations provision is made for the following scholarships:—(i.) Eight public exhibitions open to boys and girls who have been *bond fide* residents of South Australia for two years prior to the competitive examination. The exhibitions are tenable for three years at an approved school or college, carry free tuition and books, and an allowance of £22 per annum when the holder lives away from home. (ii.) Forty exhibitions, tenable for three years at a High School, are open to competition by children under 13 years of age in attendance at State primary schools. (iii.) Eight senior exhibitions, worth £40 per annum, and four of the value of £20, are tenable at the Adelaide High School, and are open to pupils of any High School under State control. (iv.) Twelve Government bursaries, of which six are reserved for pupils of the Adelaide High School. These are tenable at the University, and the holder receives £20 per annum and free tuition.

(v.) *Western Australia.* A Modern School, designed to give a four years' course to pupils admitted at about the age of 13 years, was opened in Perth early in 1911. The first two years of the course are to a large extent common to all, but in the final two years specialization is aimed at, in order to meet the needs of future University students, teachers, agriculturists, scientific and business men; and, in the case of girls, to give tuition in domestic economy to those desirous of it. At the end of 1911 there were 337 students, but when the additional buildings are completed there will be accommodation for 400. No fees are charged at the Modern School. During 1909 the upper classes of schools in the largest centres of population were brought together into central schools, in order to secure more economical and effective teaching, and it is intended that these central institutions shall form the nucleus of future High Schools. Continuation classes were inaugurated in 14 centres in 1911, and were attended in 1912 by about 1200 pupils. The classes are intended to provide some measure of higher education to those who leave school as soon as they reach the compulsory age of 14 years. Admission to these classes is free, but pupils must attend regularly three evenings a week. Evening Schools are held in various parts of the State, but the work carried on is mainly primary. Exhibitions and scholarships at present in force comprise three University exhibitions valued at £150 each, tenable for three years at any registered University in the British Empire, seven senior exhibitions valued at £25 each tenable for one year, and 12 junior exhibitions, valued at £15 each, also tenable for one year.

(vi.) *Tasmania.* Up to the year 1912 the Department confined its efforts to the provision of primary education for the school children in Tasmania. In 1911, however, super-primary classes were formed in the larger schools, with an enrolment in 1911 of 200, and in 1912, of 400 pupils. It was recognised, however, that the previously existing scheme of scholarships and exhibitions was inadequate to meet the demands for higher education. High schools were therefore opened in January, 1913, at Hobart and Launceston, with an enrolment of 150 and 110 pupils respectively. These will cater for five classes of pupils—(i.) Those who desire to become teachers; (ii.) University students; (iii.) Commercial; (iv.) Mechanics; (v.) Home duties (girls). It is proposed to grant a leaving certificate at the end of a four years' course.

**7. Agricultural Training in State Schools.**—The question of agricultural training in ordinary schools has received considerable attention in *New South Wales*. In 1905 a teacher of school agriculture was appointed to visit schools and districts for the purpose of giving instruction to teachers and scholars in the subject, the officer selected possessing the dual qualifications of a thorough acquaintance with agricultural work and school methods. The Education Department makes grants of seeds of various kinds to the schools having gardens, and in some instances has installed windmill plants to provide an adequate water supply. Under the direction of a capable head master, a college has also been opened at Hurlstone, near Sydney, at which practical lessons are given in elementary agriculture, and the institution also serves as a stepping-stone to the Hawkesbury Agricultural College. Scholarships are available to students of the Hurlstone Agricultural High School as it is now called, and these scholarships entitle the holder to a two years' free course at the Hawkesbury institution, with a grant of £1 10s. per annum for text books. The Department has also organised Rural Camp Schools for the purpose of giving teachers and scholars first hand knowledge of country industries. Schools of this nature were held in 1912 at Nowra, Camden, and Tamworth, the total attendances for the year being 1528 boys, and 109 masters.

The subject of Agricultural Colleges and Experimental Farms is dealt with in the section relating to Agriculture. (See page 356.)

In *Victoria*, what are termed Agricultural High Schools have been established at Ballarat, Colac, Leongatha, Mansfield, Mildura, Sale, Shepparton, Wangaratta, Warragul, and Warrnambool. Pupils must be at least fourteen years of age, and have passed beyond the curriculum of the elementary school, or else be able to afford satisfactory proof that they are qualified to profit by the instruction offered. The schools are

practically secondary schools with an agricultural bias, and form a link between the rural school and the agricultural college. They are also used as a preliminary stage in the education of boys and girls who wish to become teachers and eventually graduate in the State Training College and the University. A local council is appointed for each school, and exercises a general oversight over its operations. The experimental plots at these schools have aroused much interest among the farmers from the surrounding districts. A Supervisor of Agriculture reports and gives advice on the teaching of agriculture in the State Schools. A fair number of teachers have gained diplomas in agriculture, and will be in a position to give practical instruction at the High Schools. The elementary principles of agriculture are now taught in about 700 State Schools. A Horticultural Society has recently been established in connection with State Schools, and has now 650 schools in affiliation.

Although *Queensland* possesses an Agricultural College and several experimental farms, there is no agricultural institution directly connected with the Education Department. The Government, however, provides a small grant to encourage the study of agriculture, horticulture, and kindred subjects in the State Schools, while a departmental teacher of agriculture visits the schools and gives assistance in agricultural, horticultural, and nature study work. Some excellent experimental work has been carried out at a few of the schools, while gardens have been established wherever circumstances permitted. Short courses of instruction for teachers have been instituted at the Gatton College. A large number of teachers have gained a practical knowledge of milk and cream testing, and the subject is now added to the programme of instruction in several of the dairying districts.

In *South Australia* the Public Schools' Floral and Industrial Society, founded in 1880, holds annual exhibitions of school work from all parts of the State. In addition, it has for some years undertaken the distribution of flower seeds among school children at a very cheap rate, and has thus fostered the love of horticulture with remarkable success. A special instructor has been appointed to give assistance to teachers desirous of making their school gardens aid in nature study work.

In *Western Australia* an advisory teacher of nature study visits the schools and gives advice in regard to proper methods in horticulture and experimental agricultural work. The number and usefulness of the gardens and experimental plots attached to State Schools shew marked improvement each year.

**8. Teachers in State Schools.**—The distribution of the teaching staff in the State Schools during the year 1912, including teachers of needlework, was as follows:—

#### TEACHING STAFF IN STATE SCHOOLS, 1912.

(COMMONWEALTH.)

| State.              | Principal Teachers. |       | Assistants. |       | Pupil or Junior Teachers. |       | Sewing Mistresses. | Total. |        |        |
|---------------------|---------------------|-------|-------------|-------|---------------------------|-------|--------------------|--------|--------|--------|

| Tasmania ...        | 183                 | 216   | 31          | 152   | 55                        | 203   | 1                  | 269    | 572    | 841    |
| Northern Territory  | 1                   | 2     | ...         | ...   | ...                       | ...   | 1                  | 1      | 3      | 4      |
| Commonwealth        | 5,468               | 2,884 | 1,999       | 5,273 | 766                       | 2,128 | 719                | 8,233  | 11,004 | 19,237 |

It will be observed that there is a fairly large number of junior teachers, or pupil teachers, as they are called in most of the States. The pupil teachers will, however, in

time disappear, and their places will be filled by young people who have undergone a course of training in schools specially provided for the purpose. Allusion to the methods of training will be found in the next paragraph.

**9. Training Colleges.**—The development of the training systems of the various States has been alluded to at some length in earlier issues of the Year Book. The present position is as follows :—

(i.) *New South Wales.* During 1912, the total number of students in the Blackfriars Training College was 327, women students numbering 222. A branch institution was opened early in 1911 at Hereford House for the training of candidates for the position of teacher or assistant at small country schools, and this was attended in 1912 by 230 students. At the various district schools there were, during 1912, 168 first-year and 204 second-year probationary students, and of these 221 passed the entrance examination for the Training College. Several of the larger metropolitan schools are used as practice schools for giving training college students opportunity to acquire practical skill in teaching. At the College a complete set of Montessori apparatus has been prepared for demonstration work on the Montessori principles, and one of the College staff was recently sent to Italy in order to gain first-hand knowledge of the possibilities of the scheme. The Principal of the Training College is also Professor of Education at the Sydney University.

(ii.) *Victoria.* Candidate teachers in this State are trained in the District High Schools or Agricultural High Schools, the period of probation being supplemented by a course of training for two years in the Senior Training College at Melbourne. There are twenty District High Schools now in operation, of which ten give training in elementary agriculture. The present Training College dates back to 1874, but during the retrenchment period, viz., from 1893 to 1900, it was closed. The institution was reopened in February, 1900, with an enrolment of fifty-seven students. By the 30th June, 1912, the number had increased to 111. The College lectures are also attended by considerable numbers of private students qualifying for certificates as Infant, Kindergarten or Primary teachers. A Training College Hostel has been established and a Correspondence class formed for country teachers desirous of qualifying for the Infant Teachers' Certificate. The students at the Hostel receive training in domestic economy. Five city and four country practising schools are attached to the Training College. The University Practising School, with an enrolment of 180 in 1912, gives teaching practice for secondary students taking the diploma course at the Melbourne University.

(iii.) *Queensland.* There is no Training College in Queensland at the present time, but it is hoped ere long to establish one at Brisbane in affiliation with the University of Queensland. Section 6 of the University Act provides for the creation of a Training College, but the erection of the necessary building has been deferred owing to lack of funds. In the meantime, the following scheme has been evolved :—Twenty-five special Teacher Scholarships to the University, each with a currency of two years, are to be awarded annually. Living allowances at the rate of £52 per annum and £26 per annum respectively are provided, the former being paid to students living away from home. The University is to provide an Education group of subjects, including Logic, Psychology, and Education. Ten of the scholarships may be carried on for a third year, and five for a fourth year. Practical training will be entrusted to a Training Master appointed by the Department. Those who attend the two years' course will be appointed to the Primary Schools, and the graduates from the three and four years' course will be available for High Schools and Secondary Schools. Young people of both sexes are admitted to the service as pupil-teachers at the age of fourteen years, the only training received being that given by the principals of the schools to which they are appointed. The schools for infants at Kangaroo Point and Rockhampton have, however, been specially staffed and equipped for training Kindergarten teachers, and Kindergarten methods have been introduced into most of the larger schools.

(iv.) *South Australia.* During the year 1910 the system of training in force in South Australia was remodelled and improved. Prior to this year students had devoted themselves chiefly to academic studies, but in 1910 provision was made for increased attention to the theory and practice of teaching. District courses of training were established to prepare teachers for work in primary and infant schools, and an advanced course was outlined for those who will become High School teachers. Each of these courses extends over a year. Students in the primary course who shew special ability may be granted a second year's training. The special course for Secondary Schools will give students an opportunity of obtaining the Diploma of Education. There were 44 students in the Training College in 1912. At the Adelaide High School there were 97 students training for teachers at the end of 1912. Practice in teaching is gained by the student teachers at the Observation School, which also provides training for teachers qualifying for appointment to provisional schools. Twenty-six candidates passed the prescribed test for admission as pupil teachers.

(v.) *Western Australia.* A Training College for teachers was opened at Claremont in 1902. The original building provided accommodation for sixty students, but extensions were opened in 1908, and the number in training during 1912 was 116, of whom 50 were teachers of small schools undergoing a special course. The course in the Training College lasts two years. Central classes for "monitors" (*i.e.*, pupil teachers) were established at Perth in 1903, and monitors outside the metropolitan area are instructed by correspondence. A Normal School was established in Perth in 1907 for the purposes of providing a two years' course of higher instruction for a limited number of children who had completed the State School course and intended to become teachers. The pupils in attendance during 1910 numbered 59, of whom 33 were girls. In February, 1911, the Normal School was closed and replaced by a better equipped institution known as the Modern School. To assist teachers of small schools to gain some experience of the best method of school management, a Model School has been established at Gosnell's, and arrangements have been made for intending teachers, as well as those actually in charge of small schools, to spend a portion of their time at this institution. Special courses of instruction have been instituted to provide training for applicant teachers for small country schools, this plan being adopted to meet the growing demand for teachers in newly settled areas. Moreover, the schools of instruction for teachers in charge of the smaller country schools are held in different centres by district inspectors, as well as in Perth; an advisory teacher visits the schools in outlying districts, while camps of instruction are held to give practice in cadet training.

(vi.) *Tasmania.* In this State the scheme for training teachers has recently been remodelled with a view to increased efficiency, and the new provisions will come into operation in 1914. Prior to entering the Training College, students will be required to attend a High School for four years. After obtaining the leaving certificate, the candidates will be drafted to selected schools to serve as junior teachers for a year, in order to gain such knowledge as will enable them to more fully appreciate the professional training at the college in the following year. Trainees will attend at the University for instruction in the higher branches of certain subjects, and in some cases will be given a second and third year to enable them to qualify for Arts or Science degrees. During the year 1912 there were 105 students in attendance at the Training College. A Summer School for teachers was held in Hobart during 1912. It is intended shortly to establish model country schools as adjuncts to the practising schools.

**10. School Savings Banks.**—Returns shew that these institutions are in existence in three States. In New South Wales, there were 719 banks at the end of 1912, the deposits amounting to £30,221, and withdrawals to £29,911. Since the establishment of the banks in 1887, deposits totalled £435,983, and withdrawals £423,864. Of the latter

sum £102,478 was placed to the children's accounts in Savings Banks. In South Australia, 245 schools had 10,216 depositors, with £8682 to their credit; and in Western Australia, there were 237 school banks, with 12,743 depositors and £14,694 to their credit.

11. **Expenditure on State Schools.**—The net expenditure on State education during 1901 and for the five years ended 1912 is shewn below. The figures do not include expenditure on buildings, which is shewn separately in a subsequent table.

### EXPENDITURE ON MAINTENANCE, STATE SCHOOLS, 1901 and 1908-12.

(COMMONWEALTH.)

| Year.    | N.S.W.    | Victoria. | Qld.    | S. Aust. | W. Aust. | Tas.   | Nor. Ter. | C'wealth. |
|----------|-----------|-----------|---------|----------|----------|--------|-----------|-----------|
|          | £         | £         | £       | £        | £        | £      | £         | £         |
| 1901 ... | 623,734   | 656,907   | 256,245 | 152,006  | 89,694   | 37,710 | ...       | 1,816,296 |
| 1908 ... | 934,603   | 692,410   | 299,227 | 152,950  | 164,456  | 60,407 | ...       | 2,304,053 |
| 1909 ... | 940,534   | 726,020   | 309,704 | 164,863  | 166,103  | 73,532 | ...       | 2,380,756 |
| 1910 ... | 979,775   | 788,246   | 323,372 | 177,827  | 172,470  | 74,907 | ...       | 2,516,597 |
| 1911 ... | 1,048,584 | 834,276   | 351,942 | 198,979  | 187,301  | 84,317 | 629       | 2,706,028 |
| 1912 ... | 1,285,410 | 893,649   | 393,543 | 217,874  | 220,780  | 86,500 | 674       | 3,098,430 |

The expenditure per head of average attendance for each of the years given above will be found in the succeeding table. As the figures shew, Western Australia has the highest average, followed by New South Wales and Victoria, the lowest rate being in Tasmania. The increase in the number of small schools was chiefly responsible for the growth of expenditure in the Western State in 1912, the expenditure on primary education alone shewing an increase of £23,000 as compared with the preceding year.

### COST PER HEAD OF AVERAGE ATTENDANCE, STATE SCHOOLS, 1901 and 1908-12.

(COMMONWEALTH.)

| Year. | N.S.W.  | Victoria. | Qld.    | S. Aust. | W. Aust. | Tasmania. | Nor. Ter. | C'wlth. |
|-------|---------|-----------|---------|----------|----------|-----------|-----------|---------|
|       | £ s. d. | £ s. d.   | £ s. d. | £ s. d.  | £ s. d.  | £ s. d.   | £ s. d.   | £ s. d. |
| 1901  | 4 0 10  | 4 7 0     | 3 12 9  | 3 9 5    | 5 9 3    | 2 12 11   | ...       | 4 0 8   |
| 1908  | 5 19 9  | 4 16 6    | 4 8 11  | 4 0 1    | 6 10 10  | 3 15 9    | ...       | 5 3 3   |
| 1909  | 5 17 6  | 4 19 5    | 4 8 0   | 4 6 2    | 6 4 6    | 4 4 7     | ...       | 5 3 11  |
| 1910  | 6 4 5   | 5 8 0     | 4 13 2  | 4 4 9    | 6 5 8    | 4 3 4     | ...       | 5 10 5  |
| 1911  | 6 10 5  | 5 13 11   | 5 0 5   | 5 12 10  | 6 7 2    | 4 13 0    | 10 9 7    | 5 16 8  |
| 1912  | 7 10 4  | 5 12 1    | 5 1 9   | 5 6 8    | 6 14 0   | 4 8 5     | 9 9 10    | 6 4 11  |

Expenditure on school buildings in each of the years quoted was as follows:—

### EXPENDITURE ON STATE SCHOOL BUILDINGS, 1901 and 1908-12.

(COMMONWEALTH.)

| Year.    | N.S.W.  | Victoria. | Qld.   | S. Aust. | W. Aust. | Tasmania | Northern Territory. | C'wealth. |
|----------|---------|-----------|--------|----------|----------|----------|---------------------|-----------|
|          | £       | £         | £      | £        | £        | £        | £                   | £         |
| 1901 ... | 57,663  | 36,040    | 33,421 | 13,656   | 49,073   | 7,762    | ...                 | 197,615   |
| 1908 ... | 146,715 | 106,983   | 44,333 | 22,726   | 34,299   | 8,659    | ...                 | 363,715   |
| 1909 ... | 149,767 | 162,932   | 57,349 | 31,512   | 31,099   | 8,442    | ...                 | 441,101   |
| 1910 ... | 191,188 | 118,556   | 50,668 | 44,025   | 47,637   | 16,957   | ...                 | 469,031   |
| 1911 ... | 176,194 | 117,048   | 53,953 | 35,581   | 58,406   | 16,548   | ...                 | 457,730   |
| 1912 ... | 287,522 | 167,657   | 67,637 | 40,855   | 73,920   | 9,423    | 2,117               | 649,131   |

The total net cost and the net cost per scholar in average attendance during the year 1912 were as follows:—

### NET TOTAL COST, STATE SCHOOL EDUCATION, 1912.

(COMMONWEALTH.)

| Item.   | N.S.W.      | Vic.        | Q'land.   | S. Aust.  | W. A.     | Tas.     | N. T.   | C'wealth.   |
|---|-------------|-------------|-----------|-----------|-----------|----------|---------|-------------|
| Net cost of education, including buildings ... .. | £ 1,572,932 | £ 1,061,306 | £ 461,180 | £ 258,729 | £ 294,700 | £ 95,923 | £ 2,791 | £ 3,747,561 |
| Per scholar ... in average attendance ... ..      | £9 3/11     | £6 13/2     | £5 19/2   | £6 6/8    | £8 18/10  | £4 18/1  | £39 6/2 | £7 11/0     |

The average for the Commonwealth in 1901 was £4 9s. 3d. per scholar in average attendance.

## § 3. Private Schools.\*

1. **School Teachers, etc., in 1912.**—The following table shews the number of Private Schools, together with the teachers engaged therein, and the enrolment and average attendance in 1912:—

### PRIVATE SCHOOLS, 1912.

(COMMONWEALTH.)

| State.                    | Schools. | Teachers. | Enrolment. | Average Attendance. |
|---------------------------|----------|-----------|------------|---------------------|
| New South Wales ... ..    | 754      | 3,673     | 61,744     | 51,168              |
| Victoria ... ..           | 548      | 1,856     | 56,035     | 45,000              |
| Queensland ... ..         | 151      | 767       | 17,289     | 14,752              |
| South Australia ... ..    | 174      | 681       | 12,031     | 9,430               |
| Western Australia ... ..  | 118      | 427       | 10,000     | 8,506               |
| Tasmania ... ..           | 116      | 360       | 6,933      | 5,041               |
| Northern Territory ... .. | 1        | 2         | 53         | 43                  |
| Commonwealth ... ..       | 1,862    | 7,766     | 164,085    | 133,940             |

The totals for New South Wales include returns from the Sydney Grammar School, which receives a yearly State subsidy of £1500, and which, in 1912, had an enrolment of 561, and an average attendance of 522.

The figures for Victoria are furnished by the Inspector of Registered Schools, and unfortunately refer to primary schools only. It is stated that the decrease is due to the closing of a number of the smaller and inefficient schools. Some of the secondary schools in the country towns have also closed, and their pupils and a portion of the teaching staff have been absorbed by the State Higher Elementary or District Schools.

The figures for Queensland include the returns from Grammar Schools, of which there are ten—six for boys and four for girls. These schools are governed by boards of trustees, partly nominated by Government, and partly by the subscribers to the funds. The trustees make regulations regarding the fees of scholars, the salaries of teachers, and generally for the management of the schools. Each school is endowed by the Government at the rate of £750 per annum, together with an additional £250 to provide district scholarships, of which five were allotted to each school from 1st January, 1911. During the year all the grammar schools were inspected by the departmental Inspector-General.

2. **Growth of Private Schools.**—The enrolment and average attendance at Private Schools during 1891, 1901 and in each year of the period 1907 to 1912 are as follows:—

\* Private Schools include all schools not wholly under State control. The term "private," though popularly applied, is, of course, a misnomer.

## ENROLMENT AND ATTENDANCE AT PRIVATE SCHOOLS, 1891 to 1912.

(COMMONWEALTH.)

| Year     | Enrolment. | Average Attendance. | Year.    | Enrolment. | Average Attendance. |
|----------|------------|---------------------|----------|------------|---------------------|
| 1891 ... | 124,485    | 99,588              | 1909 ... | 164,428    | 127,069             |
| 1901 ... | 148,659    | 120,742             | 1910 ... | 158,694    | 129,872             |
| 1907 ... | 152,037    | 122,878             | 1911 ... | 160,794    | 132,588             |
| 1908 ... | 152,399    | 125,530             | 1912 ... | 164,085    | 133,940             |

In view of the growth in population during the period covered by the table, the increase in enrolment and attendance does not afford room for much satisfaction. The returns will no doubt in future be to some extent adversely affected by the development of the Higher State Schools alluded to in a preceding paragraph.

**3. Defects in Returns of Private Schools.**—Until recent years the various State Governments had comparatively little control over privately conducted Schools. With the advance of modern educational thought the position is improving, but still leaves much to be desired. It is evident that without a thorough system of registration there will always be a difficulty in regard to enforcing the compulsory clauses of the various Education Acts. Moreover, advanced educational thought demands complete supervision, not only of curricula, but of all matters pertaining to school hygiene.

In New South Wales, under the provisions of the Bursary Endowment Act of 1912, 55 non-State Schools were inspected by the Departmental Inspector. It is pointed out by the inspector that the schools obtaining registration under this Act will gain an advantage over non-registered schools which will tend to increase their yearly capital value.

In Victoria, up to the year 1905, no attempt had been made to bring Private Schools under general administrative control, but the Registration of Teachers and Schools Act of 1906, and the Education Act of 1910, established a registration scheme under a special committee. At present, the committee consists of nine members of the Council of Education. Section 60 of the Act of 1910 also empowers the Minister of Education to authorise the inspection of any school (other than a State School) in order to ascertain whether the instruction given is satisfactory. The inspector of registered schools has on several occasions pointed out that there is a fair number of institutions which are very unsatisfactory, both as regards buildings and quality of instruction given therein.

In Queensland, with the exception of the Grammar Schools, which are now examined annually, there is practically no control over the Private Schools, beyond the fact that they may submit themselves to inspection if so desired, and there is apparently no provision in South Australia for any Government supervision over Private School affairs.

In Western Australia, non-Government schools must be declared efficient by the Education Department if attendance at them is to be recognised as fulfilling the requirements of the law, and the school registers must be open to the inspection of the compulsory officers of the Department.

In Tasmania the Education Act requires the teachers of other than State Schools "to furnish during January of each year returns shewing attendances at such schools." Despite the fact that penalties are prescribed for non-compliance with the law, nevertheless many teachers neglect to return the forms sent out. Provision has been made for registration of private teachers and schools very much on the lines adopted in Victoria. The Act declares that all persons who were employed in a *bonâ fide* manner for at least three months before 25th October, 1906, are entitled to be registered as teachers without submitting proof of professional qualifications. No person can be registered as a private teacher since July, 1907, unless the Board is satisfied as to his fitness for the work.

## § 4. Free Kindergartens.

The following information regarding Free Kindergartens in the Commonwealth has been compiled from particulars supplied by the principals of the chief institutions in each State, except in the case of Victoria, the details for this State being furnished by the Inspector of Registered Schools.

## FREE KINDERGARTENS IN THE COMMONWEALTH, 1912.

| State.                         | No. of Schools. | Teachers. | Average Attendance of Children. | Number of Teachers in Training. |
|--------------------------------|-----------------|-----------|---------------------------------|---------------------------------|
| New South Wales (Sydney) ...   | 8               | 35        | 450                             | 42                              |
| (Newcastle) ...                | 3               | 4         | 120                             | 4                               |
| Victoria (Melbourne) ...       | 17              | 219       | 678                             | 38                              |
| (Ballarat) ...                 | 1               | 12        | 26                              | ...                             |
| Queensland (Brisbane) ...      | 4               | 4         | 98                              | 6                               |
| South Australia (Adelaide) ... | 5               | 6         | 300                             | 18                              |
| Tasmania (Hobart) ...          | 1               | 4         | 35                              | 3                               |
| (Launceston) ...               | 1               | 4         | 45                              | 3                               |
| Total ...                      | 40              | 288       | 1,752                           | 114                             |

The figures given in the column referring to teachers include in some instances voluntary helpers and student teachers as well as permanent instructors. In New South Wales the total includes twenty-five student teachers, while the Victorian returns are inclusive of one hundred and eighty-five voluntary helpers.

It must, of course, be distinctly understood that the information given above refers to Kindergartens under private management, and is exclusive of institutions controlled by the Education Departments of the various States.

## § 5. Universities.

1. **Origin and Development.**—The history of the foundation and progress of the four then existing Australian Universities was traced at some length in Year Books I. and II. In the present volume space will permit of only a very brief reference to the subject.

(i.) *University of Sydney.* The Act of Incorporation of the University of Sydney received Royal assent on the 1st October, 1850, and the first Senate was appointed on the 24th December of that year. The first matriculation examination was held in October, 1852, when twenty-four candidates passed the required test, and the formal inauguration ceremony took place on the 11th October of the same year. A Royal Charter was granted to the University on the 27th February, 1858. Women students were admitted in 1881. The passing of the University (Amendment) Act of 1912 marks an important epoch in the development of the educational system of New South Wales. The Act aims at placing the University in a more effective position as the culminating point in a thoroughly co-ordinated system of State education, and it is claimed that the passing of this measure makes the educational system—from the Primary Schools through the Secondary Schools to the Technical Colleges or to the University—form a progressive and continuous whole. Under the new Act the constitution of the Senate was radically changed, and this body now consists of—four Fellows appointed by the Governor, one

elected by members of the Legislative Council, one elected by members of the Legislative Assembly, five representatives of the University teaching staff, ten elected by graduates of the University, and three elected by the aforesaid Fellows. The professorial representatives hold office for two years, and the other Fellows for five years. In addition, it is provided that in view of their distinguished services, the present Chancellor, Sir Normand MacLaurin, and the Vice-Chancellor, Judge Backhouse, shall each during his life be a Fellow in addition to the ten Fellows elected by the graduates. The second part of the Act contains a feature of outstanding importance, in that it provides for the allotment of exhibitions in the proportion of 1 for every 500 of the population of New South Wales between the ages of 17 and 20, or in such other ratio as may be determined by Parliament. These exhibitions, which carry exemption from all fees, are not restricted to any particular faculty in the University, and are principally allotted in order of merit as shewn by examinations for leaving certificates at the State Schools. Pupils of registered Secondary Private Schools are also eligible for leaving certificates on the same conditions as those of the State Schools. To gain a leaving certificate a candidate must have satisfactorily completed an approved four years' course of study. Five per cent. of the total number of exhibitions allotted in any year are available for successful candidates at the written examination, even though they be ineligible for a leaving certificate. For the year 1912-13 the statutory endowment to the University has been increased from £10,000 to £20,000. At the inception of the University there were only three professorships. The present staff consists of twenty-one professors, eight assistant professors, and ninety-four lecturers and demonstrators. There are, in addition, seven honorary lecturers, various honorary demonstrators, as well as various miscellaneous assistants in laboratories and three curators of museums.

(ii.) *University of Melbourne.* This institution was established by Act of Parliament assented to on the 22nd January, 1853, and its first Council was appointed on the 11th April of that year. The foundation stone of the main building was laid on the 3rd July, 1854, and the University was formally inaugurated on the 13th April, 1855. By Royal Letters Patent, issued in 1859, its degrees are, like those of the Sydney institution, declared of equal status with those of any other University in the British Empire. Women students attended lectures for the first time in 1881. The University, which began in 1855 with Schools of Arts and Laws, has now a staff of eighteen professors, sixty-four lecturers and demonstrators, as well as fifty-seven miscellaneous assistants. The Conservatorium of Music has a staff numbering twenty-five.

(iii.) *University of Adelaide.* This University was established by Act of Parliament in 1874. Its origin and progress was largely due to the munificence of the late Sir Walter Watson Hughes and Sir Thomas Elder, G.C.M.G., the total gifts of the latter amounting to over £100,000. The academical work of the institution was commenced in March, 1876, when eight matriculated and fifty-two non-graduating students attended lectures. The foundation stone of the University buildings was laid on the 30th July, 1879, and the buildings were opened in April, 1882. In 1881, by Royal Letters Patent, the degrees granted by the institution were recognised as of equal distinction with those of any University in the British Empire. The Elder Conservatorium of Music was opened in 1898. Power was given by Act of Parliament in 1880 to grant degrees to women. At first there were only four professorships in the University, whereas the present staff consists of eleven professors, thirty lecturers and six assistant lecturers, exclusive of the staff at the Conservatorium, which numbers ten.

(iv.) *University of Tasmania.* The Act to establish the University of Tasmania (Hobart) was assented to on the 5th of December, 1889. At the present time, the institution, which is small but efficient, possesses a staff of four professors, four lecturers, and

two assistant lecturers and demonstrators. Under Statute dated 13th April, 1905, the Zeehan School of Mines and Metallurgy was affiliated to the University.

(v.) *University of Queensland.* The Act to establish the University of Queensland was passed in 1909, and the first Senate was appointed on the 14th April, 1910. The University was opened on the 14th March, 1911, when 60 students were matriculated. Provision has been made for a Correspondence Study department in connection with the institution. At the present time there are four professors, *i.e.*, one each of classics, chemistry, engineering, and for mathematics and physics, with a liberal complement of lecturers and demonstrators.

(vi.) *University of Western Australia.* The University Commission in this State has recommended the establishment of a University somewhat on the lines of those in the eastern States, but with such amendments as would bring it as far as possible into accord with the most modern requirements. The Act establishing a University was passed on the 18th February, 1911. In addition to lectureships, the institution has been opened with six professorships—modern literature and history, mathematics and physics, chemistry, engineering and mining, and geology—while a chair in agriculture has been endowed by the generosity of Dr. Hackett. The institution was opened in March, 1913.

**2. Teachers and Students of Universities.**—The following table shews the number of professors and lecturers and the students in attendance at each of the Commonwealth Universities during the year 1912:—

#### UNIVERSITIES.—TEACHERS AND STUDENTS, 1912.

| University.            | Professors. | Lecturers. | Students attending Lectures. |                   |        |
|------------------------|-------------|------------|------------------------------|-------------------|--------|
|                        |             |            | Matriculated.                | Non-matriculated. | Total. |
| Sydney ... ..          | 29          | 101        | 1,107                        | 388               | 1,495  |
| Melbourne ... ..       | 18          | 64         | ...                          | ...               | 1,221* |
| Adelaide ... ..        | 11          | 36         | 387                          | 310               | 697†   |
| Tasmania (Hobart) ...  | 4           | 6          | 79                           | 51                | 130    |
| Queensland (Brisbane)† | 4           | 17         | 205                          | 14                | 219    |

\* Exclusive of 98 music students.

† Exclusive of 318 music students.

‡ Opened in 1911.

**3. University Revenues.**—The income of the Universities from all sources during the year 1912 was as follows:—

#### UNIVERSITIES.—REVENUE, 1912.

| University.           | Government Grants. | Fees.  | Other. | Total. |
|-----------------------|--------------------|--------|--------|--------|
|                       | £                  | £      | £      | £      |
| Sydney ... ..         | 43,000             | 20,590 | 26,850 | 90,440 |
| Melbourne ... ..      | 37,404             | 31,793 | 7,532  | 76,729 |
| Adelaide ... ..       | 27,004             | 10,296 | 6,445  | 43,745 |
| Tasmania (Hobart) ... | 5,000              | 1,454  | 732    | 7,186  |
| Queensland (Brisbane) | 12,500             | 2,331  | 3,888  | 18,719 |

The column "Other" includes the receipts from private foundations. The extent to which the Universities have benefited by private munificence will be apparent from the following table:—

## PRINCIPAL PRIVATE BENEFACTIONS TO AUSTRALIAN UNIVERSITIES.

| University of Sydney. |           | University of Melbourne. |           | University of Adelaide. |         |
|-----------------------|-----------|--------------------------|-----------|-------------------------|---------|
| Donor.                | Amount.   | Donor.                   | Amount.   | Donor.                  | Amount. |
|                       | £         |                          | £         |                         | £       |
| J. H. Challis ...     | 250,750   | Sir Samuel Wilson        | 30,000    | Sir Thos. Elder ...     | 98,760  |
| Sir P. N. Russell...  | 100,000   | James Stewart ...        | 25,624    | Sir W. Hughes ...       | 20,000  |
| Thos. Fisher ...      | 30,000    | Hon. Francis Ormond      | 20,000    | Hon. J. H. Angas        | 10,000  |
| Edwin Dalton ...      | 8,000     | John Hastie ...          | 19,140    | R. Barr Smith ...       | 10,150  |
| Hugh Dixon ...        | 7,050     | Robert Dixson ...        | 10,837    | Other donations ...     | 14,902  |
| Hon. Sir W. Macleay   | 6,000     | John Dixson Wy-          |           |                         |         |
| Mrs. Hovell ...       | 6,000     | selaskie ...             | 8,400     |                         |         |
| Thos. Walker ...      | 6,200     | David Kay ...            | 5,764     |                         |         |
| Other donations ...   | 53,714    | Henry Dwight ...         | 5,000     |                         |         |
|                       |           | Wm. Thos. Mollison       | 5,000     |                         |         |
|                       |           | Other donations ...      | 44,862    |                         |         |
| Total                 | £ 467,714 | Total                    | £ 174,627 | Total                   | 153,812 |

In addition to the sum of £6000 shewn above, the Hon. Sir W. Macleay also presented the Museum of Natural History to the University.

The credit balances of some of the above endowments now amount to very considerable sums. For example, on the 31st December, 1912, the Challis Fund amounted to nearly £310,000, and the Fisher bequest to over £41,000. The cash balance at the end of 1912 on account of all private foundations to Sydney University stood at £547,165. In the case of Melbourne University the Stewart fund on the 31st December, 1911, stood at £30,438, the Hastie at £19,238, the Dixson fund at £12,212, etc.

In addition to the above there were various other bequests to Sydney University—*e.g.*, collection of Egyptian antiquities, etc., by Sir Charles Nicholson, and Natural History collection by Mr. Geo. Masters, while the building for the Natural History Museum was given by Sir W. Macleay. Numerous prizes and scholarships have also been given to the various colleges. In Melbourne, the Hon. Francis Ormond's benefactions to Ormond College amounted to about £108,000. Private benefactions to the University of Tasmania and the newly-established University of Queensland amount to £3105 and £6846 respectively.

**4. University Extension.**—These lectures were instituted at Sydney University in 1886, but under a statute of the Senate, approved of in 1892, a Board was appointed, which was empowered from time to time to recommend to the Senate the names of suitable persons for giving courses of lectures, and to hold examinations in the subjects of the lectures. The Board receives and considers applications from country centres, and makes provision for engaging lecturers and managing the entire business connected with the various courses. The project has only met with fair success, no lectures having been given in some years, but lately there appears to be an awakening of interest in the matter. The Board also arranged for courses of lectures in Queensland, Victoria, and Western Australia. In 1912 the average attendance at extension lectures in New South Wales was 120.

University extension lectures in Victoria date from the year 1891, when a Board was appointed by the Melbourne University for the purpose of appointing lecturers and holding classes and examinations at such places and in such subjects as it might think fit. Interest in University extension has varied in Victoria, the attendance at the various centres numbering about 570 in 1911.

The Adelaide University has also instituted short courses of extension lectures in Arts and Science, to which students are admitted on payment of a nominal fee. Public intimation of these lectures is made from time to time during the session. For 1912 a course of nine lectures was provided. The University of Tasmania provides for courses of lectures at Launceston, which are delivered weekly by members of the University teaching staff.

As pointed out previously, a correspondence study department has been inaugurated in connection with the University of Queensland in order to overcome, as far as possible, the difficulties of students who desire to benefit by University teaching, but who for various reasons are unable to attend the lectures. At present the work of this department is confined to the Arts course.

(v.) *Workmen's Tutorial Classes.* Chiefly as the result of a visit to Australia in 1913 by Mr. Mansbridge, of the Workers' Educational Association of Britain, a movement has been inaugurated having for its object the bringing of the University into closer relationship with the masses of the people. In New South Wales a Workers' Educational Association has been formed, and already tutorial classes have been started in Economics. The University Council in Victoria has formulated a scheme, and it is proposed to ask for a State grant of £2500, of which £1250 is to be expended on tutorial classes. In Queensland, classes have been formed at Brisbane and Ipswich, and the movement is extending in the other States.

## § 6. Technical Education.

1. **General.**—Although provision has been made in some of the States in respect to many necessary branches of technical education, the total provision made would imply that this branch of education has not been regarded as of great importance. As will be seen later on, the expenditure on technical education for the whole of Australasia is comparatively insignificant. The question of apprenticeship is dealt with in the sections dealing with "Manufacturing Industries and Labour and Industrial Statistics."

2. **New South Wales.**—The present organisation of technical education in this State dates from the year 1883, when a Technical Education Board was appointed as a result of suggestions made at the Technological Conference held in 1879. This Board continued its functions till November, 1889, when it was dissolved, and the work has thenceforward been carried on as a branch of the Public Instruction Department. The chief centre of activity is, of course, in Sydney, where the Technical College and Technological Museum are situated, the college having been opened for the reception of students early in 1892. Colleges have also been erected in some of the chief country towns—at Maitland in 1890; Newcastle 1896; Bathurst 1898; Broken Hill 1898; Albury 1899; and Goulburn 1902. In other centres classes have been established in various subjects whenever the prospects are sufficiently encouraging. It is proposed to secure a greater degree of co-ordination of the Technical College with the other branches of State educational effort, and also with the technical side of the University. Up to the year 1912 the provision for technical education is stated to have partaken more or less of the nature of successive accretions on the original humble beginnings, rather than to have aimed at development in accordance with a definite plan. With the systematisation of the other branches of education, the necessity for more effective organisation of the technical side became imperative. It is stated that at present there is much wasted effort on account of the insufficient prior elementary training possessed by students taking up courses, and it is hoped that serviceable initial training will be provided in the newly established Trade and Continuation Schools. Provision has been made for Intermediate Technical Scholarships, entitling the holder to three years' free tuition at any of the organised day courses at the Technical College. These were eagerly competed for in 1912, and 10 with grant and 12 without grant were awarded.

The table below gives some idea of the development of technical education in New South Wales :—

### TECHNICAL EDUCATION, NEW SOUTH WALES, 1908-12.

| Year.       | Number of<br>Classes. | Number of<br>Enrolments. | Average<br>Weekly<br>Attendance. | Number of<br>Lecturers and<br>Teachers. | Fees<br>Received. |
|-------------|-----------------------|--------------------------|----------------------------------|---|-------------------|
|             |                       |                          |                                  |   | £                 |
| 1908 ... .. | 790                   | 18,490                   | 10,498                           | 280                                     | 14,176            |
| 1909 ... .. | 864                   | 21,242                   | 12,265                           | 292                                     | 15,475            |
| 1910 ... .. | 886                   | 22,822                   | 13,255                           | 334                                     | 15,873            |
| 1911 ... .. | 875                   | 23,621                   | 15,074                           | 329                                     | 16,395            |
| 1912 ... .. | 793                   | 28,082                   | 17,749                           | 320                                     | 15,846            |

The enrolments in 1912 were distributed as follows :—

|                           |     |     |     |        |
|---------------------------|-----|-----|-----|--------|
| Sydney College Classes    | ... | ... | ... | 17,359 |
| Suburban Classes          | ... | ... | ... | 2,599  |
| Country Classes           | ... | ... | ... | 6,511  |
|                           |     |     |     | <hr/>  |
|                           |     |     |     | 26,469 |
| Classes at Public Schools | ... | ... | ... | 1,613  |
|                           |     |     |     | <hr/>  |
| Total                     | ... | ... | ... | 28,082 |

Technical Day Schools have been established at the Central College in Sydney, and at Newcastle and Goulburn. The course of instruction covers two years, and is designed to prepare young students for admission to the Engineering, Mining, or Architecture classes at the College. Trade schools have been established at Balmain and Leichhardt. As mentioned elsewhere, higher technical training is afforded at the Schools of Mines and Engineering in connection with the University. References to the Agricultural Colleges will be found in the section dealing with Agriculture.

3. **Victoria.**—Technical instruction in mining has for many years received considerable attention in Victoria, the Ballarat School of Mines, which was established as far back as 1870, having achieved an Australasian reputation. The general scheme of instruction, however, lacked cohesion, and it was not until after the publication of the Report of the Royal Commission on Technical Education, which was appointed in 1899, that many defects were remedied. Prior to the passing of the Education Act of 1910, the Technical Schools were managed by local Councils, receiving grants from the Education Department. It is now proposed to place them directly under the control of the Department, and some of the smaller institutions have been transferred already, while the larger schools will be taken over as soon as the necessary arrangements can be made. It is hoped that the Agricultural and District High Schools will serve as an effective connecting link between the ordinary State Schools and the Technical Schools. At present there are 20 Technical Schools receiving State aid, and of these 3 afford instruction in Science, Art, and Trade subjects; 3 in Art and Science; 3 in Art and Trade; while 5 confine their teaching to Art, and 1 to Trade subjects. The largest technical institution in Melbourne is the Working Men's College, founded in 1887. The College, in addition to giving instruction in a large number of technical subjects, is also a School of Mines. Six of the schools, viz., the Working Men's College, and the Schools of Mines at Ballarat, Bendigo, Bairnsdale, Maryborough and Stawell are classed as Certified Science Schools and are open to receive State School exhibitors. Science and Art classes have been established at some of the larger State Schools.

## TECHNICAL EDUCATION, VICTORIA, 1912.

| Year. |     |     |     |     | No. of Subjects Taught. | No. of Enrolments. | Fees Received. |
|-------|-----|-----|-----|-----|-------------------------|--------------------|----------------|
|       |     |     |     |     |                         |                    | £              |
| 1908  | ... | ... | ... | ... | 68                      | 6,012              | 10,883         |
| 1909  | ... | ... | ... | ... | 85                      | 6,612              | 13,234         |
| 1910  | ... | ... | ... | ... | 88                      | 7,107              | 13,631         |
| 1911  | ... | ... | ... | ... | 90                      | 7,008              | 12,991         |
| 1912  | ... | ... | ... | ... | 101                     | 7,923              | 11,664         |

The average attendance for Victoria is not available, but the number of individual students enrolled per term was given as 4440 for 1912.

4. **Queensland.**—The control of Technical Education in Queensland was removed from the hands of the local Committee in 1905, and vested in the Education Department. At present the Director is assisted in his administration by a Superintendent, and an Inspector of Technical Colleges. During 1912 there were 16 colleges in operation—Bowen, Bundaberg, Cairns, Central, Charters Towers, Gympie, Herberton, Ipswich, Mackay, Maryborough, Mount Morgan, Rockhampton, Sandgate, Toowoomba, Townsville, Warwick. The colleges at Warwick, Brisbane and Mackay are under the direct control of the Department, while the remainder are managed by Committees under departmental supervision. The progress of technical education since 1908 is shewn in the following table:—

## TECHNICAL EDUCATION, QUEENSLAND, 1908-12.

| Year. |     |     |     |     | Number of Classes. | Enrolments. | Average Weekly Attendance. | Number of Teachers. | Fees Received. |
|-------|-----|-----|-----|-----|--------------------|-------------|----------------------------|---------------------|----------------|
|       |     |     |     |     |                    |             |                            |                     | £              |
| 1908  | ... | ... | ... | ... | 327                | 5,187       | 2,640                      | 199                 | 9,029          |
| 1909  | ... | ... | ... | ... | 349                | 5,608       | 3,128                      | 214                 | 8,605          |
| 1910  | ... | ... | ... | ... | 312                | 5,744       | 3,250                      | 195                 | 8,884          |
| 1911  | ... | ... | ... | ... | 381                | 7,089       | 5,567                      | 219                 | 10,349         |
| 1912  | ... | ... | ... | ... | 363                | 7,851       | 5,589                      | 238                 | 9,794          |

Greater attention is being devoted to the development of trade classes, and the Technical College authorities have been assisted by the University Professors in the preparation of a properly organised system of Trade instruction. The Department now pays about £2000 per annum to the Technical Colleges for the instruction of selected State School pupils in approved subjects. Tuition by correspondence is given by the Central Technical School. It is believed that the raising of the school age to 14 years, coupled with the establishment of High Schools, will result in a more effective co-ordination between ordinary and technical education in the State.

5. **South Australia.**—A considerable amount of attention has been given to technical education in South Australia, particularly in connection with the mining industry. The School of Mines and Industries in Adelaide was founded in 1889. There are in addition Schools of Mines at Moonta, Port Pirie, Kapunda, and Gawler. A School of Design, Painting, and Technical Arts has been established in Adelaide, with branches at Port Adelaide and Gawler. The conditions connected with the country Technical Schools, viewed from the standpoint of the Department of Education, are not considered satisfactory. While the Government bears the bulk of the cost of maintenance, the Minister for Education is not consulted in regard to the organisation, curriculum, or staffing of the schools. Although good work has been accomplished, the system of

control of Technical Schools by independent councils is declared by the Director of Education to be no longer suitable, and stress is laid on the necessity for co-ordinating technical effort under one central authority. The development since 1908 is shewn in the table hereunder:—

#### TECHNICAL EDUCATION, SOUTH AUSTRALIA, 1908-12.

| Year. |     |     | Number of<br>Classes. | Enrolments. | Average<br>Weekly<br>Attendance. | Number of<br>Teachers. | Fees<br>Received. |
|-------|-----|-----|-----------------------|-------------|----------------------------------|------------------------|-------------------|
|       |     |     |                       |             |                                  |                        | £ —               |
| 1908  | ... | ... | 126                   | 2,508       | *                                | 90                     | 3,370             |
| 1909  | ... | ... | 204                   | 4,179       | *                                | 88                     | 3,574             |
| 1910  | ... | ... | 199                   | 4,646       | *                                | 83                     | 3,537             |
| 1911  | ... | ... | 185                   | 4,456       | *                                | 91                     | 3,547             |
| 1912  | ... | ... | 201                   | 4,760       | 3,445                            | 95                     | 3,526             |

\* Not available.

6. **Western Australia.**—A Technical School was established at Perth in 1900, and since its opening has progressed rapidly. Extensive additions to the buildings were made in 1909, and the remodelled institution was opened in 1910. There are branch institutions at Midland Junction, Fremantle, Claremont, Coolgardie, Kalgoorlie, Boulder, Murchison, Northam, Albany, Bunbury, Geraldton, Pingelly, Leonora, and Collfe, while it is proposed to open classes at other centres as occasion demands. The schools are all under the control of the Education Department, the officer entrusted with their supervision being styled Director of Technical Education. The Director also supervises the School of Mines at Kalgoorlie, which is controlled by the Mines Department. Advanced work at present is taken only in Perth, Fremantle, Boulder, and in Kalgoorlie by the School of Mines, the other branches dealing almost entirely with preparatory work chiefly in Continuation Classes. At the Perth School the full course can now be taken for the B.Sc. degree of the University of Adelaide. It is hoped that in this way a nucleus will be formed for an efficient staff of Science teachers for the Education Department and the State University. Returns for the last five years are embodied in the table hereunder:—

#### TECHNICAL EDUCATION, WESTERN AUSTRALIA, 1908-12.

| Year. |     |     | No. of Classes. | Enrolments. | No. of<br>Teachers. | Fees Received. |
|-------|-----|-----|-----------------|-------------|---------------------|----------------|
|       |     |     |                 |             |                     | £              |
| 1908  | ... | ... | 135             | 1,337       | 73                  | 2,836          |
| 1909  | ... | ... | 146             | 1,574       | 83                  | 2,854          |
| 1910  | ... | ... | 142             | 2,007       | 122                 | 3,683          |
| 1911  | ... | ... | 230             | 4,595       | 157                 | 3,332          |
| 1912  | ... | ... | 304             | 5,090       | 163                 | 3,144          |

Information regarding average weekly attendance is not available for Western Australia.

7. **Tasmania.**—In this State provision for technical education dates from the year 1888. At the present time the most important technical institution is the School of Mines and Metallurgy at Zeehan. Courses of instruction are given in metal mining and in metallurgical chemistry and assaying, the diploma in metal mining entitling the holder to the Government certificate of competency as a mine manager. The institution is affiliated to the University of Tasmania. There are also three other schools under the control of the Education Department, each managed by a committee appointed by the Governor-in-Council. Tasmanian Technical Schools naturally devote their chief attention to mining and mineralogy. Statistics for the last five years are given as follows:—

## TECHNICAL EDUCATION, TASMANIA, 1908-12.

| Year.    | No. of Classes. | Enrolments. | Average weekly Attendance. | No of Teachers. | Fees Received. |
|----------|-----------------|-------------|----------------------------|-----------------|----------------|
|          |                 |             |                            |                 | £              |
| 1908 ... | 29              | 680         | 171                        | 29              | 619            |
| 1909 ... | 67              | 794         | 248                        | 32              | 647            |
| 1910 ... | 49              | 614         | 267                        | 33              | 681            |
| 1911 ... | 54              | 833         | 295*                       | 32              | 667            |
| 1912 ... | 62              | 993         | 300*                       | 36              | 768            |

\* Estimated.

8. **Attendance at Commonwealth Technical Schools.**—The table hereunder shows the enrolment and attendance at Technical Schools and classes in the Commonwealth during 1912:—

## ENROLMENT AND ATTENDANCE AT TECHNICAL SCHOOLS, 1912.

(COMMONWEALTH.)

| State                 | Enrolment | Average Attendance | Technical Classes at State Schools. |             |
|-----------------------|-----------|--------------------|-------------------------------------|-------------|
|                       |           |                    | Enrolment                           | Av. Attend. |
| New South Wales ...   | 28,082    | 17,749             | 1,613                               | 545         |
| Victoria ...          | 7,923     | †3,500             | 79                                  | ...         |
| Queensland ...        | 7,851     | 5,589              | ...                                 | †1,597      |
| South Australia ...   | 4,760     | 3,445              | 262                                 | ...         |
| Western Australia ... | 5,090     | *                  | ...                                 | ...         |

\* Not available.

† Estimate.

‡ Free—Pupils from State Schools.

9. **Expenditure on Technical Education.**—The expenditure on technical education in each State during the period 1908 to 1912 is shewn below:—

## EXPENDITURE ON TECHNICAL EDUCATION, 1908-12.

(COMMONWEALTH.)

| Year.    | N.S.W. | Victoria. | Queensland. | South Aust. | West. Aust. | Tasmania. | C'wealth. |
|----------|--------|-----------|-------------|-------------|-------------|-----------|-----------|
|          | £      | £         | £           | £           | £           | £         | £         |
| 1908 ... | 51,814 | 26,839    | 10,720      | 7,856       | 9,264       | 2,215     | 108,708   |
| 1909 ... | 61,452 | 27,039    | 13,589      | 12,742      | 9,422       | 3,209     | 127,453   |
| 1910 ... | 71,002 | 32,217    | 20,612      | 13,476      | 9,987       | 3,055     | 150,349   |
| 1911 ... | 77,160 | 41,030    | 34,611      | 13,017      | 14,590      | 3,726     | 184,134   |
| 1912 ... | 99,265 | 42,541    | 44,073      | 13,906      | 27,536      | 3,318     | 230,639   |

The figures in the preceding table represent an expenditure of about 11d. per head of the population of the Commonwealth, as compared with 13s. 4d. per head spent on maintenance for primary education, and clearly shew that technical education has not attained its proper place in the educational organisation of Australia. Expenditure on buildings, included in the foregoing totals, comprises £10,393 in New South Wales, £13,605 in Victoria; £18,697 in Queensland, and £12,144 in Western Australia.

## § 7. Business Colleges and Shorthand Schools.

There has been considerable development in recent years both in the number and scope of privately conducted institutions, which aim at giving instruction in business methods, shorthand, typewriting, the use of calculating machines, etc. Particulars for those States where the information is available are given in the table hereunder:—

## BUSINESS COLLEGES AND SHORTHAND SCHOOLS, Etc., 1912.

| State.                | Schools. | Teachers. | Students Enrolled. |          | Aver. Attendances. |          | Fees Recd. |
|-----------------------|----------|-----------|--------------------|----------|--------------------|----------|------------|
|                       |          |           | Males.             | Females. | Males.             | Females. |            |
|                       |          |           |                    |          |                    |          | £          |
| New South Wales ...   | 18       | 103       | 3,280              | 5,231    | 1,321              | 2,134    | 22,743     |
| Victoria* ...         | ...      | ...       | ...                | ...      | ...                | ...      | ...        |
| Queensland†           | ...      | ...       | ...                | ...      | ...                | ...      | ...        |
| South Australia ...   | 4        | 38        | 911                | 746      | 453                | 369      | 8,488      |
| Western Australia ... | 4        | 25        | 363                | 594      | 229                | 343      | 3,619      |
| Tasmania ...          | 3        | 9         | 77                 | 159      | 23                 | 52       | 862        |

\* Not available. † Included in Private Schools.

The figures for average attendance shew a predominance of woman students in all States, except South Australia, the excess being due to the increasing number of girls finding employment as stenographers, and in clerical and accountancy work.

## § 8. Diffusion of Education.

1. General Education.—A rough indication of the state of education of the people is obtained at each Census under the three headings, "read and write," "read only," and "cannot read." The grouping of the whole population, exclusive of aborigines, in these three divisions is given for each Census since 1861:—

## EDUCATION AT CENSUS PERIODS, 1861 to 1911.

(COMMONWEALTH.)

| State or Territory. |              | 1861.   | 1871.     | 1881.     | 1891.     | 1901.     | 1911.     |

| C'mw'lth            | Read & write | 662,212 | 1,037,601 | 1,591,556 | 2,394,339 | 3,020,665 | 3,765,463 |
|                     | Read only... | 140,027 | 177,596   | 138,282   | 108,870   | 78,614    | 18,156    |
|                     | Cannot read  | 348,952 | 447,842   | 520,356   | 671,183   | 674,522   | 671,386   |

(a) Including Federal Territory prior to 1911.

(b) Including Northern Territory prior to 1911.

(c) Included in South Australia prior to 1911.

(d) Included in New South Wales prior to 1911.

The proportion in the Commonwealth of the various classes per 10,000 of the population is shewn below for each Census period:—

**PROPORTION OF EDUCATION AND ILLITERATE PER 10,000 PERSONS,  
1861 to 1911.  
(COMMONWEALTH.)**

| Division.          | 1861. | 1871. | 1881. | 1891. | 1901  | 1911. |
|--------------------|-------|-------|-------|-------|-------|-------|
| Read and write ... | 5,752 | 6,239 | 7,073 | 7,543 | 8,004 | 8,452 |
| Read only ...      | 1,217 | 1,068 | 615   | 343   | 208   | 41    |
| Cannot read ...    | 3,031 | 2,693 | 2,312 | 2,114 | 1,788 | 1,507 |

**2. Education of Children.**—The figures in the preceding tables refer to the entire population of the Commonwealth, and as the age constitution of those dwelling in the various portions of Australia underwent considerable modifications during the period dealt with, a far more reliable test of the diffusion of education will be obtained by a comparison of the Census returns in regard to children of school age. For comparative purposes this has been taken to include all children in the group over five and under fifteen years of age, and the degree of education of these at each Census will be found below:—

**EDUCATION OF CHILDREN AT CENSUS PERIODS, 1861 to 1911.  
(COMMONWEALTH.)**

| State or Territory.      | 1861.   | 1871.   | 1881.   | 1891.   | 1901.   | 1911.   |

| { Read only ...          | 59,219  | 89,818  | 70,662  | 53,136  | 42,856  | 2,614   |
| { Cannot read            | 58,945  | 86,961  | 93,381  | 121,443 | 136,712 | 83,659  |

(a) Including Federal Territory prior to 1911. (b) Including Northern Territory prior to 1911. (c) Included in South Australia prior to 1911. (d) Included in New South Wales prior to 1911.

In the case of Tasmania full details for the years 1861 and 1871 are not available, and the figures for those years are approximate. The variation in degree of education will be more readily seen by reducing the foregoing figures to the basis of proportion per 10,000, and the results so obtained are embodied in the following table, a glance at which is sufficient to demonstrate the remarkable strides that at least the lower branches of education have made since 1861. In that year, only 47 per cent. of the children of school age could read and write, while 26 per cent. were illiterate. The returns for 1911 shew that the proportion of those who could read and write had increased to over 90 per cent., while the totally ignorant had declined by nearly two-thirds.

### EDUCATION OF CHILDREN (AGES 5 to 14) PER 10,000 AT CENSUS PERIODS,

1861 to 1911.

(COMMONWEALTH.)

| State or Territory.         | 1861. | 1871. | 1881. | 1891. | 1901. | 1911. |

(a), (b), (c), (d), see notes to preceding table.

3. Education as shewn by Marriage Registers.—Another common method of testing the spread of education is to compare the number of mark signatures with the total number of persons married during each year of a series. The percentage of males and females signing with a mark to the total persons married in the Census years 1861 to 1901, and during each of the last seven years, was as follows. The figures refer to marriages in the Commonwealth in respect of which information was obtainable.

**ILLITERACY AS SHEWN BY MARRIAGE SIGNATURES, 1861 to 1912.**  
(COMMONWEALTH.)

| Year.    | Proportion Signing with Marks of Total Persons Married. |           |           |          |           |           |           |
|----------|---|-----------|-----------|----------|-----------|-----------|-----------|
|          | Males.  | Females.  | Total.    | Year.    | Males.    | Females.  | Total.    |
|          | per cent.   | per cent. | per cent. |          | per cent. | per cent. | per cent. |
| 1861 ... | 18.50   | 30.69     | 24.60     | 1907 ... | 0.81      | 0.70      | 0.76      |
| 1871 ... | 10.55   | 16.40     | 13.49     | 1908 ... | 0.71      | 0.73      | 0.72      |
| 1881 ... | 4.34  | 6.78      | 5.56      | 1909 ... | 0.65      | 0.62      | 0.64      |
| 1891 ... | 2.27  | 2.40      | 2.34      | 1910 ... | 0.56      | 0.59      | 0.58      |
| 1901 ... | 1.35  | 1.29      | 1.32      | 1911 ... | 0.56      | 0.54      | 0.55      |
| 1906 ... | 0.92  | 0.86      | 0.89      | 1912 ... | 0.43      | 0.45      | 0.44      |

The table shews that there has been a large diminution in illiteracy, and judging from the figures for the last few years the proportion bids fair to practically disappear. Up to 1891 there was a higher proportion of illiteracy amongst females, but from 1910 onwards, generally speaking, the opposite condition prevailed.

### § 9. Miscellaneous.

1. **Scientific Societies.**—(a) *Royal Societies.* Despite the trials and struggles incidental to the earlier years of the history of Australia, higher education and scientific advancement were not lost sight of. Thus the origin of the Royal Society of New South Wales dates as far back as 1821, when it was founded under the name of the Philosophical Society of Australasia, Sir Thomas Brisbane being its first president. Scientific work was fitfully carried on by means of a society whose name varied as the years rolled on. It was called the Australian Philosophical Society in 1850. In 1856 the old Australian Society merged into a resuscitated Philosophical Society of New South Wales, and its papers were published up to 1859 in the Sydney Magazine of Science and Art (2 vols. 1858-9). Its present title dates from 1866. Some of the papers of the old Philosophical Society were published in 1825 under the title of "Geographical Memoirs of New South Wales" (Barron Field), and contain much that is interesting in regard to the early history of Australia. One volume containing the Transactions of the Philosophical Society of New South Wales (1862-65) was published in 1866. The journal of the Society did not begin to bear a serial number, however (vol. 1), until the year 1867. "Transactions of the Royal Society of New South Wales" was issued in 1867, the title of the series being altered to "Journal" in 1876. Up to the end of 1912 forty-six volumes had been published. The exchange list comprises the names of 372 kindred societies. At the present time the library contains about 21,000 volumes and pamphlets, valued at over £7500. Income and expenditure for the year ended 31st March, 1913, were £1397 (Government grant £400) and £1740 respectively. The Society had on the same date 318 members.

The Royal Society of Victoria dates from 1854, in which year the Victorian Institute for the Advancement of Science and the Philosophical Society of Victoria were founded. These were amalgamated in the following year under the title of the Philosophical Institute of Victoria, whilst the society received its present title in 1860. The first volume of its publications dates from 1855. The earlier publications dealt largely with Physics, later on Biology became prominent, while at present a large number of papers deal with Geology. Up to 1912 fifty-six volumes of publications had been issued. The Society exchanges with 326 kindred bodies. The constitution of the society states that it was founded "for the promotion of art, literature, and science," but for many years past science has monopolised its energies. The library contains about 10,000 volumes. Income for the year 1912 amounted to £488, including Government grant £200, members' fees £221, other £67. The total expenditure was £432.

The inaugural meeting of the Royal Society of Queensland was held on the 8th January, 1884, under the presidency of the late Sir A. C. Gregory. The society was formed "for the furtherance of the natural and applied sciences, especially by means of

original research." Shortly after its formation it received an addition to its ranks by the amalgamation with it of the Queensland Philosophical Society, which was started at the time when Queensland became a separate colony. At latest date the members numbered 127; publications issued, 24 volumes; library, 3800 volumes; societies on exchange list, 145.

The present Royal Society of South Australia grew out of the Adelaide Philosophical Society, which was founded in 1853, its object being the discussion of all subjects connected with science, literature and art. Despite this programme, the tendency of the papers was distinctly scientific, or of a practical or industrial nature. With the advent of the late Professor Tate the society became purely scientific. Permission to assume the title of "Royal" was obtained in 1879, the society thenceforward being known as "The Royal Society of South Australia." In 1903 the society was incorporated. In 1912 the number of members was 91. The income for the year 1912 was £463, including £226 Government subsidy, and expenditure £339. Up to 1912 the society had issued thirty-six volumes of proceedings and six parts of memoirs, exclusive of several individual papers published in earlier years. The exchange list numbers about 253.

The Royal Society of Tasmania (the first Royal Society outside the United Kingdom) was founded by Sir Eardley Wilmot, Lieutenant-Governor of Van Diemen's Land, on the 14th October, 1843. A large portion of the Colonial Gardens, together with a grant of £400, was given to the Society. A library and museum were established in 1848. In 1885 the museum and gardens were given back to the State, the Society being granted room in the Museum for its library and meetings. The names of Captains Ross and Crozier, of H.M.S. *Erebus* and *Terror*, appear in the list of the first corresponding members. The society, which, since 1844, has published annual volumes of proceedings, possesses 170 members, 15 corresponding members, exchanges with 140 kindred bodies, and has a library containing 10,000 volumes in addition to manuscripts, etc. Income for the year 1913 was £215, of which £178 came from members' fees.

(b) *Other Scientific Societies.* The Australasian Association for the Advancement of Science, founded in 1888, has its headquarters in Sydney. It meets usually in each State biennially in turn. Its receipts to date were about £13,000, including Government aid to the amount of £4000. The library contains 4000 volumes, valued at £400. Up to date, thirteen volumes of proceedings have been issued. The exchange list numbers 250. The Linnean Society of New South Wales, with headquarters in Sydney, was founded in 1875, and possesses a library of 10,000 volumes, valued at £6000. Up to date, thirty-seven volumes of proceedings have been issued. Exchanges number 188. This Society maintains three investigators engaged in research work (four for part of the year), and owes its development almost entirely to the benefactions of Sir William Macleay. The number of ordinary members at the end of 1912 was 168. Income for the year came to £1028, and expenditure to £976. The special revenue for research purposes only was £2045, and the expenditure £1491. The British Astronomical Association has a branch in Sydney, and in some of the States the British Medical Association has branches.

The principal scientific society in Western Australia is the Natural History and Science Society of Western Australia. This society has grown out of the Mueller Botanic Society, founded in July, 1897. The objects of the society are the study of natural history and pure science, promoted by periodical meetings and field excursions, the maintenance of a library, and the issue of reports of proceedings. It numbers at present 118 members, whose subscriptions form its main source of revenue. Government aid in the past has ranged from £7 to £75 per annum, the subsidy paid in 1912 being £25. Since its establishment the society has issued twenty journals of proceedings. Its publications are exchanged with 41 institutions at home and abroad.

In addition to the societies enumerated above, there are various others in each State devoted to branches of scientific investigation, particulars respecting which are not at present available.

2. **Libraries.**—As far as can be ascertained the total number of libraries in the Commonwealth at the latest available date was about 1500, and the number of books contained therein is estimated at nearly three millions. In each of the capital cities there is a well-equipped Public Library, the institutions in Melbourne and Sydney especially comparing very favourably with similar institutions in other parts of the world. The following statement gives the number of volumes in the Public Library of each city :—

#### METROPOLITAN PUBLIC LIBRARIES.

| City.         | Number of Volumes in— |                         |                         | Total.  |
|---------------|-----------------------|-------------------------|-------------------------|---------|
|               | Reference Branch.     | Ordinary Lending Branch | Country Lending Branch. |         |
| Sydney ...    | 237,481               | *                       | 12,902                  | 250,383 |
| Melbourne ... | 215,763               | 30,913                  | ...                     | 246,676 |
| Brisbane ...  | 37,521                | ...                     | ...                     | 37,521  |
| Adelaide ...  | 77,328                | 28,444                  | ...                     | 105,772 |
| Perth ...     | 90,982                | 9,109                   | ...                     | 100,091 |
| Hobart ...    | 19,000                | ...                     | ...                     | 19,000  |

\* The maintenance and control of the lending branch of the Public Library at Sydney were transferred in 1908 to the Municipal Council. At the end of December, 1912, the books numbered 25,000.

The Mitchell Library in Sydney consists of over 60,000 volumes and pamphlets, principally relating to Australasia, bequeathed in 1907 by Mr. D. S. Mitchell, together with an endowment of £70,000. The testator stipulated that the regulations of the British Museum were to be adopted as far as practicable, hence the library is the resort of specialists.

The Launceston Mechanics' Institute in Tasmania possesses a library of 27,000 volumes.

The number of libraries in receipt of State or municipal aid, together with the estimated number of books contained therein, is given below for each State:—

#### SUBSIDISED LIBRARIES AND BOOKS THEREIN.

| Particulars.                  | N.S.W.  | Vic.      | Q'land. | S. Aust. | W. Aust. | Tas.    | N. Terr. |
|-------------------------------|---------|-----------|---------|----------|----------|---------|----------|
| Number of libraries ...       | 469     | 525       | 203     | 208      | 237      | 31      | 2        |
| Estimated number of books ... | 969,000 | 1,109,000 | 304,000 | 486,000  | 214,000  | 103,000 | 2,700    |

The figures in the above table can be taken only as approximations, as in many instances returns were not received from various institutions. The return for New South Wales includes the Public Library and the Sydney Municipal Library. Amongst other important libraries not included, may be enumerated those at the Sydney University and the Australian Museum, which contain 100,000 and 20,000 volumes respectively. There are also 2227 libraries, with an estimated total of 320,000 volumes, attached to State Schools.

3. **Museums.**—The Australian Museum in Sydney, founded in 1836, is the oldest institution of its kind in Australia. In addition to possessing a fine collection of the usual objects to be met with in kindred institutions, the Museum contains a very valuable and complete set of specimens of Australian fauna. The cost of construction of the building was £79,000. The number of visitors to the institution in 1912 was 222,000, and the average attendance on week-days 608, and on Sundays 1167. The expenditure for 1912 amounted to £11,836. A valuable library containing over 18,000 volumes

is attached to the Museum. Representative collections, illustrative of the natural wealth of the country, are to be found in the Agricultural and Forestry Museum, and the Mining and Geological Museum. The latter institution prepares collections of specimens to be used as teaching aids in country schools. The "Nicholson" Museum of Antiquities, the "Macleay" Museum of Natural History, and the Museum of Normal and Morbid Anatomy, connected with the University, and the National Herbarium and Botanical Museum at the Sydney Botanic Gardens, are also accessible to the public. There is a fine Technological Museum in Sydney, with branches in six country centres, the metropolitan institution containing over 109,000 specimens. Valuable research work has been undertaken by the scientific staff in connection with oil and other products of the eucalyptus. The number of visitors at the Technological Museums during 1912 was about 215,000.

The National Museum at Melbourne, devoted to Natural History, Geology, and Ethnology, is located in the Public Library building. The expenditure for specimens, furniture, etc., in 1912 was £500, and salaries and wages £2431. The Industrial and Technological Museum, opened in 1870, contains upwards of 55,000 specimens. There is a fine Museum of Botany and Plant Products in the Melbourne Botanic Gardens. Well equipped museums of mining and geological specimens are established in connection with the Schools of Mines in the chief mining districts.

The Queensland Museum dates from the year 1871, but the present building was opened in January, 1901. Since its inauguration the Government has expended on the institution a sum of £77,407, of which buildings absorbed £18,117, purchases £24,096, and salaries £35,194. The number of visitors during the year was 77,538, of whom 30,370 visited the institution on Sundays. The Queensland Geological Survey Museum has branches in Townsville, opened in 1886, and Brisbane, opened in 1892.

Under the Public Library Act of 1884 the South Australian Institute ceased to exist, and the books contained therein were divided amongst the Museum, Public Library, and Art Gallery of South Australia, and the Adelaide Circulating Library. The Museum was attended by 80,000 visitors in 1912.

The latest available returns shew that the Western Australian Museum contains altogether 53,000 specimens, of an estimated value of £66,000. The Museum is housed in the same building as the Art Gallery, and the visitors to the combined institutions during the year reached 54,000 on week days and 17,000 on Sundays. The expenditure totalled £3781, of which salaries absorbed £2204.

There are two museums in Tasmania—The Tasmanian Museum at Hobart, and the Victoria Museum and Art Gallery at Launceston, both of which contain valuable collections of botanical and mineral products. The Tasmanian Museum received aid from the Government during last year to the extent of £500.

**4. Art Galleries.**—Information regarding the State collections of objects of art in the various capitals is in some cases very meagre, while the method of presentation does not admit of any detailed comparisons being made. The National Art Gallery of New South Wales originated in the Academy of Art founded in 1871. The contents, which are valued at £140,000, comprise 393 oil paintings, 381 water colours, 526 black and white, 160 statuary and bronzes, and 368 ceramics, works in metal and miscellaneous. During 1912 the average attendance on week days was 620, and on Sundays 2247. The expenditure in 1911 amounted to £5852.

The National Gallery at Melbourne at the end of 1912 contained 545 oil paintings, 3583 objects of statuary, bronzes and ceramics, and 13,926 water-colour drawings, engravings, and photographs. The Gallery is situated in the same building as the Museum and Public Library, the total cost of construction being £291,000. At the end of 1912 the Ballarat Art Gallery contained 219 oil paintings, and 165 water colours, etc., while there are some valuable works of art in the smaller galleries at Bendigo, Geelong, and Warrnambool.

The Art Gallery at Adelaide dates from 1880, when the Government expended £2000 in the purchase of pictures, which were exhibited in the Public Library building in 1882. The liberality of private citizens caused the Gallery to rapidly outgrow the accommodation provided for it in 1889, at the Exhibition Building, and on the receipt of a bequest of £25,000 from the late Sir T. Elder, the Government erected the present building, which was opened in April, 1900. The Gallery also received a bequest of £16,500 in 1903 from the estate of Dr. Morgan Thomas, and of £3000 in 1907 from Mr. David Murray. At the latest available date there were in the Gallery 220 oil paintings, 131 water colours, 164 black and white, 142 engravings and etchings, 22 statuary, and 651 miscellaneous works in metal, etc., the whole being valued at upwards of £47,000. Building and site are valued at upwards of £31,000. Visitors during the year 1912 numbered 97,973.

The foundation stone of the present Art Gallery at Perth in Western Australia was laid in 1901, the building and site being valued at £60,000. The collection comprises 97 oil paintings, 41 water colours, 217 engravings and black and white, 262 statuary, and miscellaneous metal works, etc., of a total value of £15,000.

In Tasmania the Art Gallery at Hobart was opened in 1887. Its present contents consist of 96 paintings and 81 etchings and black and white drawings. Buildings and site are valued at £30,000. The number of visitors during the year on week days totals 60,000.

The Art Gallery at Launceston was erected in 1888 at a cost of £5000, and opened on the 2nd April, 1891. Only a small proportion of the contents belong to the Gallery, the bulk of the pictures being obtained on loan. At latest date there were on view 80 oil paintings and 44 water colours valued at £5000. The total value of buildings and site is estimated at £12,100. The annual attendance is 33,000, and for Sundays 16,000.

**5. State Expenditure on all Forms of Educational Effort.**—The expenditure from the Consolidated Revenue in each State and Territory on all forms of educational and scientific activity during each of the last five financial years was as follows:—

**EXPENDITURE ON EDUCATION, SCIENCE, AND ART, 1908-9 to 1912-13.**

| State or Territory. |          | 1908-9.     | 1909-10.  | 1910-11.  | 1911-12.  | 1912-13.  |
|---------------------|----------|-------------|-----------|-----------|-----------|-----------|
|                     |          | £           | £         | £         | £         | £         |
| New South Wales     | Total    | £ 1,104,077 | 1,149,422 | 1,221,175 | 1,416,015 | 1,609,734 |
|                     | Per head | 13/9        | 13/11     | 14/11     | 16/11     | 18/6      |
| Victoria ...        | Total    | £ 925,368   | 953,499   | 1,003,251 | 1,142,399 | 1,122,854 |
|                     | Per head | 14/5        | 14/7      | 15/8      | 16/9      | 16/7      |
| Queensland ...      | Total    | £ 423,080   | 510,388   | 503,021   | 535,082   | 622,238   |
|                     | Per head | 14/11       | 17/4      | 17/-      | 17/2      | 19/8      |
| South Australia...  | Total    | £ 238,376   | 231,584   | 275,671   | 298,610   | 323,787   |
|                     | Per head | 11/7        | 11/1      | 13/9      | 14/3      | 15/4      |

|                     | Per head | 16/4        | 16/-      | 18/6      | 20/3      | 21/3      |
| Tasmania ...        | Total    | £ 81,182    | 87,603    | 92,036    | 95,352    | 101,008   |
|                     | Per head | 8/10        | 9/7       | 9/8       | 9/11      | 10/6      |
| Northern Territ'y   | Total    | £ ...       | ...       | ...       | 1,477     | 2,516     |
|                     | Per head | ...         | ...       | ...       | 9/1       | 15/       |
| Commonwealth        | Total    | £ 2,993,460 | 3,155,357 | 3,346,225 | 3,787,465 | 4,101,860 |
|                     | Per head | 13/10       | 14/3      | 15/4      | 16/7      | 17/8      |

\* The comparatively heavy increase in Queensland for 1909-10 and subsequent years is due to the inclusion of expenditure in connection with the University.

## SECTION XXIII.

## PUBLIC JUSTICE.

## § 1. Police.

1. **Introductory.**—In previous issues of the Year Book a résumé was given of the evolution of the police force in Australia up to the passing of the Police Act of 1862 (25 Vic. No. 16) in New South Wales, but considerations of space preclude its inclusion in the present volume.

In general terms the police forces of Australia may be said to be satisfactory both in regard to physique and intelligence, while as regards methods of prevention and detection of crime it is believed that the system in vogue here compares very favourably with those of the older-settled countries of the world.

2. **Strength of Police Force.**—The strength of the police force in each State during the five years ended 1912 was as follows. It may be mentioned that the police forces are entirely under State control, but, by arrangement, the Commonwealth Government utilises their services in various directions, such as the collection of Commonwealth electoral rolls, etc.

## POLICE FORCES IN THE COMMONWEALTH, 1908 to 1912.

| State.             | Area of State<br>in<br>Sq. Miles. | 1908. | 1909. | 1910. | 1911. | 1912. |
|--------------------|-----------------------------------|-------|-------|-------|-------|-------|
| New South Wales    | 310,372                           | 2,417 | 2,435 | 2,447 | 2,487 | 2,554 |
| Victoria...        | 87,884                            | 1,552 | 1,598 | 1,605 | 1,640 | 1,662 |
| Queensland         | 670,500                           | 960   | 966   | 957   | 1,011 | 1,084 |
| South Australia    | 380,070                           | 429   | 442   | 465   | 502   | 522   |
| Western Australia  | 975,920                           | 492   | 475   | 474   | 481   | 487   |
| Tasmania           | 26,215                            | 232   | 234   | 234   | 232   | 237   |
| Northern Territory | 523,620                           | ...   | ...   | ...   | 22    | 25    |
| Commonwealth       | 2,974,581                         | 6,082 | 6,150 | 6,182 | 6,375 | 6,571 |

The figures for New South Wales for 1912 are exclusive of fifty-six "black trackers," i.e., natives employed in detection of offenders in outlying districts, and five female searchers. In Queensland there were ninety-nine native trackers. The South Australian returns for 1912 are exclusive of eleven "black trackers" and one female searcher. The Northern Territory had twenty-three "black trackers" in 1912. There are also fifty-three "black trackers" in Western Australia and three female searchers not included in the table.

(i.) *Average Number of Inhabitants to each Police Officer.* The average number of inhabitants to each officer in each State during the same period is as follows. In considering these figures allowance must, of course, be made for the unequal area and unequal distribution of the population of the various States.

**INHABITANTS TO EACH POLICE OFFICER, 1908 to 1912.**  
(COMMONWEALTH.)

| State.             | No. of Persons<br>per<br>Sq. Mile,<br>1911 Census. | Inhabitants to each Police Officer. |       |       |       |       |
|--------------------|--|-------------------------------------|-------|-------|-------|-------|
|                    |  | 1908.                               | 1909. | 1910. | 1911. | 1912. |
| New South Wales    | 5.31   | 659                                 | 659   | 667   | 664   | 680   |
| Victoria           | 14.97  | 819                                 | 804   | 799   | 810   | 816   |
| Queensland         | 0.90   | 575                                 | 585   | 622   | 608   | 582   |
| South Australia    | 0.46   | 949                                 | 900   | 863   | 819   | 808   |
| Western Australia  | 0.29   | 543                                 | 571   | 572   | 596   | 619   |
| Tasmania           | 7.29   | 801                                 | 787   | 816   | 820   | 809   |
| Northern Territory | ...  | ...                                 | ...   | ...   | 151   | 134   |
| Commonwealth       | 1.50   | 703                                 | 703   | 707   | 704   | 707   |

The above figures naturally shew a great disparity in the relative numbers of the population protected by each police officer in the various States, and also in the relative area of territory to each officer. Western Australia and South Australia exhibit the largest figures in the latter respect, this, of course, being due to the fact that extensive areas in each State are as yet unpeopled by white settlers.

**3. Duties of the Police.**—In addition to the ordinary employment attaching to their office, the police are called upon to perform many duties which in other countries are carried out by various functionaries. Thus, in Queensland, according to the Commissioner's report for 1912, no less than fifty subsidiary offices are held by the police. As far as the statistician is concerned, it is found that the expert local knowledge possessed by the police renders their services in the collection of such returns as those relating to the agricultural, pastoral, and manufacturing industries, private schools, etc., more than ordinarily valuable. Then, again, the fact that their services are enlisted by such widely different departments as those dealing with mines, stock, agriculture, elections, registrations of births, deaths, and marriages, forestry, fisheries, explosives, old-age pensions, lunacy, public works, labour, etc., greatly enhances their general alertness by widening the range of their experience. Occasionally the objection is heard in some quarters that these special tasks involve some degree of sacrifice of ordinary routine duties, but that the general intelligence of the Australian police is adequate to the obligation to perform these tasks, besides being most creditable, results in a great saving of the public money.

**4. Cost of Police Forces.**—The expenditure from Consolidated Revenue on the police forces in each State during the five years 1908 to 1912 is shewn in the following table. Cost of buildings has been excluded from the return.

**COST OF POLICE FORCES IN THE COMMONWEALTH, 1908 to 1912.**

| State.             | 1908.     | 1909.     | 1910.     | 1911.     | 1912.     |
|--------------------|-----------|-----------|-----------|-----------|-----------|
|                    | £         | £         | £         | £         | £         |
| New South Wales    | 466,994   | 472,718   | 504,146   | 515,569   | 578,767   |
| Victoria           | 306,263   | 320,831   | 337,670   | 345,889   | 348,227   |
| Queensland         | 207,043   | 220,344   | 244,945   | 258,538   | 306,431   |
| South Australia    | 96,979    | 98,214    | 96,769    | 107,872   | 116,847   |
| Western Australia  | 124,518   | 119,111   | 120,420   | 127,458   | 129,556   |
| Tasmania           | 39,105    | 39,740    | 40,408    | 41,535    | 43,236    |
| Northern Territory | ...       | ...       | ...       | 9,708     | 10,609    |
| Commonwealth       | 1,240,902 | 1,270,958 | 1,344,358 | 1,406,569 | 1,533,673 |

The total for New South Wales includes £25,000 payment to Police Superannuation Fund. Similar payments in Victoria and Queensland come to £17,000 and £23,000 respectively, while smaller amounts are included in the returns for other States. The cost per head of the population in each State for the period 1908 to 1912 was as follows:—

## COST OF POLICE PER INHABITANT, 1908 to 1912.

(COMMONWEALTH.)

| State.                 | 1908. | 1909. | 1910. | 1911. | 1912. |
|------------------------|-------|-------|-------|-------|-------|
|                        | s. d. | s. d. | s. d. | s. d. | s. d. |
| New South Wales ...    | 5 11  | 5 11  | 6 2   | 6 2   | 6 8   |
| Victoria ...           | 4 10  | 5 0   | 5 2   | 5 1   | 5 2   |
| Queensland ...         | 7 6   | 7 8   | 8 3   | 8 4   | 9 8   |
| South Australia ...    | 4 11  | 5 0   | 4 10  | 5 2   | 5 6   |
| Western Australia ...  | 9 5   | 8 10  | 8 11  | 8 8   | 8 7   |
| Tasmania ...           | 4 4   | 4 4   | 4 3   | 4 4   | 4 6   |
| Northern Territory ... | ...   | ...   | ...   | 58 6  | 63 2  |
| Commonwealth ...       | 5 11  | 5 11  | 6 2   | 6 2   | 6 7   |

The relatively high cost per head in Queensland and Western Australia is due to the fact that there are in those States extensive areas of sparsely settled country, in which mounted patrols have to be maintained.

In view of the small number of its white population and the vast extent of country to be patrolled, the figures for the Northern Territory necessarily shew a very high average.

## § 2. Lower (Magistrates') Courts.

1. **Introductory.**—In considering the criminal returns of the various States, due allowance must be made on account of several factors, such as the relative powers of the courts, both lower and higher, etc. In the case of lower courts, the actual number of laws in each State, the breach of which renders a person liable to fine or imprisonment, must be taken into account. Again, the attitude of the magistracy and police towards certain classes of offences is a factor, for in the case of liquor laws, or laws connected with vagrancy or gaming, the views of magistrates, and instructions issued to the police, may be responsible for considerable variations in the returns. The strength and distribution of the police forces, and the age constitution and distribution of the State's population, also influence the results. In any consideration of criminal returns, due weight should also be given to the prevalence of undetected crime, but information on this point can only be obtained for the State of Victoria. It may be mentioned that each State has its own separate judicial system, the Commonwealth jurisdiction being confined to the High Court of Australia, which is largely a Court of Appeal intermediate to the Privy Council, although it has also original jurisdiction, and the Commonwealth Court of Arbitration and Conciliation. Full particulars regarding the judicial power of the Commonwealth will be found in Chapter III. of the Commonwealth Constitution (see page 29).

2. **Powers of the Magistrates.**—In New South Wales there is no general limit to the powers of the magistrates in regard to offences punished summarily, their authority depending in such case on the statute which creates the offence and gives them jurisdiction. Except in the case of a very few statutes, and excluding cumulative sentences,

the power of sentence is limited to six months. Imprisonment in default of payment of fine is regulated by a scale limiting the maximum period according to the sum ordered to be paid, but in no case exceeding twelve months. Actions for debt and damage within certain limits also come within magisterial jurisdiction. In cases of debts, liquidated or unliquidated, the amount recoverable is not exceeding £50 before a court constituted of a stipendiary or police magistrate at certain authorised places, and not exceeding £30 at any other place before a court constituted of a stipendiary or police magistrate or two or more justices of the peace. The amount in actions of damage is limited to £10, but may extend to £30 by consent of parties.

In Victoria the civil jurisdiction of magistrates is restricted to what may be designated ordinary debts, damages for assault, restitution of goods, etc., where the amount in dispute does not exceed £50. No definite limit is fixed to the powers of the magistrates on the criminal side, and for some offences sentences up to two years may be imposed. The proportion of long sentences is, however, comparatively small.

In Queensland, generally speaking, the maximum term of imprisonment which justices can inflict is six months, but in certain exceptional cases, such as offences against sections 233 and 445 of the criminal code (betting-houses and illegally using animals), sentences of twelve months may be imposed. No limit exists as to the extent to which cumulative sentences may be applied, but in practice the term is never very lengthy.

In South Australia, under the Minor Offences Act, magistrates can impose sentences up to six months, and under the Summary Convictions Act, up to three months. The Police Act of 1869 gives power to sentence up to one year, with hard labour, in the case of incorrigible rogues; while under the Quarantine Act of 1877, and the Lottery and Gaming Act of 1875, sentences of two years may be imposed.

Under the Petty Sessions Act of 1867, in Tasmania, any person charged with having committed, or with having aided or abetted in the commission of an offence, in regard to property of a value not exceeding £10, may, on conviction, for a first offence, before two or more justices in Petty Sessions, be imprisoned for any term not exceeding one year, and for a term not exceeding two years for a second or subsequent offence.

**3. Persons Charged at Magistrates' Courts.**—The total number of persons who were charged before magistrates in each State is given below for the five years 1908 to 1912:—

**PERSONS CHARGED BEFORE MAGISTRATES IN THE COMMONWEALTH, 1908 to 1912.**

| State.                | 1908.   | 1909.   | 1910.   | 1911.   | 1912.   |
|-----------------------|---------|---------|---------|---------|---------|
| New South Wales ...   | 66,233  | 64,502  | 73,960  | 75,114  | 89,951  |
| Victoria ...          | 58,778  | 52,658  | 52,060  | 44,526  | 53,087  |
| Queensland ...        | 19,687  | 19,824  | 22,104  | 25,482  | 27,323  |
| South Australia ...   | 6,589   | 7,332   | 8,328   | 8,435   | 10,685  |
| Western Australia ... | 12,685  | 12,961  | 13,260  | 13,862  | 15,092  |
| Tasmania ...          | 7,048   | 6,831   | 7,079   | 6,597   | 7,084   |
| Northern Territory... | ...     | ...     | ...     | 92      | 219     |
| Commonwealth ...      | 171,020 | 164,108 | 176,791 | 174,108 | 203,441 |

As the table shews, the number of charges at Magistrates' Courts in New South Wales increased during 1912 by nearly 20 per cent. It would, however, be rash to conclude that crime is therefore on the increase in that State, for a scrutiny of the detailed returns shews that the bulk of the increase took place in offences against good order, and in the indefinite "not included" class, which comprises breaches of various enactments, such as the Local Government Act, Commonwealth Defence Act, etc. These offences hardly come within the category of ordinary crime.

The considerable falling-off in the returns for Victoria during 1911 was due in large measure to the decline in summons cases under the Education Act, the figures for 1911 being 4695, as compared with 12,317 in the preceding year. An increase in summons cases accounted for the rise in the total for 1912, to which summonses contributed 33,273 cases, as against 25,128 in the previous year. A scrutiny of the summons returns shews that the rise was due largely to an increase in breaches of the Education Act, for which the figures advanced from 4695 in 1911 to 7470 in 1912. Further, the summons cases for 1912 include in the column "other" 2936 breaches of the Defence Act, this entry appearing, of course, for the first time in the 1912 returns. The above considerations afford an excellent illustration of the necessity for analysis of the total returns prior to drawing therefrom any deductions in regard to the increase or otherwise of criminality. (See also in this connection § 2, 1. *ante*.)

The figures given in the tabulation above include, of course, a number of people who were wrongly charged, and statistically are not of great importance. The actual number of convictions in connection with the persons who appeared before the lower courts in each year of the period 1908 to 1912 is, therefore, given hereunder. A separate line is added shewing the committals to higher courts.

CONVICTIONS AND COMMITTALS AT MAGISTRATES' COURTS, 1908 to 1912.

(COMMONWEALTH.)

| State.             |               | 1908.   | 1909.   | 1910.   | 1911.   | 1912.   |
|--------------------|---------------|---------|---------|---------|---------|---------|
| New South Wales    | { Convictions | 57,630  | 55,767  | 63,671  | 65,058  | 77,611  |
|                    | { Committals  | 1,015   | 1,081   | 1,176   | 1,178   | 1,490   |

|                    | { Committals  | 89      | 111     | 117     | 99      | 121     |
| Western Australia  | { Convictions | 10,695  | 10,910  | 11,433  | 11,936  | 13,251  |
|                    | { Committals  | 187     | 177     | 192     | 204     | 162     |
| Tasmania           | { Convictions | 5,903   | 5,930   | 6,250   | 5,756   | 6,108   |
|                    | { Committals  | 63      | 44      | 48      | 57      | 60      |
| Northern Territory | { Convictions | ...     | ...     | ...     | 75      | 183     |
|                    | { Committals  | ...     | ...     | ...     | ...     | 8       |
| Commonwealth       | { Convictions | 141,307 | 135,316 | 146,943 | 144,764 | 169,979 |
|                    | { Committals  | 2,348   | 2,435   | 2,539   | 2,631   | 2,837   |

4. **Convictions for Serious Crime.**—While the figures given in the preceding table refer to the entire body of convictions, the fact must not be lost sight of that they include a large proportion of offences of a technical nature, many of them unwittingly committed, against various Acts of Parliaments. Cases of drunkenness and minor breaches of good order, which, if they can be said to come within the category of crime at all, at least do so in a very different sense to some other offences, also help to swell the list. The following table has, therefore, been prepared for the purpose of shewing the convictions at magistrates' courts for what may be regarded as the more serious offences, *i.e.*, against the person and property, either separately or conjointly, and forgery and offences against the currency:—

**CONVICTIONS FOR SERIOUS CRIMES AT MAGISTRATES' COURTS, 1908 to 1912.**  
(COMMONWEALTH.)

| State.                 | 1908.  | 1909.  | 1910.  | 1911.  | 1912.  |
|------------------------|--------|--------|--------|--------|--------|
| New South Wales ...    | 4,779  | 4,764  | 5,224  | 5,075  | 5,904  |
| Victoria ...           | 2,794  | 2,626  | 2,673  | 2,362  | 2,655  |
| Queensland ...         | 1,433  | 1,526  | 1,479  | 1,540  | 1,495  |
| South Australia ...    | 540    | 513    | 487    | 488    | 554    |
| Western Australia ...  | 1,143  | 1,074  | 996    | 1,025  | 1,053  |
| Tasmania ...           | 575    | 548    | 609    | 557    | 566    |
| Northern Territory ... | ...    | ...    | ...    | 6      | 11     |
| Commonwealth ...       | 11,264 | 11,051 | 11,468 | 11,053 | 12,238 |

Compared with the population the above figures give the following results per 10,000 inhabitants:—

**CONVICTIONS FOR SERIOUS CRIME PER 10,000 INHABITANTS, 1908 to 1912.**  
(COMMONWEALTH.)

| State.                 | 1908. | 1909. | 1910. | 1911. | 1912. |
|------------------------|-------|-------|-------|-------|-------|
| New South Wales ...    | 30.2  | 29.7  | 32.0  | 30.7  | 33.9  |
| Victoria ...           | 22.2  | 20.4  | 20.8  | 17.8  | 19.6  |
| Queensland ...         | 26.1  | 27.0  | 25.0  | 25.0  | 23.7  |
| South Australia ...    | 13.6  | 12.5  | 12.1  | 11.9  | 13.1  |
| Western Australia ...  | 43.1  | 39.6  | 36.7  | 35.7  | 34.9  |
| Tasmania ...           | 31.6  | 29.8  | 31.9  | 29.3  | 29.5  |
| Northern Territory ... | ...   | ...   | ...   | 18.1  | 32.7  |
| Commonwealth ...       | 26.6  | 25.6  | 26.2  | 24.6  | 26.3  |

5. **Decrease in Crime.**—The figures quoted in the preceding table show that during the last five years the rate of serious crime has slightly declined, while if the comparison be carried back to 1881 the position is seen to be still more satisfactory. The rate of convictions at magistrates' courts per 10,000 of the population is given below for each of the years 1881, 1891, 1901, and 1912. Only the more serious offences, particularised in the preceding paragraph, have been taken into consideration.

**RATE OF CONVICTIONS FOR SERIOUS CRIME IN THE COMMONWEALTH.**

| Year.    | Convictions<br>per<br>10,000 Persons |     |     |     |      |
|----------|--------------------------------------|-----|-----|-----|------|
| 1881 ... | ...                                  | ... | ... | ... | 69.3 |
| 1891 ... | ...                                  | ... | ... | ... | 44.8 |
| 1901 ... | ...                                  | ... | ... | ... | 29.1 |
| 1912 ... | ...                                  | ... | ... | ... | 26.3 |

6. **Need of Statistics of Distinct Persons.**—The figures already quoted refer to total convictions, and in respect of individuals necessarily involve a considerable amount of duplication, especially in minor offences, such as drunkenness, petty larcenies, etc., in which the same offender appears before the court many times in the course of the year. In a few of the States it is possible to obtain the number of distinct persons arrested, but there are no means of arriving at the total distinct persons convicted before the magistrates in any State.

**7. Causes of Decrease in Crime.**—The statistics given shew that there has been a considerable decrease in crime throughout Australia. The results so far quoted are restricted entirely to the lower or magistrates' courts. There has also been a gratifying decrease in regard to offences tried at the higher courts, as will be seen later.

Attempts have been made to account for this decline: *e.g.*, advance in education, enlightened penological methods, etc. Much depends upon what is meant by education. Many classed in census statistics as "educated" can barely read and write. In this connection, moreover, it ought not to be forgotten that collaterally with the introduction of ordinary intellectual education certain people have departed from their pristine virtues. The deterrent effect of punishment, in respect of many offences, notably drunkenness, vagrancy, petty larcenies, etc., appears to be almost negligible. In general, punishment has declined in brutality and severity, and has improved in respect of being based to a greater extent upon a scientific penological system, though in this latter respect there is yet much to be desired. Recent advances in penological methods will be referred to in a subsequent section. Here it will be sufficient to remark that under the old régime, a prisoner on completion of a sentence in gaol was simply turned adrift on society, and in many cases sought his criminal friends, and speedily qualified for readmission to the penitentiary. Frequently he was goaded to this by mistaken zeal on the part of the police, who took pains to inform employers of the fact of a man having served a sentence in gaol. For a long time any assistance to discharged prisoners was in the hands of private organisations, such as the Salvation Army Prison Gate Brigade, but in some of the States, and notably in New South Wales, the authorities themselves look after the welfare of discharged prisoners in the way of finding work, providing tools, etc.

Improvements in the means of communication and identification have been responsible for some of the falling-off noticeable in the criminal returns, the introduction of the Bertillon system having contributed to certainty of identification. In his report for the year 1910 the Inspector-General of Police in New South Wales states that "criminals have a wholesome dread of the finger print system, and I have not the slightest doubt that it is one of the principal causes of the diminution of serious crimes." Part of the improvement may no doubt be referred also to the general amelioration in social conditions that has taken place during the last fifty years.

**8. Drunkenness.**—The number of cases of drunkenness and the convictions recorded in connection therewith during the period 1908 to 1912 will be found in the following table:—

#### CASES AND CONVICTIONS—DRUNKENNESS, 1908 to 1912.

(COMMONWEALTH.)

| State.                 | 1908.  |              | 1909.  |              | 1910.  |              | 1911.  |              | 1912.  |              |
|------------------------|--------|--------------|--------|--------------|--------|--------------|--------|--------------|--------|--------------|
|                        | Cases. | Convictions. | Cases. | Convictions. | Cases. | Convictions. | Cases. | Convictions. | Cases. | Convictions. |
| New South Wales ...    | 27,976 | 27,817       | 27,495 | 27,363       | 27,542 | 27,380       | 29,398 | 29,299       | 32,915 | 32,720       |
| Victoria ...           | 13,102 | 6,596        | 12,436 | 7,025        | 13,719 | 7,272        | 13,603 | 7,557        | 13,524 | 7,446        |
| Queensland ...         | 9,303  | 9,185        | 9,109  | 9,102        | 10,870 | 10,849       | 12,824 | 12,767       | 14,225 | 14,213       |
| South Australia ...    | 3,063  | 3,024        | 3,481  | 3,455        | 4,383  | 4,323        | 4,673  | 4,627        | 5,470  | 5,416        |
| Western Australia ...  | 3,506  | 3,441        | 4,007  | 3,955        | 4,550  | 4,506        | 4,857  | 4,808        | 6,257  | 6,174        |
| Tasmania ...           | 543    | 527          | 709    | 690          | 761    | 741          | 756    | 740          | 644    | 633          |
| Northern Territory ... | ...    | ...          | ...    | ...          | ...    | ...          | 34     | 34           | 80     | 80           |
| Commonwealth ...       | 57,393 | 50,590       | 57,237 | 51,590       | 60,825 | 55,071       | 66,145 | 59,832       | 73,115 | 66,682       |

The number of convictions is, as might naturally be expected, almost identical with the number of cases. Victoria, however, is an exception, but in this State it is explained that offenders are generally discharged on a first appearance, and no conviction is recorded, a similar procedure being also adopted in the case of those arrested on Saturday and detained in custody till Monday. The logic of excluding these cases from the list of convictions is certainly open to doubt.

The convictions for drunkenness per 10,000 of the population during each of the years from 1908 to 1912 are given hereunder :—

### CONVICTIONS FOR DRUNKENNESS PER 10,000, 1908 to 1912.

(COMMONWEALTH.)

| State.                | 1908. | 1909  | 1910. | 1911. | 1912. |
|-----------------------|-------|-------|-------|-------|-------|
| New South Wales ...   | 175.9 | 170.4 | 167.7 | 167.0 | 188.1 |
| Victoria ...          | 52.4  | 54.7  | 56.7  | 56.8  | 54.9  |
| Queensland ...        | 167.1 | 161.1 | 183.4 | 207.8 | 225.0 |
| South Australia ...   | 76.0  | 84.1  | 107.7 | 112.5 | 128.4 |
| Western Australia ... | 129.8 | 146.0 | 166.2 | 167.7 | 204.8 |
| Tasmania ...          | 29.0  | 37.5  | 38.8  | 38.9  | 33.0  |
| Northern Territory... | ...   | ...   | ...   | 102.4 | 238.1 |
| Commonwealth ...      | 119.5 | 119.4 | 126.0 | 133.2 | 143.5 |

The convictions for drunkenness taken by themselves are not an altogether satisfactory test of the relative sobriety of the inhabitants of each State, inasmuch as several important factors must be taken into consideration. The age and sex constitution of the people, for example, is by no means identical in each State, Western Australia having by far the largest proportion of adult males. Owing to the smallness of the population the figures for the Northern Territory are, of course, abnormal. The avocations of the people affect the result, since persons engaged in strenuous callings are, on the whole, more likely to indulge in alcoholic stimulants than those employed in less arduous ones. The distribution of the population is also a factor, the likelihood of arrest or summons for drunkenness obviously being greater in the more densely populated regions, and lastly, allowance must be made for the attitude of the magistracy, the police, and the public generally in regard to the offence.

It is not unusual to supplement statistics of drunkenness by furnishing also the relative consumption of alcoholic beverages. Deductions drawn therefrom will be very misleading if they fail to take into account also the consumption of non-intoxicating beverages such as tea and coffee, and the general habit of the people. Throughout the greater part of Europe, tea and coffee are consumed but sparingly, while Australia, as is well known, is one of the greatest tea-drinking countries of the world.

The following table shewing the consumption of spirits, wine, and beer per head of the population has, with the exception of the figures relating to the Commonwealth, been compiled from returns prepared by the British Board of Trade. The figures quoted for the Commonwealth refer to the year 1912, and for the other countries mentioned cover the quinquennium 1907-11.

## CONSUMPTION OF ALCOHOLIC BEVERAGES IN VARIOUS COUNTRIES.

| Country.                  | Consumption per Head of Population. |             |             | Country.          | Consumption per Head of Population. |             |             |
|---------------------------|-------------------------------------|-------------|-------------|-------------------|-------------------------------------|-------------|-------------|
|                           | Spirits.                            | Wine.       | Beer.       |                   | Spirits.                            | Wine.       | Beer.       |

**9. Treatment of Drunkenness as Crime.**—Though the problem of the correct method of dealing with dipsomania is by no means an easy one, it seems fairly clear that the present plan of bringing offenders before magistrates, and subjecting them to the penalty of imprisonment or fine, has little deterrent effect, as the same offenders are constantly reappearing before the courts. Further, the casting of an inebriate into prison, and placing him in his weakened mental state in the company of professional malefactors, doubtless tends to swell the ranks of criminals and certainly tends to lower his self-respect. Examination of the prison records in New South Wales some years ago disclosed the fact that over 40 per cent. of the gaol population had commenced their criminal career with a charge of drunkenness. During the last few years the dangers of moral contamination in this way have been more accurately appreciated, and a system of classification of prisoners has been adopted whereby the petty offender is as far as possible kept from association with the more evilly-disposed. With regard to drunkards, however, the Comptroller of Prisons in New South Wales advocates the entire abandonment of the system of repeated fine or imprisonment in favour of a course of hospital treatment, and this has to some extent been accomplished by the Inebriates Acts of 1900 and 1909, under which habitual drunkards may be detained for long periods. The Comptroller-General of Prisons in Queensland states in his report for the year 1907 that "the drunken habit in many cases is merely one of many symptoms which jointly indicate the existence of a graver condition than simple habitual drunkenness."

**10. Remedial Treatment of Inebriates.**—Legislation has been passed in each State providing for the commitment of inebriates to special Government institutions, but so far New South Wales and Victoria are the only States in which such institutions have been established. The laws in the various States are as follows:—New South Wales, Inebriates Act 1900; Victoria, Inebriates Act 1904; Queensland, Inebriate Institutions Act of 1896; South Australia, Inebriates Act of 1881; Western Australia, Lunacy Act 1903, Pt. iv., Habitual Drunkards; Tasmania, Inebriates Act 1885, Inebriate Hospitals Act 1892. Curative work was first undertaken by the Government of New South Wales in 1907. The institutes are connected with the gaols, and, naturally, custodial measures are still a strong feature in their management; nevertheless the results so far have been encouraging. In Victoria an institute purporting to be wholly remedial was founded in 1907. It may be mentioned that there are private retreats in each State, but these are not officially subsidised or inspected.

**11. Treatment of Habitual Offenders.**—In New South Wales the Habitual Criminal Act of 1905 gives judges the power of declaring a prisoner, after a certain number of sentences, to be an habitual criminal, and as such to be detained until, in the opinion of the authorities, he is fit to be at large. At the end of 1912 there were forty persons in prison under this Act. The Indeterminate Sentences Act came into force in Victoria in July, 1908, and during the five years the Act has been in operation, 157 prisoners have been admitted to the three reformatory prisons, and fifty-three have been released on probation on the recommendation of the Indeterminate Sentences Board. Somewhat similar Acts are in force in South Australia and Tasmania. The provisions of the Habitual Criminals Amendment Act of 1907 were put into force in

South Australia in 1909, and twelve criminals declared to be habitual offenders were in confinement in the Labour Prison at the end of 1912. Legislation of this character has not yet been adopted in Queensland, but its introduction is proposed. Naturally it will be some time before the full effect of these measures on the prevalence of crime can be estimated. The Comptroller-General of Prisons in New South Wales states, however, that the system has exercised a wholesome deterrent effect on the criminal who is not a prisoner.

**12. Treatment of First Offenders.**—In all the States and in New Zealand statutes dealing with first offenders have been in force for some years, the dates of passing the Acts being as follows: New South Wales, 1894; Victoria, 1890; Queensland and South Australia, 1887; Western Australia, 1892; Tasmania and New Zealand, 1886. The method of procedure is practically the same in all cases, i.e., with regard to most first offenders the magistrate or judge is empowered to allow the offender to go free on recognisances being entered into for his good behaviour for a certain period. In practice, this humane law has been found to work excellently, very few of those to whom its provisions have been extended having been found to relapse into crime.

**13. Children's Courts.**—Special courts for the trial of juvenile offenders have been established in New South Wales, Victoria, Western Australia, and New Zealand within the last few years, while Children's Courts, although not under that name, are practically provided for by the State Children's Acts of 1895 and 1900 in South Australia. The object of these courts is to avoid, as far as possible, the unpleasant surroundings of the ordinary police court. This subject is also dealt with in detail in the section dealing with Public Hygiene.

**14. Committals to Superior Courts.**—In a previous section it has been pointed out that comparisons of criminality based on a consideration of the total returns from magistrates' courts are somewhat inadequate, seeing that the figures include numbers of cases which are merely technical breaches of laws having in some instances a purely local significance. The committals to higher courts give a better basis of comparison, although even in this connection allowance must be made for the want of uniformity in jurisdiction. The table below gives the number of committals in each year from 1908 to 1912, with the proportion of such committals per 10,000 of the population. The rates are shewn on a separate line.

#### COMMITTALS TO SUPERIOR COURTS (COMMONWEALTH), 1908 to 1912.

| State.             |     |     |      | 1908. | 1909. | 1910. | 1911. | 1912. |
|--------------------|-----|-----|------|-------|-------|-------|-------|-------|
| New South Wales    | ... | ... | No.  | 1,060 | 1,135 | 1,233 | 1,223 | 1,923 |
|                    |     |     | Rate | 6.7   | 7.1   | 7.6   | 7.4   | 11.1  |
| Victoria           | ... | ... | No.  | 577   | 580   | 551   | 564   | 571   |
|                    |     |     | Rate | 4.6   | 4.5   | 4.3   | 4.2   | 4.2   |
| Queensland         | ... | ... | No.  | 417   | 442   | 455   | 529   | 425   |
|                    |     |     | Rate | 7.6   | 7.8   | 7.7   | 8.6   | 6.7   |
| South Australia    | ... | ... | No.  | 89    | 111   | 117   | 99    | 121   |
|                    |     |     | Rate | 2.2   | 2.7   | 2.9   | 2.4   | 2.9   |
| Western Australia  | ... | ... | No.  | 187   | 177   | 192   | 204   | 162   |
|                    |     |     | Rate | 7.0   | 6.5   | 7.1   | 7.1   | 5.4   |
| Tasmania           | ... | ... | No.  | 63    | 44    | 48    | 57    | 60    |
|                    |     |     | Rate | 3.5   | 2.4   | 2.5   | 3.0   | 3.1   |
| Northern Territory | ... | ... | No.  | ...   | ...   | ...   | ...   | 8     |
|                    |     |     | Rate | ...   | ...   | ...   | ...   | 23.8  |
| Commonwealth       | ... | ... | No.  | 2,393 | 2,489 | 2,596 | 2,676 | 3,270 |
|                    |     |     | Rate | 5.7   | 5.8   | 5.9   | 6.0   | 7.0   |

The above figures shew that the rate of committals for serious crime has increased slightly during the last five years, but if the comparison be carried farther back, it will be found that, as compared with the earlier years, there has been a considerable improvement. This will be evident from an examination of the following figures, which shew the rate of committals per 10,000 persons in Australia at various periods since 1861:—

#### RATE OF COMMITTALS IN AUSTRALIA, 1861 to 1912.

| Year ...                          | ... | ... | ... | ... | 1861. | 1871. | 1881. | 1891. | 1901. | 1912. |
|-----------------------------------|-----|-----|-----|-----|-------|-------|-------|-------|-------|-------|
| Committals per 10,000 inhabitants | ... | ... | ... | ... | 22    | 14    | 12    | 11    | 8     | 7     |

The decline in proportion to population since 1861 has therefore been about 70 per cent.

### § 3. Superior Courts.

1. **Convictions at Superior Courts.**—The total number of convictions at superior courts, together with the rate per 10,000 of the population, is shewn below for each of the years 1908 to 1912:—

#### CONVICTIONS AT SUPERIOR COURTS (COMMONWEALTH), 1908 to 1912.

| State.             |     |   |      | 1908. | 1909. | 1910. | 1911. | 1912. |

|                    |     |   | Rate | 3.8   | 3.7   | 3.6   | 3.5   | 3.7   |

The figures for Victoria, which in previous editions were exclusive of summons cases, have been adjusted for the last five years so as to include all cases.

In considering the above figures allowance must be made for the various factors enumerated in a preceding paragraph. Tasmania, it will be noted, shews by far the smallest proportion of serious crime, while the figures available shew that the island State is relatively the smallest consumer of alcoholic beverages. That a definite causal relation exists between the figures shewn by the respective tables is not, however, obvious. The figures for the Northern Territory are, of course, somewhat abnormal.

2. **Offences for which Convictions were Recorded at Superior Courts.**—In the following table will be found a classification of the principal offences for which persons were convicted at the higher courts during each year of the period 1908 to 1912. Owing

to lack of uniformity in the presentation of the returns for the several States the information is confined to the chief offences against the person only. In the case of Victoria no information is available regarding the convictions on summons committals. The figures quoted refer to convictions in the Commonwealth during the period dealt with.

### CONVICTIONS FOR SERIOUS CRIME, SUPERIOR COURTS, 1908 to 1912.

(COMMONWEALTH.)

| Offences.                             | 1908. | 1909. | 1910. | 1911. | 1912. |
|---------------------------------------|-------|-------|-------|-------|-------|
| Murder and attempts at ...            | 26    | 24    | 31    | 18    | 33    |
| Manslaughter ...                      | 20    | 21    | 15    | 15    | 16    |
| Rape and crimes of lust ...           | 60    | 59    | 77    | 97    | 88    |
| Other offences against the person ... | 278   | 260   | 250   | 235   | 221   |

While the individual totals shew considerable fluctuations, the returns generally manifest considerable improvement. The general total of convictions for all offences against the person shews a decline since 1901 of about 17 per cent., and since 1908 of about 7 per cent.

3. **Capital Punishment.**—The table below gives the number of executions in each State during the period 1908 to 1912:—

### EXECUTIONS (COMMONWEALTH), 1908 to 1912.

| State.                | 1908. | 1909. | 1910. | 1911. | 1912. |
|-----------------------|-------|-------|-------|-------|-------|
| New South Wales ...   | ...   | ...   | ...   | ...   | 1     |
| Victoria ...          | 1     | ...   | ...   | ...   | 1     |
| Queensland ...        | ...   | 2     | 1     | ...   | ...   |
| South Australia ...   | 1     | ...   | 3     | ...   | ...   |
| Western Australia ... | 2     | 1     | 1     | 2     | ...   |
| Tasmania ...          | ...   | ...   | ...   | ...   | ...   |
| Commonwealth ...      | 4     | 3     | 5     | 2     | 2     |

In the early days of the history of Australia the penalty of death was attached to a large number of offences, many of which at the present time would be dealt with in the lower or magistrates' courts. With the growth of settlement, and the general amelioration in social and moral conditions, the list was, however, considerably curtailed, and the existing tendency is practically to restrict death sentences to cases of murder. It may be remarked that in cases of rape, which is a capital offence in some of the Australian States, the penalty has been but sparingly inflicted during the last few years. Juries are reputed to be loth to convict on this charge, owing to the uncertainty whether sentence of death will be pronounced.

During the period 1861 to 1880 the average number of executions in the Commonwealth was nine, from 1881 to 1900 the average was six, while for the period 1901 to 1910 the figure stood at four.

## § 4. Prisons.

1. **Prison Accommodation and Prisoners in Gaol.**—The table below shews the number of prisons in each State and the accommodation therein at the end of 1912:—

## PRISONS AND PRISON ACCOMMODATION (COMMONWEALTH), 1912.

| State.                    | Number of Prisons. | Accommodation in— |        | Prisoners at End of Year. |

| South Australia ... ..    | 12                 | 756               | 385    | 287                       |
| Western Australia ... ..  | 24                 | 795               | 117    | 356                       |
| Tasmania ... ..           | 2                  | 200               | 228    | 69                        |
| Northern Territory ... .. | 3                  | 19                | 5      | 12                        |
| Commonwealth ... ..       | 101                | 6,110             | ...    | 3,390                     |

\* Not available.

The number of prisoners in gaol, exclusive of debtors, at the 31st December in each of the years 1908 to 1912, is given below. A separate line is added in each instance shewing the proportion per 10,000 of the population.

## PRISONERS IN GAOL (COMMONWEALTH), 1908 to 1912.

| State.                          | 1908. | 1909. | 1910. | 1911. | 1912. |
|---------------------------------|-------|-------|-------|-------|-------|
| New South Wales ... { Number    | 1,417 | 1,333 | 1,235 | 1,173 | 1,257 |
| ... { Proportion                | 9.0   | 8.3   | 7.6   | 7.1   | 7.2   |
| Victoria ... { Number           | 875   | 844   | 859   | 797   | 880   |
| ... { Proportion                | 7.0   | 6.5   | 6.7   | 6.0   | 6.5   |
| Queensland ... { Number         | 493   | 516   | 527   | 514   | 529   |
| ... { Proportion                | 9.0   | 9.1   | 8.9   | 8.4   | 8.4   |
| South Australia ... { Number    | 247   | 276   | 269   | 224   | 287   |
| ... { Proportion                | 6.2   | 6.7   | 6.7   | 5.4   | 6.8   |
| Western Australia ... { Number  | 351   | 365   | 311   | 323   | 356   |
| ... { Proportion                | 13.2  | 13.5  | 11.5  | 11.3  | 11.8  |
| Tasmania ... { Number           | 96    | 81    | 72    | 65    | 69    |
| ... { Proportion                | 5.3   | 4.4   | 3.8   | 3.4   | 3.6   |
| Northern Territory ... { Number | ...   | ...   | ...   | ...   | 12    |
| ... { Proportion                | ...   | ...   | ...   | ...   | 35.7  |
| Commonwealth ... { Number       | 3,479 | 3,415 | 3,273 | 3,096 | 3,390 |
| ... { Proportion                | 8.2   | 7.9   | 7.5   | 6.9   | 7.3   |

From the preceding table it will be seen that the proportion to population of prisoners in gaol has fallen considerably during the last five years, while, if the comparison be carried farther back, the position is seen to be still more favourable, the prisoners in gaol in the Commonwealth numbering as much as 16 per 10,000 of the population in 1891.

**2. Improvement of Penological Methods.**—During recent years Australia, in common with most other civilised countries, has introduced considerable modifications and improvements in methods of prison management. Under the old régime punishment partook more or less of the character of reprisal for wrongdoing, and the idea of constituting the prison as a reformatory agency was in the background. But of recent years there has been an earnest attempt at effecting a moral reformation in the unfortunates who lapse into crime. This aspect of prison management has been specially prominent in New South Wales. A short account of the re-organisation of the prison system in this State appears in preceding Year Books (see No. V., p. 922), but considerations of space preclude its repetition here. At the present time it is found that good results have followed the principles of scientific classification and restricted association of prisoners, together with the provision of separate institutions for the treatment of inebriates. It is proposed to introduce in New South Wales the system of carrying on afforestation by prison labour, somewhat after the manner of that in vogue for several years in New Zealand, and in 1911 a site near Tuncurry, on the Manning River, was selected for the purpose of initiating the scheme. That there is some connection between mental and physical health and crime is proved by the condition in which many persons are received into gaol. In a large number of instances prisoners are found to be suffering from contagious diseases. Under the Prisoners Detention Act such persons may be kept in gaol until cured, but unfortunately the provisions of the Act do not apply to short sentenced prisoners detained in lieu of paying fines, many of whom have been known to be afflicted with disease.

In 1902 the system of finger-print identification of criminals was introduced, and by the year 1903 bureaux had been established in the various States for the exchange of records. Very successful results have attended the introduction of the system.

Space will not permit of more than a passing reference to the improvements brought about in prison management in the other States. In Victoria there is an excellent system of classification and allocation of prisoners to different gaols, while at the important penal establishment at Pentridge a careful segregation into no less than five distinct classes is carried out. It is proposed to make better provision at the Pentridge prison for the accommodation and classification of habitual offenders. In common with the other States the latest humane methods of accommodation and prison treatment have for some time been employed.

Queensland prisons have been considerably modernised during the last few years. The prison for females at Brisbane has been built on the radiating plan, and embodies the latest ideas in penological methods. Classification of prisoners has been fully carried out in the male and female divisions of Brisbane prison, and at the Stewart's Creek penal establishment. The construction of the buildings does not, however, permit of the plan being adopted in its entirety in all Queensland prisons. Amongst reforms in 1912 were the reduction of the period of separate treatment undergone by prisoners sentenced to hard labour or penal servitude, a remodelling of the remission clauses, and allowance of more liberal privileges in the way of correspondence and visits from friends. Electric light has been installed in the Brisbane prison, and prisoners are allowed to read up to 8 o'clock each evening.

Unusual circumstances have combined to keep crime at a low point in South Australia. In the first place there was never any transportation of criminals to the State, while in the earlier years of its history South Australian lawbreakers were transported elsewhere. The present system was drafted mainly on English and European lines by

the late W. R. Boothby, C.M.G., and under his directions and that of his successor has been found to work admirably. Excellent work for the benefit and assistance of discharged prisoners is performed by the Prisoners' Aid Association.

A Royal Commission in 1911 recommended the adoption of various reforms in connection with the prison system of Western Australia. The bulk of these have been carried out, and include, amongst other things, an extension of the principle of separate treatment, improvement in prisoners' dietary scale, more satisfactory arrangements in regard to remission of sentences, and improvements in regard to hours of labour, leave of absence, etc., for the staff. In his report for the year 1912, the Comptroller-General refers to the heavy cost of the common gaols as compared with the Police Gaols, and recommends the abolition of some of the former. Aid to discharged prisoners in Western Australia is provided for by a strong committee with branches in-country towns.

### § 5. Civil Courts.

1. **Lower Courts.**—The transactions of the lower courts on the civil side during each of the last five years are given in the table hereunder. As pointed out previously, the jurisdiction of the courts is by no means uniform in the various States.

#### LOWER COURTS.—CIVIL CASES, COMMONWEALTH, 1908 to 1912.

| State.            |     |        |     | 1908.   | 1909.   | 1910.   | 1911.   | 1912.   |
|-------------------|-----|--------|-----|---------|---------|---------|---------|---------|
| New South Wales   | ... | Cases  | No. | 30,472  | 32,637  | 30,059  | 29,570  | 32,531  |
|                   |     | Amount | £   | 83,372  | 87,432  | 77,700  | 74,461  | 93,592  |
| Victoria          | ... | Cases  | No. | 32,005  | 36,894  | 29,902  | 28,575  | 36,043  |
|                   |     | Amount | £   | 157,334 | 162,393 | 146,284 | 129,172 | 190,485 |
| Queensland        | ... | Cases  | No. | 12,016  | 12,244  | 11,951  | 12,511  | 14,962  |
|                   |     | Amount | £   | 42,863  | 43,363  | 45,432  | 48,374  | 61,047  |
| South Australia   | ... | Cases  | No. | 13,068  | 13,627  | 13,845  | 14,996  | 18,905  |
|                   |     | Amount | £   | 39,627  | 41,811  | 45,380  | 51,282  | 60,813  |
| Western Australia | ... | Cases  | No. | 10,570  | 10,681  | 9,598   | 9,773   | 12,735  |
|                   |     | Amount | £   | 59,863  | 50,261  | 42,636  | 43,413  | 60,774  |
| Tasmania          | ... | Cases  | No. | 4,120   | 4,868   | 3,620   | 5,189   | 4,487   |
|                   |     | Amount | £   | 25,717  | 30,855  | 29,199  | 33,601  | 28,571  |
| Commonwealth      | ... | Cases  | No. | 102,251 | 110,951 | 98,975  | 100,614 | 119,663 |
|                   |     | Amount | £   | 408,776 | 416,115 | 386,631 | 380,303 | 495,282 |

The figures just given represent the returns from Petty Sessions Courts in New South Wales and Victoria, the Petty Debts cases in Queensland, the Local Courts of South Australia and Western Australia, and the Court of Requests in Tasmania.

2. **Superior Courts.**—In the next table will be found the transactions on the civil side in the Superior Courts during each of the years 1908 to 1912.

The New South Wales returns are to some extent defective, as the figures quoted for amount of judgments include, in the case of the Common Law jurisdiction of the Supreme Court, the total judgments signed, while in the case of the other States the figures refer to sums actually adjudged after trial. For New South Wales, also, the transactions of

district courts refer to the total amounts sued for, and not the sums actually awarded after trial. Statistically the chief importance of the table consists in the fact that it shews a decline in litigiousness in Australia.

### SUPERIOR COURTS.—CIVIL CASES, 1908 to 1912.

#### COMMONWEALTH.

| State.             |              | 1908    | 1909.   | 1910.   | 1911.   | 1912.   |

| Commonwealth      | 402       | 16                   | 478       | 19                   | 454       | 12                   | 502       | 16                   | 667       | 15                   |

The average annual number of divorces and judicial separations in the Commonwealth at decennial periods from 1871 to 1910 is given hereunder :—

### DIVORCES AND JUDICIAL SEPARATIONS, 1871 to 1910.

|              |     |     | 1871-1880. | 1881-90. | 1891-1900. | 1901-10. |
|--------------|-----|-----|------------|----------|------------|----------|
| Commonwealth | ... | ... | 29         | 70       | 358        | 401      |

The bulk of the divorces and judicial separations refer, as the table shews, to New South Wales and Victoria, the Acts of 1892 and 1889 in the respective States making the separation of the marriage tie comparatively easy. In some statistical works it is customary to compare the divorces in any year with the marriages in the same year. The comparison is, however, quite valueless, as there is no necessary connection between the figures.

4. **Probates.**—The number of probates and letters of administration granted, together with the value of the estates concerned, is shewn below for each State for the period 1908 to 1912:—

### PROBATES AND LETTERS OF ADMINISTRATION, COMMONWEALTH, 1908 to 1912.

| State.            |     |           | 1908.      | 1909.      | 1910.      | 1911.      | 1912.      |
|-------------------|-----|-----------|------------|------------|------------|------------|------------|
| New South Wales   | ... | { Number  | 3,094      | 3,185      | 3,336      | 3,589      | 3,648      |
|                   |     | { Value £ | 7,838,572  | 11,142,068 | 8,834,934  | 13,138,068 | 13,389,806 |

|                   |     | { Value £ | 2,105,351  | 1,939,509  | 2,422,519  | 2,855,089  | 1,993,106  |
| Western Australia | ... | { Number  | 455        | 413        | 492        | 584        | 552        |
|                   |     | { Value £ | 955,995    | 939,318    | 868,638    | 844,151    | 605,622    |
| Tasmania          | ... | { Number  | 346        | 361        | 375        | 399        | 465        |
|                   |     | { Value £ | 1,023,629  | 722,011    | 797,439    | 596,870    | 983,618    |
| Commonwealth      | ... | { Number  | 9,971      | 9,822      | 10,156     | 10,972     | 11,251     |
|                   |     | { Value £ | 20,427,887 | 22,732,165 | 22,007,170 | 28,312,836 | 28,235,693 |

As may naturally be expected, the figures in the above table, giving the value of property left each year, shew considerable variations.

5. **Bankruptcies.**—The returns in bankruptcy during each of the last five years are given in the following table.

For several reasons comparisons drawn from the figures in the following table are of little value. In the first place, the statements of assets and liabilities are notably unsatisfactory, particularly in regard to the former. Then, again, there is wide dissimilarity in regard to the laws in force in the various States and the method of procedure thereunder in connection with bankruptcy. Further, there are no means of knowing how many persons in each State who were in a bankrupt condition made private arrangements with their creditors either personally or by intervention of a solicitor. The figures quoted in the table exclude the private arrangements in Victoria and South Australia, and the liquidations in Queensland and Tasmania.

## BANKRUPTCIES, COMMONWEALTH, 1908 to 1912.

**6. High Court of Australia.**—Under the provisions of section 71 of the Commonwealth Constitution Act, the judicial power of the Commonwealth is vested in a Federal Supreme Court, called the High Court of Australia, and in such other courts as the Parliament creates or invests with federal jurisdiction. The Federal High Court possesses both original and appellate jurisdiction, but so far its activities have been confined principally to the latter form. The powers of the court are defined in Chapter III. of the Constitution Act and in the Judiciary Acts of 1903, 1906, 1907, and 1910. At present the court consists of a Chief Justice and six other judges. Sittings of the court are held in the capitals of the various States as occasion may require. The following statement shews the transactions of the High Court for the quinquennium 1908-12:—

## COMMONWEALTH HIGH COURT TRANSACTIONS, 1908 to 1912.

| Items.                                     | 1908.  | 1909. | 1910.  | 1911. | 1912. |

### § 6. Cost of Administration of Justice.

The table below shews the expenditure from Consolidated Revenue during each of the last five years in connection with the administration of justice in each of the States. Expenditure on police and prisons has been separately shewn. With regard to the figures quoted for "other" expenditure, a slight allowance has to be made for the fact that some extraneous expenditure has been included which it was found impossible to disentangle from the total, but the amount is in no instance large. Cost of buildings has been excluded from the return.

#### EXPENDITURE ON JUSTICE, COMMONWEALTH, 1908 to 1912.

With the exception of that of the Northern Territory, the expenditure shewn in the foregoing table is that incurred by the State Governments only, and does not include expenditure in connection with the Federal High Court, which is shewn below for the period 1908-9 to 1912-13:—

#### EXPENDITURE OF FEDERAL HIGH COURT, 1908-9 to 1912-13.

| Year.   |     |     | Amount. | Year.   |     |     | Amount. |
|---------|-----|-----|---------|---------|-----|-----|---------|
|         |     |     | £       |         |     |     | £       |
| 1908-9  | ... | ... | 24,037  | 1911-12 | ... | ... | 26,320  |
| 1909-10 | ... | ... | 23,677  | 1912-13 | ... | ... | 23,334  |
| 1910-11 | ... | ... | 25,850  |         |     |     |         |

Other items of Federal legal expenditure also not included in the table are Arbitration Court £4690, Crown Solicitor £6046, and general £9679.

For the purposes of comparison the figures in the first table above have been reduced to a population basis, and the results are given in the table following:—

## EXPENDITURE ON JUSTICE PER INHABITANT, COMMONWEALTH, 1908 to 1912.

| State              |     |     |          | 1908. | 1909. | 1910. | 1911. | 1912. |

| Commonwealth       | ... | ... | { Police | 5 10  | 5 11  | 6 2   | 6 3   | 6 7   |
|                    |     |     | { Gaols  | 1 0   | 0 11  | 0 11  | 1 0   | 0 11  |
|                    |     |     | { Other  | 2 9   | 2 10  | 2 10  | 2 11  | 3 3   |

Owing to the smallness of the white population, large area to be policed, and cost of supplies, transport, etc., the figures for the Northern Territory must necessarily appear somewhat abnormal.

The total expenditure in the Commonwealth in connection with the administration of justice has risen from ten shillings per inhabitant in 1901 to ten shillings and ninepence in 1912. Police expenditure has increased by about tenpence per head, the average for gaols is about threepence per head less, while the expenditure on courts and the remaining machinery of justice has increased by twopence per head, during the same period.

## SECTION XXIV.

## PUBLIC BENEVOLENCE.

## § 1. Introductory.

1. *General*.—Charity and charitable effort in Australia may be classified under three headings, viz.:—(a) State; (b) public; (c) private. To the first belong all institutions wholly provided for by the State, such as the principal lunatic asylums in the various States, the Government hospitals in Western Australia, and the Government asylums for infirm in New South Wales. The second class comprises public institutions of two kinds, viz.:—(i.) Institutions partially subsidised by the State or State endowed, but receiving also private aid, and (ii.) those wholly dependent upon private aid. To the former division belong such institutions as the Melbourne and other large metropolitan hospitals. In the latter are included institutions established and endowed by individuals for the benefit of the needy generally. All charitable movements of a private or special character are included in the third group.

A more or less accurate statistical account is possible in classes (a) and (b), but in regard to (c) complete tabulation is, for obvious reasons, impossible. Moreover, public response to special appeals, and summary relief in kind, cannot be statistically recorded. Hospitals, orphanages, homes, benevolent asylums, etc., naturally attract the largest share of charitable aid. There are, nevertheless, numerous other and minor charities which mark the course and measure the amount of a considerable volume of private beneficence. In institutions which receive Government aid, management and finance are usually relegated to executive bodies.

The distribution of wealth in the Australian Commonwealth, and the generally favourable conditions, as regards scope for the exercise of natural ability, operate to prevent the development of a permanent pauper class, and at the same time lessen in a dual way the burden of charity. This result is brought about by the increase, on the one hand, of the number of people whose prosperity enables them to relieve the indigent and unfortunate, and by the reduction, on the other, of the number who need assistance. Enactments of State Legislatures have decreed short hours and a liberal holiday allowance for large numbers of persons engaged in industrial and other pursuits, and, even in occupations not covered by Act of Parliament, the general conditions of employment often provide a considerable amount of leisure. This, coupled with an equable climate, enables the community to spend much of its time in the open air, with resultant advantages to its physique and general health. No poor-rate is levied in Australia, and Government aid without return is required only for the aged and disabled. Moreover, although Old Age Pensions are paid by the Commonwealth, the payments are looked upon rather in the light of a citizen's right than as a charity. Reference to the Old Age Pensions will be found in § 3, Miscellaneous, chap. xxxiv.

To meet temporary conditions, or rather, what ought to be temporary conditions, various relief works have been started from time to time, in which the able-bodied who may be forced to seek official relief are required to make some return for the assistance afforded.

In each of the States there are Government asylums for the care of the insane, and the condition of these unfortunates has been steadily ameliorated by the general advance in psychiatry.

Young children deprived of parental training and control are cared for and educated in "orphanages" and "industrial schools," and those who have been guilty of some specific offence, or who are beyond adequate parental control, are committed to "reformatories."

In common with other civilised communities, relief funds have from time to time been organised for famine-stricken territories (*e.g.*, China, India, etc.), or for places where plague, flood, fire, or earthquake has shewn the need of urgent relief. Statistical information in regard to this form of charity is not, however, available. It may be mentioned that the daily Press frequently accepts the duties of collectorship in charity appeals.

**2. Charity Reforms.**—The evident overlapping of charitable effort has on various occasions led to discussion regarding methods of collection and distribution. The great desideratum in charity organisation is that the available aid should be relegated solely to the relief of distress and suffering. The true interests of the sick poor would thus be conserved, and the real intention of the donors fulfilled. With greater public attention, improved administration has been brought about. Societies to prevent overlapping have been formed, resulting in improved economical collection and distribution of charitable aid, and a better system of using the available accommodation.

Other proposed reforms aim at ascertaining the causes of poverty and crime, and finding the necessary palliative. Increased provision of better houses and workrooms and improved sanitation are advocated, together with more stringent legislative measures to enforce cleanliness and healthy modes of life. Further, Factories Legislation, Health Acts, etc., have enacted provisions for safeguarding dangerous machinery, and permitting only competent persons to be employed thereon.

**3. Tabulation of Charities Statistics.**—Differences in the organisation of charities prevent uniform tabulation of statistics for all the States, but certain of the larger features of the statistics of benevolence have been combined for the whole Commonwealth. Combinations for the whole of Australia for the five years ended 1912 are given for hospitals, benevolent asylums, orphanages, and hospitals for the insane. Satisfactory tabulation for other charities is not yet possible. Where the combination has been for dissimilar periods the nearest years have been taken.

## § 2. The Larger Charities of Australia.

**1. Hospitals.**—Most of the State capitals have several large and well-equipped hospitals, and there is at least one in every important town. In large centres there are hospitals for consumptives, women, children, infectious diseases, incurables, etc. The

number of hospitals in Australia, with the admissions, patients treated, deaths, and expenditure, is shewn in the following table. Only general hospitals are tabulated, since the working of "special" institutions is not properly comparable with those which treat cases of all kinds. In 1909, the figures for assisted hospitals in Western Australia were included for the first time, not having been available for previous years.

### HOSPITALS IN THE COMMONWEALTH, 1908 to 1912.

| Particulars.                | 1908.     | 1909.   | 1910.   | 1911.   | 1912.     |
|-----------------------------|-----------|---------|---------|---------|-----------|
| Number of institutions ...  | 312       | 337     | 338     | 355     | 368       |
| Number of beds ...          | 12,057    | 12,630  | 13,342  | 13,732  | 14,574    |
| Admissions during year ...  | 107,292   | 112,102 | 119,091 | 125,822 | 139,378   |
| Indoor patients treated ... | 114,668   | 118,928 | 126,234 | 133,652 | 144,692   |
| Deaths ...                  | 8,560     | 8,814   | 8,946   | 9,642   | 11,235    |
| Expenditure ...             | £ 758,993 | 805,787 | 802,212 | 888,802 | 1,102,134 |

In addition to those admitted to the institutions there are large numbers of out-patients. The exact number of these cannot be given, but a rough estimate of distinct cases for 1912 places the total at about 300,000.

Fuller details of hospital statistics are given for 1912 in the table below, the States of the Commonwealth being shewn separately :—

### GENERAL HOSPITALS.—NUMBER, STAFFS, AND ACCOMMODATION OF HOSPITALS IN THE COMMONWEALTH, 1912.

\* Exclusive of assisted hospitals. † Information not available. ‡ Excluding Government grants, etc., Northern Territory. § Including rent.

2. **Hospitals for General and Special Cases.**—The tables here given refer to general hospitals. In addition there are hospitals for “specials” (such as women’s, children’s, and infectious diseases hospitals), and institutions nearly allied to hospitals (such as consumptive sanatoria). In the first and second numbers of the Commonwealth Year Book, these were tabulated with general hospitals. Where the institutions carry on general hospital relief, they are still included with those establishments.

(i.) *New South Wales.* A Government hospital is established at Little Bay. There are four women’s and one children’s hospitals in the metropolis. Other leading institutions are the Thomas Walker Convalescent Hospital, Dental Hospital, Home for Incurables, Hospital for Infants and Asylum for Women and Children, Infants’ Home, etc. A feature of late years has been the establishment of general hospitals in many country towns of growing importance.

(ii.) *Victoria.* Special hospitals, not included in the above tabulation, comprise the Women’s Hospital, with infirmary and midwifery departments, the Children’s Hospital, the Hospital for Women and Children, a Government Consumptive Sanatorium, Inebriates’ Institute, Convalescent homes, etc.

(iii.) *Queensland.* There are six lying-in and two children’s hospitals in Queensland, and a sanatorium.

(iv.) *South Australia.* In connection with the leading general hospital in the metropolis, there is a consumptive home and infectious diseases block; there are also a children’s hospital, two lying-in homes, sanatorium, convalescent home, home for incurables, etc.

(v.) *Western Australia.* The leading general hospitals are Government establishments. There is a lying-in establishment in connection with the metropolitan women’s home. There are also homes for the dying and incurable, homes and rests for sailors, strangers, etc.

(vi.) *Tasmania.* In Tasmania there are several institutions, which pay particular regard to “special cases”; these include two hospitals for contagious diseases; two

hospitals for women ; a consumptive sanatorium ; and a convalescent home. Other important institutions of a general nature are the New Town Charitable Establishment, and the Home for Invalids.

**3. Benevolent and Destitute Asylums.**—A marked increase has taken place in the amount of aid bestowed upon the aged. Two elements, each of them independent of the growth of population, have influenced this increase. One is, that the general age of the community has advanced—the large flow of immigration of fifty and sixty years ago having been mostly of persons in the prime of life ; the other is the increased regard paid in all British communities to the well-being of the helpless. The result in Australia has been that numerous establishments have been founded for the housing and protection of such as are no longer able to care for themselves. The institutions are supported by Government and municipal aid, public subscriptions, charity performances, bequests, etc., and in many cases relatives of indigent and afflicted persons contribute to their maintenance.

The impossibility of an entirely satisfactory statistical tabulation in regard to all forms of charitable aid, is especially marked in the case of benevolent institutions, since the conditions under which they have been established in the different centres in the Commonwealth have caused divergence in their development and in the classes of cases treated by them. For example, in Western Australia the Home for Destitute Women includes a maternity ward, for which the statistics are not separately kept. Since the predominating function of the Institution is aid to the destitute, it has been included among benevolent asylums. In Victoria, nine of the hospitals are also Benevolent asylums, and they are included wholly under the former. In South Australia, the Destitute Asylum includes lying-in and children's departments.

(i.) *Government Asylums for the Infirm, New South Wales.* There are six of these institutions in New South Wales, with something over 4000 beds, usually in continuous use. Inmates at the end of 1912 numbered 2879 ; deaths numbered 418 ; and the expenditure amounted to £35,369 for the six months ended 30th December, 1912.

(ii.) *Benevolent Asylums, Victoria.* Besides the asylums attached to hospitals, there are eight institutions in Victoria. The daily average number indoors was 2045 for 1911-12, with 678 distinct cases of outdoor relief. Deaths numbered 514. The total expenditure was £45,320 (of which £8454 was spent on buildings), and receipts £41,104—£18,418 from Government and £22,686 from other sources.

(iii.) *Benevolent Asylums, Queensland.* There are four institutions in Queensland, with 1079 beds. The total number in the asylums during 1912 was 1683, with a daily average of 1042. Deaths numbered 166. Expenditure amounted to £28,979, and receipts to £28,907, of which £27,490 was Government aid.

(iv.) *Destitute Asylum, Adelaide.* Outside of hospitals and lunatic asylums the destitute of South Australia are dealt with and relieved at the Destitute Asylum, Adelaide. The institution includes lying-in and children's departments. In the asylum the average number of inmates in 1911-12 was 297. There were eighty-six deaths during the year. Expenditure totalled £7287. In addition, £7756 was dispensed through the institution for outdoor relief of the destitute in both metropolitan and rural districts.

(v.) *Homes for the Destitute, Western Australia.* There are four of these homes in Western Australia supported by public funds. Attached to the Perth Women's Home is a lying-in department. Outdoor relief to the poor and aged is given, the amount expended being included in expenditure in the above table. Nearly thirteen hundred indoor cases were dealt with during 1912. There were 107 deaths.

(vi.) *Charitable Establishments, Tasmania.* There are two principal Government charitable establishments in Tasmania. Beds numbered 283 in 1911-12. The total number of persons treated was 492, of whom 64 died. The daily average number resident was 217. Total expenditure was £4735, receipts amounting to the same sum, of which £4001 was contributed by the State.

4. **Orphanages, Industrial Schools, etc.**—The organisation of charitable effort varies greatly in regard to orphans and waifs. In many institutions shelter and some form of industrial training is offered to destitute children of all classes, whether orphans or not, while some of those styled orphanages do not confine their relief to orphans strictly so called. The figures in the next table are those for institutions where, it is believed, the principal effort is on behalf of those who are really orphans:—

#### ORPHANAGES IN COMMONWEALTH, 1908 to 1912.

| Particulars.                            | 1908.    | 1909.  | 1910.  | 1911.  | 1912.  |

| Admissions ... ..                       | 1,393    | 1,613  | 1,626  | 1,760  | 1,563  |
| Total number of inmates during year ... | 4,078    | 5,150  | 5,331  | 5,465  | 5,057  |
| Deaths ... ..                           | 19       | 14     | 22     | 12     | 18     |
| Expenditure* ... ..                     | £ 65,154 | 61,088 | 72,882 | 74,415 | 63,362 |

\* Incomplete. Expenditure is not available for some orphanages.

(i.) *New South Wales.* The care of destitute and neglected children is entrusted to the State Children's Relief Board, whose officers are charged with a strict supervision regarding the welfare of the children and the treatment of them by those to whom they are boarded out. Useful trades and profitable occupations are taught, and many of the children become useful members of society. The number of children under the board's supervision in 1912-13 was 4734. The board's expenditure in that year was £110,770, or £23 8s. per child.

There are also twelve orphanages, with about 700 persons under care. Deaths are but one or two annually, and the yearly expenditure fluctuates between £7000 and £10,000.

New South Wales had in 1910 three reformatory institutions—the Carpenterian State Reformatory, and the "Sobraon" State Training Ship for boys; and the Girls' State Industrial School.

The training ship attained very satisfactory results. In forty years more than 5000 boys were dealt with, and the records shew that 98 per cent. of these have developed into good citizens. In 1911 the "Sobraon" was purchased by the Commonwealth, to be used in connection with naval training. The boys were placed in the Mittagong Farm Homes and the Brush Farm Home and Reformatory. To the Reformatory are sent boys who have been convicted in the courts, whom it is desired to keep apart from other prisoners, and who are taught useful trades.

For 1912 the figures are:—Brush Farm Home for boys (Carpenterian Reformatory)—enrolment, 158; Girls' Industrial School—enrolment, 145.

(ii.) *Victoria.* There are ten orphanages in Victoria, with 1581 beds. The total number under care in 1911-12 was about 2000. Average annual admissions are about 500. Deaths numbered seven in 1911-12. The average annual expenditure is about £23,000. In 1912 it was £27,463.

At the end of 1912 there were three industrial and nine reformatory schools in the State. Of these, one industrial and one reformatory school are wholly controlled by the Government, being used merely as receiving and distributing depôts. The children are sent thence to situations, foster homes or other institutions dealing with State wards. The other schools are under private management, receiving an allowance for State wards. Many of the reformatory children are placed with friends or licensed out. On 31st December, 1912, the wards of the State numbered 7784—classed mostly as neglected children. There were also some children free from legal control, who, being incapacitated, were maintained by the State. The total expenditure for 1912 was £107,619, of which £103,092 was borne by the Government.

Under Government control, but not administered as charity, are the training ships "John Murray" and "Dart," on which general instruction is imparted and special training given in technical seamanship.

(iii.) *Queensland.* There are seven orphanages in Queensland, with over 1000 beds. The number under care is about 1000, deaths averaging seven per annum. The expenditure in 1912 was £13,990.

There are also six industrial and reformatory schools. The total number of children under State control at the end of 1912 was 4498. The gross cost was £53,907, of which £50,233 was borne by the Government.

(iv.) *South Australia.* The State Children's Department exercises a supervision over the probationary and industrial schools, the reformatories, and the Methodist Home. The total number of admissions into these institutions in 1911-12 was 205. The number of inmates on the 30th June, 1912, was 178, in addition to which 1352 were placed out, or had been adopted or apprenticed. There were eleven deaths of children in industrial schools, and eight of those placed out and in other institutions. The number of children under State control on 30th June, 1912, was 1530. The expenditure for 1911-12 was £27,312 in gross, of which the Government aid was £24,840.

There are three orphan asylums. The number under care during 1912 was 300. There were no deaths in the year, and expenditure amounted to £3553.

(v.) *Western Australia.* In Western Australia there were, in 1912, eight orphanages (including industrial orphanage schools). The inmates in these institutions during the year were 818, and the number in institutions on 31st December was 755. There were no deaths during the year. The State expenditure was about £10,000.

In the Government Industrial School there were, at the end of 1912, 52 inmates, 87 having been admitted during the year. No deaths occurred. At the end of 1912 825 children were under State control. The net cost to the State was £14,107, parents' contributions amounting to £663.

(vi.) *Tasmania.* There were three admissions to the orphanage in 1912-13, and forty-two inmates during the year. No deaths occurred. Expenditure amounted to £575.

There are three industrial schools under benevolent institutions in the State. Admissions in 1912-13 numbered nineteen, and total inmates during the year 118. No deaths occurred. The expenditure was £2810.

Under the boarding-out system upwards of 200 children are placed out at an expenditure of between £2000 and £2600. The total number of children under State control at the end of 1912 was 196, the gross cost to the State of children's relief being £2586, of which £231 represents parents' contributions.

(vii.) *Neglected Children.* The following table summarises the number of neglected children under State Departments. In New South Wales a number of children are boarded out with their own mothers, and the inclusion of these would make the total number of State-aided children in that State 10,120. Similar provisions are in force in some of the other States, the figures, however, not being available.

5. **Lepers.**—Lazarets for the treatment of lepers have been established in New South Wales (Little Bay); Queensland (Peel Island, near Brisbane, and Dayman Island, Torres Straits); and the Northern Territory (Mud Island). Quarantine and isolation stations have also been used for the segregation of patients. A great deal of information concerning the beginning and progress of leprosy in Australia has been collected and published by Dr. J. Ashburton Thompson, Chief Government Medical Officer and President of the Board of Health, New South Wales, from whose reports the following table has been compiled:—

**CASES OF LEPROSY RECORDED IN THE COMMONWEALTH, 1855 to 1911.**

| State.                   | 1855 to 1906. | 1907. | 1908. | 1909. | 1910. | 1911. | Total. |

\* In addition, some Chinese.

† In addition, many Kanakas.

6. **Hospitals for the Insane.**—The method of compiling insanity statistics has been fairly uniform throughout the States, but the various methods of observing the early stages of the development of insanity introduce an element of uncertainty which considerably reduces the value of comparison. In the summary given below, licensed houses (except as regards expenditure) are included in the total for New South Wales and Victoria, but in the latter State the figures are exclusive of reception houses and observation wards in gaols:—

#### HOSPITALS FOR INSANE,\* COMMONWEALTH, 1908 to 1912.

| Particulars.                               | 1908.    | 1909.   | 1910.   | 1911.   | 1912.   |

| Expenditure ... ..                         | £511,468 | 514,531 | 561,677 | 616,302 | 693,772 |

\* Exclusive of receiving wards at two general hospitals and including six licensed houses for insane in Victoria.

The proportion of insane, as well as the total number returned as under treatment, has changed very little during recent years. In the next table the number of insane under official care in Australia is given, and in the table following the proportion of insane to population.

The number of insane persons in institutions in Australia at the end of each of the last five years was as follows:—

#### INSANE PERSONS IN THE COMMONWEALTH, 1908 to 1912.

| State.                   | 1908.  | 1909.  | 1910.  | 1911.  | 1912.  |
|--------------------------|--------|--------|--------|--------|--------|
| New South Wales ... ..   | 5,673  | 5,902  | 6,148  | 6,351  | 6,160  |
| Victoria ... ..          | 5,014  | 5,097  | 5,241  | 5,340  | 5,470  |
| Queensland ... ..        | 2,184  | 2,227  | 2,260  | 2,283  | 2,322  |
| South Australia ... ..   | 1,051  | 1,051  | 1,055  | 1,084  | 1,082  |
| Western Australia ... .. | 707    | 782    | 793    | 842    | 871    |
| Tasmania ... ..          | 507    | 506    | 505    | 521    | 534    |
| Commonwealth ... ..      | 15,136 | 15,565 | 16,002 | 16,421 | 16,439 |

For the period embraced in the tables Victoria shews the highest rate of insanity, roughly one in 250 persons. It is stated that this is chiefly owing to the proportionately greater number of old persons in that State. On the other hand, in Western Australia, where the population is much younger, a considerably lower insanity rate has prevailed, being about one in 400 in 1908, and about one in 350 in the four following years.

## PROPORTION OF INSANE, COMMONWEALTH, 1908 to 1912.

| State.                      | 1908. | 1909. | 1910. | 1911. | 1912. |
|-----------------------------|-------|-------|-------|-------|-------|
| PER 1000 OF THE POPULATION. |       |       |       |       |       |
| New South Wales ...         | 3.58  | 3.66  | 3.74  | 3.79  | 3.46  |
| Victoria ...                | 4.01  | 3.99  | 4.03  | 3.92  | 3.96  |
| Queensland ...              | 3.92  | 3.85  | 3.77  | 3.67  | 3.65  |
| South Australia ...         | 2.70  | 2.65  | 2.57  | 2.57  | 2.50  |
| Western Australia ...       | 2.72  | 2.94  | 2.87  | 2.86  | 2.84  |
| Tasmania ...                | 2.64  | 2.62  | 2.61  | 2.69  | 2.71  |
| Commonwealth ...            | 3.58  | 3.60  | 3.62  | 3.59  | 3.47  |

Consequent upon the development of a more rational attitude to the treatment of mental cases, a greater willingness is being shewn to submit necessary cases to treatment at an earlier stage than formerly. Hence an increase in the number of recorded cases does not necessarily imply an actual increase in insanity. It is important to bear this in mind, because the small progressive increase in the preceding table is probably to be attributed largely, if not solely, to this circumstance. The increase in expenditure is another evidence of the greater care bestowed on the insane.

The leading features in regard to institutions for the care of the insane are given below for 1912:—

HOSPITALS FOR THE INSANE.—NUMBER, STAFFS, AND ACCOMMODATION,  
COMMONWEALTH, 1912.

| Particulars.                | N.S.W.              | Vict.*    | Qld.      | S.A.  | W.A.    | Tas.    | C'wlth. |

| Total ...                                    | 6,134  | 4,938 | 2,284 | 1,067 | 857  | 526  | 15,806 |

\* Exclusive of inmates of the Receiving House, Royal Park, and of Receiving Wards attached to the hospitals at Bendigo and Geelong, and of five private licensed houses.

In some of the States it is the practice to allow persons well advanced towards recovery to leave the institutions and reside with their relatives or friends, but they are nevertheless under supervision of the asylum authorities and are kept on the books. These patients are not shewn in the above table as inmates. In nearly every case absconders are retaken. They are shewn above as readmitted.

The revenue of Government asylums is small in comparison with their cost, and consists chiefly of patients' fees. The proportion of expenditure borne by the State amounts to about 86 per cent.

### HOSPITALS FOR THE INSANE (GOVERNMENT ONLY), REVENUE AND EXPENDITURE, 1912.

\* Buildings and repairs.

(i.) *New South Wales.* The latest return available shews that the average length of residence in the hospitals of persons who died, was 4 years 8 months for males and 5 years 9 months for females; and that of persons who were discharged, was 1 year 2 months for males and 1 year 7 months for females.

There are also two State reception houses, where suspected persons are confined for observation, being subsequently either discharged or transferred to lunatic asylums. In two of the gaols observation wards have been instituted, with similar functions.

(ii.) *Victoria.* The average residence in the hospitals of those who died was 6 years 5 months for males, and 9 years 10 months for females; that of those discharged, 1 year 3 months for males, and 1 year 4 months for females.

There are lunacy wards in two of the general hospitals; and also a State receiving house where persons are placed for observation, and subsequently discharged or transferred to asylums.

(iii.) *Queensland.* The average residence in the institutions of those who died was 7 years 10 months for males and 9 years 3 months for females; and of those who were discharged, 1 year and 3 months for males and 1 year and 4 months for females.

There are also three reception houses for insane, which act as depôts to which patients are sent with a view to determining whether their mental illness is of a merely temporary character, readily to be relieved, or is of such a nature as to need further treatment at the State asylums.

(iv.) *South Australia.* The average residence of those who died was 6 years and 5 months for males and 9 years for females; of those discharged, 11 months for males and 8 months for females.

(v.) *Western Australia.* The period of residence of those who died during the year averaged 2 years 5 months for males and 4 years 3 months for females; of those who were discharged, 1 year 2 months for males and 1 year 1 month for females.

(vi.) *Tasmania.* The period of residence of those who died was 10 years 4 months for males and 8 years 4 months for females; that of those discharged, 10 months for males and 1 year 2 months for females.

(vii.) *Causes of Insanity.* The proportion of causes of insanity to the total of ascertained causes in Australia in the five years 1908-1912 shews that hereditary influences have been the chief factor, more than one-fifth of the total ascertained causes coming under this head. Domestic troubles, adverse circumstances, etc., have also been a fruitful source. About one case in six was due to intemperance in drink.

**PROPORTION OF ASCERTAINED CAUSES, etc., OF INSANITY, COMMONWEALTH,  
1908 to 1912.**

| Causes, Previous History, etc.           | 1908.     | 1909.     | 1910      | 1911.     | 1912.     |

7. **Treatment of Inebriates.**—The treatment of inebriates is referred to in the section dealing with Public Justice hereinbefore. (See page 803.)

8. **Protection of Aborigines.**—For the protection of the aboriginal Australian race there are institutions, under the supervision of Aborigines Boards, where the blacks are housed and encouraged to work, the children receiving elementary education. The work is usually carried on at mission stations, but many of the natives are nomadic in habit of life, and receive food and clothing when they call, whilst others but rarely come under the notice of the boards. The native race is extinct in Tasmania. The average annual expenditure on maintenance, etc., for the last five years was—New South Wales, £19,000; Victoria, £4200; Queensland, £14,800; South Australia, including Northern Territory, £13,500; Western Australia, £23,500; Commonwealth, £75,000.

9. **Other Charitable Institutions.**—Owing to variety of name and function of other charitable institutions it has been found impracticable to give detailed results. The aid given in kind—food, clothing, tools of trade, etc.—is considerable, whilst the shelter and treatment afforded ranges from a bed for a night for casual callers in establishments ministering minor charity, to indoor treatment over long periods in those that exist for the relief of the aged and infirm. The institutions not so particularised include asylums for the deaf, dumb, and blind, maternity institutions and infant homes, homes for the destitute and aged poor, industrial colonies, night shelters, crèches, homes of hope, rescue homes, free kindergarten and ragged schools, auxiliary medical charities, free dispensaries, benevolent societies and nursing systems, ambulance and health societies, boys' brigades, humane and animals' protection societies, prisoners' aid associations, shipwreck relief societies, bush fires and mining accident relief funds, etc.

10. **State Expenditure on Charities.**—The table below gives the amount expended by Government on charities in each of the last five years. In some of the States amounts have been included for minor items, which in other States are charged to other heads:—

## STATE EXPENDITURE ON CHARITIES, 1908 to 1912.

| State.                | 1908.     | 1909.     | 1910.     | 1911.     | 1912.     |
|-----------------------|-----------|-----------|-----------|-----------|-----------|
|                       | £         | £         | £         | £         | £         |
| New South Wales ...   | 481,887   | 519,327   | 528,289   | 518,484   | 576,886   |
| Victoria ...          | 383,086   | 378,165   | 385,467   | 436,859   | 446,332   |
| Queensland ...        | 216,144   | 200,141   | 205,577   | 237,224   | 262,171   |
| South Australia ...   | 88,752    | 88,618    | 87,112    | 98,236    | 118,931   |
| Western Australia ... | 175,839   | 149,892   | 139,700   | 177,734   | 184,940   |
| Tasmania ...          | 47,537    | 36,316    | 39,558    | 43,245    | 45,166    |
| Commonwealth ...      | 1,393,245 | 1,372,459 | 1,385,703 | 1,511,782 | 1,634,426 |

11. **Total Charitable Expenditure.**—The expenditure in the Commonwealth in money on hospitals, charities, and all forms of relief publicly given, comprising the amounts furnished by Government and those raised by public subscription, etc., but excluding old-age pensions, exceeds £2,700,000 annually.

## SECTION XXV.

## GENERAL GOVERNMENT.

## § 1. Scheme of Parliamentary Government.

1. **General.**—The legislative power of the Commonwealth is vested in the Federal Parliament, which consists of the Sovereign, the Senate, and the House of Representatives. The Sovereign is represented throughout the Commonwealth by the Governor-General, who, subject to the Constitution of the Commonwealth, has such powers and functions as the Sovereign is pleased to assign to him. In each State there is a State Governor, who is the representative of the Sovereign for the State, and who exercises such powers within the State as are conferred upon him by the Letters Patent which constitute his office, and by the instructions, which inform him in detail of the manner in which his duties are to be fulfilled. The Legislature in each State is also bi-cameral, and consists of (a) a Legislative Council and (b) a Legislative Assembly, or House of Assembly, the legislative powers of these chambers being delimited by the Commonwealth and the State Constitutions. The latter chamber, which is the larger, is always elective; the qualification for the franchise varies in character. The former chamber is, in the case of New South Wales and Queensland, nominated by the Governor-in-Council, but in the other States it is elective, the constituencies being differently arranged and some property qualification for the electorate being required. In the Federal Parliament, however, the qualifications for the franchise are identical for both Houses. A brief account of the constitutional history of each of the States was given in previous issues of this book (see especially Year Book No. 4, pp. 27 to 32).

2. **Number of Members of the Legislatures.**—The following table shews the number of members in each of the legislative chambers in the Commonwealth and in each State in March, 1914:—

MEMBERS OF PARLIAMENTS OF AUSTRALIA, 1914.

| Members in— | C'wealth. | N.S.W. | Victoria. | Q'land. | S. Aust.* | W. Aust. | Tas. | Total. |
|-------------|-----------|--------|-----------|---------|-----------|----------|------|--------|
| Upper House | 36        | 56     | 34        | 40      | 18        | 30       | 18   | 232    |
| Lower House | 75        | 90     | 65        | 72      | 40        | 50       | 30   | 422    |
| Total ...   | 111       | 146    | 99        | 112     | 58        | 80       | 48   | 654    |

— \* By "Constitution Further Amendment Act 1913," the number of members in the Upper House was increased to 20, and in the Lower to 46, the increase not to take place, however, until the next general election.

The use of the expressions "Upper House" and "Lower House" in the above statement, though not justified constitutionally, is convenient, inasmuch as the legislative chambers are known by different names in the Commonwealth and in some of the States.

In the Commonwealth Parliament the Upper House is known as the Senate, and in the State Parliaments as the Legislative Council. The Lower House is known as follows:—In the Commonwealth Parliament as the House of Representatives, in the State Parliaments of New South Wales, Victoria, Queensland, and Western Australia as the Legislative Assembly, and in the State Parliaments of South Australia and Tasmania as the House of Assembly.

**3. The Cabinet and Executive Government.**—The sections of the Commonwealth Constitution Act dealing with the Executive Government are given on pages 28 and 29 hereinafore. In both the Commonwealth and the State Legislatures the forms of Government have been founded on their prototype, the Imperial Government, and the relations established between the Ministry and the representatives of the people are in accordance with those prevailing in Great Britain. The executive powers in the Commonwealth and in the State Governments are vested in the Governor-in-Council. The Executive Council in the Commonwealth and in the majority of the States is co-extensive with a group of departmental chiefs who are usually spoken of as the Cabinet, and who change with the rise and fall of party majorities. In Victoria and Tasmania, however, the Cabinet on leaving office remain members of the Executive Council, though they no longer attend its meetings, and it is in fact an essential feature of the Cabinet system of Government that they should not do so, except to assist the Governor in transacting purely formal business, or to advise on non-political questions.

(i.) *The Executive Council.* This body is composed of the Governor and the Ministers of State holding office for the time being. The latter are sworn both as Executive Councillors and as Ministers controlling the different administrative departments. It should be observed that all persons living who have held Ministerial office under former Governments are also technically members of the Executive Council, and are thus liable to be specially summoned for attendance at meetings of that body. The meetings are official in character; they are presided over by the Governor-General (or Governor) and are attended by the clerk, who keeps a formal record of its proceedings. At these meetings the decisions of the Cabinet are put into official form and made effective, appointments are confirmed, resignations accepted, proceedings ordered, and notices and regulations published.

The official members of the Executive Council in March, 1914, are specified below. In addition, all living members of past Ministries (see following pages) are technically liable to be officially summoned to attend meetings of the Executive Council :—

#### OFFICIAL MEMBERS OF THE COMMONWEALTH EXECUTIVE COUNCIL, 1914.

##### *Prime Minister and Minister for*

*Home Affairs* ... ... The Hon. JOSEPH COOK.

*Treasurer* ... ... The Right Hon. SIR JOHN FORREST, P.C.,  
G.C.M.G.

*Attorney-General* ... ... The Hon. WILLIAM HILL IRVINE, K.C.

*Minister for Defence* ... ... The Hon. EDWARD DAVIS MILLEN.

*Minister for External Affairs* ... The Hon. PATRICK MCMAHON GLYNN, K.C.

*Minister for Customs* ... ... The Hon. LITTLETON ERNEST GROOM.

*Postmaster General* ... ... The Hon. AGAR WYNNE.

*Vice-President of Executive Council* The Hon. JAMES HIERS MCCOLL.

*Honorary Minister* ... ... The Hon. JOHN SINGLETON CLEMONS.

" " " " The Hon. WILLIAM HENRY KELLY.

Particulars of previous Commonwealth Ministries are given on pages 40-42 hereinafore, and on pages 832 and 833 following.

(ii.) *The Cabinet.* The meetings of this body are private and deliberative. No one is admitted but the actual Ministry of the day, no records of the meetings transpire, and no official notice is taken of the proceedings. The members of the Cabinet, being the leaders of the party in power in Parliament, control the bent of legislation and must retain the confidence of the people and also of the Governor-General (or Governor), to whom they act as an advising body. They also in effect wield, by virtue of their seats on the Executive Council, the whole executive force of the community. In summoning, proroguing, or dissolving Parliament the Governor-General (or Governor) is usually guided by the advice tendered him by the Cabinet, though legally he is in no way bound to do so. The following statement gives the names of the Ministers of State for the Commonwealth, who have held office since the inauguration of the Commonwealth Government :—

# **MINISTERS OF STATE FOR THE COMMONWEALTH OF AUSTRALIA FROM 1st JANUARY, 1901, to MARCH, 1914.**

| EXTERNAL AFFAIRS.                         |          |          | TRADE AND CUSTOMS.                       |          |          |

4. **The Appointment of Ministers and of Executive Councillors.**<sup>1</sup>—Although it is technically possible for the Governor to make and unmake cabinets at his pleasure, under all ordinary circumstances his apparent liberty in choosing his Executive Council is virtually restricted by the operation of constitutional machinery. When a Ministry is defeated in Parliament or at the polls, the procedure both in the Commonwealth and the State Parliaments generally, though not invariably, follows that prevailing in the Imperial Parliament. The customary procedure in connection with the resignation or acceptance of office by a Ministry is described fully in previous issues of the Year Book. (No. 6, page 942.)

5. **Enactments of the Parliament.**—In the Commonwealth, all laws are enacted in the name of the Sovereign, the Senate, and the House of Representatives. The subjects with respect to which the Commonwealth Parliament is empowered to make laws are enumerated in the Constitution Act (see pp. 25-28 hereinbefore). In the States, laws are enacted in the name of the Sovereign by and with the consent of the Legislative Council and Legislative Assembly or House of Assembly. The Governor-General or the State

1. See Jenks' "Government of Victoria," pp. 269 *et seq.*

Governor acts as Viceroy as regards giving the Royal Assent to or vetoing Bills passed by the Legislatures, or reserving them for the special consideration of the Sovereign. In the States, the Councils and Assemblies are empowered generally, subject to the Commonwealth Constitution, to make laws in and for their respective States in all cases whatsoever. Subject to certain limitations, they may alter, repeal, or vary their Constitution. Where a law of a State is inconsistent with a law of the Commonwealth the latter prevails, and the former is, to the extent of the inconsistency, invalid.

**6. Powers and Functions of the Governor-General and of the Governors.**—The Governor-General and the State Governors act under the authority of the commissions by which they are appointed and of Letters Patent under the Great Seal of the United Kingdom, and according to instructions issued by the Colonial Office and passed under the Royal Sign Manual and Signet.

The office of Governor-General and Commander-in-Chief of the Commonwealth was constituted by Letters Patent issued on the 29th October, 1900, in pursuance of the provisions of the Commonwealth Constitution Act (see p. 20 hereinbefore). The powers and duties of the Governor-General were further defined by Royal instructions passed on the same date. The principal and most important of his functions, legislative as well as executive, are expressly conferred upon him by the terms of the Constitution itself. He is the custodian of the Great Seal of the Commonwealth, and has the appointment of political officers to administer Departments of State of the Commonwealth.

His legislative functions are exercised with respect to proposed laws as finally passed by the Federal Houses of Parliament. Such Bills are presented to the Governor-General for his assent in the King's name, on receiving of which they become law throughout the Commonwealth. The Governor-General may, however, withhold his assent, or may reserve any Bill for the King's pleasure. He may return to the House in which it originated any proposed law with suggested amendments. The King may disallow any law within one year from the date on which it was assented to by the Governor-General.

The Governor-General's executive functions are, under ordinary circumstances, exercised on the advice of his responsible Ministers. Various specific powers are vested in him by the Constitution; he may summon or prorogue Parliament and may dissolve the House of Representatives. He is the Commander-in-Chief of the military and naval forces of the Commonwealth, and is invested by the Crown with the prerogative of mercy in cases of offences committed against the laws of the Commonwealth.

The Governor-General is also invested with authority in certain matters of Imperial interest, such as the control of the naval and military forces of the Commonwealth; the observance of the relations of foreign States to Great Britain, so far as they may be affected by the indirect relations of such States to the Commonwealth; and the treatment of neutral and belligerent ships in Commonwealth waters in time of war.

The Governor-General may not leave the Commonwealth without having first obtained leave from the Imperial Government, to whom alone he is responsible for his official acts. The powers and functions of the State Governors are, within their respective States, very similar to those exercised by the Governor-General for the Commonwealth, and are defined by the terms of their Commissions and by the Royal instructions accompanying the same. A State Governor is the official head of the State Legislature, and assents in the name of the Crown to all Bills passed by the Parliament, except those reserved for the Royal Assent. The latter include certain classes of Bills, which are regulated by the Constitution Acts and by the instructions issued by the Imperial Government. The Governors are, under ordinary circumstances, guided by their Executive Councils, the chief matters in which the exercise of discretion is required being the granting or withholding of a dissolution of Parliament when requested by a Premier; the appointment of a new Ministry; or the assenting to, vetoing, or receiving of Bills passed by the legislative chambers. The Governors are authorised, under certain restrictions, to administer the prerogative of mercy by the reprieve or pardon of criminal offenders within their jurisdiction, and to remit fines and penalties due to the Crown. All moneys to be expended for the public service are issued from the Treasury under the Governor's warrant.

In a recent work in which the above matters are exhaustively discussed,\* it is indicated that there are important functions in the hands of a Governor, and that his influence may extend beyond what is anticipated by those who are unfamiliar with the activities of actual government. This is, however, essentially a matter of individual character. A Governor is entitled to the fullest confidence of his Ministers, to be informed at once of any important decisions taken by his Cabinet, and to discuss them with the utmost freedom. He can point out objections, give advice, deprecate measures, and urge alterations, subject, however, to his remaining always behind the scenes. It should be remembered, moreover, that the State Executive Councils owe their existence to the Royal Letters Patent constituting the office of Governor and that, in law, the Governor is never bound to accept the advice of his Ministers. He cannot indeed do many things without their advice, for it is provided by law (either in the Constitution or Interpretation Acts, or by authoritative usage) that a Governor-in-Council must act on the advice of the Council. He cannot therefore perform any act in Council without a majority, though he can always refuse to act, and thus force his Ministers either to give way on the point at issue or to resign their posts. Even in the case of a ministerial act he can forbid a Minister to take any action on pain of dismissal. Nominally a Governor will, of course, be justified in accepting the advice of his Ministers as being a correct statement of the facts and law, but he is not bound to be so satisfied, and in matters of law he must exercise his own judgment if he be in doubt. A Governor is not, however, entitled to refuse to act on the advice of his Ministers because he personally does not approve of their action or policy; his duty is not to his own conscience, but to the people of the State which he governs, and he should execute that duty independently of every other consideration.

Although the above furnishes a brief *resumé* of the powers of a Governor from a legal point of view, in practice the exercise of his powers is generally limited by his ability to persuade his Ministers as to the desirability of any particular course of action. Disagreement with Ministers is only justifiable in extreme cases, and even then it involves the responsibility of finding other Ministers, who must either shew that they have as much support as any other party, or be prepared to administer during a dissolution pending an appeal to the people. It may be remarked that a Governor who cannot work with Ministers possessing the support of the people must be recalled, unless he has acted on Imperial grounds, and the dispute is not one between him and Ministers, but between the Imperial and State Governments.

It may also be pointed out that a Governor, besides acting according to law, has, within the range of what is lawful, to act according to the instructions of the Secretary of State. He is called upon to do so by the instruments which create his office and appoint him Governor, and he obeys the Secretary of State as the mouthpiece of the Crown. Historically, there have been many cases in which these instructions have placed Governors in opposition to their Ministers.

The present Governor-General is the Right Honourable Thomas, Baron Denman, P.C., G.C.M.G., K.C.V.O. He assumed office on the 31st July, 1911, and will retire on the 16th May, 1914. The Governor-General designate is the Right Honourable Sir Ronald Craufurd Munro-Ferguson, P.C., G.C.M.G.† Particulars of previous Governors-General are given on p. 40 hereinbefore.

The following is a list of the Governors of the various States of the Commonwealth:—

|                              |   |
|------------------------------|---|
| <i>New South Wales</i> ...   | SIR GERALD STRICKLAND, Count Della Catena, G.C.M.G.             |
| <i>Victoria</i> ...          | The Hon. SIR ARTHUR LYULPH STANLEY, K.C.M.G.                    |
| <i>Queensland</i> ...        | SIR WILLIAM MACGREGOR, M.D., LL.D., G.C.M.G., C.B.              |
| <i>South Australia</i> ...   | Lieutenant-Colonel SIR HENRY LIONEL GALWAY, K.C.M.G., D.S.O.    |

(a) Cost expressed in pounds sterling and decimals of a pound, per 1000 of population. (b) Including Lower House. (c) Included in Upper House. (d) Included in No. 5. (e) Not available.

## § 2. Parliaments and Elections.

1. **Qualifications for Membership and for Franchise.**—The summary on pages 846-847 gives particulars as to the legislative chambers in the Commonwealth and State Parliaments, and shews concisely the qualifications necessary for membership and for the franchise in each House. Persons who are otherwise eligible, either as members or voters, are generally disqualified on the usual grounds of being of unsound mind or attainted of treason, being convicted of certain offences, and, as regards membership, on the grounds of holding a place of profit under the Crown, being pecuniarily interested in Government contracts, or being an undischarged bankrupt.

2. **The Federal Parliament.**—The Senate consists of thirty-six members, six being returned by each of the original federating States. Members of this chamber are elected for a term of six years, but by a provision in the Constitution a certain number retire at

the end of every third year, although they are eligible for re-election. In accordance with the Constitution the total number of members of the House of Representatives must be as nearly as possible double that of the Senate. In the House of Representatives the States are represented on a population basis, and the numbers stand at present as follows:—New South Wales, 27; Victoria, 21; Queensland, 10; South Australia, 7; Western Australia, 5; Tasmania, 5—total, 75. The Constitution provides for a minimum of five members in each original State. Members of the House of Representatives are elected for the duration of the Parliament, which is limited to three years. In elections for Senators each State is counted as a single electorate, but an elaborate scheme of subdivision had to be undertaken in order to provide workable electorates in each State for members of the House of Representatives. Members of both Houses are paid at the rate of £600 per annum. Further information regarding the Senate and the House of Representatives is given on pages 20 to 25 hereinbefore.

*Particulars of Elections.* There have been four complete Parliaments since the inauguration of Federation. The first Parliament was opened by His Royal Highness the Duke of Cornwall and York on 9th May, 1901, and was dissolved on 23rd November, 1903. The fifth Parliament began its second session on 15th April, 1914. Further information as to the Commonwealth Parliaments since their inception is given on page 832 hereinbefore. Since the establishment of the Commonwealth there have been five elections for the Senate and for the House of Representatives. The fifth Federal elections took place on 31st May, 1913, when, in addition to the ordinary voting, six proposed laws for the Alteration of the Constitution were submitted to the electors. These are referred to in detail on page 25 hereinbefore. Particulars regarding the number of electors enrolled and the number of electors to whom ballot-papers were issued at the last three elections may be found in the tables given hereunder:—

FEDERAL ELECTIONS OF 16th DECEMBER, 1903, 12th DECEMBER, 1906,  
13th APRIL, 1910, AND 31st MAY, 1913.

|                                | 1913                | 1,401,042 | 1,260,335 | 2,661,377                                   | 1,078,997 | 876,726 | 1,955,723                                  | 77.01 | 69.56  | 73.49 |

\* For the House of Representatives the number of electors enrolled in contested divisions only is given.

In the Senate the figures for the year 1906 shew that ballot-papers were issued to 50.21 per cent. of the electors, and are a slight improvement on those for the year 1903, when only about 47 per cent. of the electors visited the polls. There was, however, a substantial increase in the number of electors who voted at the 1910 elections, 62.16 per cent. of the persons on the rolls exercising the franchise. The elections of 1913 also shewed a gratifying increase over those of 1910, no less than 73.49 per cent. of the persons on the rolls exercising their right to vote. It will be seen from the foregoing table that the electors of the Commonwealth are beginning to set a higher value on the privilege of the franchise. The percentage of female voters in 1913, while still considerably below that of the males, shews a marked increase (over 13 per cent.) on that of female voters in 1910.

3. **Commonwealth Referenda, 26th April, 1911.**—Two proposed laws for the alteration of the Constitution were submitted to the people for acceptance or rejection on the 26th April, 1911. They were (A) The Constitution Alteration (Legislative Powers) 1910, and (B) the Constitution Alteration (Monopolies) 1910. If, in a majority of the States, a majority of the electors voting approve the proposed laws, and if a majority of all the electors voting also approve them, they are presented to the Governor-General for the King's assent. Particulars of the alterations proposed have already been given (see page 25).

Results of the Referenda of 1911 are given in the following table, which shews the number of electors enrolled, electors to whom ballot papers were issued, and the number of votes in favour of, and against, each of the proposed laws, and, as will be seen, neither of the proposed laws was approved by the people.

4. **Commonwealth Referenda, 31st May, 1913.**—At the general elections that took place on 31st May, 1913, the question of altering the Constitution so as to extend the powers of the Commonwealth was again submitted to the people. The particulars of the proposed laws have been given on page 25 hereinbefore. The results of the Referenda of 1913 are given below, and, as will be seen, none of the proposed laws was approved by the electors.

**COMMONWEALTH REFERENDA (LEGISLATIVE POWERS) TAKEN ON 31st MAY, 1913.**

5. **The Parliament of New South Wales.**—The Legislative Council is in this State a nominee chamber, the Legislative Assembly being an elective body. Theoretically the Legislative Council may contain an unlimited number of members, but in practice the number is restricted to about sixty, the members at the latest available date being fifty-six. The tenure of the seat is for life; four-fifths of the members must be persons not holding any paid office under the Crown, but this is not held to include officers of His Majesty's sea or land forces on full or half pay, or retired officers on pensions. The Legislative Assembly consists of ninety members, who hold their seats during the existence of the Parliament to which they are elected. The duration of any single Parliament is limited to three years.

*Particulars of Elections.* Since the introduction of responsible government in New South Wales there have been twenty-two complete Parliaments, the first of which opened on the 22nd May, 1856, and was dissolved on the 19th December, 1857, while the twenty-second opened on the 15th November, 1910, and closed on the 6th November, 1913. The average duration of the Parliaments was two years and five months. The first session of the twenty-third Parliament was opened on the 23rd December, 1913. Particulars of voting at the last seven elections are given below:—

#### LEGISLATIVE ASSEMBLY ELECTIONS, NEW SOUTH WALES, 1894 to 1913.

|                                | Females 484,366         |                   |                    | 468,437                 | 298,828         | 63.79                         |                               |

The franchise was extended to women in 1902, and was exercised for the first time at a State election in 1904.

6. **The Parliament of Victoria.**—Both of the Victorian legislative chambers are elective bodies, but there is a considerable difference in the number of members of each House, as well as in the qualifications necessary for members and electors. The number of members in the Upper House in March, 1914, was 34, and in the Lower House, 65. In the Legislative Council the tenure of the seat is for six years, but one member for each province retires every third year, except in the case of a dissolution, when one half of the newly elected members hold their seats for three years only. Members of the Legislative Assembly are elected for the duration of Parliament, which is limited to three years. The franchise was extended to women by the "Adult Suffrage Act, 1908." An elector for the Legislative Assembly may only vote once, plurality of voting having been abolished in 1899; an elector, however, qualified in more than one district, may select that for which he desires to record his vote. The preferential system of voting (see Section Miscellaneous hereinafter) was for the first time adopted in Victoria at the election held in November, 1911.

*Particulars of Elections.* Since the introduction of responsible government in Victoria there have been twenty-two complete Parliaments, the first of which was opened on the 21st November, 1856, and closed on the 9th August, 1859, while the twenty-second opened on the 7th January, 1909, and closed on the 24th October, 1911. The third session of the twenty-third Parliament opened on the 2nd July, 1913, and terminated on the 13th February, 1914.

Statistics regarding the elections that have been held since 1901 will be found below:—

\* Not contested.

As the table shews, the proportion of voters for the Legislative Council is considerably less than that for the Legislative Assembly. The number of persons who voted by post at the elections for the Legislative Assembly in 1911 was 12,362.

**7. The Parliament of Queensland.**—No limit is set by the Constitution Act to the number of members of the Legislative Council of Queensland, the total at the latest available date being forty. Members are appointed by the State Governor, and it is provided that not less than four-fifths of the members must consist of persons not holding any office under the Crown, except officers of His Majesty's sea or land forces on full or half-pay, or retired officers on pensions. The members are nominated for life. By "The Electoral Districts Act of 1910" the Legislative Assembly is composed of seventy-two members, and the State is now divided into that number of electoral districts, and the General Election which took place in 1912 was in conformity with this new Act.

*Particulars of Elections.* Since the establishment of responsible government in Queensland there have been eighteen complete Parliaments, the first of which opened on the 29th May, 1860, and dissolved on the 20th May, 1863, while the eighteenth Parliament opened on 2nd November, 1909, and closed on 9th January, 1912. The nineteenth Parliament opened on the 2nd July, 1912. Statistics regarding the last six elections are given below:—

**ELECTIONS FOR QUEENSLAND LEGISLATIVE ASSEMBLY, 1902 to 1912.**

| Year. | Number of Seats. | Number of Candidates Nominated. | Candidates sent to the Poll. | Electors Enrolled. |          |         | Electors who Voted. |          |         | Percentage of Electors Voting in Contested Electorates. |          |        |

| 1908  | 72               | 137                             | 125                          | 117,385            | 83,507   | 205,892 | 77,632              | 61,115   | 138,747 | 66.13   | 69.05    | 67.39  |
| 1909  | 72               | 145                             | 133                          | 135,841            | 106,913  | 242,754 | 89,609              | 66,809   | 156,418 | 75.34   | 69.36    | 72.67  |
| 1912  | 72               | 144                             | 139                          | 173,601            | 135,789  | 309,590 | 122,844             | 95,795   | 218,639 | 75.92   | 75.02    | 75.52  |

The election of 1907 was the first State election in Queensland at which women voted, the privilege being conferred under Act 5 Edw. VII., No. 1. Some of the returns did not separate the sexes in the figures respecting the number of electors who voted, and the percentage of males and females was therefore calculated on the total returns where the subdivision was made.

**8. Parliament of South Australia.**—In this State there is a Legislative Council composed of eighteen members and a House of Assembly with forty members, both chambers being elective. Under the Constitution Amendment Act 1908, the State of South Australia was divided into four Council Districts, of which one returns six members, and the other three return four members each, to the Legislative Council, but under the Constitution Further Amendment Act of 1913, the State is now divided into five Districts, which will in future return four members each, a total of twenty members instead of eighteen as now. For the purpose of electing members of the House of Assembly the State was divided into twelve electoral districts, but under the Act of 1913 mentioned above, the State has been divided into nineteen Districts, which will return forty-six members instead of forty as hitherto. The former districts returned five members from one district, four members from two, and three each from the balance. Under the new Act, eight districts will in future return three members each, and eleven districts two members each.

*Particulars of Elections.* Since the inauguration of responsible government in South Australia there have been twenty complete Parliaments, the first of which was opened on the 22nd April, 1857, and dissolved on the 1st September, 1859, while the twentieth was opened on the 2nd June, 1910, and terminated on the 16th January, 1912. The first session of the twenty-first Parliament opened on the 19th March, 1912. Particulars of voting at the last five elections are given below:—

#### PARLIAMENTARY ELECTIONS IN SOUTH AUSTRALIA, 1900 to 1912.

| Year. | Electors on Rolls. |          |        | Electors Who Voted. |          |        | Percentage of Electors Voting. |          |
|-------|--------------------|----------|--------|---------------------|----------|--------|--------------------------------|----------|
|       | Males.             | Females. | Total. | Males.              | Females. | Total. | Males.                         | Females. |

##### LEGISLATIVE COUNCIL.

|      |     |        |        |        |        |        |        |       |       |
|------|-----|--------|--------|--------|--------|--------|--------|-------|-------|
| 1900 | ... | 38,688 | 9,854  | 48,542 | 21,403 | 3,907  | 25,310 | 55.32 | 39.65 |
| 1902 | ... | 38,413 | 13,496 | 51,909 | 29,978 | 7,940  | 37,918 | 78.04 | 58.83 |
| 1905 | ... | 39,011 | 13,873 | 52,884 | 28,820 | 8,328  | 37,148 | 73.88 | 60.03 |
| 1910 | ... | 48,145 | 16,157 | 64,302 | 32,540 | 9,356  | 41,896 | 67.59 | 57.91 |
| 1912 | ... | 59,228 | 19,985 | 79,213 | 40,709 | 13,016 | 53,725 | 80.91 | 72.56 |

##### LEGISLATIVE ASSEMBLY.

|      |     |         |         |         |        |        |         |       |       |
|------|-----|---------|---------|---------|--------|--------|---------|-------|-------|
| 1902 | ... | 77,147  | 72,030  | 149,177 | 53,471 | 36,545 | 90,016  | 62.14 | 49.22 |
| 1905 | ... | 95,396  | 92,249  | 187,645 | 64,330 | 50,246 | 114,576 | 67.43 | 54.47 |
| 1906 | ... | 96,724  | 93,438  | 190,162 | 60,109 | 45,997 | 106,106 | 69.31 | 50.73 |
| 1910 | ... | 94,656  | 88,762  | 183,418 | 73,464 | 56,830 | 130,294 | 77.61 | 64.03 |
| 1912 | ... | 117,440 | 106,971 | 224,411 | 87,530 | 73,732 | 161,262 | 74.53 | 68.93 |

The proportions of votes recorded to total persons entitled to vote in each of the five years given above were as follows:—Legislative Council, 52.14, 73.05, 70.24, 77.64, and 78.71 per cent.; and Legislative Assembly, 60.34, 61.06, 55.80, 71.04, and 71.86 per cent.

It is interesting to note that South Australia was the first of the States to grant women's suffrage (under Act No. 16 of 1894), the franchise being exercised for the first time at the Legislative Assembly election on the 25th April, 1896.

**9. Parliament of Western Australia.**—In this State both chambers are elective. For the Legislative Council there are thirty members, each of the ten electorates returning three members, while the Legislative Assembly is composed of fifty members, one member being returned by each of the fifty electoral divisions. At the expiration of two years from the date of election to a seat in the Legislative Council, and every two years thereafter, the senior member for the time being for each province retires. Seniority is determined (a) by date of election, (b) if two or more members are elected on the same day, then the senior is the one who polled the least number of votes, (c) if the election be uncontested, or in case of an equality of votes, then the seniority is determined by the alphabetical precedence of surnames and, if necessary, Christian names. Members of the Legislative Assembly are elected for three years.

*Particulars of Elections.* Since the establishment of responsible government in Western Australia there have been seven complete Parliaments, the first of which was opened on the 30th December, 1890, and was dissolved on the 1st June, 1894, while the seventh Parliament was opened on the 10th November, 1908, and closed on the 3rd February, 1911. The first session of the eighth Parliament commenced on the 1st November, 1911. Particulars relating to the last five Assembly and three Council elections are given in the tables below.

**PARLIAMENTARY ELECTIONS, WESTERN AUSTRALIA, 1901 to 1912.**

| Year. | Electors on the Roll. |          |        | In Contested Districts. |          |        | Votes Recorded. |          |        | Percentage of Electors Voting. |          |        |
|-------|-----------------------|----------|--------|-------------------------|----------|--------|-----------------|----------|--------|--------------------------------|----------|--------|
|       | Males.                | Females. | Total. | Males.                  | Females. | Total. | Males.          | Females. | Total. | Males.                         | Females. | Total. |

**LEGISLATIVE ASSEMBLY.**

|      |         |        |         |        |        |         |        |        |        |    |    |    |

| 1911 | 91,814  | 60,831 | 152,645 | 71,675 | 50,700 | 122,375 | 53,355 | 38,281 | 91,636 | 74 | 75 | 75 |

**LEGISLATIVE COUNCIL.**

|      |        |        |        |        |       |        |        |       |        |    |    |    |
|------|--------|--------|--------|--------|-------|--------|--------|-------|--------|----|----|----|
| 1908 | 29,255 | 6,543  | 35,798 | 19,233 | 4,508 | 23,741 | 10,210 | 2,283 | 12,493 | 53 | 51 | 52 |
| 1910 | 31,983 | 7,553  | 39,536 | 31,290 | 7,495 | 38,785 | 12,020 | 2,461 | 14,481 | 38 | 33 | 35 |
| 1912 | 36,716 | 10,437 | 47,153 | 33,490 | 9,818 | 43,308 | 20,733 | 5,552 | 26,285 | 62 | 57 | 59 |

**10. Parliament of Tasmania.**—In Tasmania there are two legislative chambers—the Legislative Council and the House of Assembly, both bodies being elective. The Council consists of eighteen members, returned from fifteen districts, Hobart returning three, Launceston two, and the remaining thirteen districts sending one member each. For the Parliament which expired in March, 1909, there were thirty-five House of Assembly districts, each district returning one member, but, in accordance with the Constitution Amendment Act of 1906, upon the expiration of the last Assembly, either by dissolution or by effluxion of time, there are now five House of Assembly districts, viz., the Commonwealth electoral districts, each district returning six members. This latter system came into force at the 1909 elections.

## PARLIAMENTS AND ELECTIONS—

| Particulars.   | Commonwealth.   | New South Wales.  | Victoria  |
|--|---|---|---|
| <b>1. Senate and Legislative Councils.</b>                       |   |   |   |
| <i>Number of Members</i> ...                                     | 36  | 56. May not be less than 21   | 34  |
| <i>Qualification for Membership</i> ...                          | Adult British subjects natural-born or naturalised for 5 years, if (a) eligible to vote at the elections for the Senate, and (b) resident for at least 3 years within the Commonwealth  | Male adult natural-born or naturalised British subjects   | Male natural-born or naturalised British subjects of the age of 30 years or upwards, (a) if possessed of a freehold property of the annual value of at least £50 for one year previous to the election, and (b) in the case of naturalised subjects if a resident of the State for 10 years   |
| <i>Period for which elected or nominated</i> ...                 | 6 years   | For life  | 6 years   |
| <i>Allowance to Members</i> ...                                  | £600 each per annum   | None  | None  |
| <i>Qualification for Franchise</i>                               | Adult British subjects of either sex who have lived in Australia for 6 months continuously. Aboriginal natives of Australia, Asia, Africa, or the islands of the Pacific, except New Zealand, cannot vote at federal elections unless they have acquired a right to vote at elections for the Lower House of a State Parliament | (Nominated)   | Adult British subjects of either sex, if either (a) the owner of a freehold of the annual value of £10 or of a leasehold of property rated at £15, or (b) a graduate of a British university, matriculated students of Melbourne University, qualified legal and medical practitioners, ministers of religion, certificated schoolmasters, and naval and military officers. Naturalised subjects must be of 3 years' standing, and must have resided in the State for 12 months |
| <b>2. House of Representatives, Legislative Assemblies, etc.</b> |   |   |   |
| <i>Number of Members</i> ...                                     | 75  | 90  | 65  |
| <i>Qualification for Membership</i> ...                          | The same as for the Senate  | Male adult British subjects if qualified to vote at an election of members of the Legislative Assembly, unless disqualified under the Constitution Acts or the Federal Elections Act 1900   | Male adult natural-born British subjects or aliens naturalised for the period of 5 years, if resident in the State for not less than 2 years  |
| <i>Period for which elected</i> ...                              | Duration of Parliament, which is limited to 3 years   | Duration of Parliament, which is limited to 3 years   | Duration of Parliament, which is limited to 3 years   |
| <i>Allowance to Members</i> ...                                  | £600 each per annum   | £500 each per annum   | £300 each per annum   |
| <i>Qualification for Franchise</i>                               | The same as for the Senate  | Adult naturalised subjects of either sex, who have resided in the Commonwealth for 6 months and in the State continuously for 3 months after naturalisation, and adult natural-born subjects who have resided in the Commonwealth for 6 months and in the State for a continuous period of 3 months | Adult natural-born or naturalised subjects of either sex who have resided in the State for a continuous period of 6 months. A elector may be enrolled in (a) the electorate in which he resides, and (b) in an electorate in which he is a freeholder or holder of an unexpired lease, provided that no elector can be on more than 2 rolls. He may vote in which district he chooses, but not in both.   |

### § 3. Administrative Government.

In each State, as well as in the Commonwealth, the Government is administered by a number of chief departments, on lines similar to those on which administrative government is carried on in the United Kingdom. Reference has already been made to the creation of the Commonwealth Departments (see pages 692 and 693). In the States the number and functions of the administrative departments vary considerably. This matter has also been referred to hereinbefore (see page 712). In many cases more than one department is under the control of a single Minister. The tabular statement given on this page and on the following pages shows the sub-departments, branches, etc., of each Ministerial Department in the Commonwealth and in each State, together with the Acts administered and other more important matters dealt with.

#### COMMONWEALTH ADMINISTRATIVE GOVERNMENT, 1914.
